### Chapter 1  
Introduction to Content Delivery Networking  

1.1 The Modern Content Delivery Network  
   1.1.1 Advantages  
   1.1.2 Disadvantages  

1.2 Evolution  
   1.2.1 Client-Server Computing  
     1.2.1.1 Client-to-Mainframe Data Flow  
     1.2.1.2 Modern Client-Server Operations  
   1.2.2 Use of Video Servers  
     1.2.2.1 Video Length  
     1.2.2.2 Video Resolution  
     1.2.2.3 Frame Rate  
     1.2.2.4 Color Depth  
     1.2.2.5 Data Compression  
   1.2.3 Server Network Architecture  
     1.2.3.1 Two-Tier Architecture  
     1.2.3.2 Three-Tier Architecture  
   1.2.4 The Road to Push Technology  
     1.2.4.1 Teletext Systems  
     1.2.4.2 Videotext  
   1.2.5 Pull Technology  
     1.2.5.1 Role of Caching  
     1.2.5.2 Pull Limitations
1.2.6 Multicast
1.2.6.1 Advantages 24
1.2.6.2 Addresses 24
1.2.6.3 Limitations 25

1.2.7 Push Technology
1.2.7.1 Evolution 26
1.2.7.2 Crawling 27
1.2.7.3 Feeds 28
1.2.7.4 Advantages 30
1.2.7.5 Disadvantages 30

1.3 Content Delivery Networking
1.3.1 Client-Server Operations on the Internet 32
1.3.2 Client Server Operating on the Same Network 33
1.3.3 Client-Server Operations on Different Networks 33
1.3.4 Peering Point 33
1.3.5 Video Considerations 38

Chapter 2 Client-Server Models 41

2.1 Overview 42

2.2 Client Operations 43
2.2.1 URLs 43
2.2.1.1 Absolute and Relative 46
2.2.1.2 Shortening URLs 47
2.2.2 HTML 47
2.2.2.1 Versions 47
2.2.2.2 HTML Documents 48
2.2.2.3 Font Control 49
2.2.2.4 Hypertext Links 50
2.2.2.5 Adding Images 50
2.2.2.6 Adding Video 52
2.2.3 HTTP 56
2.2.3.1 Versions 56
2.2.3.2 Operation 56
2.2.3.3 HTTP 1.1 59
2.2.3.4 State Maintenance 61

2.2.4 Browser Programs 62
2.2.4.1 Helpers 64
2.2.4.2 Plug-Ins 65
2.2.4.3 Java 65
2.2.4.4 VBScript 68
2.2.4.5 ActiveX 69

2.3 Server Operations 70
2.3.1 Evolution 70
2.3.2 Common Web Server Programs 71
2.3.2.1 Server Characteristics 71
2.3.3 Application Servers
   2.3.3.1 Access 74
   2.3.3.2 Java Application Servers 75
   2.3.3.3 General Server Tools 76
   2.3.3.4 Microsoft's .NET Framework 77

2.4 Distance Relationship
   2.4.1 Using Ping 78
   2.4.2 Using Traceroot 80

Chapter 3 Understanding TCP/IP 83
3.1 The TCP/IP Protocol Suite 83
   3.1.1 Protocol Suite Components 83
   3.1.2 Physical and Data-Link Layers 84
      3.1.2.1 MAC Addressing 85
      3.1.2.2 Layer 3 Addressing 85
      3.1.2.3 ARP 88
   3.1.3 The Network Layer 88
      3.1.3.1 IP Header 89
   3.1.4 The Transport Layer 91
      3.1.4.1 TCP 91
      3.1.4.2 UDP 93
      3.1.4.3 Port Meanings 94

3.2 The Domain Name System 95
   3.2.1 Need for Address Resolution 96
   3.2.2 Domain Name Servers 96
   3.2.3 Top-Level Domain 97
   3.2.4 DNS Operation 98
   3.2.5 Configuring Your Computer 98
   3.2.6 Root Name Servers 100
   3.2.7 The NSLookup Tool 101
   3.2.8 Expediting the Name Resolution Process 102
   3.2.9 DNS Resource Records 103
      3.2.9.1 SOA Resource Record 103
      3.2.9.2 Name Server (NS) Records 104
      3.2.9.3 Address (A) records 104
      3.2.9.4 Host Information (HINFO) Record 104
      3.2.9.5 Mail Exchange (MX) Records 105
      3.2.9.6 Canonical Name (CNAME) Records 105
      3.2.9.7 Other Records 105

Chapter 4 The CDN Model 107
4.1 Why Performance Matters 107
   4.1.1 Economics of Poor Performance 108
   4.1.2 Predictability 109
   4.1.3 Customer Loyalty 110
   4.1.4 Scalability 111
CONTENTS

4.1 Flexibility 112
  4.1.6 Company Perception 112
  4.1.7 Summary 113

4.2 Examining Internet Bottlenecks 113
  4.2.1 Entry and Egress Considerations 113
  4.2.2 Access Delays 114
  4.2.3 Egress Delays 121
  4.2.4 Benefits of Edge Servers 124
  4.2.5 Peering Points 125
    4.2.5.1 Rationale 125
    4.2.5.2 Peering and Transit Operations 126
    4.2.5.3 Transit and Peering Operations 130
    4.2.5.4 Global Structure of Peering Points 134
    4.2.5.5 Representative Peering Points 135
    4.2.5.6 Peering Point Delays 144

4.3 Edge Operations 148
  4.3.1 CDN Operation 149
  4.3.2 The Akamai Network 149
    4.3.2.1 Type of Content Support 150
    4.3.2.2 Centralized Web Site Access 150
    4.3.2.3 Edge Server Model 151
    4.3.2.4 Limitations 153
  4.3.3 Edge Side Includes 153
    4.3.3.1 ESI Support 156
    4.3.3.2 Inclusion and Conditional Inclusion 157
    4.3.3.3 Environmental Variables 157
    4.3.3.4 Exception and Error Handling 157
    4.3.3.5 Language Tags 158
    4.3.3.6 The ESI Template 158
  4.3.4 Edge Side Includes for Java 159
  4.3.5 Statistics 160
  4.3.6 Summary 161

4.4 The Akamai HD Network 161
  4.4.1 Using the HD Network with Flash 162
    4.4.1.1 Selecting the Client Population 163
    4.4.1.2 Selecting Bit Rates 163
    4.4.1.3 Selecting Frame Sizes 163
    4.4.1.4 Profiles 164
    4.4.1.5 Levels 165
    4.4.1.6 Keyframes 165

5.1 Caching 167
  5.1.1 Browser Cache 168
  5.1.2 Other Types of Web Caches 169
    5.1.2.1 Proxy Caches 169
    5.1.2.2 Gateway Caches 172
    5.1.2.3 Server Caches 173
Chapter 6  The CDN Enterprise Model  205

6.1 Overview  205
   6.1.1 Rationale  206
       6.1.1.1 Concentrated Customer Base  207
       6.1.1.2 Distributed Locations Available
           for Use  207
       6.1.1.3 Knowledgeable Staff  208
       6.1.1.4 Control  208
       6.1.1.5 Economics  209

6.1.2 Summary  209

6.2 Traffic Analysis  210
   6.2.1 Using Web Logs  210
       6.2.1.1 Apache Access Logs  211
       6.2.1.2 Access Records  212
       6.2.1.3 HTTP Response Codes  212

   6.2.2 Using Logging Strings  214

   6.2.3 Web-Log Analysis  215

6.2.4 Top Referring Domains  217
