About the Author ix
Series Preface x
Preface xi

1 Applications of Advanced Composites in Aircraft Structures 1
   References 7

2 Cost of Composites: a Qualitative Discussion 9
   2.1 Recurring Cost 10
   2.2 Nonrecurring Cost 18
   2.3 Technology Selection 20
   2.4 Summary and Conclusions 27
   Exercises 30
   References 30

3 Review of Classical Laminated Plate Theory 33
   3.1 Composite Materials: Definitions, Symbols and Terminology 33
   3.2 Constitutive Equations in Three Dimensions 35
   3.2.1 Tensor Transformations 37
   3.3 Constitutive Equations in Two Dimensions: Plane Stress 39
   Exercises 52
   References 53

4 Review of Laminate Strength and Failure Criteria 55
   4.1 Maximum Stress Failure Theory 57
   4.2 Maximum Strain Failure Theory 58
   4.3 Tsai–Hill Failure Theory 58
   4.4 Tsai–Wu Failure Theory 59
   4.5 Other Failure Theories 59
   References 60

5 Composite Structural Components and Mathematical Formulation 63
   5.1 Overview of Composite Airframe 63
      5.1.1 The Structural Design Process: The Analyst's Perspective 64
8.4 Beam on an Elastic Foundation under Compression
8.5 Crippling
8.5.1 One-Edge-Free (OEF) Crippling
8.5.2 No-Edge-Free (NEF) Crippling
8.5.3 Crippling under Bending Loads
8.5.4 Crippling of Closed-Section Beams
8.6 Importance of Radius Regions at Flange Intersections
8.7 Inter-rivet Buckling of Stiffener Flanges
8.8 Application: Analysis of Stiffeners in a Stiffened Panel under Compression
Exercises
References

9 Skin-Stiffened Structure
9.1 Smearing of Stiffness Properties (Equivalent Stiffness)
9.1.1 Equivalent Membrane Stiffnesses
9.1.2 Equivalent Bending Stiffnesses
9.2 Failure Modes of a Stiffened Panel
9.2.1 Local Buckling (Between Stiffeners) Versus Overall Panel Buckling (the Panel Breaker Condition)
9.2.2 Skin–Stiffener Separation
9.3 Additional Considerations for Stiffened Panels
9.3.1 'Pinching' of Skin
9.3.2 Co-Curing Versus Bonding Versus Fastening
Exercises
References

10 Sandwich Structure
10.1 Sandwich Bending Stiffnesses
10.2 Buckling of Sandwich Structure
10.2.1 Buckling of Sandwich Under Compression
10.2.2 Buckling of Sandwich Under Shear
10.2.3 Buckling of Sandwich Under Combined Loading
10.3 Sandwich Wrinkling
10.3.1 Sandwich Wrinkling Under Compression
10.3.2 Sandwich Wrinkling Under Shear
10.3.3 Sandwich Wrinkling Under Combined Loads
10.4 Sandwich Crimping
10.4.1 Sandwich Crimping Under Compression
10.4.2 Sandwich Crimping Under Shear
10.5 Sandwich Intracellular Buckling (Dimpling) under Compression
10.6 Attaching Sandwich Structures
10.6.1 Core Ramp-Down Regions
10.6.2 Alternatives to Core Ramp-Down
Exercises
References
