7th ACM SIGCOMM Workshop on Network and Systems Support for Games 2008

(NetGames 2008)

Worcester, Massachusetts, USA
21-22 October 2008

ISBN: 978-1-61567-464-0
# Table of Contents

## Cheat Detection

A Peer Auditing Scheme for Cheat Elimination in MMOGs ........................................ 3  
*Josh Goodman (McGill University)*  
*Clark Verbrugge (McGill University)*

Stealth Measurements for Cheat Detection in On-line Games ................................. 9  
*Wu-chang Feng (Portland State University)*  
*Ed Kaiser (Portland State University)*  
*Travis Schluessler (Intel)*

Game Bot Identification Based on Manifold Learning ............................................. 15  
*Kuan-Ta Chen (Academia Sinica)*  
*Hsing-Kuo Kenneth Pao (National Taiwan University of Science and Technology)*  
*Hong-Chung Chang (National Taiwan University of Science and Technology)*

## Peer-to-Peer

A Case for Mutual Notification: A Survey of P2P Protocols for Massively Multiplayer Online Games ................................................................. 23  
*Stephan Krause (Universität Karlsruhe)*

Efficient Triangulation for P2P Networked Virtual Environments .......................... 29  
*Eliya Buyukkaya (LIP6, University of Paris 6)*  
*Maha Abdallah (LIP6, University of Paris 6)*

Area-Based Gossip Multicast ..................................................................................... 35  
*Christian Seeger (Technische Universität Darmstadt)*  
*Patrick Kabus (Technische Universität Darmstadt)*  
*Bettina Kemme (McGill University)*  
*Alejandro Buchmann (Technische Universität Darmstadt)*

## Massively Multiplayer Online Games

An Analysis of WoW Players' Game Hours .............................................................. 43  
*Pin-Yun Tarng (National Taiwan University)*  
*Kuan-Ta Chen (Academia Sinica)*  
*Polly Huang (National Taiwan University)*
Persistence in Massively Multiplayer Online Games

Kaiwen Zhang (McGill University)
Bettina Kemme (McGill University)
Alexandre Denault (McGill University)

Architectures

A Hybrid Architecture for Massively Multiplayer Online Games

Jared Jardine (Brigham Young University)
Daniel Zappa (Brigham Young University)

Dynamic Server Allocation in a Real-Life Deployable Communications Architecture for Networked Games

Peter Quax (Hasselt University)
Bart Cornelissen (Hasselt University)
Jeroen Dierckx (Hasselt University)
Gert Vanscheeuwijk (Andromed NV)
Wim Lamotte (Hasselt University)

Performance Analysis of Game World Partitioning Methods for Multiplayer Mobile Gaming

Kusno Prasetya (Bond University)
Zheng da Wu (Bond University)

Bandwidth and Latency Reduction

Latency Reduction by Dynamic Core Selection and Partial Migration of Game State

Paul B. Beskow (Simula / University of Oslo)
Knut-Helge Vik (Simula / University of Oslo)
Pål Halvorsen (Simula / University of Oslo)
Carsten Griwodz (Simula / University of Oslo)

Tackling Online Game Development Problems with a Novel Network Scripting Language

Paul Sheppard (ITI Techmedia)
George Russell (Codeplay Software Ltd)
Rich Rowan (Codeplay Software Ltd)
Verena Achenbach (Codeplay Software Ltd)
Alastair F. Donaldson (Codeplay Software Ltd)
Improving Application Layer Latency for Reliable Thin-stream Game Traffic .......................... 8 9
Andreas Petlund (Simula / University of Oslo)
Kristian Evensen (Simula / University of Oslo)
Pål Halvorsen (Simula / University of Oslo)
Carsten Griwodz (Simula / University of Oslo)

Posters

Quantifying the Effect of Content-based Transport Strategies for Online Role Playing Games ............. 9 7
Chih-Ming Chen (National Taiwan University)
Te-Yuang Huang (National Taiwan University)
Kuan-Ta Chen (Academia Sinica)
Polly Huang (National Taiwan University)

Dragon Kill Points: Loot Distribution in MMORPGs ........................................................................ 9 9
Ernst Gwnmar Gran (Simula Research Laboratory)
Sven-Arne Reinemo (Simula Research Laboratory)

Dynamic Voice Communication Support for Multiplayer Online Games ........................................ 1 0 1
Tomas Hildebrandt (KOM - TU Darmstadt)
Sonja Bergstrer (KOM - TU Darmstadt)
Christoph Rensing (KOM - TU Darmstadt)
Ralf Steinmetz (KOM - TU Darmstadt)

A CAPTCHA System for Nintendo DS ..................................................................................... 1 0 3
Mohammad Shirali-Shahreza (Sharif University of Technology)
Sajad Shirali-Shahreza (Sharif University of Technology)

Action-specific Massive Multiplayer Online Role Playing Games Traffic Analysis:
A Case Study of World of Warcraft ......................................................................................... 1 0 5
Mirko Suznjevic (University of Zagreb)
Maja Matijasevic (University of Zagreb)
Ognjen Dobrijevic (University of Zagreb)
