Contents

Technical Sessions

Session 1

Stationary and Trellis Encoding for IID Sources and Simulation
Mark Z. Mao and Robert M. Gray
Stanford University
3

Bounding the Rate Region of Vector Gaussian Multiple Descriptions
with Individual and Central Receivers
Guoqiang Zhang, W. Bastiaan Kleijn, and Jan Østergaard†
KTH - Royal Institute of Technology, ‡Aalborg University
13

Arbitrary Directional Edge Encoding Schemes for the Operational
Rate-Distortion Optimal Shape Coding Framework
Zhongyuan Lai, Junhuan Zhu, Zhou Ren, Wenyu Liu, and Baolan Yan†
Huazhong University of Science and Technology, ‡Huazhong Normal University
20

Maximum Mutual Information Vector Quantization of Log-Likelihood
Ratios for Memory Efficient HARQ Implementations
Matteo Danieli, Søren Forchhammer, Jakob Dahl Andersen,
Lars P. B. Christensen†, and Søren Skougaard Christensen†
Technical University of Denmark, ‡Nokia Denmark
30

An MCMC Approach to Lossy Compression of Continuous Sources
Dror Baron and Tsachy Weissman†
Technion – Israel Institute of Technology, ‡Stanford University
40

Session 2

Local Average-Based Model of Probabilities for JPEG2000 Bitplane Coder
Francesc Auli-Llinàs
Universitat Autònoma de Barcelona, Spain
59

On the Adaptive Coefficient Scanning of JPEG XR/HD Photo
Vanessa Testoni, Max H. M. Costa, Darko Kirovski†, and Henrique S. Malvar†
University of Campinas - Unicamp, ‡Microsoft Research
69

Spatial Constant Quantization in JPEG XR is Nearly Optimal
Thomas Richter
University of Stuttgart
79

Subsampling-Adaptive Directional Wavelet Transform for Image Coding
Jizheng Xu and Feng Wu
Microsoft Research Asia
89
Smart JPIP Proxy Server with Prefetching Strategies .......................................................... 99
José Lino Monteagudo-Pereira, Francesc Auli-Llinàs, Joan Serra-Sagristà,
and Joan Bartrina-Rapesta
Universitat Autònoma de Barcelona, Spain
A Lossless Circuit Layout Image Compression Algorithm for Maskless Lithography Systems ......................................................... 109
Jeehong Yang and Serap A. Savari†
University of Michigan, †Texas A&M University

Session 3

Estimation-Theoretic Delayed Decoding of Predictively Encoded Video Sequences ................................................................. 119
Jingning Han, Vinay Melkote, and Kenneth Rose
University of California, Santa Barbara
Causal Transmission of Colored Source Frames over a Packet Erasure Channel ........ 129
Ying-zong Huang, Yuval Kochman, and Gregory W. Wornell
Massachusetts Institute of Technology
Spatially Scalable Video Coding Based on Hybrid Epitomic Resizing .................. 139
Qijun Wang, Ruimin Hu, and Zhongyuan Wang
Wuhan University
Information Flows in Video Coding ............................................................... 149
Jia Wang and Xiaolin Wu†
Shanghai Jiao Tong University, †McMaster University

Session 4

Optimized Analog Mappings for Distributed Source-Channel Coding .................. 159
Emrah Akyol, Kenneth Rose, and Tor Ramstad†
University of California, Santa Barbara, †Norwegian University of Science and Technology
A SAT-Based Scheme to Determine Optimal Fix-Free Codes ......................... 169
Navid Abedini, Sunil P. Khatri, and Serap A. Savari
Texas A&M University
Efficient Algorithms for Constructing Optimal Bi-directional Context Sets ........ 179
Fernando Fernández, Alfredo Viola, and Marcelo J. Weinberger†
Universidad de la República, Montevideo, Uruguay, †Hewlett Packard Laboratories
On Computation of Performance Bounds of Optimal Index Assignment ........... 189
Xiaolin Wu, Hans D. Mittelmann†, Xiaohan Wang‡, and Jia Wang‡
McMaster University, †Arizona State University, ‡Research in Motion,
‡Shanghai Jiaotong University

Session 5

A New Searchable Variable-to-Variable Compressor ........................................... 199
Nieves R. Brisboa, Antonio Fariña, Juan R. López, Gonzalo Navarro†,
and Eduardo R. López
University of A Coruña, †University of Chile
Neural Markovian Predictive Compression: An Algorithm for Online Lossless Data Compression .......................................................... 209
   Erez Shermer†, Mireille Avigal†, and Dana Shapira‡
   †The Open University of Israel, ‡Ashkelon Academic College
An Efficient Algorithm for Almost Instantaneous VF Code Using Multiplexed Parse Tree ................................................................. 219
   Satoshi Yoshida and Takuya Kida
   Hokkaido University
Lossless Data Compression via Substring Enumeration .................................................. 229
   Danny Dubé and Vincent Beaudoin
   Université Laval
LZ77-Like Compression with Fast Random Access ....................................................... 239
   Sebastian Kreft and Gonzalo Navarro
   University of Chile
Bidirectional Delta Files .......................................................................................... 249
   Dana Shapira‡, † and Michael Kats‡
   †Ashkelon Academic College, ‡The Open University of Israel

Session 6

Bandwidth Expansion in a Simple Gaussian Sensor Network Using Feedback .............. 259
   Anna N. Kim and Tor A. Ramstad
   Norwegian University of Science and Technology
A Flexible Multiple Description Coding Scheme Based on Rateless Codes .................... 269
   O. Y. Bursalioglu and G. Caire
   University of Southern California
Fixed-Lag Smoothing for Low-Delay Predictive Coding with Noise Shaping for Lossy Networks .................................................................. 279
   Thomas Arildsen, Jan Østergaard, Manohar N. Murthy, Søren Vang Andersen, and Søren Holdt Jensen
   Aalborg University, †University of Miami
Rate-Compatible Slepian-Wolf Coding with Short Non-Binary LDPC Codes ............... 288
   Kenta Kasai, Takayuki Tsujimoto, Ryutaroh Matsumoto, and Kohichi Sakaniwa
   Tokyo Institute of Technology
A Systematic Distributed Quantizer Design Method with an Application to MIMO Broadcast Channels ............................................ 297
   Erdem Koyuncu and Hamid Jafarkhani
   University of California, Irvine
Scalar Quantizer Design for Noisy Channel with Decoder Side Information ................. 307
   Sepideh Shamaie and Farshad Lahouti
   University of Tehran

Session 7

A Symbolic Dynamical System Approach to Lossy Source Coding with Feedforward ........................................................................... 317
   Ofer Shayevitz
   University of California, San Diego
When Huffman Meets Hamming: A Class of Optimal Variable-Length Error Correcting Codes ................................. 327

Serap A. Savari and Jörg Kliewer†
Texas A&M University, †New Mexico State University

Lossless Compression Based on the Sequence Memoizer ................................................................. 337

Jan Gasthaus, Frank Wood†, and Yee Whye Teh
UCL, †Columbia University

A Similarity Measure Using Smallest Context-Free Grammars......................................................... 346

Daniele Cerra† and Mihai Datcu†, t
†German Aerospace Center (DLR), tTélécom Paris

Session 8

On the Systematic Measurement Matrix for Compressed Sensing
in the Presence of Gross Errors........................................................................................................ 356

Zhi Li, Feng Wu†, and John Wright†
Stanford University, †Microsoft Research Asia

Xampling: Analog Data Compression .............................................................................................. 366

Moshe Mishali and Yonina C. Eldar
Technion - Israel Institute of Technology

Tanner Graph Based Image Interpolation.......................................................................................... 376

Ruiqin Xiong and Wen Gao
Peking University

Session 9

Lossless Reduced Cutset Coding of Markov Random Fields ....................................................... 386

Matthew G. Reyes and David L. Neuhoff
University of Michigan

gFPC: A Self-Tuning Compression Algorithm .................................................................................. 396

Martin Burscher and Paruj Ratanaworabhan†
University of Texas at Austin, †Kasetsart University

Advantages of Shared Data Structures for Sequences of Balanced Parentheses........................ 406

Simon Gog and Johannes Fischer†
Universität Ulm, †Universität Tübingen

Segment-Parallel Predictor for FPGA-Based Hardware Compressor
and Decompressor of Floating-Point Data Streams to Enhance Memory

I/O Bandwidth .................................................................................................................................... 416

Kentaro Sano, Kazuya Katahira, and Satoru Yamamoto
Tohoku University

I/O-Efficient Compressed Text Indexes: From Theory to Practice .................................................. 426

Sheng-Yuan Chiu, Wing-Kai Hon, Rahul Shah†, and Jeffrey Scott Vitter†
National Tsing Hua University, †Louisiana State University, †Texas A&M University
Session 10

Enhanced Adaptive Interpolation Filters for Video Coding
Yan Ye, Giovanni Motta†, and Marta Karczewicz‡
Dolby Laboratories, †Hewlett Packard Corp., ‡Qualcomm Inc.

Packet Dropping for Widely Varying Bit Reduction Rates Using a Network-Based Packet Loss Visibility Model
Ting-Lan Lin, Jihyun Shin, and Pamela Cosman
University of California, San Diego

Auto Regressive Model and Weighted Least Squares Based Packet Video Error Concealment
Yongbing Zhang, Xinguang Xiang, Siwei Ma†, Debin Zhao, and Wen Gao‡
Harbin Institute of Technology, †Peking University

A Hybrid Media Transmission Scheme for Wireless VoIP
Ala’ Khalifeh and Homayoun Yousefi’zadeh
University of California, Irvine

Low-Complexity PARCOR Coefficient Quantizer and Prediction Order Estimator for G.711.0 (Lossless Speech Coding)
Yutaka Kamamoto, Takehiro Moriya, and Noboru Harada
NTT Communication Science Laboratories

Session 11

Shape Recognition Using Vector Quantization
Antonella Di Lillo, Giovanni Motta†, and James A. Storer
Brandeis University, †Hewlett-Packard Corp.

Optimization of Overlapped Tiling for Efficient 3D Image Retrieval
Zihong Fan and Antonio Ortega
University of Southern California

Depth Compression of 3D Object Represented by Layered Depth Image
Sang-Young Park and Seong-Dae Kim
KAIST
Poster Session
(listed alphabetically by first author)

Modeling Parallel Texts for Boosting Compression .................................................. 517
   Joaquín Adiego, Miguel A. Martínez-Prieto, Javier E. Hoyos-Torío,
   and Felipe Sánchez-Martínez
   Universidad de Valladolid, Universitat d'Alacant

Lossless Compression of Maps, Charts, and Graphs via Color Separation ..................... 518
   Saif alZahir and Arber Borici
   University of N. British Columbia

Local Modeling for WebGraph Compression .................................................................. 519
   Vo Ngoc Anh and Alistair Moffat
   University of Melbourne

Modeling the Quantization Staircase Function ............................................................ 520
   Salman Aslam, Aaron Bobick, and Christopher Barnes
   Georgia Institute of Technology

Dual Contribution of JPEG 2000 Images for Unidirectional Links ................................. 521
   Jesús M. Barbero, Eugenio Santos, and Abraham Gutierrez
   Polytechnic University of Madrid

Analysis of LDPC Codes for Compression of Nonuniform Sources
with Side Information Using Density Evolution .......................................................... 522
   Raghunadh K. Bhattar, K. R. Ramakrishnan, and K. S. Dasgupta
   IIISC, ISRO

Multi-resolution Mean-Shift Algorithm for Vector Quantization .................................. 523
   P. L. M. Boutefroy, A. Bouzerdoum, A. Beghdadi, and S. L. Phung
   University of Wollongong, Université Paris

A Pseudo-Random Number Generator Based on LZSS .................................................. 524
   Weiling Chang, Binxing Fang, Xiaochun Yun, Shupeng Wang, and Xiangzhan Yu
   Harbin Institute of Technology, Chinese Academy of Science

Inverted Index Compression for Scalable Image Matching ............................................ 525
   David M. Chen, Sam S. Tsai, Vijay Chandrasekhar, Gabriel Takaes,
   Ramakrishna Vedantham, Radek Grzeszczuk, and Bernd Girod
   Stanford University, Nokia Research Center

A Novel Frame Error Concealment Algorithm Based on Dynamic Texture Synthesis ........................................ 526
   Hao Chen, Ruimin Hu, Dan Mao, and Zhongyuan Wang
   Wuhan University

Image Compression Using the DCT and Noiselets: A New Algorithm
and Its Rate Distortion Performance ........................................................................... 527
   Zhuoyuan Chen, Jiangtao Wen, Shiqiang Yang, Yuxing Han
   Tsinghua University, University of California, Los Angeles

The Non-existence of Length-5 Perfect Slepian-Wolf Codes of Three Sources .............. 528
   Samuel Cheng and Rick Mat
   University of Oklahoma, Hong Kong University of Science and Technology
Robust Detection and Lossless Compression of the Foreground in Magnetic Resonance Images .......................................................... 529
  Andrés Corvetto, Ana Ruedin, and Daniel Acevedo
  Universidad de Buenos Aires
Tree Structure Based Analyses on Compressive Sensing for Binary Sparse Sources ................................................................. 530
  Jingjing Fu†, Zhouchen Lin†, Bing Zeng†, and Feng Wu†
  †Hong Kong University of Science and Technology, ‡Microsoft Research Asia
Data Compression Based on a Dictionary Method Using Recursive Construction of T-Codes ......................................................... 531
  Kenji Hamano and Hirosuke Yamamoto
  The University of Tokyo
Lossless Compression of Mapped Domain Linear Prediction Residual for ITU-T Recommendation G.711.0 ........................................... 532
  Noboru Harada, Yutaka Kamamoto, and Takehiro Moriya
  NTT Communication Science Laboratories
A Fast Compact Prefix Encoding for Pattern Matching in Limited Resources Devices ................................................................. 533
  S. Harrusi, A. Averbuch, and N. Rabin
  Tel Aviv University
Compressed Indexes for Approximate Library Management .............................................................................................................. 534
  Wing-Kai Hon, Winson Wu, and Ting-Shuo Yang
  National Tsing Hua University
Two-Step Coding for High Definition Video Compression ............................................................................................................. 535
  Wenfei Jiang, Wenyu Liu, Longin Jan Latecki†, Hui Liang, Changqing Wang, and Bing Feng
  Huazhong University of Science and Technology, †Temple University
Exploiting Wavelet-Domain Dependencies in Compressed Sensing ................................................................................................. 536
  Yookyung Kim, Mariappan S. Nadar‡, and Ali Bilgin
  University of Arizona, ‡Siemens Corporation
Arbitrary ROI-Based Wavelet Video Coding ................................................................................................................................. 537
  Xuguang Lan, Nanning Zheng, Wen Ma, Miao Hui, and Jianru Xue
  Xi'an Jiaotong University
Optimum String Match Choices in LZSS ........................................................................................................................................ 538
  Graham Little and James Diamond
  Acadia University
Error Resilient Dual Frame Motion Compensation with Uneven Quality Protection ............................................................... 539
  Da Liu, Debin Zhao, and Siwei Ma†
  Harbin Institute of Technology, †Peking University
A New Approach to Time-Frequency Analysis .............................................................................................................................. 540
  Xiteng Liu
  McMaster University
An Integrated Algorithm for Fractional Pixel Interpolation and Motion Estimation of H.264 ........................................................... 541
  Jiyuan Lu†, Peizhao Zhang‡, Hongyang Chao‡, and Paul Fisher‡
  †Sun Yat-Sen University, ‡Guangdong University of Finance, ‡Winston-Salem State University
A Matrix Completion Approach to Reduce Energy Consumption in Wireless Sensor Networks

Angshul Majumdar and Rabab K. Ward
University of British Columbia

High-Order Text Compression on Hierarchical Edge-Guided
Miguel A. Martínez-Prieto, Joaquín Adiego, Pablo de la Fuente,
and Javier D. Fernández
University of Valladolid, Spain

TreeZip: A New Algorithm for Compressing Large Collections of Evolutionary Trees
Suzanne J. Matthews, Seung-Jin Sul, and Tiffani L. Williams
Texas A&M University

Lossy Audio Compression via Compressed Sensing
Rubem J. V. de Medeiros, Edmar C. Gurjão, and João M. de Carvalho
Federal University of Campina Grande

Enhanced Lossless Coding Tools of LPC Residual for ITU-T G.711.0
Takehiro Moriya, Yutaka Kamamoto, and Noboru Harada
NTT Communication Science Laboratories

Block Compressed Sensing of Images Using Directional Transforms
Sungkwang Mun and James E. Fowler
Mississippi State University

On the Overflow Probability of Fixed-to-Variable Length Codes
with Side Information
Ryo Nomura and Toshiyasu Matsushima
Aoyama Gakuin University, †Waseda University

Data Compression Technology Dedicated to Distribution and Embedded Systems
Junichi Odagiri, Noriko Itani, Yasuhiro Nakano, and David E. Culler
Fujitsu Laboratories LTD., †University of California, Berkeley

Analysis of Amplitude Quantization in ACELP Excitation Coding
Wisarn Patchoo, Thomas R. Fischer, Changho Ahn, and Sangwon Kang
Washington State University, †Hanyang University

LDPC Codes for Information Embedding and Lossy Distributed Source Coding
Mina Sartipi
University of Tennessee at Chattanooga

Horizontal Spatial Prediction for High Dimension Intra Coding
Pin Tao, Wenting Wu, Chao Wang, Mou Xiao, and Jiangtao Wen
Tsinghua University

Batch-Pipelining for H.264 Decoding on Multicore Systems
Tung-Hsun Tu and Chih-Wen Hsueh
National Taiwan University

Development of Optimum Lossless Compression Systems for Space Missions
Alberto G. Villafranca, †Jordi Portell, † and Enrique García-Berro
†Institut d'Estudis Espacials de Catalunya, †Universitat Politècnica de Catalunya,
University of Barcelona

Region Based Rate-Distortion Analysis for 3D Video Coding
Qiye Wang, Xiangyang Ji, Qionghai Dai, and Naiyao Zhang
Tsinghua University
