TABLE OF CONTENTS
SE 2010

MODEL BASED DEVELOPMENT
677-013: Model based Architecting with MARTE and SysML Profiles
S. Pantsar-Syvänen and E. Ovaska ......................... 1

677-028: Timing Diagrams Requirements Modeling using Event-B Formal Methods
T. Joochim, C.F. Snook, M.R. Poppleton, and
A.M. Gravell ........................................... 9

677-039: Transformation to Formalized Business Process Model
G.-W. Kim, S.H. Lee, H. Seo, and J.H. Son .............. 17

677-050: A .NET Architecture for Domain Expert Programming in Electrical Engineering
G. Czech, C. Ernsbrunner, and J. Pichler .................. 25

677-091: TraDe: A Language and its Tool Support for Programming in Electrical Engineering
M. Pfeiffer and J. Pichler ................................ 33

677-015: Plausible Logic Facilitates Engineering the Behaviour of Autonomous Robots
D. Billington, V. Estivill-Castro, R. Helix, and
A. Rock .............................................. 41

677-027: Updating Imperatively Defined Model Transformations by Merging Paths
E. Fischer ........................................... 49

677-043: Developing a Usability Evaluation Framework (FUEML) for Modeling Languages
C. Schalles, M. Rebstock, and J. Creagh .................. 57

677-095: Scheduler Implementation for Small Embedded Systems
D. Donari, L. Ordinez, R. Santos, and J. Orozco ....... 65

677-099: On the Object Modelling of the Massively Parallel Architecture Computers
M. Youssfi, O. Bouattane, and M.O. Bensalah .......... 71

SOFTWARE ENGINEERING REQUIREMENTS AND VALIDATION
677-021: Using Formal Concept Analysis for Verification of Process - Data Matrices in Conceptual Domain Models
J. Poelmans, G. Dedene, M. Snoeck, and S. Viaene ...... 79

677-065: Property Checking for Design Patterns

677-079: Modeling of a Requirements Management Tool to Support Small Projects
A. Zainol and S. Mansoor .............................. 95

677-088: Towards an Integrated Process-Personnel Model to Evaluate the Requirements Engineering in SMEs
L. Pires, M. Ortega, M. Pérez, L. Mendoza,
E. Méndez, and K. Domínguez .......................... 101

677-097: Predicting Class Interactions from Requirement Interactions: Evaluating a New Filtration Approach
N. Kama, T. French, and M. Reynolds .................... 109

SOFTWARE ENGINEERING METHODOLOGIES AND EXPERIENCES
677-031: Performance Comparison for Effort Estimation Models with Log-Normal and Gamma Distributions
S. Anasakti .......................................... 117

677-042: Experiences Initiating Software Product Line Engineering in Small Teams with Pulse
H.M. Mørsk-Møller and B. Nørregaard Jørgensen .... 125

677-066: Attachable Software Visualization for Multiple-Thread Programs
T. Shimomura, K. Ikeda, and M. Takahashi ............. 135

677-072: A Graph Theoretic Approach to Estimate Software Evolution Costs
E.J. Stanek .......................................... 142

677-087: Usability of Mobile Voting with NFC Technology
K. Ok, V. Coskun, and M.N. Aydin ...................... 151

SOFTWARE RE-ENGINEERING, MAINTENANCE, AND KNOWLEDGE MANAGEMENT
677-022: Improving Software Development Processes in Small Companies: A Case Study
M. Kivijalme and A. Valsta ............................ 159
### HUMAN-COMPUTER INTERACTION ISSUES

- **677-055**: Expressive Power of a New Iconic Visual Query Language for Mobile GIS  
  S. Khaddaj and H.E. Elariss
  
  - **677-056**: Query Formulation of a Visual Query Language for Mobile GIS  
    H.E. Elariss and S. Khaddaj
  
  - **677-064**: Incorporating Usability in the Software Development Process  
    M. Aveledo, A. De la Rosa, and A.M. Moreno
  
  - **677-082**: XP-PROTOTYPING Approach for User Interface Design of Large Web-based Applications  
    O.N.A. Al-Allaf

### SOFTWARE TESTING

- **677-025**: Analyzing Impact of Change in UML Sequence Diagrams on State Machine based Regression Testing  
  N. Sabahat, Q.-u.-A. Farooq, and Z.I. Malik

- **677-070**: Server-Driven Regression Test for Web Applications and its Performance  
  T. Shimomura and K. Ikeda

- **677-075**: Addressing High Severity Faults in Web Application Testing  
  K. Dobolyi and W. Weiner

- **677-033**: Testing Embedded Systems Software using Open Source Virtual Platforms  
  A. Bastoni, P. Boschi, F. Batino, C. Di Biagio, and L. Recchia
