Contents

Volume I

Automated/Real Time Systems

3D Visualization for Tunnel Boring Machine Steering and Alignment Control in Microtunneling
Xiong Liang and Ming Lu

Automated Multiple Objects Tracking System (AMOTS)
I. P. Tharindu Weerasinghe and Janaka Y. Ruwanpura

Resource Performance Indicators in Controlling Industrial Steel Projects
Reza Azimi, SangHyun Lee, and Simaan M. AbouRizk

Application of Sensing Technology to Safety Management
Matthew R. Hallowell, Jochen Teizer, and Wes Blaney

Automated Materials Tracking and Locating: Impact Modeling and Estimation
D. Young, H. Nasir, S. Razavi, C. Haas, P. Goodrum, and C. Caldas

Automated Model-Based Recognition of Progress Using Daily Construction Photographs and IFC-Based 4D Models
Mani Golparvar-Fard, Silvio Savarese, and Feniosky Peña-Mora

Construction Activity Classification Using Accelerometers
Liju Joshua and Koshy Varghese

Mario Bergés, Lucio Soibelman, H. Scott Matthews, and Ethan Goldman

Automatically Tracking and Guiding Underground Tunnel Boring Machines during Microtunneling and Pipe Jacking Operations
Xuesong Shen, Ming Lu, and Wu Chen

Geospatial Databases and Augmented Reality Visualization for Improving Safety in Urban Excavation Operations
Sanat A. Talmaki, Suyang Dong, and Vineet R. Kamat

Real Time Information Integration via i-Booth
Lahiru P. Silva, Janaka Y. Ruwanpura, Kasun N. Hewage, and Jamal Siadat

Real-Time Spatial Location Tracking of Construction Resources in Lay Down Yards
Manu Venigopal, Tao Cheng, and Jochen Teizer

Semi-Automated As-Built Modeling of Light Rail System Guide Beams
Pingbo Tang, Burcu Akinci, and Daniel Huber

Principles for Utilization of Construction Equipment Operator
Training Simulators ...................................................................... 1039
Phillip S. Dunston, Robert W. Proctor, Xing Su, Motonori Yamaguchi,
Xiangyu Wang, and Rui (Irene) Chen

The Relationship between the Maturity of Safety Management Practices
and Performance ...................................................................... 1047
A. K. Goggin, C. J. Willis, and J. H. Rankin

Validity of Industry Benchmarks and Metrics for Engineering Productivity .......... 1057
Yasser Ebrahimy and Sima Rokni

Worker Satisfaction and Work-Life Related Characteristics in the U.S.
Construction Industry ................................................................. 1064
Yongwei Shan and Paul M. Goodrum

Project Planning and Control

A Framework for Evaluating the Effect of Fast-Tracking Techniques
on Project Performance ................................................................. 1074
F. Khoramshahi, J. Y. Ruwanpura, and R. Dehghan

A New Approach for Resource-Constrained Multi-Project Scheduling .............. 1084
Jie Zhu, Xiaoping Li, Qi Hao, and Weiming Shen

An Analytical Framework for Incorporating Projects Supply Chain Problems
into Project Plan ................................................................. 1094
Y. Ebrahimy, Y. Mohamed, and S. AbouRizk

Analysis of Temporary Traffic Control Cost Items in Transportation
Construction Bidding Process ....................................................... 1103
Duzgun Agdas and Ralph D. Ellis, Jr.

Assessment of the Impact of Inter-Organizational Interactions
on Project Metrics ................................................................ 1115
V. Valentin and D. M. Abraham

Front End Planning for Infrastructure Projects .................................. 1125
G. Edward Gibson, Jr., Evan Bingham, and Claude R. Stogner

Implementation of Building Information Modeling (BIM) in Modular
Construction: Benefits and Challenges ........................................ 1136
Na Lu and Thomas Korman

Improved Procedures for Business Accommodation on Transportation
Construction Projects ............................................................... 1146
Ralph D. Ellis, Jr. and Duzgun Agdas

Modeling Cash Flow Profiles with Singularity Functions .......................... 1155
Gunnar Lucko and James P. Cooper III

Modeling Resource Profiles with Singularity Functions ......................... 1165
Gunnar Lucko
Activity Overlapping Assessment in Construction, Oil, and Gas Projects
R. Dehghan, J. Y. Ruwanpura, and F. Khoramshahi
Optimizing Labor Utilization in Multiple Shifts for Construction Projects
Dho Heon Jun and Khaled El-Rayes
Optimizing Material Logistics Planning in Construction Projects
Hisham Said and Khaled El-Rayes
Progress Monitoring of Construction Projects Using Statistical Pattern Recognition
Osama Abdel-Wahhab and Ashraf Elazouni
Significant Factors Affecting Right-of-Way Acquisition Time in Highway Projects
Tiendung Le, Carlos H. Caldas, and G. Edward Gibson, Jr.
Using Key Date Matrix (KDM) to Minimize Risk in Semiconductor Facility Projects
Alex Kwok Yu, Kenneth Sullivan, and Allan Chasey

Project Risk Assessment and Management
A Decision Model for Technology Selection in Renovation Project Planning
Shu-Chien Hsu and Qingbin Cui
A Valuation Model for Choosing the Optimal Minimum Revenue Guarantee (MRG) in a Highway Project: A Real-Option Approach
B. Ashuri, H. Kashani, K. R. Molenaar, and S. Lee
Classification of Risks for International Construction Joint Ventures (ICJV) Projects
Yasser Abdelghany and A. Samer Ezeldin
Interrelationships among Construction Injury Prevention Strategies: A Cross-Impact Analysis
Matthew E. Calhoun and Matthew R. Hallowell
Quantitative Assessment of Horizontal Directional Drilling Project Risk Using Fuzzy Fault Tree Analysis
Mohamed Abdelgawad, Aminah Robinson Fayek, and Fernando Martinez
Xinyi Song, Feniosky Peña-Mora, and Carlos A. Arboleda
The Impact of Regulatory Licensing Processes on U.S. Civilian Nuclear Power Plant Project Performance
Timothy R. B. Taylor, David N. Ford, and Kenneth F. Reinschmidt

Quantitative Methods and Models
A Financial Market Entry Decision Model for International Construction Business Using Real Option Analysis and Monte Carlo Simulation
Du Yon Kim, Seung Heon Han, and Baabak Ashuri
An Application of ELECTRE III to Contractor Selection ................................. 1316
Mohamed Marzouk

Embeddedness and Collaborative Venture Networks for Overseas
Construction Projects .................................................................................. 1325
JeongWook Son, Seung Heon Han, Eddy M. Rojas, and Heedae Park

Field Measurement of Concrete Lateral Pressure in Formwork ...................... 1335
David W. Johnston

Forecasting ENR Construction Cost Index: A Time Series Analysis Approach ........ 1345
Baabak Ashuri and Jian Lu

Influence Factor-Based Safety Risk Assessment Methodology
for Construction Site .................................................................................. 1356
Hyunsoo Kim, Hyun-Soo Lee, Moonseo Park, and Kwang-Pyo Lee

Sustainable Construction and Facilities

“Sustainability by...” A Synthesis of Procurement Approaches for High
Performance Buildings .................................................................................. 1366
Nathaniel Sobin, Keith Molenaar, and Douglas Gransberg

A Unified Process Approach to Healthcare Project Delivery: Synergies
between Greening Strategies, Lean Principles, and BIM ................................. 1376
Elena Enache-Pommer, Michael J. Horman, John I. Messner, and David Riley

An Integrated Condition Assessment Model for Buildings .............................. 1386
Ahmed Eweda, Tarek Zayed, and Sabah Alkass

The Application of Visualization for Construction Emission Monitoring .......... 1396
Reza Shiftehfar, Mani Golparvar-Fard, Feniosky Peña-Mora, Karrie G. Karahalios, and Zeeshan Aziz

Calculation of Greenhouse Gas Emissions Associated with Highway
Construction Projects Using an Integrated Life Cycle Assessment
Approach ....................................................................................................... 1406
Darrell Cass and Amlan Mukherjee

Decision Making Processes and the Adoption of Energy Saving Techniques
in Social Housing .......................................................................................... 1416
A. G. Entrop and G. P. M. R. Dewulf

Exploring the Validity of Qualitative Methods to Analyze Project Delivery
of Sustainable, High Performance Buildings ................................................ 1427
Lipika Swamp, Sinem Korkmaz, Peiin Gultekin, and Michael Horman

Identifying Factors that Affect the Energy Consumption
of Residential Buildings ................................................................................ 1437
Pramen P. Shrestha and Prajakta Kulkarni

Impact of Sustainability Perceptions on the Purchasability of Materials
in Construction Projects ................................................................................ 1447
Laura Flórez, Daniel Castro-Lacouture, and Javier Irizarry
Leadership in Energy and Environmental Design Certification of a Project in Alachua County: An Analysis of the 2007 Florida Building Code and the Alachua County Unified Land Development Code for LEED 2009 ............ 1457
J. G. Sullivan and D. A. Treleven

Life Cycle Assessment Modeling of Heavy Construction Activities ....................... 1467
Robert Ries, Sudha Velayutham, and Yuan Chang

Life Cycle Cost Analysis and Real Option Theory for Improved Sustainability in Existing Buildings ......................................................... 1477
Carol C. Menassa and Alexander J. Rexrode

Life Cycle Cost Analysis of Hybrid Chiller Plants under Dynamic Utility Prices ............................................................. 1487
Sami Kolahdoozan and Baabak Ashuri

Modeling Construction Waste Generation towards Sustainability .................... 1498
B. A. D. S. Wimalasena, J. Y. Ruwanpura, and J. P. A. Hettiaratchi

Current Status of C&D Waste Management and Green Building Standards in Canada ............................................................................. 1508
M. A. Shamloo and K. N. Hewage

Process-Based Approach in Sustainable Impact Analysis of Rebar Supply System ......................................................................................... 1518
Yong-Woo Kim and Joyce Cooper

Shale Oil—An Opportunity to Revive the Construction Industry and Economy while Increasing Energy and Construction Job Security ........................................................................................................ 1528
Stephen Sewalk and Paul Chinowsky

Carbon Footprints Analysis for Tunnel Construction Processes in the Preplanning Phase Using Collaborative Simulation .................................................. 1538
Changbum Ahn, Hua Xie, SangHyun Lee, Simaan Abourizk, and Feniosky Peña-Mora

Canadian Industry Practitioners Perception on LEED Credits ....................... 1547
Ferah Rahman and Farnaz Sadeghpour

A GIS Framework for Reducing GHG Emissions in Concrete Transportation .... 1557
Alma Artenian, Farnaz Sadeghpour, and Jochen Teizer
