International Colloquium on
Graph and Model Transformation

on the occasion of the 65th birthday of Hartmut Ehrig

February 11 – 12, 2010
TU Berlin

C. Ermel, H. Ehrig, F. Orejas, G. Taentzer
(Editors)
# Table of Contents

## Session 1: Graph Transformation Techniques

- Modeling a Service and Session Calculus with Hierarchical Graph Transformation  
  Andrea Corradini, Ugo Montanari and Roberto Bruni  
  Page 10
- Symbolic Attributed Graphs for Attributed Graph Transformation  
  Fernando Orejas  
  Page 26

## Session 2: Modeling with Graph and Net Transformations

- Graph Modeling and Transformation  
  Claudia Ermel and Karsten Ehrg  
  Page 56
- A Termination Criterion for Graph Transformations with NACs  
  Francesco Parisi-Presicce and Paolo Bottoni  
  Page 76
- Formal Modeling and Analysis of Flexible Processes Using Reconfigurable Systems  
  Kathrin Hoffmann, Julia Padberg and Tony Modica  
  Page 86

## Session 3: Verification and Constraints

- Second-Order Value Numbering  
  Tiziana Margaria and Bernhard Steffen  
  Page 106
- Towards Theorem Proving Graph Grammars using Event-B  
  Leila Ribeiro, Simone Costa, Fabiane Dillenburg and Fernando Dotti  
  Page 122
- Expressiveness of Graph Conditions with Variables  
  Annegret Habel and Hendrik Radke  
  Page 136

## Session 4: Modeling of Chemical and Biochemical Reactions

- From Stochastic Graph Transformations to Differential Equations  
  Reiko Heckel and Mayur Bapodra  
  Page 156
- Reaction Systems - a Formal Framework for Biochemical Reactions  
  Grzegorz Rozenberg  
  Page 178

## Session 5: Model Transformations

- Model Transformations to Mitigate the Semantic Gap in Embedded Systems Verification  
  Sabine Glesner, Björn Bartels and Thomas Göthel  
  Page 180
- Specification and Verification of Model Transformations  
  Frank Hermann, Barbara König and Matthias Hülsbusch  
  Page 196
- Stepping from Graph Transformation Units to Model Transformation Units  
  Hans-Jörg Kreowski, Sabine Kuske, and Caro von Toth  
  Page 216
Session 6: Software System Modelling

Test-driven Language Derivation with Graph Transformation-based Dynamic Meta Modeling .................................................. 240
Gregor Engels, Christian Soltenborn

From Separate Formal Specifications to Certified Integrated Visual Modelling Techniques and Environments ........................................ 258
Hartmut Ehrig

Formal Methods and Agile Development ................................................................. 264
Michael Löwe

Models in Software and Systems Development ....................................................... 270
Bernd Mahr

Why Model Transformations Should be Based on Algebraic Graph Transformation Concepts ................................................. 278
Gabriele Taentzer
