2010 IEEE Network Operations and Management Symposium
(NOMS 2010)

Osaka, Japan
19 - 23 April 2010

Editors:

Y. Kiriha
L. Z. Granville
D. Medhi

T. Tonouchi
M. S. Kim

IEEE Catalog Number: CFP10NOM-PRT
TABLE OF CONTENTS

Operator and Radio Resource Sharing in Multi-carrier Environments ............................................. 1
P. Teeraparpwong, P. Johansson, H. P. Madhyastha, A. Vahdat

WiMFlow: a Distributed, Self-adaptive Architecture for Flow Monitoring in Wireless Mesh Networks ............... 9
C. Popi, O. Festor

A Cross-layer Cooperative Method for IEEE 802.16 Mesh Networks* ............................................. 17
Y. Li, Y. Huang, C. Wang, X. You, A. Daneshmand

An Architecture and Implementation for IP Network and Service Quality Measurements ..................... 25
P. Racz, D. Dönni, B. Stiller

Redundant Virtual Machine Placement for Fault-tolerant Consolidated Server Clusters .................... 33
F. Machida, M. Kawai, Y. Maseno

Optimized Network Configuration Parameter Assignment Based on Graph Coloring ......................... 41
T. Bandh, G. Carle, H. Sunneck, L. C. Schmelz, R. Romelt, B. Bauer

Elements of System Design Optimization in Service Quality Management ................................... 49
N. Anerosiis, Y. Diao, A. Heching

Automated Runtime Risk Management for Voice over IP Networks and Services .......................... 57
O. Dabbebi, R. Badonnel, O. Festor

Automating the Delivery of IT Service Continuity Management Through Cloud Service Orchestration ............ 65
M. Klemis, S. Tai, L. Shwartz, G. Grabarnik

Interactive SNMP Traffic Analysis Through Information Visualization ........................................ 73
P. T. Barbosa, L. Z. Gramville

SMON: Self-managed Overlay Networks for Managing Distributed Applications ....................... 81

Analysis of P2P File Sharing Network's Credit System for Fairness Management .......................... 89
Y. Li, D. Gruenbacher

Online Detection of Utility Cloud Anomalies Using Metric Distributions ......................................... 97
C. Wang, V. Talwar, K. Schwan, P. Ranganathan

Virtual Hypervisor: Enabling Fair and Economical Resource Partitioning in Cloud Environments .......... 105
M. R. Head, A. Kochut, C. Schulz, H. Shaikh

Kahuna: Problem Diagnosis for MapReduce-based Cloud Computing Environments .................. 113
J. Tan, Y. Pan, E. Marinelli, S. Kanwaly, R. Gandhi, P. Narasibhan

TANSO: A Componentized Distributed Service Foundation in Cloud Environment .......................... 121
L. L. R. Tian, B. Yang, H. Huang, H. Liu, K. Shuang

Extended Topic Map: Knowledge Collaborative Building for Distributed Knowledge Resource ........... 129
H. Lu, B. Feng, X. Chen

A Model of Information Systems Operation and Maintenance Process Complexity ........................ 137
G. Xiao, J. X. Wang, F. Han

Information-theoretic Treatment of Sensor Measurements in Network Systems ............................ 145
K. Ravindran

Dynamic Obligation Specification and Negotiation .......................................................... 153
M. Lischka

In-home and Remote QoS Control for Home Networks .......................................................... 161
B. Loew, H. Hua, H. J. Kolbe, M. Stier, T. Dietz, M. Brunner

Estimations of Additional Delays for Mobile Application Data from Comparative Output-input Throughput Analysis .......................................................... 169
K. Wac, M. Fiedler, R. Bulcs, H. Hermers

Analysis of SIP Retransmission Probability Using a Markov-Modulated Poisson Process Model .......... 177
Y. Hong, C. Huang, J. Yan

Identifying Symptoms of Recurrent Faults in Log Files of Distributed Information Systems ............. 185
T. Reidenmeister, M. A. Munawar, P. A. S. Ward

Hybrid Architecture for Resource Reservation in IP-based Mobile Networks ................................ 193
H. Lin, H. Labiod

A Trust-incentive-based Combinatorial Double Auction Algorithm ............................................. 199
K. Wang, L. Li, D. Hausheer, Z. Liu, W. Li, D. Shi, G. He, B. Stiller

VeTo: An Exploit Prevention Language from Known Vulnerabilities in SIP Services ..................... 207
A. Lahmadi, O. Festor
