THEORETICAL
AND
APPLIED
MECHANICS
JAPAN

Volume 58
58th Japan National Congress for Theoretical and Applied Mechanics, 2009

Edited by Takeshi TAMURA and Norihiro IZUMI
National Committee for IUTAM, Science Council of Japan
CONTENTS

Preface

I. Solid and Structural Mechanics

Application of Crack Propagation Simulation to Crack Arrester

H. Osaki, Y. Nakabayashi, G. Yagawa and Y. J. Kim 3

Improved Time-Domain BEM Analysis for a Solid-Solid Interface with Contact Boundary Conditions

T. Saitoh, K. Nakahata and S. Hirose 9

Seismic Response Control of a Building and Elevator Rope with Active Mass Damper

T. Baba and M. Kohiyama 19

Fatigue Characteristics of CFS-Reinforced RC Slabs Sustaining Running Vibration Loads and Running Constant Loads

M. Takano, T. Abe, T. Kida, A. Kobayashi and A. Komori 31

Analyses of Pressure Distribution Using Arching Criteria in 2D Sand Heaps

T. Pipatpongsa, A. Iizuka and H. Ohta 41

II. Dynamics and Optimization

An Econometric Analysis of CO₂, Fuel, and Electricity Prices

M. Endo 51

On a Singular Solution in Higgs Field (II) —The Structure of SM Higgs Boson

K. Kitazawa 61

Solutions of Ginzburg-Landau Equations Induced from Multi-dimensional Bichromatic Waves and Some Examples of Their Envelope Functions

S. Kanagawa, K. Tchizawa and T. Nitta 71

A Complicated Double Periodicity in a Model of an Artificial Neural Network

M. Umeki 79

The Multiple Scale Analysis of the Coupled van der Pol Equation System and Its Error Estimation

B. T. Nohara and A. Arimoto 89
III. Mechanics in Geophysics

Optimization of Boundary Condition and Physical Parameter in an Ocean Tide Model Using an Evolutionary Algorithm

D. Inazu, T. Higuchi and K. Nakamura 101

Constraining Interplate Frictional Parameters by Using Limited Terms of Synthetic Observation Data for Afterslip: A Preliminary Test of Data Assimilation

N. Mitsui, T. Hori, S. Miyazaki and K. Nakamura 113

Representation and Localization of Gusty Winds Induced by Misocyclones with a High-Resolution Meteorological Modeling

T. Takemi, K. Kusunoki, K. Araki, T. Imai, K. Bessho, S. Hoshino and S. Hayashi 121

Closed Vortex in a Rotating Polar Cap

Y. Taniguchi, H. Kitauchi and M. Yamada 131

Numerical Simulation of Ocean Bottom Boundary Layer

Y. Wakata 145

Numerical Computation of Continuation Problems in the Annular Domain

H. Imai, H. Sakaguchi and T. Takeuchi 153

IV. Heat Transfer and Fluid Mechanics

Transient Heat Conduction in Infinite Hollow Confocal Elliptical Cylinder

K. Sato 167

An Alternative Symmetry for Large-Scale Structures in Channel Flow

T. Itano, S. Toh and K. Satoh 177

Dependency of Collective Motion Control of Air Vehicles on Interaction Parameters

Y. Inada and H. Takanobu 185

Effect of Pressure Ratio for Self-Induced Flow Oscillation of Underexpanded Supersonic Jet Impinging on Cylindrical Body

T. Yasunobu, Y. Otobe and H. Kashimura 197

Small Model Experiment on the Formation and Propagation of Pressure Waves by Entering the Tunnel of Conventional Limited Express

K. Maeno, H. Endo, K. Ohmura and M. Ota 205

Effect of Nozzle Diameter on the Supersonic Jet Structure

Y. Otobe, H. Kashimura and T. Setoguchi 213
Contents

The von Neumann Paradox for Strong Shock Waves and Dynamic Transition
.................................................. S. KOBAYASHI, T. ADACHI and T. SUZUKI 219

Coherent Vortex Extraction from Three-Dimensional Homogeneous Isotropic Turbulence: Comparison of Wavelet and Fourier Nonlinear Filtering Methods
.................................................. K. YOSHIMATSU, N. OKAMOTO, M. FARGE and K. SCHNEIDER 227

On the Critical Rayleigh Number of the Benard Problem for a Gas
.................................................. T. KATAOKA 235

Numerical Computation for Hydrodynamic Oscillations of a Square Cylinder
.................................................. N. KONDO 243

Theoretical Study on Acoustic Dynamics of Circular Liquid-Gas Micro-Meniscus
.................................................. K. SUGIYAMA and H. RATHGEN 251

Osmotic Flow in Porous Membranes: Effects of Electric Charge
.................................................. T. AKINAGA, M. SUGIHARA-SEKI and T. ITANO 261

V. Numerical Simulation

A Design Method for Control System to Attenuate Unknown Output Disturbances Using Disturbance Observers
.................................................. K. YAMADA, Y. ANDO, I. MURAKAMI, T. HAGIWARA, Y. IMAI, D. Z. GONG and M. KOBAYASHI 273

The Parametrization of All Robust Stabilizing Multi-Period Repetitive Controllers for Time-Delay Plants
.................................................. T. HAGIWARA, K. YAMADA, N. NAKAZAWA, I. MURAKAMI, Y. IMAI, D. Z. GONG and M. KOBAYASHI 273

Trigonometrically Symplectic Integration Methods of Two-Stage, Second-Order and Three-Stage, Third-Order
.................................................. WATSU and H. TSURU 295

Evaluation of Three-Dimensional Enriched Free Mesh Method and Its Application to a Dynamic Elastic Problem
.................................................. H. SUZUKI, H. MATSUBARA, Y. EZAWA and G. YAGAWA 301

What Kind of Frictional Parameter Should be Used in the Polygonal DEM for the Eccentric Collision Simulations?
.................................................. H. SAKAGUCHI and D. NISHIURA 309

Numerical Analysis on Angiogenesis in Cancer Using a Particle Model
.................................................. K. NAGAYAMA, J. NITTA and I. MIURA 321
Contents

Interface Treatment under No-Slip Conditions Using Level-Set Virtual Particles for Fluid-Structure Interaction

................................................................. G. Hashimoto and K. Ono 325

INDEX OF AUTHORS ................................................................. 343
