## Contents

1 Introduction

2 Development of the Basic Model
   2.1 Information Needs and Queries
   2.2 Binary Relevance
   2.3 The Probability Ranking Principle
   2.4 Some Notation
   2.5 A Note on Probabilities and Rank Equivalence

3 Derived Models
   3.1 The Binary Independence Model
   3.2 Relevance Feedback and Query Expansion
   3.3 Blind Feedback
   3.4 The Eliteness Model and BM25
   3.5 Uses of BM25
   3.6 Multiple Streams and BM25F
   3.7 Non-Textual Relevance Features
   3.8 Positional Information
   3.9 Open Source Implementations of BM25 and BM25F

4 Comparison with Other Models
   4.1 Maron and Kuhns
   4.2 The Unified Model
