The 5th International Congress on the Science and Technology of Ironmaking

(ICSTI’09)

October 20—22, 2009
Shanghai, China

Organized by
The Chinese Society for Metals
Part B  Blast Furnace Ironmaking

B1-1 Ironmaking Process

B1-1.01 Advancement and Thought of BF Iron-Making Technology in Baosteel
ZHURen-liang and LI You-qing (Baoshan Iron & Steel Co Ltd) ........................................... 537

B1-1.02 Technological Reconstruction of Ansteel Ironmaking System Since “The Tenth Five-Year”
SHANG Ce, WANG Qian, WANG Bao-hai and TANG Qing-hua (Angang Steel Co Ltd)...... 544

B1-1.03 Developments in Blast Furnace Ironmaking
Chandan Barman Ray, Narayan Sengupta and Amitava Dasgupta (M.N. Dastur & Company (P) Ltd) .............................................................................................................. 549

B1-1.04 Progress in Technology of Vanadium-Bearing Titanomagnetite Smelting in Pangang
FU Wei-guo and XIE Hong-en (Panzhihua Iron & Steel Research Institute) ................. 554

B1-1.05 Technical Advance of TISCO Ironmaking
WANG Hong-bin and YAN Kui-hong (Taigang Stainless Steel Co Ltd) ......................... 560

B1-1.06 The Mini Blast Furnace Flex
Castro Jose Adilson (Federal Fluminense University) ......................................................... 564

B1-1.07 Progress of Iron-Making Technology for Special Ore in Baotou Steel
WU Hu-lin, SONG Guo-long and MA Xiang (Baotou Steel Group Co) ......................... 569

B1-1.08 Some Aspects of the Future of Blast Furnace Ironmaking The Process: Focusing on Low Cost Hot Metal
Maarten Geerdes, Roman Vaynshteyn and Reinoud van Laar (Danieli Corus BV) ......... 575

B1-1.09 Technique Index Analysis on Different Types of Blast Furnace
DUAN Dong-ping and LIU Wen-quan (Chinesé Academy of Sciences) ....................... 581

B1-2 Energy Saving and Emission Control

B1-2.01 Energy-Saving and Emission-Reducing of Blast Furnace Ironmaking Production in China
YANG Tian-jun, ZHANG Jian-liang and ZUO Hai-bin (University of Science and Technology Beijing) ................................ ................................................................. 587

B1-2.02 Optimization of Biomass Utilization for Reducing CO₂ in Ironmaking Process
Shigeru Ueda, Kentaro Watanabe, Kazunari Yanagiya, Ryo Inoue and Tatsuro Ariyama (Tohoku University) ....................................................................................................... 593

B1-2.03 Application of Dry Dedusting Technology in Ansteel New No.4 BF
LI Dong-sheng, FAN Chuan-chang, ZHU Jian-wei, LONG Cheng-jun and ZHONG Shan (Angang Steel Co Ltd) ........................................................................................... 600

B1-2.04 Energy and Exergy Analyses of Low Coke Blast Furnace Ironmaking
ZHANG Guangqing and Ostrovski Oleg (University of New South Wales) ................... 603

B1-2.05 Study on Dry Type Bag Filter Cleaning Technology of BF Gas at Large Blast Furnace
ZHANG Fu-ming (Shougang International Engineering Technology Co Ltd) .................. 608

B1-2.06 Optimization of Blast Furnace Operation Under Top Gas Recycling
Helle Hannu, Helle Mikko, Pettersson Frank and Saxén Henrik (Åbo Akademi University) ... 613
Proceedings of the 5th International Congress on the Science and Technology of Ironmaking

B1-2.07 **Discuss on Operation of Large-Scale BF With Low Fuel Rate**  
*MA Jin-fang, WAN Lei, JIA Guo-li and ZHANG Hai-bin* (Shougang Qian’an Iron & Steel Co Ltd).  
619

B1-2.08 **Study of Decreasing Energy Consumption in Ironmaking System**  
*ZHANG Qi, CAI Ji-ju, YAO Tong-hui, WU Fu-zhong and JIA Feng-rui* (Northeastern University).  
624

*ZHOU Yu-sheng, XU Hui, ZHANG You-ping and FENG Hua-tang* (Baoshan Iron & Steel Co Ltd).  
628

B1-2.10 **Jigang Develop Circular Economy Strongly to Realize Energy-Saving and Emission-Cutting in Ironmaking**  
*LIU Chong-ting, WANG Liang-zhou, KONG Fan-shuo, QI Hua and JIA Yong* (Jinan Iron and Steel Group Co).  
633

B1-2.11 **Independent Innovation and Sustainable Development of Blast Furnace Power Recovery Turbine Train**  
*LIU Li-guang, YE Chang-qing and SUN Hong-sheng* (Xi’an Shaangu Power Co Ltd).  
636

B1-2.12 **Research and Application of Energy-Saving and Ejection-Decreasing Technology of 3200m³ Blast Furnace in Tangshan Steel**  
*ZHAO Jun, YOU Xin-dong, WANG Yi-guang, LI Ming and GUO Xiu-ying* (Tangshan Iron and Steel Co Ltd).  
641

B1-2.13 **The Influence of Domestic Sewage on Circulated Utilization of BFG Washing Water**  
*CHENG Xiang-li, CANG Da-qiang, SUN Xiao-yue and CHAI Qing-feng* (University of Science and Technology Beijing).  
647

B1-2.14 **Application of Micro-Pore Insulating Brick in Torpedo and Energy Conservation Analysis**  
*LI Hai-feng, ZHOU Jun, ZHANG Mei-jie, HUANG Ao and LIN Xiao-long* (China University of Geosciences).  
651

B1-2.15 **Changes the Air Volume and Reduce the Load to Realization 20000m³/h Air Separation Installment's Energy Conservation Practice**  
*WANG Rong-hua and ZHANG Jian* (Handan Iron & Steel Group Co Ltd).  
655

**B2-1 Blast Furnace Performance**

B2-1.01 **Low Coke Rate Operation of Blast Furnace by Controlling Size of Coke Mixed Into Ore Layer**  
*Muneyoshi Sawayama, Kazuya Miyagawa, Kentaro Nozawa, Yoshiyuki Matsui and Ko-ichiro Shibata* (KOBE Steel Group).  
659

B2-1.02 **Practices of Blast Furnace Intensifying Operation at WISCO**  
*XIONG Ya-fei, YANG Jia-long and LI Huai-yuan* (Wuhan Iron & Steel Co).  
664

B2-1.03 **Successful Blow-in of Essar Steel Algoma Blast Furnaces 6 and 7**  
*Jones Lornes, Vannarrum Diana, Tuomi Jonathan, Dutta Devbrat, Thibodeau Darin, Kuuskman Peter, Krassavtsev Alex, Quigley Kelly, Liu Sining, Hyde J Barry and Cameron Ian* (Essar Steel Algoma Inc).  
672

B2-1.04 **Efficiency of Using Briquettes From Technogenic and Natural Raw Materials in Blast Furnace Process**  
*I F Kurunov, V N Titov, E M Scheglov, D N Tikhonov and A I Kononov* (Novolipetsk Steel)…  
678
Proceedings of the 5th International Congress on the Science and Technology of Ironmaking

B2-1.05 Industrial Practice of Low Fuel Rate and High PCI Rate at Shouqin No.1 BF
HAN Qing, DING Ru-cai, WU Keng, WEI Shao-hua and ZHU Li (Shouqin Metal Materials Co Ltd) ................................................................. 685

B2-1.06 Effects of Operation Parameters on Drainage Behavior in a Blast Furnace Hearth
Zhou Ping, D (Frank) Huang and Chen Q Zhou (Central South University) ................................................................. 691

B2-1.07 MAC Lump Properties Study and Plant Performance at Baosteel Stainless Steel
ZHANG Zheng-wei, HU Xiao-ming, DU Hong-jin, Honeyands Tom TA and LIN Li-quan (Baosteel Stainless Steel Co) ................................................................. 696

B2-1.08 Operational Research to Optimize the Iron Raw Materials for Blast Furnace Burden
Destro Elton, Assis Paulo Santos, Silva Guilherme Liziover Ruggio, Carias Rafael Dário Alves and Oliveira Felipe Otávio Morato (Federal University of Ouro Preto) ................................................................. 701

B2-1.09 Causes and Solutions on Operation Difficulties of 2000 m³ BF No.5 of Handan Iron & Steel Co
LI Gui-yang, ZHAO Gui-xi and BI Si-you (Handan Iron & Steel Group Co Ltd) ................................................................. 706

B2-1.10 Research on Tuyere Coke Sampling and Instruction for Blast Furnace Operation
ZHU Wei-chun, ZHANG Xue-song, MA Li, WANG Zi-tong and WANG Xiao-peng (Shougang Group) ................................................................. 711

B2-1.11 The Relining and Blowing-in of Baosteel No.2 Blast Furnace
ZHU Ren-liang, ZHU Jin-ming, LI Jun, Xiang Zhong-yong, OU Yang-biao and ZHOU Zhong-ming (Baoshan Iron & Steel Co Ltd) ................................................................. 716

B2-1.12 Long Campaign Life and Running Smoothly by Adjusting Burden Distribution Regulation
SHANG Ce, ZHANG Yan-hui and JIN Guo-yi (Ansteel Limited Co) ................................................................. 722

B2-1.13 The Law Discussion and Analysis of Burden Distribution Test of 5500m³ BF
YAN Shu-wu, ZHANG Jian and SU Wei (Beijing Shougang International Engineering Technology Co Ltd) ................................................................. 727

B2-1.14 Blow-in of Blast Furnace No.2 in Gerdlau Acominas S A, Brazil
ZOU Zhong-ping, XI Bin, WANG Liang and Marcelo Alves de Carvalho (CISDI Engineering Co Ltd) ................................................................. 731

B2-1.15 The Practices on Rapid Restart of No. 3 BF in Shougang Group
ZHANG He-shun, CHEN Jun and WEI Song-min (Shougang Group) ................................................................. 738

B2-1.16 Influence of the Change in Raw Material on Blast Furnace and the Countermeasures
LIN Cheng-cheng and WANG Shi-bin (Baoshan Iron & Steel Co Ltd) ................................................................. 743

B2-1.17 Discussing the Influence Factors of Flow Gas Distribution of QIAN GANG BF Throat
ZHANG Xue-song and ZHU Wei-chun (Shougang Group) ................................................................. 748

B2-2 Tuyere Injection

B2-2.01 An Industrial Investigation of Bi-PCI Process in a Blast Furnace
SHEN Feng-man, DING Zhi-min, YANG Wen-guang, JIANG Xin, MU Lin and SHEN Yan-song (Northeastern University) ................................................................. 753

B2-2.02 Recycling of Fine Oily Scale by Injection Into Blast Furnace
Ivan Kurunov, Dmitriy Tikhonov and Aleksandr Kononov (Novolipetsk Steel) ................................................................. 758

B2-2.03 Blast Furnace Technology With Charcoal Injection: Technological and Ecological Aspects
Babich Alexander, Senk Dieter and Fernandez Migue (RWTH Aachen University) ................................................................. 762
B2-2.04 Technical Research on Economical Pulverized Coal Injection for Blast Furnace
XU Wan-ren, LI Zhao-yi and GUO Yan-ling (Baoshan Iron & Steel Co Ltd) .......................... 767

B2-2.05 An Estimation of PC Injection Efficiency in Ukraine
Yaroshesvskyy Stanislav, Kochura Volodymyr, Lystopadov Vladislav, Kaznetsov Alexandr and Braga Vitaly (Donetsk National Technical University) .................................................. 771

B2-2.06 Pulverized Coal Combustion Catalyzed by CeO₂ Based on Iron-Making System
GONG Xu-zhong, GUO Zhan-cheng and WANG Zhi (Chinese Academy of Sciences) .... 777

B2-2.07 New Design Methods for Coal Distribution Systems for Blast Furnace Coal Injection
Hilgraf Peter and Nolde Hans-dieter (Claudius Peters Technologies GmbH) ..................... 783

B2-2.08 Research and Practice on Coal Utilization Under High PCI Rate in Shougang Qiangang BF
MA Ze-jun, ZHU Wei-chun, WANG Dong-qing and QING Ge-le (Shougang Group) ............... 788

B2-2.09 Optimisation of the Design of Pulverized Coal Injection Lances: From Concept to Full Scale Implementation at BlueScope Steel’s BF 6
Daniel Maldonado, Paul Zulli, Peter Austin, Mark Walsh, John Mathieson, Baoyu Guo, Aibing Yu and Harold Rogers (BlueScope Steel) .......................................................... 793

B2-2.10 Low Coke Rate Ironmaking in Blast Furnace With Hot Gas Injection
ZHANG You-ping, ZHOU Yu-sheng and LI Zhao-yi (Baoshan Iron & Steel Co Ltd) ................. 800

B2-2.11 Study of the Behavior of Biomass, Coal and Mixtures at Their Injection Into Blast Furnaces
Machado Janaina, Osório Eduardo, Vilela Antônio, Babich Alexander, Gudenau Heimrich and Senk Dieter (Federal University of Rio Grande do Sul) ........................................... 804

B2-2.12 Experiment on Combustion-Supporting Agent on PCI for Combustibility of Pulverized Coal
YANG Shuang-ping, JU Jian-tao, DONG Jie, WANG Miao and LIU Hua-xin (Xi’an University of Architecture and Technology) ................................................................. 809

B2-2.13 Coal Conversion Reactions and Their Impact on BF PCI Operations
L Lu, V Sahajwalla and A McLean (CSIRO Minerals) .......................................................... 813

B2-2.14 Results of Dense Phase Pulverised Coal Injection System
Schulte van Bentheim Michael (Küttners GmbH & Co KG) ................................................. 818

B2-2.15 Application and Research on Coal Blending Model for Pulverized Coal Injection of Blast Furnace
MA Ze-jun, ZHU Wei-chun, MA Li, PAN Wen and WANG Dong-qing (University of Science and Technology Beijing) ................................................................. 821

B2-2.16 Research and Development of Automatic Coal Injection Technology for No.3 BF in Shougang
WANG Sheng, CHEN Jun and MA Hong-bin (Shougang Group) ............................................. 825

B3-1 Blast Furnace Maintenance and Campaign Life
B3-1.01 Practice and Concept for Extending Blast Furnace Campaign Life at WISCO
ZHANG Shou-rong and YU Zhong-jie (Wuhan Iron and Steel Co) ........................................ 830

B3-1.02 3-D CFD Blast Furnace Hearth Model
D (Frank) Huang and C Q Zhou (ArcelorMittal) ................................................................. 836

B3-1.03 Production Practice of Baosteel Large BF’s Long Campaign Life
ZHANG Long-lai, JIN Jue-sheng and JU Qin-zhang (Baoshan Iron & Steel Co Ltd) .................. 844

B3-2.03 Innovation and Development of Shougang Blast Furnace Expert System
MA Fu-tao and ZHOU Jian-ping (Shougang Automation and Information Technology Co Ltd).................................................. 923

B3-2.04 Development of Monitoring & Diagnosis System Based on Multivariate Statistical Analysis Methods in Blast Furnace Process
Tae-hwa Choi and Jung-il Kim (POSCO)................................................................. 927

B3-2.05 Development of Specific Measuring Techniques in Ironmaking Process
SHA Yong-zhi, CAO Jun and WANG Feng-qi (Central Iron & Steel Research Institute)........... 929

B3-2.06 Blast Furnace Operation Using Information on Active Burden Weight
Marsuverskiy Boris A (Mechel Management OOO)................................................... 933

B3-2.07 Development of the FCG Mathematical Model for the Bell-less Blast Furnace in Ansteel
CHE Yu-man, LI Lian-cheng, SUN Bo, SUN Peng and GUO Tian-yong (Angang Steel Co Ltd).................................................. 938

B3-2.08 Probing the Inner Structure of a Blast Furnace by Cosmic-Ray Muon Radiography
Akihiro Shinotake, Shinroku Matsuzaki, Kazuya Kunitomo, Masaaki Naito, Misao Hashimoto, Asao Hatanaka, Toshihiro Nagane, Kanteada Nagamine and Hiroyuki Tanaka (Nippon Steel Co).................................................. 942

B3-2.09 Study of Burden Distribution Control Based on Infrared Image Pattern Recognition and Case-Based Inference
LK Chen (Wuhan Iron & Steel Co)........................................................................ 947

B3-2.10 Non-Destructive Testing (NDT) and Inspection of the Blast Furnace Refractory Lining by Stress Wave Propagation Technique
Sadri Afsin and Gebski Pawel (Hatch Ltd).............................................................. 951

B3-2.11 Laser Detect Technology and Burden Distribution Computer Simulation Model on BF
GAO Zheng-kai and DAI Jian-hua (University of Science and Technology Beijing)................ 956

B3-2.12 Research and Application of 3D Simulation of Dynamic Imaging for the BF Burden Surface
LI Yi-wei, CHEN Xian-zhong, WU Yun and LIU Feng-mei (Baoshan Iron & Steel Co Ltd)........ 960

B3-2.13 Particle Flow Transition During Blast Furnace Bin Discharge
Pinson David John, Chew Sheng Jason and Austin Peter Richard (BlueScope Steel).................. 965

B3-2.14 Rules Mining and Fuzzy Inferring for Temperature Forecasting of Hot Metal in BF Production
GUO Hong-wei, ZHANG Jian-liang, ZUO Hai-bin, LIU Zheng-jian and YANG Tian-jun (University of Science and Technology Beijing)........................................ 970

B3-2.15 Optimization of Molten Iron Flow Behavior in Ladle With Blowing Gas
ZHANG Mei-jie, XUAN Wu-guo, HUANG Ao and LIN Xiao-long (Wuhan University of Science and Technology).............................................. 975

B4-1 Hot Blast Stove; Design and Equipment
B4-1.01 Shaftless Hot Stove– Reliable Construction for Blast Heating up to the High Temperatures
Kalugin Iakov (Kalugin JSC)................................................................................ 979

B4-1.02 Technology Progress on High Blast Temperature of Hot Blast Stove in Shougang
ZHAO Min-ge and CHEN Guan-jun (Shougang Group)........................................... 985
B4-1.03 3D- Numerical Simulation Research of the Kalugin Hot Blast Stove
CHEN Yi-sheng, WANG Wei-li and HE Zhen (Inner Mongolia University of Science and Technology)......................................................... 990

B4-1.04 Advancement of Hot Blast Stove Technology in China
WU Qi-chang and FENG Yan-bo (Capital Engineering and Research Incorporation Ltd)...... 994

B4-1.05 Study and Application of Ceramic Burner of Hot Blast Stove for Blast Furnace
DAI Fang-qin, LI Shao-hua and LIU Ke (Wuhan Research Institute of Metallurgical Construction)................................................................. 1002

B4-1.06 Research on the Optimization Application of BF Hot Stove Energy-Saving Coating
WANG Miao, BAI Hao, ZHAO Li-hua, CANG Da-qiang, CHENG Xiang-li and ZHOU Hui-min (University of Science and Technology Beijing)................................. 1007

B4-1.07 Methodology and Results of Ironmaking Technology Selection for Specific Site Conditions
Gordon Yakov, Freistlich Michiel and Els Jeanne (Hatch)......................................................... 1011

B4-1.08 A New Design System of Blast Furnace
XIANG Zhong-yong, CHEN Ying-ming and ZOU Zhong-ping (CISDI Engineering Co Ltd)................................................................. 1016

B4-1.09 The Bell-less Rotary Charging Unit of the New Generation is a Break-Through in the Blast Furnace Charging Technology
B Boranbaev, Y Glazer, V Vakulin and A Sirkar (Totem Co Ltd)............................................. 1023

B4-1.10 Design of 5500m³ Blast Furnace at Shougang Jingtang
ZHANG Fu-ming, QIAN Shi-chong, ZHANG Jian and MAO Qing-wu (Beijing Shougang International Engineering Technology Co Ltd)........................................ 1029

B4-1.11 Blast Furnace Hearth Design Evolution
McNally Rory, Serradeill Muriel and Roulet Frederic (Saint-Gobain Industrial Ceramics)...... 1034

B4-1.12 Iron-Making Technology Selection Using a Fuzzy Hierarchical TOPSIS Method
Nasser Towhidi, Reza Tavakkoli-Moghaddam and Mohammad Peymandar (University of Teheran)................................................................. 1039

B4-1.13 Some Aspects of the Future of Blast Furnace Iron-Making and the Equipment: Blast Furnace Design for Low Cost Hot Metal
Reinoud van Laar, Maarten Geerdes and Roman Vaynshteyn (Danieli Corus)..................... 1045

B4-1.14 Optimization of Melted Iron Flow Behavior in Torpedo With Gas Blowing at Bottom
HUANG Ao, GU Hua-zhi, WANG Hou-zhi and ZHANG Mei-jie (Wuhan University of Science and Technology)..................................................... 1050

B4-1.15 Technology of High Blast Air Temperature for BF in Shougang Qian’an Iron and Steel Co Ltd
WANG Jian-min, MA Jin-fang, WANG Wei-ping and LU Jie (Shougang Qian’an Iron & Steel Co Ltd)........................................................................ 1054

B4-1.16 Numerical Simulating the Effects of High Radiative Coating on Heat Transfer Process in Regenerator of BF Hot Stove
ZHOU Hui-min, ZHANG Hao, CANG Da-qiang, BAI Hao, WANG Yuan-cheng, FANG Zhao-hong, ZHANG Hai-tao, LIU Xin-hua, WANG Miao, CHENG Xiang-li, ZHAO Li-hua and ZONG Yan-bing (Shandong Huimin Science & Technology Co Ltd)............... 1058

B4-2.11 Heat Transfer Study of Blast Furnace 2 at SSAB Oxelösund
Swartling Maria, Sundelin Bo, Tillander Anders and Jönsson Pär (Royal Institute of Technology, Materials Science and Engineering)................................................................. 1131

B4-2.12 Modelling in-Furnace Phenomena of Coal/Coke Combustion in a Blast Furnace: Effects of Coal Properties
Shen Yansong, Guo Baoyu, Yu Aibing, Austin Peter and Zulli Paul (University of New South Wales)................................................................. 1137

B4-2.13 Effects of Tuyere Dimensions and Bosh Angle on Raceway Shape and Particle Movement Based on Cold-Model Experiments
Naoyuki Takeuchi, Akinori Murao, Taihei Nouchi, Shiro Watakabe and Michitaka Sato (JFE Steel Co)................................................................. 1143

B4-3 Experiment and Research
B4-3.01 The Dissection of Laiwu Steel's 125m³ BF
LUO Deng-wu, ZHANG Jian-liang, GUO Huai-gong, ZUO Hai-bin and ZENG Hui (Laiwu Steel Group Ltd)................................................................. 1149

B4-3.02 Investigation of the Phenomena in the Blast Furnace Hearth by Means of Dissection Test and Numerical Analysis
Kaoru Nakano, Atsuya Kasai and Takanobu Inada (Sumitomo Metal Industries Ltd)................................................................. 1156

B4-3.03 Effect of Carbon Structure on Iron Carburization and Primary Fe-C Liquid Formation Behavior
Ohno Ko-ichiro, Maeda Takayuki, Nishioka Koki and Shimizu Masakata (Kyushu University)................................................................. 1161

B4-3.04 Trials With LRI at LKAB's Experimental Blast Furnace
Zuo Guangqing and Hallin Mats (LKAB)................................................................. 1166

B4-3.05 Fundamental Studies in Ironmaking Slags to Lower Operating Temperatures and to Recover Titania From Slag
Zhao Baojun, Jak Eugene and Hayes Peter (University of Queensland)................................................................. 1172

B4-3.06 Effective Use of Hydrogen in Gaseous Reduction of Iron Ore Agglomerates With H₂-CO
Usui Tateo, Nishimura Tsunehisa, Ono (-Nakazato) Hideki, Konishi Hirokazu and Kawabata Hirotsoshi (Osaka University)................................................................. 1179

B4-3.07 Investigation of Blast Furnace Primary Slag Property Optimization at High PCI Rates
FU Lian-chun, BI Xue-gong, FENG Zhi-hui, ZHOU Guo-fan and ZHANG Shou-rong (Wuhan University of Science and Technology)................................................................. 1185

B4-3.08 The Wetting of Liquid Iron Carbon on Aluminate Minerals Formed During Coke Dissolution in Iron
Brian J Monaghan, Michael W Chapman and Sharon A Nightingale (University of Wollongong)................................................................. 1190

B4-3.09 Effect of Magnesium Oxide and Aluminum Oxide Content on the Final Slag Fluidity of Blast Furnace
Jia-Shyan Shiau and Shih-Hsien Liu (China Steel Co)................................................................. 1194

B4-3.10 Experimental Study on Reduction Behavior of Iron Ore Fines at Low Temperature
LI Qiu-ju, YU Xiao, WANG Dao-jing and HONG Xin (Shanghai University)................................................................. 1199
B4-3.11 Thermodynamics Analyses on the Comprehensive Utilization of Vanadium-Bearing Titanomagnetite
ZHENG Hai-yan, XUE Xun, WEI Guo and SHEN Feng-man (Northeastern University)……… 1204

B4-3.12 Heat Transportation System From Steelworks to Chemical Plants
Takahiro Nomura, Noriyuki Okinaka and Tomohiro Akiyama (Hokkaido University)……… 1207

B4-3.13 On the Configuration of Closed Two-Phase Regions in Equilibrium Phase Diagrams
Sidorov Evgeny and Pikunov Mikhail (Vladimir State University)………………………… 1212

B4-3.14 On Equilibrium Phase Diagram of the Iron – Carbon System
Sidorov Evgeny (Vladimir State University)………………………………………………… 1216

B4-3.15 Effects of Oxygen Blast on the Tuyere Working Life in Packed Bed Type Ironmaking Process
YAO Xiao-guang and ZHENG Shao-bo (Shanghai University)…………………………… 1221
