# TABLE OF CONTENTS

## AH01: ROUTING I

- Rapid and Reliable Routing Mesh Protocol (RRRMP) ................................................................. 1  
  F. Javadi, K. S. Munasinghe, A. Jamalipour
- C’AR: Coding and Capacity Aware Routing for Wireless Ad Hoc Networks ................................. 6  
  M.-F. Jhang, S.-W. Lin, W. Liao
- Hybrid Clustering and Routing Strategy with Low Overhead for Wireless Sensor Networks .............. 11  
  Z. Xu, C. Long, C. Chen, X. Guan
- Tree Cover Based Geographic Routing with Guaranteed Delivery ............................................... 16  
  M. Tang, H. Chen, G. Zhang, J. Yang
- SAUR: A Service Aided UWB Routing for Wireless Mesh Networks ........................................... 21  
  S. Song, F. Zhu, Y. Guo, X. Guo, Y. Wei
- A Dynamic Route Optimization Mechanism for AODV in MANETs ........................................... 27  
  Z. Bilgin, B. Khan

## AH1P: TOPICS IN AD HOC SENSOR AND MESH NETWORKS I

- Capacity Scaling of Mobile Ad Hoc Networks ........................................................................... 32  
  B. Su, C. Pei, K. Xu, H. Wang, B. Wang
- Joint Variable Width Spectrum Allocation and Link Scheduling for Wireless Mesh Networks .......... 36  
  Z. A. Eu, H.-P. Tan, W. K. G. Seah
  J. Rousset, J.-D. Decotignie
- On the Best Way to Cut a Body Area Network’s Wires .............................................................. 46  
  S. De, A. Kowatra, S. Chatterjee
- Analysis of UWB Radar Sensor Networks .................................................................................. 51  
  S. Bartoletti, A. Costi, A. Giogatti

## AH02: CROSS-LAYER DESIGN

- Cost Efficient Erasure Coding Based Routing in Delay Tolerant Networks .................................. 62  
  E. Bulul, Z. Wang, B. K. Szymanski
- Cross-Layer MAC Enabling Virtual Link for Multi-Hop Routing in Wireless Ad Hoc Networks ....... 67  
  K. Hong, S. Sengupta, R. Chandramouli
- Cross-Layer Mixed Bias Scheduling for Wireless Mesh Networks ............................................... 72  
  Z. Li, M. Liu, A. Zhou
- Maximizing Throughput by Exploiting Spatial Reuse Opportunities with Smart Antenna Systems .. 77  
  C.-T. Chang, C.-Y. Chang, Y.-J. Lu
- Joint Routing, Scheduling and Variable-Width Channel Allocation for Multi-Hop WMNs ............... 82  
  C. Assi
- A Crosslayer Geographic Routing Algorithm for the Airborne Internet ....................................... 88  
  D. Medina, F. Hoffmann, F. Rossetto, C.-H. Rokitansky

## AH2P: TOPICS IN AD HOC SENSOR AND MESH NETWORKS II

  X. Zhang, H. M. Hoa, C. Li
- A Permutation-Based Multi-Polynomial Scheme for Pairwise Key Establishment in Sensor Networks ........................................................................................................... 100  
  S. Guo, Y. Leung, Z. Qian
- TESP: Timed Efficient Source Privacy Preservation Scheme for Wireless Sensor Networks .......... 105  
  R. Lu, X. Liu, H. Zhu, X. Shen
- Enhancing Path Stability Towards the Provision of Multimedia Support in Vehicular Ad Hoc Networks ..................................................................................................................... 111  
  C. Rezende, B. W. Pazzi, A. Boukerche
- VoIP Service over Multihop 802.11 Networks with Power Capture and Channel Noise ................ 116  
  M. A. K. Sidique, J. Konstantinou
- On the Performance of Compressive Video Streaming for Wireless Multimedia Sensor Networks .... 122  
  S. Podloucky, T. Melodia

Location Update Scheme for Mobile Sink in Wireless Sensor Networks ...................................................... 269
F. Yu, E. Lee, S. Park, J. Lee, M.-S. Jin, S.-H. Kim

A Wide Coverage Positioning System (WPS) for Underwater Localization .................................................. 274

Improving Localization Accuracy Using Spatio-Temporal Information of Objects ....................................... 279
X. Chen, N. C. Rowe, G. Singh

An Improved Localization Method Using Error Probability Distribution for Underwater Sensor Networks ........... 284
T. Bien, R. Venkatesan, C. Li

AH5P: TOPICS IN AD HOC SENSOR AND MESH NETWORKS V

F. Theoleyre, A. Bachir, N. Chakchouk, A. Duda, K. K. Leung

Accelerating Consensus Gossip Algorithms: Sparserifying Networks Can Be Good for You ............................. 296
C. Atevosian-Maron, B. Reffrell-Lezano

Energy-Efficient Parallel Singulation in RFID .................................................................................................. 301

Efficient Sensor-Based Agriculture Monitoring System for Developing Countries ........................................... 306
L. Karim, N. Nazar

AH06: MAC

DEEP: A Deployable Energy Efficient 802.15.4 MAC Protocol for Sensor Networks ......................................... 311
M. Valero, A. Bourgeois, R. Beyah

L. Chiu, S. H. Lam, J.-A. Jun

The Impact of Edge Effects on the Performance of MAC Protocols in Ad Hoc Networks with Fading ................. 322
F. Fahbri, M. Kaynia, R. Verdone

MAC Design for Interference Issues in Multi-Channel Wireless Mesh Networks ............................................. 328
K. L. E. Law, W.-C. Hung

An Efficient MAC Protocol with Correlated Connection Arrival and Variable Slot Assignment in Wireless Sensor Networks .................................................................................................................................. 334

Modeling Aggregate MAC Flow Throughput and Fairness in Non-Saturated IEEE 802.11 Based Wireless Mesh Networks .................................................................................................................. 339
K. W. E. Lin, B. Bensaou, K.-L. Hung

AH07: LOCALIZATION AND TIME SYNCHRONIZATION II

On Distinguishing Relative Locations with Busy Tones for Wireless Sensor Networks ........................................ 344
C.-Y. Chang, L.-L. Hung, C.-Y. Lin, M.-H. Li

HLLS: A History Information Based Light Location Service for MANETs ....................................................... 349
X. Pan, X. Yang, W. Yu, X. Pu

HyberLoc: Providing Physical Layer Location Privacy in Hybrid Sensor Networks ......................................... 354
R. El-Badry, A. Sultan, M. Youssef

Closed-Form Solution for Joint Localization and Time Synchronization in Wireless Sensor Networks ............... 359
Y. Y. Zhang, A-S. Wong

A Routing Based Time Synchronization Protocol for Multi-Hop Wireless Networks ....................................... 364
X. Chen, C. Li

How Does a Faulty Node Disturb Decentralized Slot Synchronization over Wireless Networks? .................... 370
A. Tyrrell, G. Auer, C. Bettstetter, R. Naripella

AH08: SENSING COVERAGE

X. Fett, P. Wang, A. Beokereche, R. Yu

Relay Usage Scheduling in Sensor Networks with Energy Harvesting ............................................................. 380
H. Li, B. Sikdar

Coverage Quality Based Target-Oriented Scheduling in Directional Sensor Networks ........................................ 385
H. Yang, D. Li, H. Chen

The Effect of Neighbor Graph Connectivity on Coverage Redundancy in Wireless Sensor Networks .................. 390
E. Bahat, Z. Wang, B. K. Szymanski

Automatic Barrier Coverage Formation with Mobile Sensor Networks .......................................................... 395
L. Kong, X. Liu, Z. Li, M.-Y. Wu

Finding Barriers with Minimum Number of Sensors in Wireless Sensor Networks ............................................ 400
J. He, H. Shi
AH09: DETECTION AND TRACKING

Mobility Assisted Distributed Tracking in Hybrid Sensor Networks ......................................................... 405
F. Wimalajeewa, S. K. Jayaweera
Efficient Node Collaboration for Mobile Multi-Target Tracking Using Two-Tier Wireless Camera Sensor Networks ........................................................................................................ 410
J. Wei, X. Zhang
Decentralized-Detection Based Mobile Multi-Target Tracking in Wireless Sensor Networks ......................... 415
J. Wei, X. Zhang
Detection and Tracking of Continuous Objects for Flexibility and Reliability in Sensor Networks ............... 420
B. Park, S. Park, E. Lee, S.-H. Kim
Distributed Detection of Local Phenomena with Wireless Sensor Networks ............................................... 426
M. Lucchi, M. Chian
Lifetime Maximization of UWB-Based Sensor Networks for Event Detection Applications ..................... 432
G. Naddafzadeh Shirazi, L. Lempre

AH10: COGNITIVE AND MESH NETWORKS

Minimum-Latency Communication in Wireless Mesh Networks Under Physical Interference Model ............... 438
Q. Xin
Handoff-Aware Channel Assignment for Multi-Radio Wireless Mesh Networks ........................................... 444
J. Rezgui, A. Hafig, R. B. Ali, M. Gendreau
A Performance Model for Multi-Hop Cognitive Mesh Networks .................................................................. 450
G. Min, Y. Wu
Admission Control for Wireless Mesh Networks Based on Active Neighbor Bandwidth Reservations .......... 455
X. Yang, Z. Rosberg, Z. Cao, P. P. Liu
VIMLOC Location Management in Wireless Meshes: Experimental Performance Evaluation and Comparison .... 461
Distributed Diffusion-Based Mesh Algorithm for Distributed Mesh Construction in Wireless Ad Hoc and Sensor Networks .................................................................................................................. 467
K. Egoi, R. Rojac-Cessa, N. Ansari

AH11: NETWORK CODING AND CHANNEL ASSIGNMENT

Combining Mimo with Network Coding: A Viable Means to Provide Multiplexing and Diversity in Wireless Relay Networks .................................................................................................................. 472
D. Xu, Z. Bai, A. Woods, G. H. Bruck, P. Jung
Network Coding for Event-Centric Wireless Sensor Networks ........................................................................ 477
I. Sallu, Y. Ghamri-Doudane, S. Lohier, G. Roussel
Mapping Codebook-Based Physical Network Coding for Asymmetric Two-Way Relay Channels ............... 483
C. Pan, J. Zheng
Regret Matching Based Channel Assignment for Wireless Sensor Networks ............................................... 488
Q. Yu, J. Chen, Y. Sun, Y. Fan, X. Shen
Mitigating Multipath Fading Through Channel Hopping in Wireless Sensor Networks .............................. 493
T. Watteyne, S. Lanzisera, A. Moha, K. S. J. Pisler
Adaptive Clock Skew Estimation with Interactive Multi-Model Kalman Filters for Sensor Networks .............. 498
Z. Yang, J. Pan, L. Cai

AH12: COOPERATIVE NETWORKS

Impact of Fading Statistics on Partner Selection in Indoor-to-Outdoor Cooperative Networks ..................... 503
P. Castiglione, S. Savazzi, M. Nicoli, T. Zemen
Transmission Capacity of Decode-and-Forward Cooperation in Overlaid Wireless Networks ....................... 509
Z. Shi, Z. Ding, K. K. Leung
Opportunistic Cooperation in Low Duty Cycle Wireless Sensor Networks .................................................. 514
X. Wang, X. Zhang, R. Chen, Q. Zhang
Cooperative Sensing and Compression in Vehicular Sensor Networks for Urban Monitoring .................... 519
Y. Yu, H. Zhao, L. Zhang, S. Wu, B. Krishnamachari, V. O. K. Li
Lower Bound of Energy-Delay Tradeoff of Cooperative MIMO Communications ....................................... 524
R. Zhang, J.-M. Geve
An Upper Bound of Node Density in Cooperative Networks with Selfish Behavior .................................... 530
E. Liu, Q. Zhang, K. K. Leung

AH13: TOPOLOGY MANAGEMENT

Restoring Connectivity in Wireless Sensor-Actor Networks with Minimal Topology Changes .................... 536
A. Abbasi, M. Younis, U. Baroudi
AH14: MODELING AND OPTIMIZATION I

Modeling and Optimization of Network Lifetime in Wireless Video Sensor Networks
J. Zou, C. Yen, R. Zhang, H. Xiong .................................................. 568

An Analytical Model for Hybrid Wireless Networks Under Bursty and Correlated Traffic
T. Wu, G. Min .................................................................................. 574

Analytical Assessment of the Effect of Backoffs and Retransmissions on the Performance of ALOHA and CSMA in Manets
M. Kaynia, G. E. Oien, R. Verronne .................................................. 579

Reliability and Overhead Analysis of Multicast BitTorrent Enabled Ad Hoc Network Routing
P. Vellone, P. Giffard, R. Venkantesan .................................................. 585

Throughput and Stability Improvements of Sleted ALOHA Based Wireless Networks Under the Random Packet Destruction Dos Attack
J. H. Sarkar, H. T. Moghaddas ............................................................... 591

Differentiate Backoff Mechanisms for Transmission Directions in IEEE 802.11 Multihop WLANs
Z. Cao, Z. Rosberg, X. Yang, Y. Xiao ................................................. 597

AH15: DATA COLLECTION AND AGGREGATION

Effective Data Aggregation Supported by Dynamic Routing in Wireless Sensor Networks
J. Zhang, O. Wu, F. Ren, T. He, C. Lin .................................................. 602

An Efficient Data Aggregation Scheme Using Degree of Dependence on Clusters in WSNs

Constructing Maximum-Lifetime Data Gathering Trees in Sensor Networks with Data Aggregation
A. Bar, Y. Chan, D. Roy, A. Jashok, S. Bandyapadhyay ......................... 613

Energy Aware Trajectory Computation of Mobile Data Collectors in Hierarchical Sensor Networks
A. Bar, Y. Chan, D. Roy, A. Jashok, S. Bandyapadhyay ......................... 619

SAG: Smart Aggregation Technique for Continuous-Monitoring in Wireless Sensor Networks
M. A. Atif, S. Bou, N. Bowsabili ......................................................... 625

An Ecologically Inspired Intelligent Agent Assisted Wireless Sensor Network for Data Reconstruction
F. Bai, K. R. Manaringhe, A. Jonnalipour ............................................. 631

AH16: MODELING AND OPTIMIZATION II

Analytical Model for Performance Analysis of IEEE 802.11 DCF Mechanism in Multi-Radio Wireless Networks
J. Zhang, O. Wu, F. Ren, T. He, C. Lin .................................................. 636

Joint Discrete Power-Level and Delay Optimization for Network Coded Wireless Communications
F. Chiti, R. Fantacci, D. Vukobratovic .................................................. 641

Optimization of Wireless Multi-Source Multicast Ad-Hoc Networks Using Asymmetric Matrix Games
E. Kovarnik, S. Ohto ........................................................................... 646

Multi-Objective WSN Deployment: Quality of Monitoring, Connectivity and Lifetime
N. Attia, N. Ahrar, K. Boussama, G. Papini ........................................... 651

Towards an Optimal Sink Placement in Wireless Sensor Networks
Y. Gu, Y. J. J. Li, H. Chen, B. Zhao, F. Liu .......................................... 657

A Model for the Loss of Hello-Messages in a Wireless Mesh Network
G. Egeland, P. E. Engenbrod ............................................................... 662

CIS01: WIRELESS SECURITY - PHY AND MAC

Selective Jamming Attacks in Wireless Networks
A. Prouko, L. Lazaro ........................................................................... 668

Jamming-Resistant Communication: Channel Surfing without Negotiation
S. Chen, K. Zeng, P. Mulgarami .......................................................... 674

Secure Communications Through Rayleigh Fading SIMO Channel with Multiple Eavesdroppers
M. Z. I. Sarkar, T. Rainarajah ............................................................... 680
