

— *Proceedings of the* —

International Conference on Martensitic Transformations

June 29 - July 05, 2008

Editors

G. B. Olson, D. S. Lieberman, and A. Saxena

TABLE OF CONTENTS

ICOMAT

| | |
|------------------------------|------|
| History and Committees | xv |
| Sponsors..... | xvi |
| Preface..... | xvii |

ICOMAT

Part I. Tributes

| | |
|---|----|
| A Tribute to C. Marvin Wayman..... | 3 |
| <i>K. Otsuka, D. Dunne, and K. Shimizu</i> | |
| A Tribute to Walter Shepherd Owen - One of the Pioneers in the Field of Martensitic Transformations | 13 |
| <i>M. Grujicic, and F. Schoen</i> | |
| A Tribute to the Memory of Professor Francisco Eiichi Fujita | 31 |
| <i>R. Oshima</i> | |
| A Tribute to Juha Pietikäinen | 39 |
| <i>K. Ullakko</i> | |
| WLR Theory of Martensite and Professor Thomas A. Read..... | 43 |
| <i>D. Lieberman, M. Wechsler, and A. Saxena</i> | |
| An Historical Account of the Development of the Bowles-MacKenzie Theory of the Crystallography of Martensite Transformation | 47 |
| <i>D. Dunne</i> | |
| James Arthur Krumhansl: Nonlinear Physics of Martensitic Phase Transformations..... | 55 |
| <i>G. Barsch, and A. Saxena</i> | |

Part II. Crystallography, Nucleation and Applications

| | |
|--|----|
| Density and Characterization of the Martensite Embryos in Ytria Doped Zirconia | 63 |
| <i>M. Hayakawa, M. Tamaki, and S. Hase</i> | |
| Martensitic Nucleation on Dislocations in Cu-Al-Ni Shape Memory Alloys Studied by in situ TEM..... | 71 |
| <i>M. No, D. Caillard, and J. Juan</i> | |

| | |
|---|-----|
| Twin-Microstructure, Line Defects, and Twinning Stress of Magnetic Shape-Memory Alloys..... | 79 |
| <i>P. Mullner</i> | |
| In-situ TEM Observations of Martensitic Transformations in Ni-Rich Single Crystals with Coherent and Aligned Precipitates..... | 89 |
| <i>A. Kroger, S. Dzaszyk, J. Frenzel, C. Somsen, A. Dlouhy, and G. Eggeler</i> | |
| Stress-Temperature Phase Diagram of Ni ₂ MnGa..... | 95 |
| <i>M. Yasui, H. Kushida, K. Hata, T. Fukuda, and T. Kakeshita</i> | |
| Martensitic Transformations: From Continuum Mechanics to Spin Models, and Automata..... | 99 |
| <i>F. Perez-Reche, L. Truskinovsky, and G. Zanzotto</i> | |
| A Dislocation Model of Parent-Martensite Interfaces..... | 107 |
| <i>R. Pond, X. Ma, and J. Hirth</i> | |
| The Phenomenological Theory of Martensite Crystallography (PTMC) versus the Topological Model (TM)..... | 115 |
| <i>P. Kelly</i> | |
| Response to "The Phenomenological Theory of Martensite Crystallography (PTMC) versus the Topological Model (TM)"..... | 123 |
| <i>J. Hirth, and R. Pond</i> | |
| Comments on "Response to "The Phenomenological Theory of Martensite Crystallography (PTMC) versus the Topological Model (TM)"..... | 129 |
| <i>P. Kelly</i> | |
| Martensite Crystallography of the $\delta \rightarrow \alpha$ (Cubic \rightarrow Monoclinic) Transformation in Plutonium..... | 135 |
| <i>H. Ledbetter</i> | |
| Thermally Activated Martensite: Its Relationship to Non-Thermally Activated (Athermal) Martensite..... | 141 |
| <i>D. Laughlin, N. Jones, A. Schwartz, and T. Massalski</i> | |
| TEM Investigation of Microstructures in Low-Hysteresis Ti ₅₀ Ni _{50-x} Pd _x Alloys with Special Lattice Parameters..... | 145 |
| <i>R. Delville, D. Schryvers, Z. Zhang, S. Kasinathan, and R. James</i> | |
| The Stress-Induced Reverse Martensitic Transformation in Fe-Mn-Si Shape Memory Alloys..... | 153 |
| <i>T. Sawaguchi, K. Ogawa, and T. Kikuchi</i> | |
| Designing a Precipitation-Strengthened, Superelastic, TiNi-Based Alloy for Endovascular Stents..... | 159 |
| <i>M. Bender, and G. Olson</i> | |

| | |
|---|-----|
| Stress-Induced Phase Transformation in the Vicinity of Vickers Indentations in 10mol% CeO ₂ Doped Tetragonal ZrO ₂ Polycrystal..... | 167 |
| <i>H. Matsuo, K. Ikeda, S.Hata, and H. Nakashima</i> | |
| Design and Characterization for Advanced High Strength Nb-Containing Dual-Phase Steels..... | 173 |
| <i>X. Liao, X. Wang, X. Li, and Y. Rong</i> | |
| Carbon Enrichment in Residual Austenite During Martensitic Transformation | 179 |
| <i>S. Ooi, Y. Cho, J. Oh, and H. Bhadeshia</i> | |
| The Absence of Work Hardening in Steel Quenched and Tempered at Around 623 K..... | 187 |
| <i>J. Pietikainen, and Y. Ge</i> | |
| In situ Synchrotron X-ray Analysis of the Behaviour of a Martensitic Stainless Steel During Ageing..... | 191 |
| <i>A. Beneteau, B. Appolaire, E. Aeby-Gautier, G. Geandier, P. Weisbecker, A. Reidjaimia, and T. Ganne</i> | |
| Transformation Induced Cyclic Behavior and Fatigue Properties of Nickel Rich NiTi Shape Memory Alloy Actuators | 199 |
| <i>O. Bertacchini, D. Lagoudas, F. Calkins, and J. Mabe</i> | |
| Modeling the Behavior of an SMA/Elastomer Composite | 207 |
| <i>Y. Chemisky, A. Duval, V. Tahiri, A. Eberhardt, and E. Patoor</i> | |
| Development of Single Crystalline Ni-Mn-Ga Foil Microactuators | 215 |
| <i>F. Khelifaoui, M. Kohl, V. Szabo, A. Mecklenburg, and R. Schneider</i> | |
| Finite Element Simulation of Magnetic Shape Memory Microactuators | 223 |
| <i>B. Krevet, M. Kohl, and S. Seelecke</i> | |
| Cu-Al-Ni Shape Memory Alloy Composites with Very High Damping Capacity | 231 |
| <i>G. Lopez, M. Barrado, E. Bocanegra, J. Juan, and M. No</i> | |
| One-Dimensional Model of Constrained Recovery in SMA with Non-Constant Young's Modulus | 239 |
| <i>T. Videnic, M. Brojan, and F. Kosel</i> | |

Part III. Characterization and Thermomechanical Behavior

| | |
|---|-----|
| In-situ Characterization of Stress-Induced Martensite and Related Magnetic Domain Structure in Ni-Fe-Ga Ferromagnetic Shape Memory Alloy Single Crystals..... | 247 |
| <i>D. Niklasch, H. Maier, I. Karaman, and Y. Chumlyakov</i> | |
| Diffraction Analysis at the Meso and Micro Scale During the Mechanically Induced Martensite Phase Transformation | 255 |
| <i>B. Malard, G. Geandier, J. Wright, T. Buslaps, S. Berveiller, and E. Patoor</i> | |

| | |
|---|-----|
| Neutron Diffraction Study of Stress-Induced New Phase in Ni ₂ MnGa..... | 263 |
| <i>H. Kushida, T. Terai, T. Fukuda, T. Kakeshita, T. Osakabe, and K. Kakurai</i> | |
| Control of Crystallographic Domain by Magnetic Field in Ferromagnetic Shape Memory Alloys and an Antiferromagnetic CoO | 267 |
| <i>T. Kakeshita, T. Terai, and T. Fukuda</i> | |
| Change in Magnetic Microstructure Near the Martensitic Transformation in a Ni-Fe-Ga Alloy | 273 |
| <i>Y. Murakami, D. Shindo, R. Kainuma, K. Oikawa, and K. Ishida</i> | |
| Epitaxial Growth of Ni-Mn-Ga: Consequences of Magnetron Configuration on Martensitic Behavior..... | 281 |
| <i>S. Kaufmann, J. Buschbeck, O. Heczko, L. Schultz, and S. Fahler</i> | |
| Magnetic Moment Analysis on Non-Stoichiometric Ni-Mn-Ga Ferromagnetic Shape Memory Alloys..... | 287 |
| <i>J. Barandiaran, P. Lazpita, J. Gutierrez, J. Feuchtwanger, M. Richard, and R. O'Handley</i> | |
| Micro- and Nano-Structure of a Ni-Ti Shape Memory Micro-Wire | 293 |
| <i>H. Tian, D. Schryvers, S. Shabalovskaya, and J. Humbeeck</i> | |
| Characterizing Twin Structure and Magnetic Domain Structure of Ni-Mn-Ga Through Atomic Force Microscopy | 299 |
| <i>M. Reinhold, W. Knowlton, and P. Mullner</i> | |
| Transmission Electron Microscopy of Antiphase Boundary-Like Structure Induced by Displacive Transformation in Ti-Pd Shape Memory Alloy..... | 305 |
| <i>M. Matsuda, M. Yamashita, K. Hirayama, T. Hara, and M. Nishida</i> | |
| Iron Content Dependence of R-Phase Transformation Behavior in Ti(50-x)Ni(x)Fe Alloys | 311 |
| <i>M. Choi, T. Fukuda, and T. Kakeshita</i> | |
| X-ray Diffraction Studies of Thermally and Thermomechanically Treated Binary Ti-Ni Alloys | 315 |
| <i>S. Prokoshkin, A. Korotitskiy, V. Brailovski, and K. Inaekyan</i> | |
| Inelastic Scattering of X-ray and Neutron by Ti-Ni(Fe) System..... | 319 |
| <i>T. Ohba, D. Kitanosono, S. Morito, T. Fukuda, T. Kakeshita, K. Hirota, A. Baron, and S. Tsutsui</i> | |
| Property Features of Ti-Ni SMA Subjected to Severe Cold Rolling and Post-Deformation Annealing..... | 323 |
| <i>V. Brailovski, S. Prokoshkin, V. Demers, K. Inaekyan, and I. Khmelevskaya</i> | |
| Annealing Effect on Transformation Behavior of Ni-Rich Ti(49)Ni(41)Cu(10) Shape Memory Alloy | 329 |
| <i>K. Lin, S. Wu, and S. Chang</i> | |

| | |
|---|-----|
| Antiphase Boundary Like Defect Inside α' -Martensite Plate in Ti-Nb-Al Shape Memory Alloy | 335 |
| <i>T. Inamura, H. Kim, H. Hosoda, K. Wakashima, and S. Miyazaki</i> | |
| Plasticity and Strain Induced Martensitic Transformation in Two Austenitic Stainless Steels..... | 341 |
| <i>S. Nanga, A. Pineau, B. Tanguy, L. Naze, and P. Santacreu</i> | |
| Effect of Nitrogen and Nickel on the Microstructure and the Shape Memory Behaviour of Fe-Mn-Si-Cr Alloys | 349 |
| <i>B. Maji, and M. Krishnan</i> | |
| Analysis of the Effect of Niobium Precipitates on the Thermo-Mechanical Behavior of a NiTiNb Shape Memory Alloy | 357 |
| <i>B. Piotrowski, A. Duval, T. Zineb, E. Patoor, A. Eberhardt, F. Pauchet, and J. Garcia</i> | |
| Application of Ferromagnetic Shape Memory Alloys in Power Generation Devices..... | 365 |
| <i>D. Carpenter, M. Chmielus, A. Rothenbuhler, R. Schneider, and P. Mullner</i> | |
| Mechanical Properties of Cu-13.8Al-Ni Alloys Containing Nb and V | 371 |
| <i>R. Gomes, A. Veloso, D. Oliveira, S. Lima, D. Santos, and T. Melo</i> | |

Part IV. Modeling, Defects and Superelasticity

| | |
|--|-----|
| Strain Heterogeneity and Ferroelastic Interfaces in Materials..... | 377 |
| <i>T. Lookman, M. Porta, and A. Saxena</i> | |
| An Analysis of Nonclassical Austenite-Martensite Interfaces in CuAlNi..... | 383 |
| <i>J. Ball, K. Koumatos, and H. Seiner</i> | |
| Testing the Theory of Domain Patterns in Ferroelastics | 391 |
| <i>A. Jacobs</i> | |
| Martensitic Transformations in 2D Lennard-Jones Crystals | 399 |
| <i>O. Kastner, and G. Ackland</i> | |
| Defects and Diffusion in Prototypes of Shape Memory Alloys: Part I β_2' Au-Cd Alloys | 407 |
| <i>D. Gupta, and D. Lieberman</i> | |
| Defects and Diffusion in Prototypes of Shape Memory Alloys: Part II β_2' Au-Cd Alloys..... | 417 |
| <i>D. Gupta, and D. Lieberman</i> | |
| Stress- and Strain-Driven Martensitic Transformations: An Acoustic Emission Study in Single-Crystalline Cu-Zn-Al | 425 |
| <i>E. Bonnot, E. Vives, L. Manosa, A. Planes, and R. Romero</i> | |
| Omega-Phase Transformations in Ti_3Al_2Mo Alloy: A First Principles Approach..... | 429 |
| <i>M. Sanati, and R. Albers</i> | |

| | |
|--|-----|
| On the Internal Friction due to the Twin Boundary-H Interaction in Martensite | 435 |
| <i>G. Fan, Y. Zhou, K. Otsuka, X. Ren, T. Suzuki, and F. Yin</i> | |
| Impact of Heat Effects on Superelasticity | 445 |
| <i>L. Heller, P. Sittner, and J. Pilch</i> | |
| Martensitic Transformation in Ni-Mn-Ga Thin Films Deposited on Alumina..... | 453 |
| <i>M. Hagler, V. Chernenko, M. Ohtsuka, S. Besseghini, and P. Mullner</i> | |
| Structural and Magnetic Phenomena in NiMnGa/Substrate Thin Films Composites | 459 |
| <i>V. Chernenko, S. Besseghini, V. Recarte, R. Anton, A. Gambardella, J. Barandiaran, and M. Ohtsuka</i> | |
| High Temperature Shape Memory Alloys Based on the RuNb System..... | 465 |
| <i>A. Denquin, K. Chastaing, P. Vermaut, D. Caillard, J. Humbeeck, and R. Portier</i> | |
| A Cyclic Model for Thermomechanical Behavior of Shape Memory Alloys..... | 473 |
| <i>L. Saint-Sulpice, S. Chirani, and S. Calloch</i> | |

Part V. Magnetic Shape Memory, Pseudoelasticity and Ferroic Transitions

| | |
|---|-----|
| TEM Study of the Surface of a Ni-Ti Shape Memory Micro-Wire..... | 483 |
| <i>H. Tian, D. Schryvers, and J. Humbeeck</i> | |
| Effect of Magneto-Mechanical Cycling on 10M Ni-Mn-Ga Magnetic Shape Memory Materials | 487 |
| <i>I. Aaltio, Y. Ge, X. Liu, J. Tellinen, O. Soderberg, and S. Hannula</i> | |
| Martensitic Transformation, Omega Transformation and Pseudoelasticity in Aged Ti-24at%Nb Alloy | 493 |
| <i>A. Nyayadhis, B. Maji, and M. Krishnan</i> | |
| Plasticity and Reversibility of Structural Transitions in a Model Solid | 499 |
| <i>A. Paul, S. Sengupta, and M. Rao</i> | |
| Structural Characterization of the α - β and Martensitic..... | 507 |
| <i>P. Tarin, P. Lopez-Garcia, J. Abellan, A. Simon, J. Badia, and N. Piris</i> | |
| Martensitic Transformation of Ni-Fe-Ga-Mn and Ni-Fe-Ga-Co Alloys: Thermal and Mechanical Behaviour | 513 |
| <i>C. Picornell, J. Pons, E. Cesari, and J. Dutkiewicz</i> | |
| Intermartensitic Transformations in Ni-Mn-Ga Alloys: Order and Non-chemical Effects..... | 519 |
| <i>C. Segui, E. Cesari, J. Pons, and V. Chernenko</i> | |
| Finite Element Simulation of Localized Phase Transformations in Pseudoelastic NiTi Shape Memory Alloys Subjected to Multi-axial Stress States | 525 |
| <i>C. Grossmann, A. Schafer, and M. Wagner</i> | |

| | |
|---|-----|
| Magnetic Transition in the Ferromagnetic State of Ni-Fe-Ga Single Crystals..... | 531 |
| <i>M. Corro, S. Kustov, E. Cesari, F. Masdeu, and Y. Chumlyakov</i> | |
| Monitoring Localized Deformation of Pseudoelastic NiTi Subjected to Uniaxial Loading | 537 |
| <i>A. Schafer, J. Olbricht, and M. Wagner</i> | |
| Precursor Nanoscale Strain Textures: From Cross-Hatched to Mottled Structure..... | 543 |
| <i>P. Lloveras, T. Castan, M. Porta, A. Planes, and A. Saxena</i> | |
| Self-Accommodating Microstructure and Intervariant Interfaces of 5M and NM Martensites in Off-Stoichiometric Ni ₂ MnGa Alloys..... | 549 |
| <i>P. Sontakke, A. Gupta, V. Hiwarkar, M. Krishnan, and I. Samajdar</i> | |
| Influence of Resistance Welding on the Properties of CuAlBe Single-Crystal Shape Memory Alloy | 555 |
| <i>G. Mussot-Hoinard, E. Patoor, and A. Eberhardt</i> | |
| 3D Reconstruction of Ni ₄ Ti ₃ Precipitates in a Ni-Ti Alloy by FIB/SEM..... | 561 |
| <i>S. Cao, W. Tirry, W. Broek, and D. Schryvers</i> | |
| Low Frequency Damping Properties of Ni-Mn-Ga Shape Memory Alloys..... | 567 |
| <i>S. Chang, S. Wu, and K. Lin</i> | |
| Influence of Fe-Addition on Ni-Mn-Ga Ferromagnetic Shape Memory Alloys | 573 |
| <i>D. Soto-Parra, F. Alvarado-Hernandez, R. Ochoa-Gamboa, H. Flores-Zuniga, D. Rios-Jara, X. Moya, L. Manosa, A. Planes, S. Aksoy, M. Acet, and T. Krenke</i> | |
| A New Stress-Induced Martensitic Transformation in a Cu-Al-Be Shape Memory Single Crystal..... | 577 |
| <i>R. Amireche, and M. Morin</i> | |
| The Improvement of Shape Recovery Property through Training Treatment in an Fe-30Mn-5Si-1Al Alloy..... | 583 |
| <i>M. Koyama, T. Sawaguchi, K. Ogawa, T. Kikuchi, and M. Murakami</i> | |
| Strain Induced Martensite Investigation in Cu-13.8Al-4Ni Polycrystalline Shape Memory Alloy | 587 |
| <i>N. Guedes, S. Lima, V. Buono, D. Santos, T. Melo, and R. Gomes</i> | |
| Nb Modified Cu-Al-Be Shape Memory Alloys..... | 591 |
| <i>T. Melo, D. Oliveira, S. Lima, V. Buono, and R. Gomes</i> | |
| Time-Temperature Equivalence in Martensite Tempering..... | 595 |
| <i>G. Thomas, J. Speer, D. Matlock, G. Krauss, and R. Hackenberg</i> | |
| Precipitation During Austempering and Composition Design for Ferromagnetic Shape Memory Effect of Fe-Ni-Co-Ti Alloys..... | 601 |
| <i>J. Mingjiang, G. Yijia, and J. Xuejun</i> | |

| | |
|---|-----|
| Effects of Thermo-Mechanical Treatment on a Fe-13Mn-5Si-12Cr-5Ni Shape Memory Alloys..... | 607 |
| <i>W. Wu, K. Lin, S. Wu, and H. Lin</i> | |

Part VI. Microstructure, Plasticity and Steels

| | |
|---|-----|
| Influence of Plastic Strain on Mechanically Induced Martensitic Transformations..... | 615 |
| <i>E. Perdahcioglu, H. Geijselaers, and J. Huetink</i> | |
| Shape Memory Characteristics of Ti(50)Ni(20)Cu(30) Strips Fabricated by Arc Melt Overflow..... | 621 |
| <i>Y. Kim, and T. Nam</i> | |
| X-ray and High Resolution Transmission Electron Microscopy Studies of Tetragonal Martensite of Ni-Mn-Ga Alloys..... | 627 |
| <i>Y. Ge, I. Aaltio, O. Soderberg, and S. Hannula</i> | |
| Ageing Behaviour of High-Temperature Ni-Mn-Ga Alloys | 633 |
| <i>E. Cesari, J. Font, J. Muntasell, J. Pons, R. Santamarta, and P. Ochin</i> | |
| Thermomechanical Constraints on Pseudoelasticity During Nanoindentation of Binary and Ternary NiTi(Fe) Alloys..... | 639 |
| <i>J. Pfetzinger, M. Wagner, J. Frenzel, C. Somsen, and G. Eggeler</i> | |
| Effect of Co Content on Structural Transitions of Polycrystalline Co-Ni-Ga Ferromagnetic Shape Memory Alloy | 645 |
| <i>F. Alvarado-Hernandez, D. Soto-Parra, R. Ochoa-Gamboa, P. Castillo-Villa, H. Flores-Zuniga, and D. Rios-Jara</i> | |
| The Crystallography of Lath Martensite Formed at Austenite Grain Boundaries in Fe-Ni-Mn Alloy | 649 |
| <i>S. Morito, J. Nishikawa, T. Ohba, T. Furuhashi, and T. Maki</i> | |
| Morphology of Charge Ordered Phase and its Melting by Magnetic Field in $\text{Pr}_{0.55}\text{Ca}_{0.45}\text{MnO}_3$ and $\text{Nd}_{0.5}\text{Sr}_{0.5}\text{MnO}_3$ Single Crystals | 655 |
| <i>T. Terai, Y. Yasui, and T. Kakeshita</i> | |
| Analysis of Stacking Structure and Morphology in $\text{Ti}_{50}(\text{Pt}_x\text{Ir}_{50-x})$ Martensite by HRTEM and HAADF-STEM..... | 659 |
| <i>T. Hara, Y. Yamabe-Mitarai, M. Nishida, and E. Okunishi</i> | |
| Magnetic Field Induced Reorientation and Mechanical Training Process in NiMnGa Single Crystal..... | 663 |
| <i>P. Molnar, P. Sittner, V. Novak, and O. Heczko</i> | |
| Temperature Dependence of Electrical Resistivity and Diffuse Scattering in Ti-(50-x)Pd-xFe ($14 \leq x \leq 22$) Alloys..... | 669 |
| <i>M. Todai, T. Fukuda, and T. Kakeshita</i> | |

| | |
|---|-----|
| Effects of Temperature and Magnetic Field on Stability of Austenitic Phase in SUS304L Stainless Steel | 673 |
| <i>J. Lee, T. Fukuda, and T. Kakeshita</i> | |
| Modeling of the Martensitic Transformation and Reorientation in SMA Under Thermomechanical Loading. Design of Finite Element Adaptive Micro-components | 677 |
| <i>A. Duval, Y. Chemisky, M. Haboussi, and T. Zineb</i> | |
| Magneto-Mechanical Properties and Fracture of a Mechanically Constrained Ni-Mn-Ga Single Crystal after Extended Magnetic Cycling..... | 683 |
| <i>M. Chmielus, V. Chernenko, A. Hilger, G. Kostorz, P. Mullner, and R. Schneider</i> | |
| Phase Proportioning in CuAlBe Shape Memory Alloys under Thermomechanical Loadings using Electric Resistance Measurements | 689 |
| <i>P. Gedouin, S. Chirani, and S. Calloch</i> | |
| Possibility of Los-Carbon, Low-Temperature Bainite..... | 695 |
| <i>H. Yang, J. Park, and H. Bhadeshia</i> | |
| Author Index | 703 |
| Subject Index | 707 |
