
(IC4E 2010)

Sanya, Hainan, China
22-24 January 2010
Table of Contents

Preface ........................................................................................................... xvi
Organizing Committee ................................................................................... xviii
Technical Committee ...................................................................................... xix

Session 1

The Role of Cognitive Styles in Investigating E-learning Usability .................. 3
Norol Hamiza Zamzuri, Erne Suzila Kassim, and Melissa Shahrom

Development of an E-learning Content-Making System for Information
Security (ELSEC) and its Application to Anti-phishing Education ................... 7
Masatoshi Kawakami, Hiroshi Yasuda, and Ryoichi Sasaki

Podcast in Higher Education: Students’ Experience and Assessment ............. 12
Simon Fietze

Study and Design on Data Management Model of SQL Server CE for Mobile
Application ....................................................................................................... 17
Ye-bai Li, Bin Zhang, and Hai-bin Wang

Research of the Verification in Workflow Process Modeling on
the Application of Petri Nets ........................................................................... 21
Ye-bai Li and Fu-qi Mao

Knowledge Acquisition, Sharing Intention, and Sharing Behavior .................. 25
Sophia Shu-Chuan Chang and Joseph C. Shih

Global Feature-Based Image Classification and Recognition in Small Sample
Size Problem .................................................................................................... 30
Lan Gan, Zhongping Yu, and Jie Gao

Virtual Classroom with Intelligent Virtual Tutor .............................................. 34
Yan Hu and Gang Zhao
Multi-modal Medical Image Registration Based on Gradient of Mutual
Information and Morphological Haar Wavelet

Xiaosheng Huang and Fang Zhang

Research on Network Cooperative Learning System Based on Virtual Reality

Shuang Li

Study on the Supplier Evaluation Index System of Lean Supply Chain

Tchidi Megan Florent and He Zhen

Study on Copetition Ecology in High-Tech Industrial Cluster

Jiang Yunxia and Xiao Huamao

Subsequence Partition of Time Series Based on Different Width Time
Window

Hongwei Guo, Jianliang Zhang, Yanchi Liu, and Xuedong Gao

SWOT Analysis of E-learning System in Bahraini Universities

Sarmad Mohammad

Session 2

Study on Evaluation Model of the Fourth Party Logistics Enterprise’s Core
Competence Based on Information Entropy of Fuzzy Matter-Element Theory

Ji-yong Li, Yun-pu Xie, and Yan-hong Zhang

Research on the Evaluation in Alliance E-business Security

Lu Xi, Zhang Xiaoyu, Zhu Aimin, and Yu Lijuan

Study on the Effects of Virtual Community Involvement on Online Stickiness
and Repurchase Intention

Zilong Liu and Jian Xu

Using FCM for Color Texture Segmentation Based Multiscale Image Fusion

Zhi-Kai Huang, Pei-Wu Li, Sheng-Qian Wang, and Ling-Ying Hou

The Characteristic Analysis and Design of Oil Exploration Data Services
in Digital Oilfield

Shen Longbin and Meng Xiangbin

SWS Based Business Service Composition

Anping Zhao, Ke Ren, Xiaoyong Wang, and Yuhui Qiu

Agent Coalition Formation of Chinese Question Answering System Based
on Improved Ant Colony Algorithm

Shuling Di, Pilian He, and Huan Li

Improving Performance and Reliability of IMS by Co-location DHT

Yang Peng, Zhang Chunhong, Ma Tao, and Gou Xuerong

Exploration and Practice of Constructing Computer Curricula in New Media

Wang Shan and Xie Zhengqiang

Relation Networks Mining Based on Workflow Logs

Ang Gao, Yang Yang, and Yue-Wei Wang
Study of Online Stickiness: Its Antecedents and Effect on Repurchase Intention

Jian Xu and Zilong Liu

P2P Communication Mechanism Based on Request Forwarding in IPv4 and IPv6 Coexistence Network

Chen Shengyang and Shang Yanlei

Methods for Efficient Digital Evidences Collecting of Business Processes and Users Activity in eLearning Environments

Jasmin Azemovic and Denis Music

Design of Web-Based Research E-learning Platform

Zhenfan Ding and Rong Li

Session 3

Based on Support Vector Machine’s Tumor Image Classifier Design

Lan Gan and Zhongping Yu

A Framework: Trust Establishment for E-services

Bailing Liu, Hongwei Lu, Yizhu Zhao, and Feng Ge

Research on the Collaboration Between Supply Chain Node Enterprise and TPL Provider: An Inventory Optimization Approach

Yan-ping Liu, Ying-jie Li, and Ruoxue Zhang

Public E-procurement: A Research Synthesis

Erne Suzila Kassim and Husnayati Hussin

Collaborative Researching Mode of Implicit Knowledge in Organizational Learning and its Network Implementation

Jianhua Ren and Hui Ding

A Scheme of Rössler Chaotic Synchronization Under Impulsive Control

Yingkui Li

The Research of a Rule-Based Business Process Management Method for Virtual Organization

Wenzhong Tang and Jingyi Qin

Evaluation of the Relationship Between Electronic-Marketing and Market-Driven Companies

Ezatollah Asgharizadeh, Amir Ekhlassi, and Pedram Toloeei

Do Buyer’s Characteristics Influence How They Behave when Facing Missing Products in Local E-tailing and E-auction Websites?

Wee-Kheng Tan and Hao-Yang Li

Online Job Seeking: An Exploratory Study from the Perspective of Social Capital and Technology Readiness

Wee-Kheng Tan, Yi-Der Yeh, and Yu-Jie Tan

User Payment Choice Behavior in E-auction Transactions

Wee-Kheng Tan and Yung-Lun Chung
Implementation of E-commerce in Market-Oriented Cluster Based on Online Agent: A Case Study of Yiwu .................................................................................................................. 188
  Xiaodi Zhang, Chi Zhang, and Yuzhe Jia
Customized Learning Environment Based on Heterogeneous Traces ................................................................................................................................. 193
  Belhassen Guettat, Henda Chorfi, and Mohamed Jemni
Optimal Pricing to Maximize the Overall Profit while Launching a New Product ...................................................................................................................... 198
  Ming-Hai Ni, Chung-Lung Yang, and Chiu-Chi Wei
Developing E-learning Skills Within English Language Training in the Slovak University of Technology ......................................................................................... 203
  Emila Mironovová, Gabriela Chmeliková, and Dušan Fedic

Session 4
Credit Risk, Information and Government—An Analysis for Chinese E-commerce ...................................................................................................................... 209
  Wu Chunmei and Jin Jiang
An Improved Semantic Similarity Measure for Word Pairs ................................................................................................................................. 212
  Songmei Cai and Zhao Lu
An Automatic Grading Model for Learning Assessment ................................................................................................................................. 217
  Yang Liu
Empirical Distributions of Personal Financial Product Returns of China ...................................................................................................................... 221
  Shijin Guo and Yanqing Wang
A Novel Evaluation Model for Teaching Assessment ................................................................................................................................. 226
  Chunting Yang
Towards an Ethical Sales-Agent in E-commerce ................................................................................................................................. 230
  Ali Reza Honarvar and Nasser Ghasem-Aghae
Object Service Provision in Internet of Things ................................................................................................................................. 234
  Zhong Dong, Zhu Yan, Lei Wangbao, Gu Jianhua, and Wang Yunlan
Combining Phoneme Loop Posteriori with Decoding Posteriori as Confidence Measure for Speech Recognition in E-service ................................................................................................................................. 238
  Yanqing Sun, Qingwei Zhao, Changliang Liu, and Yonghong Yan
Harnessing Collective Intelligence: Wiki and Social Network from End-user Perspective ................................................................................................................................. 242
  Behnaz Gholami and Roshanak Safavi
Application of CC and RBF-DDA Algorithm in Simulating Neural Networks Using Pseudorandom Information ................................................................................................................................. 247
  Jun Li and Xiaoli Wang
Application of Loop Cycle Theory and Game-Theoretic Symmetries in Architecture Deployment of Software Engineering................................................................................................................................. 251
  Jun Li and Xiaoli Wang
Using a Virtual Learning Environment with Highly Interactive Elements in Second Life to Engage Millennial Students ........................................................................................................255
Wei Shi, Gordon Lee, Jonathan Hinchley, Jean-Pierre Corriveau, Bill Kapralos, and Andrew Hogue

An Exploratory Study on RFID Adoption in China ..................................................................260
Yun-feng Wang, Jie Li, Zhi-min Zhang, and Ya-kun Li

E-health Challenges, Opportunities and Experiences of Developing Countries ..........................264
Sayed Nasir Khalifehsoltani and Mohammad Reza Gerami

A Novel Insight into Virtual Process Performance of E-work .........................................................269
Daocheng Hong, Hong Ling, and Yangmei Li

Session 5

A Hybrid Data Mining Model for Effective Citizen Relationship Management:
A Case Study on Tehran Municipality ............................................................................................277
Ali Mohammad Ahmadvand, Behrooz Minaei Bidgoli, and Elham Akhondzadeh

Online Spillover Effects on Hotels: The Case of Taiwan .................................................................282
Tsung-Ju Yang, Ling-Chu Huang, and Wei-I Li

A Survey of Taiwan’s Education from Peter McLaren’s Criticism of Global Capitalism .............288
Hsing-Fen Tsai and Chung-Ping Yang

Research on Multimedia Technology for E-education Based on Optical Network .....................291
Ning Zhang and Hong Bao

Research on Computer Technology for E-learning in Higher Education ......................................295
Ning Zhang and Hong Bao

Research on E-learning with Digital Technology in Distance Education ......................................299
Ning Zhang and Hong Bao

Analyzing a Fair Exchange E-commerce Protocol Using CSP and FDR .....................................303
Zhangkai Wang

A Research on Student Model Based on Intelligent Computer Assisted Instruction ....................308
Juhua Zhang, Yan Ma, and Ning Song

Calligraphic Creation Based on Flash ............................................................................................311
You-Rong Xiao, Quan-Jun Zheng, and Jun Ou

Technology of Loop Generation Based on Flash ActionScript 2.0 ..............................................316
You-Rong Xiao, Quan-Jun Zheng, Xue Gong, and Jun Ou

The Study of Subspace Pseudoframes of Translates with Several Refinable Functions ...............320
Hui Wang and Meijuan Zhai
The Description for Properties of Biorthogonal Vector-Valued Wavelet Packets with Six-Scale Factor ................................................................. 325
   Mei Juan Zhai and Hong-E Wu

The Characters of Multiple Affine Bivariate Pseudoframes of Translates with Bivariate Filter Functions ................................................................. 329
   Baoxian Lv and Yong Liu

The Properties of Multivariate Wavelet Packets Associated with Eight-Scaled Filter Bank Functions ................................................................. 334
   Baoxian Lv and Xin Xian Tian

The Construction of Collaborative Manufacturing Business Platform Based on Workflow Technology ................................................................. 339
   Wuling Ren and Ningning Song

Session 6

Effectiveness of Online Advertising—A Hong Kong Case Study ................................................................. 345
   Ronnie Cheung

Straight-Line Intersection Point Detection Based on Curve Fitting of Hough Parameter Space ................................................................. 350
   Lin Qiang Chen, Lei Wang, and Jun Xiong

Research on Circular Economy of Mineral Resources ................................................................. 354
   Hao Li and Qingfei Wang

Visualization of Heuristics Approach to Classroom-Period Schedule Optimization ................................................................. 358
   Emir Humo and Mohamed El-Zayat

The Explore of Automation of Professional Practice Teaching Based on the Virtual Laboratory ................................................................. 361
   Gao Qiang, Chen Min, and Yue Feng Li

Information Technology: Tools for Interaction Communication in Agriculture of Iran ................................................................. 365
   Ahmad Reza Ommmani

The Relationship Between E-service Quality and Ease of Use on Electronic Customer Relationship Management (E-CRM) Performance: An Empirical Investigation in Jordan Mobile Phone Services ................................................................. 368
   Samsudin Wahab, Nor Azila Mohd Nor, and Khaled Al-Momani

The Roadmap and Future of UML Research in China ................................................................. 373
   Tong Yi

Impact of TQM on Employees’ Job Satisfaction in Indian Software Industry ................................................................. 378
   Ankur Jain

A Document Clustering Algorithm for Web Search Engine Retrieval System ................................................................. 383
   Hongwei Yang
A Method of Weak Signal Detection Based on Duffing Oscillator .........................................................387
Jian-xiong Wang and Chulin Hou

A Genetic-Algorithm-Based Two-Stage Learning Scheme for Neural Networks ........................................391
Shuo Wang, Xiaomeng Zhang, Xueyan Zheng, and Bingshi Yuan.

Some Analysis of Investment Benefit on College E-Learning .................................................................395
Xiaofei Chen and Xiaoling Zhu

Economic Analysis of E-business Method Patent .......................................................................................397
Luo Shengqiang and Zhao Haiyan

Boxed Pigs and the External Incentives of Promoting Technological Innovation of Little and Medium-sized Enterprises .............................................................401
Xing-ting Peng and Sheng-ting Peng

Session 7

Multi-agent Research on Immunology-Based Emergency Preplan .........................................................407
Yang Qing, Shi Yaneng, and Wang Zhan

Novel Approach of Auto-generating Examination Papers—Based on Fuzzy Logic ........................................411
Xien Cheng and Jinghua Zheng

Research Progress and Practice of Ecology Problems on Information Systems ...........................................415
Hong-chang An

The Spillover Effect of Education on Productivity: Evidence from China .................................................420
Dong Yajuan

Re-engineering the Iranian Airlines Fleet Planning Process to Enhance Revenue and Market Share ..........425
Arman Rezaee, Parisa Noshiravani, and Yasser Jalali

Investigation of the Relation Between Interaction and Sense of Presence in Educational Virtual Environments .................................................................428
Ioannis Messinis, Dimitrios Sattaouras, Panayotis Pintelas, and Tassos Mikropoulos

Comparing the Satisfaction of the E-learning Between Teenagers and People with More than 45 Years Old in Cyberjaya .................................................................432
Mir Mohammad Seyed Danesh

Following Construction Study of One Village One College Student Training Plan in Heilongjiang Province .................................................................436
Ying Xing and Shengde Hu

An Attribute-Oriented Model for Identity Management .............................................................................440
Z.P. Jin, Jian Xu, Ming Xu, and Ning Zheng

Case Study: Strategic Information Systems Planning in Shanghai Key Universities in Yangpu District ..........445
Zhe Lv
E-learning in Price Risk Management .................................................................................. 451
  Zsolt Csapo, Laszlo Karpati, Laszlo Kozar, and Andras Nabradi
Web Data Mining Based Learners Personalized Information Modeling .......................... 454
  Luo Jun and Chen Zhihua
Design and Implementation of Chinese Ancient Poetry Learning System Based on Domain Ontology ................................................................. 460
  Rui Yao and Jin Zhang
Research on Management Mode of the Learning Information in Network Courses ................................................................. 464
  Hong Shen
Web-Based SMS Passenger Application: New Approach to Inform Passengers via SMS in Airlines ................................................................. 469
  Newsha Ghoreishi and Mehdi Shajari

Session 8

The Effect of Economic Relation on International Peace ................................................. 475
  Cai Jie
IPv6 Based Large-Scale Lighting Devices E-management System ................................. 479
  Feng Chen, Xiaohui Rong, Pan Deng, and Qiongqiong Zhou
Strategy 2.0 to a Teaching and Learning Process in Higher Education ......................... 484
  Ligia Sousa and Rui Gomes
The Washback Effect of IELTS Preparation Courses to the Learners: Iranian Learners Perspectives on IELTS Preparation Courses ........................................... 490
  Zahra Rahimi and Navid Nazhand
A Lightweight and Secure Protocol for Mobile Payments Via Wireless Internet in M-commerce ...................................................................................... 495
  Ali Akbar Tabandehjooy and Navid Nazhand
Framework of Evaluating E-commerce Based on Business Process ....................... 499
  Yuheng Wang
Malicious Executables Classification Based on Behavioral Factor Analysis .................. 502
  Hengli Zhao, Ming Xu, Ning Zheng, Jingjing Yao, and Qiang Ho
Study on Supply Chain Finance in E-business Circumstances .................................. 507
  Haipeng Wang
Research of the Application and Type of Fast Break Technique in Football ................ 510
  Shengquan He
Research on the Current Situation of University Students Sports Activity after School in China ................................................................. 513
  Shengquan He
An Investigation of E-business Using SelfishRater .................................................. 517
  Jiankang Mu
Research of the Modern Rural Logistic System Construction .......................................................521
   Shuanglin Zhao
MBA in Agribusiness and Commerce (AGRIMBA)—A Tool for Life-Long
and E-learning .................................................................................................................................524
   Zsolt Csapó, Laszlo Karpati, Laszlo Kozar, and Andras Nabradi
Economic Value of Agribusiness and Food Exhibitions in Eastern-Europe ..................................527
   Laszlo Karpati, Levente Varga, and Andras Nabradi
Agricultural Drought Monitoring Using Web-Serviced Remote Sensing Data ..............................532
   Shao-E Yang and Bing-fang Wu

Session 9

Technology Integration: Yet to Happen at Malaysian Universities ..............................................539
   Sima Sayadian and Jayakaran Mukundan
The Analysis and Design of the Information Service System for Migrate
Workers .......................................................................................................................................543
   Guoqiang Ren and Yuhui Luo
Research on Corporation Financial Distress Prediction in the Environment
of E-business .................................................................................................................................548
   Zhao Rui and Fu Rongxia
Research on Evaluation Methods in Network Education ................................................................551
   Xiang Zhou
Study on E-learning Education Model Based on Web Intelligence ................................................554
   Jianfeng Zhu
Enterprise Management and its Creation in the Environment of E-commerce ..............................558
   Qiyuan Li and Mei Wu
Research on Network Financial Management System Based on E-commerce ............................561
   Xiao-lin Liang and Yu-yong Hu
The Development and Applied Research of E-learning Resources ..............................................564
   Jianfeng Zhu
Research on E-commerce Model Based on Web Services under P2P
Environment .................................................................................................................................567
   Guiying Su
An Intelligent E-learning System on Emotion Interaction .............................................................571
   Yan Yu
The Study of the Table Tennis Receiver’s Development Rule ......................................................575
   Xinguo Li and Xinxue Li
Optimization of Corporate Governance Performance Calls for Application
of Workflow Technology in Corporate Information Management System ....................................578
   Lai Xu
GIS-Based Tourism Information System Design and Implementation ........................................582
   Xie Hongyong and Shi Xi
Research on Issues of Resources and Environment ................................................................. 586
Aiguo Yuan and Hao Li
On the Traffic Administrative Department’s Moral Hazard in the Operation
Mechanism of Highway Franchise—Based on Incomplete Contracts ................................. 589
Sheng-ting Peng

Session 10

On the Moral Risk of the Franchised Enterprise in the Operation
of Highway—The Traffic Administrative Department on Behalf of Public
Interest ................................ ................................................................................................................. 595
Sheng-ting Peng and Xing-ting Peng
Building Integrated Oil and Gas B2B E-commerce Hub Architecture Based
on SOA ................................ ................................................................................................................. 599
Usama A. Mohamed, Galal H. Galal-Edeen, and Adel A. El-Zoghbi
ICT-Based Business Model for Re-engineering the Emergence of Virtual Low
Cost Carrier ................................ ................................................................................................................. 609
Arman Rezaee, Parisa Noshiravani, and Yasser Jalali
Simple Analysis of Advantages and Disadvantages of Golf Tourism
Development ................................ ................................................................................................................. 611
Ji Chun
Differences of Competitive Sports Views in Chinese and Western Sports
Culture ................................ ................................................................................................................. 615
Dongjun Yang, Hong-bin Luo, and Chen Gang
The Study on the Overall Reform of Physical Education Curriculum
in Ordinary Universities ................................ ................................................................................................. 620
Qiaozhen Zhang
Implementation of Workflow Engine Based on Petri Nets ................................ .................. 623
Yan Yu
An Empirical Analysis of Supplier Risk ................................ .................................................. 627
Sheng Zhong, Dan Feng, and Meng-qi Zeng
OLAT: The Swiss Open Source Learning Management System ....................................... 632
Sandra Arnold and Joël Fisler
Outsourcing and the Development of Services in China ................................ .................. 637
Xiu-lian Chen
Research on the Workflow Model Designing of Enterprise Management
Informationization Based on Service-Oriented ................................ ................................. 641
An Li
Mutual Recognition Agreement: A Conceptual View on Malaysian
Educational Services ................................ ................................................................................................. 645
Raja Suzana Raja Kasim

xiv
Pneumatics and Electro-pneumatic Control Laboratory .......................................................... 651
  Karol Velisek and Peter Kostal
Interconnecting Approach of Train Network in Marshalling ............................................. 655
  Guoqiang Cai, Xi Li, Limin Jia, Yong Qin, and Liming Zhou

Author Index .................................................................................................................................. 660
