2009 XXIII Brazilian Symposium on Software Engineering

(SBES 2009)

Fortaleza, Brazil
5-9 October 2009
2009 XXIII Brazilian Symposium on Software Engineering

SBES 2009

Table of Contents

Foreword
Program Committee
Reviewers
Invited Talk: Processos de Software: Porque e Como Implantar
Invited Talk: Rainbow: Engineering Support for Self-Healing Systems
Invited Talk: Attacking Information Overload in Software Development

Software Reuse and Product Lines

Variability Management in Aspect-Oriented Architecture Description Languages: An Integrated Approach ................................................. 1
  Eiji Adachi, Thais Batista, Uirá Kulesza, Ana Luisa Medeiros, Christina Chavez, and Alessandro Garcia
Automating the Product Derivation Process of Multi-agent Systems Product Lines .......................................................... 12
  Elder Cirilo, Ingrid Nunes, Uirá Kulesza, and Carlos Lucena
Assessing Intra-application Exception Handling Reuse with Aspects .................................................................................. 22
  Júlio César Taveira, Cristiane Queiroz, Rômulo Lima, Juliana Saraiva, Sérgio Soares, Hitalo Oliveira, Nathalia Temudo, Amanda Araújo, and Jefferson Amorim

Experimental Software Engineering

Knowledge Repository Structure of an Experimental Software Engineering Environment .......................................................... 32
  Vitor Pires Lopes and Guilherme Horta Travassos
Exception Flows Made Explicit: An Exploratory Study .................................................................................................................. 43
  Nélio Cacho, Francisco Dantas, Alessandro Garcia, and Fernando Castor
Mining Software Change History in an Industrial Environment ......................................................................................... 54
  Methanias Colaço Júnior, Manoel Mendonça, and Francisco Rodrigues
Software Metrics and Measurement

Reference Values for Object-Oriented Software Metrics
Kecia A. M. Ferreira, Mariza A. S. Bigonha, Roberto S. Bigonha, Heitor C. Almeida, and Luiz F. O. Mendes

Metrics for Evaluation of Aspect-Oriented Middleware
Tâssia A. V. Freitas, Thais V. Batista, Flávia C. Delicato, and Paulo F. Pires

Applying and Evaluating Concern-Sensitive Design Heuristics
Eduardo Figueiredo, Claudio Sant’Anna, Alessandro Garcia, and Carlos Lucena

Model Driven Software Development

Towards a UML Profile for Model-Driven Object-Relational Mapping
Alexandre Torres, Renata Galante, and Marcelo Soares Pimenta

An Integrated Approach for Model Driven Process Modeling and Enactment
Rita Suzana Pitangueria Maciel, Bruno Carreiro da Silva, Ana Patricia Fontes Magalhães, and Nelson Souto Rosa

A Framework for Modeling, Building and Maintaining Enterprise Information
Alexandre Cláudio de Almeida, Glauber Boff, and Juliano Lopes de Oliveira

Social Aspects of Software Engineering

An Experimental Research on the Relationships between Preferences for Technical Activities and Behavioural Profile in Software Development
Fabio Q. B. da Silva and Ana Cristina F. César

Habilities and Behavioural Profiles of SQA Professionals Related to Process Maturity Levels
Aliny F. Meira and Fabio Q. B. da Silva

Developing Motivational Programs for Software Engineers through an Experimental Method
A. César França and Fabio Q. da Silva

Methods and Tools for Software Engineering

On the Selection of Concurrency Control Policies for Configuration Management
João Gustavo Prudêncio, Leonardo Murta, and Cláudia Werner

Using TransFlow to Analyze Open Source Developers’ Evolution
Jean M. R. Costa, Francisco W. Santana, and Cleidson R. B. Souza

Software Artifact Metamodel
Marcos Silva, Toacy Oliveira, and Ricardo Bastos
Requirements Engineering

Quality Improvement for Use Case Model ..................................................................................187
  Ricardo Ramos, Jaelson Castro, João Araújo, Ana Moreira, Fernanda Alencar, and Rosângela Penteado

Integrating Problem Frames with Aspects .............................................................................196
  Gustavo Marques, João Araújo, and Maria Lencastre

A New Approach to the Software Release Planning .................................................................207
  Felipe Colares, Jerffeson Souza, Rafael Carmo, Clarindo Pádua, and Geraldo R. Mateus

Software Verification, Validation, Testing, and Formal Models

Applying Code Coverage Approach to an Infinite Failure Software Reliability Model ................216
  Adalberto Nobiato Crespo, Alberto Pasquini, Mario Jino, and José Carlos Maldonado

Improving a Web Usability Inspection Technique Using Qualitative and Quantitative Data from an Observational Study ...........................................................................................................227
  Tayana Conte, Verónica Vaz, Jobson Massolar, Emilia Mendes, and Guilherme Horta Travassos

Fuzzy Continuous Resource Allocation Mechanisms in Workflow Management Systems ....................236
  Joslaine Cristina Jeske, Stéphane Julia, and Robert Valette
