HEALTH INFORMATION
Management of a Strategic Resource
# Contents

## Section 1

**FOUNDATIONS OF HEALTH INFORMATION MANAGEMENT** 1

### Chapter 1

**HEALTH CARE SYSTEMS** 2
- Evolution of Health Care Systems in the United States 5
  - Health Care in the 19th Century 5
  - Twentieth-Century Reforms 6
  - Health Care in the 21st Century 7
  - Healthy People 9
- Regulatory Agencies and Organizations 9
  - Federal Government as Regulator 9
  - The Role of States 12
  - Legislation 13
  - Accreditation 13
  - Regulatory Mechanisms of Health Occupations 14
- Health Care Delivery Systems 15
  - Continuum of Care 15
  - Ambulatory Care 16
  - Hospitals 18
  - Subacute Care 27
  - Home Care (Home Health Care) 27
  - Long-Term Care Facilities 27
  - Hospice Care 28
  - Respite Care 29
  - Complementary and Alternative Medicine 29
  - E-Health 29
  - Adult Day Care Services 29
  - Mobile Diagnostic Services 29
  - Contract Services 29
  - Integrated Delivery Systems 29
- Health Care Professionals 30
  - Health Care Team 30
- Financing Health Care 34
  - Reimbursement 34
  - Managed Care 34
  - Utilization Management 36
  - Government's Role as Payer 36
- Technology in Health Information 38
  - Point-of-Care Clinical Information Systems 38
  - Electronic Data Exchange 38
  - Decision Support Systems 38
  - Electronic Health Record 38
  - National Health Information Infrastructure 39
  - Institute of Medicine 39
- Future Issues 39

## Chapter 2

**THE HEALTH INFORMATICS AND INFORMATION MANAGEMENT PROFESSION** 42
- Health Information Management—A Profession in Transformation 44
- The Patient Record—Source of Health Data and Information 44
- Evolution of the Patient Record 45
  - Early History 45
  - Influential Forces 46
- Evolution of the Health Information Management Profession 49
  - Early History 49
  - 1990s Forward 50
  - Formation of Education Programs 52
  - Professional Certification 53
  - Maintenance of Certification and Lifelong Learning 55
  - Fellowship Program 57
- American Health Information Management Association Today 58
- American Health Information Management Association Communications 59
- AHIMA Foundation: Research and Education in Health Information Management 59
- The Professional Code of Ethics 60
- Looking to the Future 60

## Section 2

**HEALTH CARE DATA & INFORMATION SYSTEMS** 63

### Chapter 3

**HEALTH INFORMATION INFRASTRUCTURE AND SYSTEMS** 64
- Health Information Technology in Health Care 65
  - Background 67
  - Federal Involvement in Health Information Technology 68
    - Congress 68
    - Department of Health and Human Services 68
    - Health IT Policy Committee (2009–Present) 72
    - Health IT Standards Committee 72
  - National Committee on Vital and Health Statistics 72
  - Role of the Private Sector 77
- Compelling Reasons to Implement Health Information Technology 77
- Obstacles to Health Information Technology Adoption 83
- Emerging Health Information Networks 84
  - Organization and Governance Issues 89
  - Technical Issues 89
  - Financial Issues 89
  - Privacy, Security, and Confidentiality Issues 89
  - Role of Health Information Management 89

TECHNOLOGY, APPLICATIONS AND SECURITY 260

Health Information Infrastructure, Technology, and Applications 262
Scope of Health Information Systems 263
Computers in Health Care—Past and Present 264
Computer Fundamentals 266
Software 267
Designing the User Interface 273
User Interface Team 274
General Design Principles 274
Computer Applications 275
Administrative Applications 276
Clinical Applications 277
Emerging Technologies 280
Bar Coding 280
Internet and Web Services 281
Telehealth 284
Fundamentals 284
Implementation 285
Computer Security 285
Authentication Tools 287
Reporting Capabilities 288
Physical Security 288
External Controls 289
Data Management Technology 292
Data Mart 292
Data Modeling 294

Chapter 8

INFORMATION SYSTEMS LIFE CYCLE AND PROJECT MANAGEMENT 296

Introduction 298
Information System Analysis Phases 298
The Players 300
Role of the Health Information Management Professional 301
Project Management 301
System Life Cycles 303
General System Life Cycle 303
Information System Life Cycle 304
Information System Life Cycles in the Organization 304
Aggregate Information Life Cycle of the Organization 305
Information System Life Cycle 307
Principles for System Development 307
Problem Analysis Basics 307
Analysis 308
   Tools and Aids for System Analysis 308
   Investigative Strategies for Analysis of Requirements 318
   Analysis Document 324
   System Design 324
   Design Principles 325
   Role of Prototyping in System Development 327
System Implementation 328
   User Preparation and Training 329
   Site Preparation 330
   System Testing and Conversion 330
   Startup 330
System Evaluation and Benefits Realization 331
   Benefits Realization 331
   Cost-Benefit Analysis 332
   Cost-Effectiveness Analysis 335
   Other Evaluation Methods and Techniques 335
Purchasing Process: Request for Proposal 337
   Request for Information 337
   Planning Steps Before Request for Proposal Preparation 337
   Analyzing System Requirements 338
   Development of System Specifications 338
   Development and Distribution of the Request for Proposal 338
   Evaluation Criteria 343
   Demonstrations and Site Visits 345
   System Selection and Contract Negotiation 345

Chapter 9
MANAGING ELECTRONIC HEALTH RECORD SYSTEMS: COLLABORATION AND IMPLEMENTATION 348
   Value of User Perspective 349
   A Natural Dependence 349
   Environmental Basics (Required for True Collaboration) 350
   Four Shared Environmental Basics 350
   Four Unshared Environmental Basics 352
   The Tide Turns 356
   Process Modeling 356
   Database Design 357
   Implementation Readiness 357
   User Processes and Procedures 358
   Plan Transition 358
   Training 358
   Prepare User Manual(s) 359
   Data Migration 360
   System Testing 360
   “Go Live” 360
   System and Project Evaluation 360

Section 4
DATA MANAGEMENT AND USE 365

Chapter 10
STATISTICS AND DATA PRESENTATION 366
   Overview of Statistics and Data Presentation 367
   Role of the Health Information Management Professional 368
   Health Care Statistics 368
   Vital Statistics 368
   Rates, Ratios, Proportions, and Percentages 368
   Mortality Rates 369
   Autopsy Rates 375
   Morbidity Rates 376
   Census Statistics 378
   Organizing and Displaying the Data 380
   Types of Data 380
   Types of Data Display 382
   Statistical Measures and Tests 385
   Descriptive Statistics 385
   Inferential Statistics 388
   Summary 397

Chapter 11
RESEARCH AND EPIDEMIOLOGY 400
   Overview of Research and Epidemiology 402
   Role of the Health Information Management Professional 402
   Designing the Research Proposal 404
   Hypothesis and Research Questions 404
   Review of Literature 404
   Methodology (Draft) 405
   Research Plan 406
   Validity and Reliability 410
   Validity 410
   Sensitivity and Specificity 410
   Reliability 411
   Biases 412
   Confounding Variables 412
   Sampling Variability 412
   Ascertainment or Selection Bias 412
   Diagnosis Bias 412
   Nonresponse Bias 412
   Survival Bias 412
   Recall Bias 413
   Interviewer Bias 413
   Prevarication Bias 413
   Epidemiologic/Research Study Designs 413
   Descriptive Study 413
   Analytic Study Design 420
   Experimental Epidemiology 424
   Use of Computer Software in Research 427
Outcome Studies and Epidemiology 428
Study Procedures 429
Data Analysis 429
Summary 434

Chapter 12
PERFORMANCE MANAGEMENT AND PATIENT SAFETY 438
The Big Picture and Key Players 440
Federal Oversight Agencies 440
Accrediting Bodies 441
National Quality Awards 441
Purchasers 442
Consumers 442
National Health Care Quality Measurement Priorities 443
Performance Measurement 444
Structure, Process, and Outcome Measures 444
Developing Performance Measures 445
Collecting Measurement Data 446
Performance Assessment 448
Reports for Analysis 448
Performance Goals and Targets 448
Performance improvement 449
Performance Improvement Models 449
Benchmarking 452
Process Improvement Tools 452
Idea Generation 453
Information Organization 453
Data Presentation and Analysis 456
Patient Safety 459
Safety Measurement 459
Safety Improvement 461
Risk Management 465
Loss Prevention and Reduction 466
Claims Management 466
Utilization Management 466
External Requirements 467
Program Components 467
Plan and Program Structure 468
Medical Staff Credentialing and Privileging 470
Credential Verification 471
Privilege Delineation 472
Ongoing Evaluation 472
Role of Managers in Quality and Patient Safety 474

Chapter 13
DATA REPORTING, INTERPRETATION AND USE 478
Health Care Data 480
Health Care Data Users 480
Health Care Data Reporting and Uses 480
Benchmarking 481
Clinical Decision Support 481
Consumer Education 481
Performance Management 483
Planning and Assessment 483
Regulatory Reporting 484
Registries Overview 484
Case Definition and Eligibility 484
Case Finding 485
Abstracting 485
Follow-up 485
Registry Quality Control 485
Confidentiality of Registry Information 485
Cancer Registries 485
Hospital Cancer Registries 486
Accessioning 486
Population-Based Cancer Registries 487
Cancer Registry Abstracting 488
Cancer Registry Coding 488
Cancer Registry Staging 488
Quality Management of the Cancer Program and Registry Data 489
Use of Cancer Registry Data 492
The Cancer Registrar Profession 492
Birth Defects Registries 492
Birth Defects Case Definition and Coding 492
Quality Control of Birth Defects Registry Data 493
Use of Birth Defects Registry Data 493
Death Registries 494
Diabetes Registries 494
Diabetes Registry Case Finding 494
Implant Registries 494
Immunization Registries 495
Immunization Registry Case Finding and Data Use 495
Organ Transplant Registries 495
Transplant Case Registration and Data Use 496
Trauma Registries 496
Trauma Registry Case Finding and Data Use 496
Traumatic Brain Injury Registry 497
Traumatic Brain Injury Case Finding and Data Use Case Definition and Coding 497
Traumatic Brain Injury Registry Abstracting 497
Data Use—National Level (Reporting) 497
Data Use—State Level (Reporting) 497
Research and Use of Data 497
Public Health Research 498
Public Health Informatics 498
Bioterrorism Surveillance 498
Emergency Response 499
Use of Population-Based Data 499
Health Services Research 499
Medical Research 499
Certified Health Data Analyst 501
Data Dictionary 502
Data Dictionary Definitions 502
Purpose of the Data Dictionary 503
Scope of the Data Dictionary 504
Meta-Content of the Data Dictionary 504
Building the Data Dictionary 504
Criteria for Data Element Inclusion 505
Cataloging Standards 506
Data Interpretation and Outcomes 507
Outcomes Data and Information Systems 507
Outcomes Data Use 508
Outcomes and the Electronic Health Record 508
Outcome Indicators 510
Outcomes and Coding Issues 510
Desirable Outcome Systems 511

Chapter 14
PRIVACY AND HEALTH LAW 516
Why Are Legal Issues Important to Health Information Management Professionals? 518
Fundamentals of the Legal System 518
Sources of Law 518
The Legal System 520
The Court System 520
Cases That Involve Health Care Facilities and Providers 521
Legal Obligations and Risks of Health Care Facilities and Individual Health Care Providers 525
Duties to Patients, in General 525
Duty to Maintain Health Information 525
Duty to Retain Health Information and Other Key Documents and to Keep Them Secure 526
Duty to Maintain Confidentiality 529
Internal Uses and External Disclosures of Health Information 531
General Principles Regarding Access and Disclosure Policies 531
Duty to Provide Care That Meets Professional Standards 543
Duty to Obtain Informed Consent to Treatment 545
Duty to Provide a Safe Environment for Patients and Visitors 546
Duty to Supervise the Actions of Employees and the Professional Staff 547
Contract Liability Issues and the Health Information Management Department 550
Legal Resources for Health Information Management Professionals 551

Section 5
MANAGEMENT 553

Chapter 15
HUMAN RESOURCE MANAGEMENT 554
Human Resource Management 556
Navigating Through Turbulent Times 556
Broad Environmental Forces 556
Forces Transforming Health Care 558
Challenges for Health Information Management Professionals 558

Systems Perspective on Human Resource Management 565
Systems Approach Applied to Health Information Services 566
Systems Perspective Applied to Human Resources Management 566
Environmental Influences and Human Resources Management 568
Legal and Regulatory Requirements Affecting Human Resources Management 572
Internal Environment of the Health Care Organization 581
Future Issues 610

Chapter 16
OPERATIONAL MANAGEMENT 612
Introduction 614
Individual Work Processes (Micro Level) 614
Organizing Work 614
Work Distribution Chart 614
Productivity 619
Work Simplification or Methods Improvement 623
Systems and Organizational Level (Midlevel) 629
Systems Analysis and Design 629
Organizational Structure 634
Organizational-Wide Level 635
Change Management 635
Strategic Management 636
Situational Analysis 636
Strategy Formulation 637
Strategic Implementation 637
Strategic Control 638
Project Management 638
Information Technology Applications 643
Reengineering 645
Design and Management of Space in Health Information Services 647
Work-Space Design 647
Design of the Workstation 651

Chapter 17
REVENUE CYCLE AND FINANCIAL MANAGEMENT 658
Historical Perspective 660
Payment for Health Care Services 661
Managing the Revenue Cycle 663
Front-End Activities 663
Back-End Activities 667
Financial Aspects of Fraud and Abuse Compliance 672
Setting Priorities for Financial Decisions 673
Management Accounting 673
Mission 673
Goals 673
Objectives 673
