2009 IITA International Conference on Services Science, Management and Engineering

(SSME 2009)

Zhangjiajie, China
11-12 July 2009
SSME 2009
Table of Contents

SSME 2009
Implementation of China’s Export Tax Rebates in Global Financial Crisis ........................................... 3
   Fei Wang
Evaluation on the Reforming Performance of RMB Exchange Rate—Based
on the Flexibility of Exchange Rate ........................................................................................................... 7
   Xianyong Zheng and Hanmin Huang
Research on Coordinate Control Influencing Factors Evaluation
among Enterprises of B2B EC .................................................................................................................... 11
   Liu Weibin
Model and Algorithms for Emergency Service Facility Location Problem .................................................. 15
   Li Dawei, Li Yanjie, and Wang Li
Designing Supply Chain KPIs for Upper-Level Management ..................................................................... 19
   Liu Ying, Xue Lijun, and Su Wei
Regional and Urban Traffic State Estimation System .................................................................................. 22
   Mingquan Wang, Dongyuan Yang, Yali Zhao, Ying Hui, and Xiaofa Shi
Research on Agile Project Management with Scrum Method ...................................................................... 26
   Zhi-gen Hu, Quan Yuan, and Xi Zhang
The Hardware Interface Design In SoC with Verilog Language .................................................................. 30
   Zhang Zhen and Zhang Hui
Web Personalization Method Based on Relevance Feedback on Keyword Space ................................................................. 34

Xiao-Gang Wang and Yue Li

The Application of Two-Dimensional Image Reconstruction for Relics’ Preservation and Administration ................................................................. 38

Min Zhou and Kai Zhang

Empirical Research on Housing Price Ripple Effect between China's Cities ................................................................. 43

Hongjing Zhang and Lanhai Liu

Optimization for the Storage Management and Job Scheduling Based on Expert System ................................................................. 47

Zeng Mingru, Zong Huliang, and Han Wei

A Method for Rough Relational Database Transformed into Relational Database ................................................................. 50

Ling-ling Wei and Wei Zhang

A Study on the Optimal Sales Policy for a Class of Non-perishable Products ................................................................. 53

Xiao-qin Wen and Qi-ying Hu

Application of Grey Model in Forecasting the Port of Qinhuangdao’s Throughput ................................................................. 57

Lili and Zhao Qihong

A New Discussion for the Strategy of Information Systems Development Based on the CAS Theory ................................................................. 61

Liu Chuling, Xie Zanfu, and Chen Chaotian

Why or Why Not Service Oriented Architecture ................................................................. 65

Ying-Hong Wang and Jingo Chenghorng Liao

A Particle Swarm Optimization Algorithm with Crossover for Resource Constrained Project Scheduling Problem ................................................................. 69

Ming Li, Yuanbiao Zhang, Weigang Jiang, and Jianwen Xie

Key Changes of Design on Financial Shared Service: Lessons of Chinese Group Companies ................................................................. 73

Ruijun Zhang, Yongji Zhang, and Yujia Huang

Hybrid Harmonic Averaging Operator and its Application to Decision Making ................................................................. 77

Guiwu Wei

UDWGA Operator and its Application to Dynamic Multiple Attribute Decision Making ................................................................. 81

Guiwu Wei

Some Generalized Uncertain Linguistic Aggregating Operators ................................................................. 85

Guiwu Wei

Construction of Supply Chain Quality Performance Measurement System Based on the Excellent Performance Criteria ................................................................. 89

Chen Yaoli
The Fuzzy Synthesize Assess in Reliability and Maintainability of Military Engineer Machinery ..........................92
Xiaonan Zhang, Anxin Liu, Bin Liu, Jun Yan, Yaoming Gao, and Hongliang Liu
Optimization Way of Engineering Equipment Maintenance Based on Process Algebra ..............................................................96
Xiaonan Zhang, Anxin Liu, Jun Yan, Bin Liu, Hongliang Liu, and Qingzheng Gao
Axial Magnetic Transmission Mechanism and the Calculation of Magnetic Torque ..............................................................100
Zhang Zhiming, Xiao Renbin, Mei Shunqi, and Tu Zhengheng
Research on the Needle Selecting Machine of Computerized Jacquard Circle Knitting Machine Based on Piezoelectric Ceramics ..............................................................104
Zhang Zhiming, Xu Qiao, Mei Shunqi, and Yu Lianqing
The Empirical Study on the Corporate Citizenship Behavior in Service Enterprises: Based on Non-Market Strategy ..............................................................107
Wang Xiquan and Zhou Haiwei
Study on the Relationship among Environment Cognition, Corporate Capability and Cooperation Performance in Service Outsourcing ..............................................................111
Zhou Haiwei and Wang Xiquan
The Optimal Stabilization of Cart-Pole System: A Modified Forwarding Control Method ..............................................................116
Xu Guowei
The Model and Strategy of Knowledge Transfer in Project Environments ..............................................................120
Yang Tong and Wang Nengmin
Information Extraction from Semi-structured WEB Page Based on DOM Tree and its Application in Scientific Literature Statistical Analysis System ..............................................................124
Wei Dong Li, Yibing Dong, Ruiliang Wang, and Hong Xia Tian
Observational Equivalence Technique in Trusted Model ..............................................................128
Jie Yang, De-yu Qi, Yu-ren Zhou, and Jin-bin Zheng
Application of XML-Based Heterogeneous Database Data Exchange Middleware in E-commerce ..............................................................132
Ou Yang Zhengzheng
Empirical Study on Electric Power Customer Satisfaction Based on Kano Model ..............................................................136
Shuai Lin and Dongxiao Niu
Service Parts Inventory Pooling Based on Periodic Review Model ..............................................................140
Dai Yong
The Influence of Intersection Transition Signal to Traffic Safety ..............................................................144
Hong-bo Qian and Sheng Dong
Study on the Influence of Trade Protective Measures on Chinese Electromechanical Products ..............................................................148
Li-ping Wang
Strategic Management Model of Investor Relations ................................................................. 152
   Feng Yanjie and Xu Bo
Evaluation of Self-organization and Orderliness in M and A System ........................................ 156
   Changbing Tong, Qiusheng Zhang, and Jinchuan Ke
Mobile Authentication Scheme Using SMS ................................................................................ 161
   Minglei Shu, Chengxiang Tan, and Haihang Wang
The Research of 3PLs Provider Selection Based on Rough Set and PSO .............................. 165
   Jie Zhang
The Allocation Optimization of Project Human Resource Based on Particle Swarm Optimization Algorithm .................................................................................................................. 169
   Shao-Qiang Wang, Li-Hua Gong, and Shi-Liang Yan
Research and Design of Internet Public Opinion Analysis System ...................................... 173
   Quanlong Guan, Saizhi Ye, Guoxiang Yao, Huanming Zhang, Linfeng Wei, Gazi Song, and Kejing He
Application of Wavelet Packet and Data-Driven in Fault Diagnosis for Hydropower Units .......................................................... 178
   Liao Wei, Wang Zhenxian, and Han Pu
Fiber Optic Lighting Development Trends in Asia .................................................................. 182
   Shih-Yuan Chiang, Chiu-Chi Wei, Te-Hsuan Chiang, and Chiao-Ling Peng
Intellectual Property Management and Integrated Innovation: From Perspective of China’s Indigenous Innovation ................................................................. 188
   Zhang Jihong, Luo Yuzhong, and Du Ding
Game Analysis of Knowledge Sharing in Virtual Enterprise ................................................... 192
   Wang Shixian, Wei Siying, and Zhang Jinlong
Research and Practical Progress on Information Service Transformation .......................... 196
   Qingling Yue and Zhaogui Qin
Research on Construction of Virtual Community in Academic Library .................................. 200
   Qingling Yue and Yi Jiang
Trust Transference in Mobile Banking: An Investigation of the Initial Trust ...................... 204
   Chu Shan and Yao-bin Lu
Open-Loop Network Design Based on Reverse Logistics Recycling ................................... 209
   Meng Xiangru and Song Wei
Construction of Third-Party Reverse Logistics About Electronics Enterprise Based on Circular Economy ................................................................................................................. 213
   Meng Xiangru and Song Wei
Economic Laissez-Faire and Regulation Policy in Liberalization of Trade in Service ......................... 217
   Ying Hua Meng and Hong Bo Cai
Construction of B2B Electronic Commerce System Based on Apache Struts Framework ............................................................ 221
   Xiangzhong Feng and Tian Le
An Object-Oriented Development Process and UML Modeling Tools ......................................................... 225
Ye Peilei

M-Commerce Development and Challenges Facing ..................................................................................... 229
Chen Xin

Model Design of Job Shop Scheduling Based on Multi-agent System ......................................................... 233
Qing-song Li and Li-ming Du

Service View Description of a Service Oriented C4ISR Architecture ..................................................... 237
Lei Wang and Ai-min Luo

Applying E-S-QUAL Scale to Analysis the Factors Affecting Consumers to Use Internet Banking Services ................................................................. 242
Quan Sun, Chunlei Wang, and Hao Cao

Study on Undergraduate Teaching Job Quality Assessment Based on Artificial Fish-BP Neural Network .................................................................................. 246
Li Lihua, Liu Fuming, and Wang Changlong

Evaluation Model for Venture Capital with Intuitionistic Fuzzy Information .............................................. 250
Yu Lin

An Empirical Study on the Factors of Chinese Services Economy Growth ................................................ 254
Renfa Yang and Qiong Huang

A Research on the Causality Relationship between Services Industry and Economy Growth in China .......... 258
Renfa Yang and Qiong Huang

A Cross-Layer Solution for Multi-hop Wireless Network ........................................................................... 262
Shi Yuhe and Xu Jie

Service Discovery in Mobile Ad Hoc Networks Using Mobility-Aware Attenuated Bloom Filters ................... 266
Yao Yu, Yu Zhou, and Sidan Du

Requirement and Design Analysis for the Post-Trauma Mobile Psychology Service ....................................... 270
Yang Ji, Nan Lin, Fan Zhang, Yangyi Wen, Kui Zhang, Zhuo Hong Zhu, Chunlei Fan, Hao Wang, and Kun Yu

Research on Particle Swarm Optimization for Grain Logistics Vehicle Routing Problem ................................... 274
Tong Zhen, Hongyi Ge, Yi Che, and Yuying Jiang

Executive Compensation Structure and Corporate Performance: An Empirical Evidence from Chinese Listed Companies ........................................................................ 278
Hong Zhang

The Pure BTS Versus the Combined BTO and BTS in Supply Chain Environment ........................................ 282
Li Yibin, Chen Rongqiu, and Li Hainan
Design of Aviation Logistics Network for GZARFCAFTA Based on the Gravity Model ........................................................... 352
Chen Wang, Zhixue Liu, Qiankai Qing, Kunpeng Li, and Hua Li

Distance Constrained Facility Location Problem ................................... 358
Kerui Weng

Clinical Image Processing Algorithm Based on Color-Analysis ................. 362
Yiwei Zhu and Qiangian Ge

Proposition of a Query Planner for Semantic Web Services ...................... 366
Naser Nematbakhsh, Farhad Mardukhi, and Hasan Mohammadkhani

Updating the Dynamic Fuzzy Sets Based on Immune Evolutionary .......... 370
Tao Peng, Minghua Jiang, and Ming Hu

Privacy Protecting in E-business Using Reasoning ................................ 374
Tao Peng, Minghua Jiang, and Ming Hu

Study on Cooperation Model in Virtual Enterprise .............................. 378
Yibo Yang and Tao Ji

A New Model of Enterprise Framework ............................................. 381
Yibo Yang and Tao Ji

The Consequences of Work-Family Conflicts to Female Entrepreneurs within the Travel Agencies ................................................. 384
Ruan Yue Qiang, Wei Ming Liang, and Li Bin

Study on Private Equity Investment Risk Avoiding Base on Principle-Agent ................................................................. 388
Xu-bo Zhang and Chengbo Zhang

Research of the Service Design Approach Based on SCA_OSGi .............. 392
Weibo Li, Yanbing Zhang, and Jie Jin

A New Decision-Feedback Equalizer Based on a Mixed Blind Equalization Algorithm .............................................................. 396
Wei Rao, Fei Xia, Yuan-juan Liu, Wen-juan Tan, Hut-jun Xu, Kang-ming Yuan, and Jian-bing Liu

Analysis of Coupling Mechanism between Network Competency and Cooperative Innovation ..................................................... 400
Baoshan Ge and Guotao Liu

Streaming Media Information Services Based on Peer to Peer Technology .... 404
Delin Hou and Huosong Xia

Vulnerabilities Analyzing Model for Alert Correlation in Distributed Environment ................................................................. 408
Wen Long, Yang Xin, and Yixian Yang

On an Active Content Access Control Device for Secure Information Management ................................................................. 412
Qian Wu and Li Fan

The Research and Implement of an Efficient Load Balancing Algorithm ........ 416
Wei Hantian and Xiong Xiaomei
Analysis on Characteristic of the Rural Population Trip

Feng Zhongxiang, Liu Haoxue, and Zhao Jianyou

Web Quality of Agile Web Development

Hu Ran, Wang Zhuo, and Xu Jianfeng

A Web Service Composition Method Based on Multi-path

Jian Dong

A Quantitative Method of Assessment on Development Level of Regional Economic Based on D-S Theory

Wang Yanting, Zhou Bin, Li Lingling, and Jin Hao

Application of Metamorphic Methodologies on the Synthesizing Write-Back Caches

Jun-qiao Qi and Hanlong Cui

Application Research of Deconstructing Based on Model Checking

Jun-qiao Qi

Application Research for Robots Based on a Case

Yan-ming Qi, Xuezheng Zhang, and Shuo Yu

Research on the Influence of Probabilistic Theory Based on Artificial Intelligence

Yan-ming Qi

Structural Reliability Calculation Based on JC Method

Chang-long Wang

Technology Research on Energy-Saving Transform of Exterior Wall of Existing Emporium Building in Handan

Chang-long Wang

The Application of Strengthening Pier with Carbon Fiber Sheet (CFS)

Chang-long Wang

Research on Knowledge Management for Person in E-learning

Zhigang Ji, Niugai Fang, and Haiyan Yang

Research on Distributed Information Resources Management of Virtual Enterprise

Min Huang and Bo Sun

Application of Dual-RAM in Numerical Control System

YanXia Liu, ShuFen Li, and LiTing Cao

A Scheme of Rössler Chaotic Synchronization under Impulsive Control

Yingkui Li

A New Strategic Partnerships Method for Virtual Enterprise Based on PSO

Neng Wang

On-Line Rescheduling to Minimize Makespan under a Limit on the Maximum Sequence Disruption

Yundong Mu and Xiao Guo
