Geotop 2010
Geosites for the Public
Paleontology and Conservation of Geosites

and

6th International Symposium on Conservation of Geological Heritage

29.05.2010 – 02.06.2010 in Hagen (Westf.)
Germany
Contents

Welcome address .......................................................................................................................... 9

Preface ....................................................................................................................................... 11

Lectures....................................................................................................................................... 13

Geological construction of Mirusha Waterfall ......................................................................... 14
Shehribane Abazi, Sali Mulaj, Ramiz Krasniqi, Alaudin Kodra, Fadil Bajraktari

The “German volcano route” as a part of the European volcano tourism route ......................... 15
Michael Abratis, Lothar Vrieseck-Götte, Olaf Tietz, Jörg Büchner, Ulrike Martin, Gerold Beckmann

Geosites of the mining Kolyma region: North-East of Russia ................................................... 16
Antonina Alenicheva

Main Geosites of the Azores Geopark project ............................................................................ 18
Eva Almeida Lima, João Carlos Nunes, Manuel Paulino Costa, Andrea Porteiro

Geotourism and geosite protection in the Vulcaneifel European Geopark Gerolsteiner Land –
a tale of two stories .................................................................................................................. 20
Peter Bitschene

Publication of geotouristic map „Geo-Pomerania“ on geoportal map server Mecklenburg-Western
Pomerania as WMS (Web Map Service) .................................................................................. 21
Andreas Börner

Conservation, Education and Entertainment: Geoparks going digital ...................................... 22
Mirjam Bröhl, Uwe Reimold, Tobia Lakes

Exploring the relicts of historic mining in Dortmund-Syburg ..................................................... 23
Heinz-Ludwig Bücking

Transformation of production – Industrial heritage and post-industrial landscapes upon
former coal and steel locations within the Ruhr Area ............................................................... 24
Ulrich Carow

Mining heritage and valorization in “Anjou Massif Armorican“ ................................................ 26
Philippe Cayla

Geological and landscape diversity, Dibra region, N- E Albania ................................................. 28
Aleksandër Çina

The process of inventory of Geological Heritage in Mozambique .............................................. 29
Ángelo Cumbe

Apple™ iPhone as a powerful tool for geosites inventorying, assessment and monitoring .......... 30
Nelson Dias, Renato Henriques, João Rocha, Orlando Guimarães, José Brilha

First resolution towards geoconservation at the 4th World Conservation Congress of IUCN .......... 31
Enrique Díaz-Martínez

Update on Spanish achievements and initiatives towards geoconservation: much done, much to be done .... 33
Enrique Díaz-Martínez, Luis Carcavilla, Ángel García-Cortés, Juana Vegas

'German' Geoparks in Japan – Tracing Edmund Naumann .......................................................... 35
Wolfgang Eder

Strategic cooperation in Geotourism and regional Geo-Marketing
The cooperation model GeoPark Ruhrgebiet – GeoTouring UG ............................................. 36
Ulrich Eimer

The Common and the Unique – Geodiversity in geoconservation strategies ................................ 37
Lars Erikstad
The Cabarz locality - an active quarry, a natural monument and an outstanding Lower Permian fossil site in the National GeoPark Thuringia Inselsberg - Drei Gleichen

Kerstin Fohlert, Stephan Brauner

GeoPark Ruhrgebiet - Geology and Museum

Michael Ganzelewski

Geosites in Ireland - How to keep a thousand geological heritage sites in the local, regional and national consciousness

Sarah Gatley, Sophie Préteseille

Palaeontological conservation in the Rhineland, western Germany – or how to cut the Gordian knot

Renate Gerlach, Christoph Hartkopf-Fröder, Thomas Otten, Hans Martin Weber

The ‘Atlas of Palaeontological Potential in the Rhineland 1 : 100.000’ – an important tool for planning agencies, local administration and palaeontological resource management

Renate Gerlach, Christoph Hartkopf-Fröder, Hans Martin Weber, Hans-Gerd Wefels

Geological special interest tourism and extracurricular education - Experiences from 15 year excursion management in the Ruhr district

Hartwig Gielisch

Development of geoheritage in Germany

Kurt Goth

Special aspects of Geotop protection in quaternary sediments of North Germany

Alf Grube

New discovery of Vendian fossils is reason for creation of “Mourafa” Geological Park

Volodymyr Grytsenko

Fossil-lagerstatten, type-localities and the handling with fossils in the Geopark Swabian Alb

Anton Hegele

Recource and Geological Archives – Carbonat Mining and Paleokarst in Southern Sachsen-Anhalt

Matthias Henniger

Landscape aesthetic values on an abandoned mining area in North Hungary

Gergely Horváth, Zoltán Karancsi

Geopark of the Uşak-Ulubey Canyon

Hülya İnane & İ. Doğukan Küçükçelen

New geological findings in the Ruhr Carboniferous and its practical application

Dierk Juch

The Westerschelde Container Terminal and the preservation of dune formation on the Kaloot, a famous fossil site in the Netherlands

Pieter Jungerius, Frank Wesselingh

From Lahn to Hudson river: Lahnmarmor as precious dimension stone and national heritage

Thomas Kirnbauer, Susanne P. Schwenzer

A media-box bringing Geopark-knowledge into schools

Timo Kluttig, Melanie Schnieders

The trilobite fauna from the Ordvician of the Ebbe Anticline (Rhenish Massiv)

Lutz Koch

The Hasselbachtal section – an auxiliary stratotype for the Devonian-Carboniferous Boundary

Dieter Korn, Matthias Piecha, Volker Wrede

Geoscience for everbody - initiatives for successful outreach of earth sciences to the general public in Germany

Ulrich Lagally
Communicating Earth heritage to all: using cartoons in leaflets, books and panels to attract and inform people of all ages .............................................. 70
John Macadam, Damir Lacković

Karelia's natural monuments of palaeontological interest. Exploitation and conservation experience .......... 71
Vladimir Makarikhin

Mülheimer Bodenschätze- about treasures of the Earth ....................................................................................... 72
Ulrike Marx

GREEN MINES: valuing the contribution of mining to the social, cultural and economic evolution of societies and communities throughout Europe ................................................................. 73
John H. Morris, Enrique Díaz-Martínez, Sarah Gatley, Alyson Tippings

Industrial heritage in the Ruhr ............................................................................................................................ 75
Hans-Peter Noll

World Heritage 'For Sale' – state supported trade in global palaeontological heritage in Dorset, UK – and its consequences ............................................................. 77
Kevin N. Page

The Geodiversity south-west website – developing an on-line resource for geoconservation in south-west England ...................................................................................... 78
Kevin Page, Mel Border, Malcolm Hart, Chris Bolton, Craig Dixon, Nick Powe, David Roche, Sam Scriven

Scale issues in geoconservation .......................................................................................................................... 79
Paulo Pereira, José Brilha, Diamantino Pereira

How to improve European cooperation for the rehabilitation of mining sites ......................................................... 80
Colin Prosser, Hanneke van den Ancker, Andreas Schüller

Fascination Geology – The most important geosites of Germany ........................................................................... 81
Horst Quade, Ernst-Rüdiger Look

Heritage Conservation in Impact Structures: Vredefort World Heritage Area (South Africa) and Ries Geopark (Germany) ........................................................................................................... 83
Wolf Uwe Reimold, Roger L. Gibson

Geological heritage of the Permocarboniferous Saar-Nahe Basin, SW Germany ..................................................... 84
Thomas Schindler

Surveying lost rooms: Digital reconstruction and museal presentation of the underground area of Nightingale Mine, Witten ........................................................................................................... 85
Olaf Schmidt-Rutsch

The German Geoparks Project .............................................................................................................................. 87
Michael Schmidt-Thomé, Heinz-Gerd Röhling, Kurt Goth

Geosites in the surroundings of Hagen – Protection and Marketing Concepts for the Purposes of a gentle Geotourism ...................................................................................................................... 90
Antje Selter, Volker Selter

Upper Kurveleshi Highland, a Museum of Albanian Nature ................................................................................. 91
Afat Serjani

Geosites – Treasures of the soil for the public ........................................................................................................... 92
Heinz Günter Struwe, Volker Selter

Ice Age Tourism, European landscapes for tourists – progress report ProGEO WG3 Northern Europe ........... 93
Hanneke van den Ancker, Klaas van der Veen, Hartmut Escher, Karin Geyer

Using drawings and art works to communicate landscape structure and history ............................................. 94
Hanneke van den Ancker, John Vermetten, Nienke Korthof

Palaeontological heritage of Russia and problems of its protection ................................................................. 95
M.S. Vdovets, A.V. Lapo
Karst and Caves in Ennepetal - Discoveries and nature conservation in one of the most spectacular cave regions of Germany
Stefan Voigt

„There is more than enough of green around“ - Protection of habitats and geosite in the Rauen Quarry, Mülheim (Ruhr Area, Germany)
Thorald vom Berg, Heiko Vittinghoff

The Messel Pit Fossil Site - a UNESCO Natural World Heritage Site
Sonja Wedmann, Stephan Schaal

The Ruhr Area National GeoPark - An Introduction
Volker Wrede

Geology in School
Engelbert Wühl

The Aller Valley project: geosite protection, German history and environmental education
Henning Zellmer

Poster
The international Pleistocene vertebrate deposits in the Roman area, Italy
Francesco Angelelli

History of Geoheritage Conservation in Kosovo
Fadil Bajraktari, Vahdet Pruthi, Rizah Hajdari, Shehrribane Abazi, Nazmi Zogaj

Geosites as lithified truth about environmental development in earth history: facts and indications from geosite-cluster Werdenfelser Country (District Garmisch-Partenkirchen, Bavaria, Germany): rise and fall of its mesozoic carbonate platforms
Hubert Engelbrecht

Old church walls - objects of palaeontological conservation?
Christoph Hartkopf-Fröder, Hans Martin Weber, Julia Klemeit

The Late Devonian „Kellwasser Event“ mass-extinction horizons in Germany: Restoring the type locality for science and geotourism
Friedrich-Wilhelm Luppold, Heinz-Gerd Röhl, Klaus George, Eberhard Schindler, Henning Zellmer

The valley and the village of Boga
Kujtim Onuzi, Petrit Imeraj, Artan Lila, Ylber Muceku

Subjectivity and uncertainty in geological heritage quantitative assessment: results from fieldwork using a predefined numerical methodology

Bats in the UNESCO World Heritage Site Messel Pit - Ambassadors of a palaeontological site for the Protection of a Geotope and a Biotope
Renate Rabenstein

Launching the AG Geodidaktik Internet Platform
Stefan Rober, Vera Mugge-Bartolović

The Upper Harz Water Regale
Heinz-Gerd Röhl, Justus Teicke, Friedrich-Wilhelm Wellmer

Geotourist activites of PGI-NRI - new challenges
Joanna Rychel, Katarzyna Pochocka-Szwarc, Monika Krzeczynska
Dinosaur track sites from Portugal and its significance as natural heritage
Vanda F. Santos, Fernando Barriga, A. M. Galopim de Carvalho, Lia M. Mergulhão,
C. Monteiro, Sofia C. Silveira, Maria J. Fernandes, J. M. Alho, R. Coelho

The chalk museum Gummanznear Sargard – Exhibition on geoscientific research and mining history
Karsten Schütze

Planning of Geotrails and potential Geoparks in Greece
Ir. Theodosiou, P. Paschos, E. Nicolaou, D. Papanikos, Z. Janikian, N. Epitropou, G. Kossiaris,
K. Michail, E. Athanassouli, S. Pavlidou, G. Vougioukalakis

Geotope Protection making an Important Contribution to the Conservation of Bats –
Successful Co-operation between Senckenberg Forschungsinstitut Frankfurt and Lessing-Gymnasium
Lampertheim (MINT EC certified school)
Gabriele Waldkircher, Renate Rabenstein

Presentation of an upcoming geopark between Germany and the Netherlands
Jannette Wolff, Hans de Jong

Field trips

Field trip E1: Lower and Upper Carboniferous rocks in the southern Ruhr Basin
Manfred R. Brix

Field trip E2: Regional Geology of the Ruhr district and remains of the historical mining period
in the south of Dortmund and Witten (Carboniferous, Cretaceous, Pleistocene)
Hartwig Gielisch

Field trip E3: The development of the Pleistocene landscape in the northern part of the
Lower Rhine Basin – insights into the past of the Geotop “Eiszeitlandschaft”
Skupin, K., Schollmayer, G., Prütfer, J., Gawlik, A.

Field trip E4: Hydrogeology, Mining and Water Supply in the Ruhr Area
Frank Wisotzky, Stefan Wohnlich

Field trip E5: Hagen: Geotrail “Kaisberg” and “Werdringen Castle” Museum
Ilka Siegwarth

Field trip E6: Cretaceous geosites of the eastern Ruhr Area and the southern Münsterland
Martin Hiss, Jörg Mutterlose

Field trip E7: Selected Geosites in the northern Rhenish Mountains
M. Piecha, K.-H. Ribbert

Field trip E8: Soil tour – „Mühlheimer Bodenschätze” and „The Rauen Quarry”
Ulrike Marx, Corinne Buch, Peter Keil, Udo Scheer

Field trips E9 und E10: From a coal mining area to the European Capital of Culture
Two field trips crosstown the Ruhr metropolis
Rainhard de Witt

Field trips E11: Geology and Industrial Heritage in the Ruhr Valley. Nightingale Mine in Witten
and Henrichshütte Ironworks Hattingen
Olaf Schmidt-Rutsch

Field trip E12: Field trip guide to sites of geological and palaeontological conservation in
the Rhineland area, western Germany
Christoph Hartkopf-Fröder, Hans Martin Weber, Renate Gerlach

E13: Carboniferous and Coal in the Ruhr Valley
Volker Wrede

Field trip E14: Ruhr Museum – Zollverein Coal Mining-Complex – Industrial Nature
Ulrike Stottrop, Udo Scheer
