CONTENTS

Preface v

International Programme Committee ix

Part A Distinguished talks (plenary talks and EPS talks) 1

Hidden oscillation in dynamical systems 3

G. A. Leonov

Anharmonicity and soliton-mediated electric transport. Is a kind of superconduction possible at room temperature? 8

M. G. Velarde, W. Ebeling and A. P. Chetverikov

Soft sensors and artificial intelligence with applications to nuclear fusion experiments 14

A. Rizzo

Preprocessing method for improving ECG signal classification and compression validation 20

L. Goras and M. Fira

Chaos of generalized two-sided symbolic dynamical systems 26

G. Chen, C. Tian and S. Xie

Part B Modelling and control of coupled stochastic oscillators 33

Feedback-dependent control of stochastic synchronization in coupled neural systems 35

P. Hövel, S. A. Shah, M. A. Dahlem and E. Schöll xi
Dynamics of cavity QED in stochastic field in interacting Fock space

P. K. Das

Delayed feedback control in stochastic excitable networks

N. B. Janson, A. Pototsky and S. Patidar

The Modelling of Fuzzy Systems based on LEE-Oscillatory Chaotic Fuzzy Model (LoCFM)

M. H. Y. Wong, J. N. K. Liu, D. T. F. Shum and R. S. T. Lee

Stochastic resonance in coupled bistable systems

A. Kenfack and K. P. Singh

Part C  Multistability in natural and laboratory-scale nonlinear systems

Control of noisy multistable systems by periodic perturbation

B. K. Goswami, A. Geltrude, S. Euzzor, K. Al Naimi, R. Meucci and F. T. Arecchi

Multi-stability and transient chaotic dynamics in semiconductor lasers with time-delayed optical feedback

J. Zamora-Munt, C. Masoller and J. García-Ojalvo

Multistability in a semiconductor laser subject to optical feedback from a Fabry-Perot filter

H. Erzgräber and B. Krauskopf

Experimental phase control of a forced Chua’s circuit

G. Chessari, S. Euzzor, L. Fortuna, M. Frasca, R. Meucci and F. T. Arecchi

Part D  Linear and matritial algebra, open problems related to control theory

Disturbance decoupling for singular systems by proportional and derivative feedback and proportional and derivative output injection

M. I. García-Planas
Enumeration of feedback equivalence classes of linear systems over a commutative ring vs. partitions of elements of a monoid

M. V. Carriegos and M. M. López-Cabeceira

Controllability of time-invariant singular linear systems

M. I. García-Planas, S. Tarragona and A. Díaz

Part E Localization of oscillations in dynamical systems and control of oscillatory delayed-coupled networks

Control of oscillations in manufacturing networks

A. Y. Pogromsky, B. Andrievsky and J. E. Rooda

Analysis and synthesis of clock generator

E. V. Kudryashova, N. V. Kuznetsov, G. A. Leonov, P. Neittaanmäki and S. M. Seledzhi

Chaos synchronization with time-delayed couplings: Three conjectures

W. Kinzel, A. Englert and I. Kanter

Part F Microfluidics: theory, methods and applications

Moving boundary problems for the BGK model of rarefied gas dynamics

G. Russo

Experimental investigation on parameters for the control of droplets dynamics

F. Sapuppo, F. Schembri and M. Bucolo

Rapid prototyping of Thiolene microfluidic chips

G. Mistura, D. Ferraro, A. Franzoi, D. Frizzo, A. Pacetti and M. Pierno
Development integrated inductive sensors for magnetic immunoassay in “lab on chip” devices

B. Andò, S. Baglio, A. Beninato, V. Marletta and G. Fallica

Part G  Mathematical modelling of dynamic systems for volcano physics

Wavelet multi-resolution analysis for the local separation of microgravity anomalies at Etna volcano

Integrated inversion of numerical geophysical models using artificial neural networks

A. Di Stefano, G. Currenti, C. Del Negro, L. Fortuna and G. Nunnari

SPH modeling of lava flows with GPU implementation

A. Hérault, C. Del Negro, A. Vicari, G. Bilotta and G. Russo

3D dynamic model for channeled model flows with nonlinear rheology

M. Filippucci, A. Tallarico and M. Dragoni

Clustering of infrasonic events as tool to detect and locate explosive activity at Mt. Etna volcano

P. Montalto, G. Nunnari, A. Cannata, E. Privitera and D. Partané

Lava flow susceptibility map of Mt. Etna based on numerical simulations

A. Cappello, C. Del Negro and A. Vicari

Automated detection and analysis of volcanic thermal anomalies through the combined use of SEVIRI and MODIS

G. Ganci, L. Fortuna, A. Vicari and C. Del Negro

Contents

Estimation problem for linear impulsive control systems under uncertainty

\textit{O. G. Matviychuk}  
271

On numerical methods of solving some optimal path problems on the plane

\textit{V. N. Ushakov, A. R. Matviychuk and A. G. Malev}  
277

Quantile optimization problem with incomplete information

\textit{G. A. Timofeeva}  
283

Estimates of trajectory tubes in control problems under uncertainty

\textit{T. F. Filippova}  
289

Control problems for a body movement in the viscous medium

\textit{D. S. Zavalishchin}  
295

Cooperative path planning in the presence of adversarial behavior

\textit{J. Borges de Sousa and J. Estrela da Silva}  
301

Part J Physics and control in fusion plasma devices  
307

Confinement regime identification at JET via an interpretable fuzzy logic classifier

\textit{G. Vagliasindi, P. Arena, A. Murari and JET-EFDA Contributors}  
309

Inspection of disruptive behaviours at JET using generative topographic mapping

\textit{G. A. Ratta, J. A. Vega, A. Murari and G. Vagliasindi}  
315

Maximizing radiofrequency heating on FTU via extremum seeking: Parameter selection and tuning

\textit{D. Carnevale, A. Astolfi, L. Zaccarian, L. Boncagni, C. Centioli, S. Podda and V. Vitale}  
321
Equinox: A real-time equilibrium code and its validation at JET  
D. Mazon, J. Blum, C. Boulbe, B. Faugeras, M. Baruzzo,  
A. Boboc, S. Bremond, M. Brix, P. De Vries,  
S. Sharapov, L. Zabeo and JET-EFDA Contributors

Plasma Scenarios and Magnetic Control in FAST  
G. Artaserse, F. Maviglia, R. Albanese, G. Ambrosino,  
G. Calabrò, V. Cocilovo, F. Crisanti, A. Cucchiaro,  
M. Mattei, G. Mazzitelli, A. Pironti, A. Pizzuto,  
G. Ramogida, C. Rita and F. Zonca

Performing real-time plasma equilibrium of the FTU Tokamak in an RTAI virtual machine  
Y. Sadeghi, L. Boncagni, G. Calabro, F. Crisanti,  
G. Ramogida, E. Vitale and L. Zaccarian

Model-based plasma control in Tokamaks  
D. Moreau, D. Mazon, Y. Adachi, Y. Takase, Y. Sakamoto,  
S. Ide, T. Suzuki and JET-EFDA Contributors

Part K Modeling and optimization of beam and plasma dynamics

Parametric optimization for Tokamak plasma control system  
S. Zavadsky, A. Ovsyannikov and N. Sakamoto

Optimization of the initial conditions of the plasma discharge in the ITER Tokamak  
M. Mizintseva, A. Ovsyannikov, E. Suhov

Multi-objective optimization for beam lines  
A. A. Chernyshev

Mathematical modeling of fringe fields in beam line control systems  
Yu. V. Tereshonkov
