Contents

Part I Invited Talk

Combining Petri Nets and UML for Model-based Software Engineering
João Miguel Fernandes .................................................. 3

Part II Long Presentations

The Resource Allocation Problem in Software Applications: A Petri Net Perspective
Juan-Pablo López-Grao and José-Manuel Colom ..................... 7

Nets Within Nets Paradigm and Grid Computing
Fabio Farina and Marco Mascheroni .................................. 23

Verifying Reference Nets By Means of Hypernets: a Plugin for RENEW
Marco Mascheroni, Thomas Wagner and Lars Wustenberg .......... 39

Improving a Workflow Management System with an Agent Flavour
Daniel Moldt, José Quenum, Christine Reese and Thomas Wagner ...... 55
Part III Short Presentations

IRS-MT: Tool for Modeling Resource Allocation in Workflow Petri Nets  
_Piotr Chrzastowski-Wachtel and Jakub Rauch_ .......................... 73

Detecting and Repairing Unintentional Change on In-use Data in Concurrent Workflow Management System  
_Thi Thanh Huyen Phan and Koichiro Ochimizu_ .......................... 89

Automata and Petri Net Models for Visualizing and Analyzing Complex Questionnaires - A Case Study  
_Heiko Rölke_ .............................................................................. 111

Deadlock Control Software for Tow Automated Guided Vehicles using Petri Nets  
_Carlos Rovetto, Elia Esther Cano Acosta and José Manuel Colom Piazuelo_ ................................................................. 125

Taming the Shrew - Resolving Structural Heterogeneities with Hierarchical CPN  
_Manuel Wimmer, Gerti Kappel, Angelika Kusel, Werner Retschitzegger, Johannes Schoenboeck and Wieland Schwinger_ ......................... 141

Part IV Poster Abstracts

MATLAB / Simulink and Program Sketcher for Verification of Hybrid Petri Nets Implementation into Programmable Logic Controller  
_Luděk Chomát_ ............................................................................. 161

Instruction Pipeline Modeling using Petri Nets  
_Adam Husar, Tomas Hruska, Karel Masarik and Zdenek Prikryl_ ........ 163

BDD-based Bounded Model Checking for Elementary Net Systems  
_Artur Meski, Wojciech Penczek and Agata Polrola_ .......................... 165
