# Table of Contents

## Passwords

A Second Look at the Usability of Click-Based Graphical Passwords  
Sonia Chiasson, Robert Biddle and P. C. van Oorschot .......................... 1

Reducing Shoulder-surfing by Using Gaze-based Password Entry  
Manu Kumar, Tal Garfinkel, Dan Boneh and Terry Winograd.......................... 13

Modeling User Choice in the PassPoints Graphical Password Scheme  
Ahmet Emir Dirik, Nasir Memon and Jean-Camille Birget.......................... 20

## Privacy and Access Control

Tracking Website Data-Collection and Privacy Practices with the iWatch Web Crawler  
Carlos Jensen, Chandan Sarkar, Christian Jensen and Colin Potts.................... 29

Usability of Anonymous Web Browsing: An Examination of Tor Interfaces and Deployability  
Jeremy Clark, P. C. van Oorschot and Carlisle Adams............................ 41

Measuring Privacy Loss and the Impact of Privacy Protection in Web Browsing  
Balachander Krishnamurthy, Delfina Malandrino and Craig E. Wills.................. 52

Lessons Learned From the Deployment of a Smartphone-Based Access-Control System  
Lujo Bauer, Lorrie Faith Cranor, Michael K. Reiter and Kami Vaniea.................. 64

## Training and Such

Improving Security Decisions with Polymorphic and Audited Dialogs  
Ricardo Villamarin-Salomon and Jose Carlos Brustoloni.......................... 76

Anti-Phishing Phil: The Design and Evaluation of a Game That Teaches People Not to Fall for Phish  
Steve Sheng, Bryant Magnien, Ponnurangam Kumaraguru, Alessandro Acquisti, Lorrie Faith Cranor, Jason Hong and Elizabeth Nunge.............................. 88

Towards Understanding IT Security Professionals and Their Tools  
David Botta, Rodrigo Werlinger, André Gagné, Konstantin Beznosov, Lee Iverson, Sidney Fels and Brian Fisher.............................. 100

## SOUPS du jour

An Honest Man Has Nothing to Fear: User Perceptions on Web-based Information Disclosure  
Gregory Conti and Edward Sobiesk............................ 112
Facemail: Showing Faces of Recipients to Prevent Misdirected Email  
Eric Lieberman and Robert C. Miller .................................................. 122

Bitfrost: the One Laptop Per Child Security Model  
Simson Garfinkel and Ivan Krstic ..................................................... 132

Posters

A Usability Evaluation of a Home Monitoring System  
Rajah James, Aleecia M. McDonald, Robert McGuire and Woo Tae Kim .................................................. 143

Establishing Darknet Connections: An Evaluation of Usability and Security  
John Bethencourt, Wai Yong Low, Isaac Simmons and Matthew Williamson .................................................. 145

Defeat Spyware With Anti-Screen Capture Technology Using Visual Persistence  
Johnny Lim ................................................................. 147

Detecting, Analyzing and Responding to Security Incidents: A Qualitative Analysis  
Rodrigo Werlinger, David Botta and Konstantin Beznosov .................................................. 149

Helping Users Create Better Passwords: Is This the Right Approach?  
Alain Forget, Sonia Chiasson and Robert Biddle .................................................. 151

Perception and Acceptance of Fingerprint Biometric Technology  
Rosa Heckle, Andrew Patrick and Ant Ozok .................................................. 153

Secure Software Installation in a Mobile Environment  
Andreas Heiner and N. Asokan .................................................. 155

Examining Privacy and Disclosure in a Social Networking Community  
Katherine Strater and Heather Richter .................................................. 157

A Survey of Privacy Concerns With Dynamic Collaborator Discovery Capabilities  
Robert Marchant ................................................................. 159

Graphical Passwords & Qualitative Spatial Relations  
Di Lin, Paul Dunphy, Patrick Olivier and Jeff Yan .................................................. 161

Vidalia: Towards a Usable Tor GUI  
Matthew Edman and Justin Hippie .................................................. 163

Is FacePIN Secure and Usable?  
Paul Dunphy and Jeff Yan ................................................................. 165

End User Concern about Security and Privacy Threats  
Joshua Gross and Mary Beth Rosson .................................................. 167

TwoKind Authentication: Usable Authenticators for Untrustworthy Environments  
Katelin Bailey, Linden Vongsathorn, Apu Kapadia, Chris Masone and Sean Smith .................................................. 169

Seven Privacy Worries in Ubiquitous Social Computing  
Sara Motahari, Constantine Manikopoulos, Roxanne Hiltz and Quentin Jones .................................................. 171

Privacy Implications for Single Sign-on Authentication In a Hospital Environment  
Rosa Heckle and Wayne Lutters .................................................. 173
