

ADVANCES IN COORDINATE METROLOGY

Edited by
Jerzy Sładek
and
Władysław Jakubiec

UNIVERSITY OF BIELSKO-BIAŁA
Bielsko-Biała 2010

CONTENTS

Introduction.....	8
Preface	9
I. Coordinate measuring machines and systems	
Christian HERBST, Rainer TUTSCH: Simulation of a micro coordinate measuring machine for parallel measurement of microstructures.....	15
Fei YETAI, Shang PING, Chen XIAOHUAI: Analysis and complementarity of Abbe principle application limited in coordinate measurement	25
Matthias FRANKE, Frank HÄRTIG, Klaus WENDT: Measuring large 3D structures using a portable 4-arm laser interferometer	35
Michael NEUGEBAUER: Precision size and form measurements with a micro-CMM F25	43
Rilpho DONKER, Ivo WIDDERSHOVEN, Henny SPAAN: Isara 400: a large measurement volume ultra-precision CMM	50
Hubert LETTENBAUER: Metrotomography® – high precision CT-metrology in a new dimension	57
II. Traceability, CMM inspection and measurement uncertainty	
Abdelhak NAFI, René MAYER, Adam WOZNIAK: Configurations selection for the separation of machine and probe errors on a CMM by a redundancy method	67
Albert WECKENMANN, Johannes BERNSTEIN: Measurement uncertainty evaluation of optical multi-sensor-measurements	73
Elmar GARCIA, Albert WECKENMANN: Sequential bayesian estimation for data fusion and data-driven measurement uncertainty evaluation	83
Francisco Augusto ARENHART, Christian Raffaello BALDO, Gustavo Daniel DONATELLI: Evaluation of coordinate measurement processes in the Brazilian industry using calibrated workpieces.....	94

Grzegorz KRAJEWSKI, Adam WOŹNIAK: Simple artifact for CMM scanning probe evaluation	105
Jerzy SŁADEK, Marek KOWALSKI, Andrzej RYNIIEWICZ, Kamila GACEK: Analogies and differences in accuracy assessment of shape mapping using coordinate measuring technology and computer tomography	111
Jerzy SŁADEK, Barbara JURAS, Marcin KRAWCZYK, Adam GAŚKA: Modelling of probing system errors by use of Monte Carlo method.....	120
Jerzy SŁADEK, Ksenia OSTROWSKA, Kamila GACEK, Magdalena BRYNDZA: Designation of operator impact on errors of measurements realized by coordinate measuring arm.....	130
Jerzy SŁADEK, Robert KUPIEC, Grzegorz SOKAL, Marcin KRAWCZYK: Laser tracker system adaptation for the analysis of selected functional characteristics of industrial robots	138
Milan BOROVIČKA: Evaluation and quantification the reliability interval..	148
Norbert WISŁA: Trends in standardization in the area of acceptance and reverification tests for coordinate measuring machines	153
Ryoshu FURUTANI, Miyu OZAKI: Uncertainty of calibration of 2D planar coordinate measuring machine	162
Władysław JAKUBIEC, Wojciech PŁOWUCHA, Marcin STARCZAK: Analytical evaluation of the coordinate measurements uncertainty	169
Krzysztof MAŁYSA, Kazimierz HAŁAT: Calibration of coordinate measuring machines	177
III. Coordinate measurements in practice	
Andrzej KAWALEC, Marek MAGDZIAK: Comparison of selected methods of optimization on the example of some measurement task in coordinate measurement technique	187
Andrzej KAWALEC, Marek MAGDZIAK: Method for computing of an offset curve	197

Andrzej PIOTROWSKI, Tadeusz NIESZPOREK: Coordinate methods of the assessment of CNC machine-tool circular interpolation accuracy.	207
Andrzej RYNIOWICZ: Application of synthetic indicators to accuracy assessment of shape mapping using computer tomography	222
Anna ZAWADA-TOMKIEWICZ, Borys STORCH: Measurement of tool geometry in a state of wear	235
Detlef FERGER: Accurate determination of multiple points – micro features measured with computed tomography, microprobes and laser	247
Dietrich IMKAMP: Optical and tactile – comparisons in surface and contour metrology.....	252
Ludek VOLF, Libor BERANEK, Pavel MACHACEK, Petr MIKES: Computer simulation of measurement process and systems	260
Małgorzata PONIATOWSKA: Spatial characteristics of geometric deviations of free-form surfaces determined in coordinate measurements.....	266
Marcus PETZ, Rainer TUTSCH, Matthias ANDRAES, Thomas WIEDENHOEFER, Benjamin HOPP: Stereophotogrammetric tactile-optical probe for three-dimensional microparts	275
Michał JANKOWSKI, Adam WOŹNIAK: Comparison of the CMM measurement accuracy with the application of the articulating head as well as multiple styli	285
Sergey MIKHEYEV, Igor KONYAKHIN: Optic-electronic system for deformation measurement of radio-telescope counter-reflector computer modelling.....	293
Patrick BLANCKAERT, Benoit WALRAVENS, Bart DE VliegHERE, Rob KUPPENS: Laser scanner probes on CMMs for feature detection: optical probing accuracy approaching tactile probing accuracy.....	301
Pavel MACHÁČEK, Jan TOMÍČEK, Libor BERÁNEK, Petr MIKEŠ: Application of laser scanning in reverse engineering and prototype manufacturing.....	309
Sabina ŽEBROWSKA-ŁUCYK, Rafał KŁODA: System for remote control of form measuring machines via the Internet	319

Siniša DELČEV, Vukan OGRIZOVIĆ, Jelena GUČEVIĆ: Geodetic method of the fuel tank shape inspection	328
---	-----

IV. Education in coordinate metrology

Călin NEAMȚU, Dan HURGOIU, Mihai DRAGOMIR, Herbert OSANNA: Using Delmia V5 in coordinate metrology training	339
---	-----

Calin NEAMTU, Liviu CRISAN, Daniela POPESCU, Numan DURAKBASA: Modern instruments for teaching coordinate metrology	349
--	-----

Libor BERÁNEK, Ludek VOLF, Pavel MACHACEK, Petr MIKES: Virtual CMM concept and its usage for educational purposes.....	359
--	-----

Petr MIKEŠ, Libor BERÁNEK, Luděk VOLF, Pavel MACHÁČEK: Design and manufacturing testing artefact for education measuring on coordinate measuring machines	365
---	-----

Teresa WERNER, Albert WECKENMANN: Demand-oriented qualification of metrologists for the sustainable assurance of accurate measurement results.....	373
--	-----

Wojciech PŁOWUCHA, Władysław JAKUBIEC, Teresa WERNER, Enrico SAVIO, Liam BLUNT: E-learning course “SAM-EMU – statistical analysis of measurement data for the evaluation of measurement uncertainty”	382
--	-----

Zbigniew HUMIENNY, Piotr TUREK: Visualization of the maximum material requirement.....	390
--	-----

V. Gears measurements

Grzegorz BUDZIK, Tomasz DZIUBEK, Bartłomiej SOBOLEWSKI, Małgorzata ZABORNIAK: Application of the coordinate measuring technique for the determination of accuracy of gear wheels produced by selected incremental rapid prototyping methods	399
---	-----

Grzegorz BUDZIK, Tomasz DZIUBEK, Bartłomiej SOBOLEWSKI, Małgorzata ZABORNIAK: Selection of measuring strategy for gear wheels produced by RP methods.....	407
---	-----

José SÁNCHEZ, Gerardo RUIZ, Sergio PADILLA, Benjamín VALERA: Modelling of hypoidal gears for the further comparison of nominal and actual profile by means of CMM.....	415
--	-----

VI. Form and surface roughness measurements

Claudia Yu. ZENKOVA: About use of the 3D-polarization measurements in the diagnostics of optical fields.....	429
Maciej SIENIŁO, Sabina ŻEBROWSKA-LUCYK: Effects of the scanning speed and the probe geometry on the extracted roundness profile – a survey with the Talyrond 365 machine.....	438
Stanisław ADAMCZAK, Dariusz JANECKI, Krzysztof STĘPIEŃ: Experimental verification of the concept of cylindricity measurements with use of the „bird-cage” strategy	448
Francois-Pierre NINOVE, Cezary RAPIEJKO, Thomas G. MATHIA: 3D morphological behaviour of heterogeneous model material in finishing abrasive process – case of nodular cast iron	455
Francois-Pierre NINOVE, P. STEPIEN, Thomas G. MATHIA: Morphological 3D analysis of model ground surface texturing.....	463
Valery V. BESOGONOV, Irina N. SKVORTSOVA, Nikola Abo ISSA: Scanning probe microscope 3D images analysis of the glass ceramic substrate surface	471
Henryk CZARNECKI, Ireneusz Piotr CHMIELIK: 3D analysis of geometrical surface structure in tribological tests.....	477
Igor KONYAKHIN: Optic-electronic systems for control the deformations of the mirrors for the millimeter wave range radiotelescope.....	485
