Third International Workshop on RFID and WSN and its Industrial Applications

Session 1: RFID

A Secure Communication Protocol for EPCglobal Class 1 Generation 2 RFID Systems .............................................................. 562
N.W. Lo and Kuo-Hui Yeh

The Performance Analysis Using Multiple Beams for RFID Warehouse Management System ........................................ 567
Zhang Tongliang, Wei Feng, Tang Hui, Cui Jianming, and Han Dan

Algorithm Based on One’s Complement for Fast Scalar Multiplication in ECC for Wireless Sensor Network ................................ 571
Pritam Gajkumar Shah, Xu Huang, and Dharmendra Sharma

Session 2: Wireless Sensor Networks

Torpid Mode: Hybrid of Sleep and Idle Mode as Power Saving Mechanism for IEEE 802.16j .................................................. 577
Ashish Kumar Singh and Vidyasagar M. Potdar

Priority Enabled Transport Layer Protocol for Wireless Sensor Network .............................................................. 583
Atif Sharif, Vidyasagar M. Potdar, and A.J.D. Rathnayaka

Pritam Gajkumar Shah, Xu Huang, and Dharmendra Sharma

The 2010 IEEE International Symposium on Mining and Web (MAW)

Session 1: Semantic Data Processing

Developing Distributed Reasoning-Based Applications for the Semantic Web .............................................................. 593
Dimitrios Koutsomitropoulos, Georgia Solomou, Panagiotis Aggelopoulos, and Theodore Papatheodorou

A New Over-Sampling Method Based on Cluster Ensembles .............................................................. 599
Si Chen, Gongde Guo, and Lifei Chen
Session 2: Multimedia Mining

Eye-like Algorithm to produce voice web pages ..............................................605
Ahmad Hammond and Daniel Bourget

Image Extraction from Online Text Streams: A Straightforward Template
Independent Approach without Training .......................................................609
George Adam, Christos Bouras, and Vassilis Poulopoulos

Multimedia Data Analysis on a Massively Distributed Parallelization Network
of Anonymous Web Clients ............................................................................615
Jeremy K. Hall, Shuichi Kurabayashi, and Yasushi Kiyoki

CASIT: Content Based Identification of Textual Information in a Large
Database ........................................................................................................621
Larbi Guezouli and Hassane Essafi

Session 3: Web Analysis

Web Tracking Site Detection Based on Temporal Link Analysis .......................626
Akira Yamada, Hara Masanori, and Yutaka Miyake

Session 4: User Models

User Studies in Web Information Retrieval: User-Centered Measures in Web
IR Evaluation ..................................................................................................632
Anwar Alhenshiri and Jack Duffy

An MIU [Most Influential Users]-Based Model for Recommender Systems ........638
Ishant Arora and V.K. Panchal

Session 5: Web and Data Mining

Identifying Key Users for Targeted Marketing by Mining Online Social
Network ..........................................................................................................644
Yu Zhang, Zhaoqing Wang, and Chaolun Xia

The Third International Symposium on Applications of Ad Hoc and Sensor
Networks (AASNET ’10)

Session 1: MAC and Routing Protocols

A Function Alternation Algorithm for Wireless Sensor Networks ....................650
Daiki Shitara, Toshiaki Miyazaki, and Hidenori Igari

A Collision Avoidance Multi-channel MAC Protocol with Physical Carrier
Sensing for Mobile Ad Hoc Networks ............................................................656
Kuei-Ping Shih, Yen-Da Chen, and Shu-Sheng Liu

Self-Organizing Data Collection in Wireless Sensor Networks .......................662
Peter Janacik, Emai Mathews, and Dalimir Orfanus
Session 2: Power Saving Protocols

A Hierarchy Energy Driven Architecture for Wireless Sensor Networks .............................................668
Najmeh Kamyabpour and Doan B. Hoang

A New Quorum-Based Power Saving Protocol to Maintain QoS for MANETs with Burst Traffics .................................................................674
Hossein Memarzadeh, Mehdi Dehghan, and Sam Jabbehdari

Tree-Based Clustering(TBC) for Energy Efficient Wireless Sensor Networks .............................................680
Kyung Tae Kim, Chang Hoon Lyu, Sung Soo Moon, and Hee Yong Youn

Session 3: Security, Lifetime, Architecture of Sensor Network

Sourendra Sinha and Zenon Chaczko

Optimizing Duty-Cycle for Delay and Energy Bound WSN Applications .............................................692
Pardeep Kumar, Mesut Günes, Qasim Mushtaq, and Jochen Schiller

SAGe: Sensor Advanced Gateway for Integrating Wireless Sensor Networks and Internet .............................................698
Antonio Vicente Lourenco Damaso, Jeisa Pereira de Oliveira Domingues, and Nelson Souto Rosa

The Third International Workshop on Disaster and Emergency Information Network Systems (IWDENS 2010)

Session 1: Disaster Information System

Tsunami Early Alert and Evacuation Support System for Fishery Workers by Mobile Phones .............................................704
Hidenori Torii, Jun Sawamoto, Norihisa Segawa, Eiji Sugino, and Yukinori Nomura

Performance Evaluation of Disaster Information System Based on P2Pnetwork .............................................710
Wei Kang and Yoshitaka Shibata

Improvement of the Survivor Information System for University .............................................716
Hiroaki Yuze and Naoyoshi Suzuki

Self Power Supplied Wireless Disaster Information Network .............................................721
Toshihiro Suzuki and Yoshitaka Shibata

Session 2: Disaster Information Network

Construction of Wireless Network for Information Communication for a Disaster-Affected Island .............................................727
Misako Urakami, Yuwa Okada, Yasuyuki Niwa, Hisaya Motoji, and Hiroshi Matsumo

Dynamic Network Configuration Method Based Cognitive Radio LANs for Disaster Information System .............................................733
Goshi Sato, Noriki Uchida, Kazuo Takahata, and Yoshitaka Shibata
Disaster Communication Method Using Electromagnetic Wave Leaking from Wireless LAN System to Outdoors

Kazuo Takahata, Takashi Mima, Noriki Uchida, and Yoshitaka Shibata

The 2010 IEEE International Workshop on Bioinformatics and Life Science Modeling and Computing (BLSMC 10)

Session 1

Mnesic Evocation: An Isochron-Based Analysis
Hedi Ben Amor, Jacques Demongeot, and Nicolas Glade

Demographic and Spatial Factors as Causes of an Epidemic Spread, the Copule Approach: Application to the Retro-prediction of the Black Death
Jean Gaudart, Mohamad Ghassani, Julie Mintsa, Jules Waku, Mustapha Rachdi, Ogobara K. Doumbo, and Jacques Demongeot

Behavioral Telemonitoring of the Elderly at Home: Detection of Nycthemeral Rhythms Drifts from Location Data
Céline Franco, Jacques Demongeot, Christophe Villemazet, and Nicolas Vuillerme

Evolution of the Genetic Regulatory Networks: The Example of the Cell Cycle Control Network—From Gastrulation Modelling to Apocatagenesis
Flavien Caraguel, Muhammad Tayyab, Françoise Giraud, and Jacques Demongeot

Session 2

Methodological Proposal to Estimate a Tailored to the Problem Specificity Mathematical Transformation: Use of Computer Intelligence to Optimize Algorithm Complexity and Application to Auditory Brainstem Responses Modeling
Antonio Gloria, Carla Taramasco, and Jacques Demongeot

On the Number of Attractors of Positive and Negative Boolean Automata Circuits
Jacques Demongeot, Mathilde Noual, and Sylvain Sené

Feature Selection for Medical Diagnosis Using Fuzzy Artmap Classification and Intersection Conflict
Mourad Benkaci, Bruno Jammes, and Andrei Doncescu

Main Pathway Discovery in Metabolic Pathways
Katsumi Inoue, Andrei Doncescu, Gabriel Synaeve, and Nabil Kabbak

Global Strategy of Active Machine Learning for Complex Systems: Embryogenesis Application on Cell Division Detection
Emmanuel Faure, Carla Taramasco, Jacques Demongeot, Louise Duloquin, Benoît Lombardot, Nadine Peyreras, and Paul Bourgine

xviii
The Fourth International Symposium on Security and Multimodality in Pervasive Environments (SMPE-10)

Session 1: Wireless Applications

Multipath Transmission with Forward Error Correction Mechanism for Delay-Sensitive Video Communications .................................................. 810

Ming-Fong Tsai, Naveen Chilamkurti, and Ce-Kuen Shieh

Global Top-k Aggregate Queries Based on X-tuple in Uncertain Database ............................................. 814

Dexi Liu, Changxuan Wan, Naixue Xiong, Jong Hyuk Park, and Sang-Soo Yeo

Session 2: Services in Pervasive Computing

An Authentication and Authorization Protocol Using Ticket in Pervasive Environment ............................................. 822

Jong Sik Moon, Im-Yeong Lee, Kang Bin Yim, and Sang-Gu Byeon

Quality Metrics for Software Process Certification Based on K-model ............................................. 827

Sun-Myung Hwang

Towards a Unified Trust Model in Pervasive Systems ............................................. 831

Hamed Khiabani, Zailani Mohamed Sidek, and Jamalul-Lail Ab Manan

Session 3: Human Oriented Interface

Improved Gait Recognition Performance Using Cycle Matching ............................................. 836

Davrondzhon Gafurov, Einar Snekkenes, and Patrick Bours

A Context Conflict Resolution with Optimized Mediation ............................................. 842

Yifei Wang, Yao Shen, Minyi Guo, and Daqiang Zhang

An Instructional Strategy Selection Model Based on Agent and Ontology for an Intelligent Tutoring System ............................................. 848

Jaesoo Kim and Y.H. Shinn

HiTrust: A Hybrid Tree Based Trust Negotiation Service ............................................. 854

Jianxin Li, Bo Li, Linlin Meng, and Dazhi Sun

Analysis of Anonymity in P2P Anonymous Communication Systems ............................................. 860

Jia Zhang, Haixin Duan, Wu Liu, and Jianping Wu

Session 1: Network Technologies

Body Area Networks for Movement Analysis in Physiotherapy Treatments ............................................. 866

Kashif Kifayat, Paul Fergus, Simon Cooper, and Madjid Merabti

A Novel Geographic Routing Strategy over VANET ............................................. 873

Yan-Bo Wang, Tim-Yu Wu, Wei-Tsong Lee, and Chih-Heng Ke
Session 3: Enabling Technologies

Energy Saving of Air Condition Using Fuzzy Control System over Zigbee Temperature Sensor

Tzu-Ming Wang, Po-Chun Lin, Hung-Lin Chan, Jen-Chi Liao, Tian-Wen Sun, and Tin-Yu Wu

A Wheel Graph Structured Associative Memory for Single-Cycle Pattern Recognition within P2P Networks

Amiza Amir, Raja Azlina Raja Mahmood, and Asad I. Khan

Choosing Text Description Language Features for Training and Testing

Adaptive Resonance Theory: A Case Study for Botanical Classification

Wen-Sen Lee

The 2010 IEEE International Workshop on Quantitative Evaluation of Large-Scale Systems and Technologies (QuEST)

Session 1: Performance Evaluation

Is the Strategic Role of Large-Scale Information Systems an Essential Part of Quantitative Evaluation Process?

Ricardo Santa and W.K. Daniel Pun

HPC Benchmarks on Amazon EC2

Sayaka Akioka and Yoichi Muraoka

Performance Evaluation of TPC-H Queries on MySQL Cluster

Sudsangun Ngamsuriyaroj and Rangsan Pornpattana

Session 2: Performance Model

A Framework for Performing Statistical Testing of Distributed Systems

Michael Horie, Stephen W. Neville, Chris Mueller, and Fiona Warman

The First International Workshop on Networking and Games (N&G 2010)

Session 1: Networking and Games

Contributions of Sensor Networks to Improve Gaming Experience

Orlando R.E. Pereira, Joel J.P.C. Rodrigues, and Abel J.P. Gomes

Session 2: Online Games and IPTV

Testing Cross-Platform Streaming of Video Games over Wired and Wireless LANs

Audrius Jurgelionis, Francesco Bellotti, Alessandro De Gloria, Jukka-Pekka Lauajainen, Philipp Fechteler, Peter Eisert, and Haggal David

Database and State Replication in Multiplayer Online Games

Paula Prata, Etelvina Pinho, and Eduardo Aires
Advances in Mobile Computing and Applications: Security, Privacy, and Trust

Session I

GEPETO: A GEoPrivacy-Enhancing TOolkit .............................................................. 1071
  Sébastien Gambs, Marc-Olivier Killijian, and Miguel Núñez del Prado Cortez
A New Trust Chain Model ...................................................................................... 1077
  Johnson Ilhye Aghinya and Denise Umuhouza
Towards a Pervasive Formal Privacy Language .................................................. 1085
  Ali Dehghantanha, Nur Izura Udzie, and Ramlan Mahmood
Implementing Trust-to-Trust with Customer Edge Switching .............................. 1092
  Raimo Antero Kantola

Session II

Privacy Preservation Through Process Views ....................................................... 1100
  Amirreza Tahamtan and Johann Eder
Subjective and Objective Types of Trustworthiness in Peer-to-Peer(P2P) Overlay Networks ........................................................................................................ 1108
  Soichi Sawamura, Ailixier Aikebaier, Tomoya Enokido, Valbona Baroli, and Makoto Takizawa
A High-Level Semiotic Trust Agent Scoring Model for Collaborative Virtual Organizations ..................................................................................................... 1114
  Timothy Stewart French, Nik Bessis, and Carsten Maple
Dynamic Role-Based Access Control with Trust-Satisfaction and Reputation for Multi-agent System .................................................................................... 1121
  Jae Wook Woo, Myung Jin Hwang, Chun Gyeong Lee, and Hee Yong Youn
