# TABLE OF CONTENTS

## Volume 1

### TACTILE AND ACOUSTIC SENSING

- **Tracking Blood Vessels in Human Forearms Using Visual Servoing**
  Thiusius Rajeeth Savarimuthu, Morten Hansen, Lars-Peter Ellekilde

- **Development of Micro-Force Sensors for Testing Applications in Micro- and Nanorobotics**
  Manuel Mikczinski, Tim Luttermann, Thomas Wich, Sergej Fatikow

- **Using a Piezo-Resistive Tactile Sensor for Detection of Incipient Slippage**
  Matthias Schöpfer, Carsten Schirrmann, Michael Pardowitz, Helge Ritter

- **Applying von Mises Distribution to Microphone Array Probabilistic Sensor Modelling**
  Ivan Markovic, Ivan Petrovic

### LOCALIZATION AND MAPPING 1

- **Dynamic Frontier Based Exploration with a Mobile Indoor Robot**
  Jens Wetsch, Karsten Bera

- **Evaluating the Efficiency of Frontier-Based Exploration Strategies**
  Dirk Holz, Nicola Basilico, Francesco Amigoni, Sven Behnke

- **Sampling-Based Multi-Robot Exploration**
  Zhi Yan, Nicolas Jouandeau, Arab Ali Cherif

- **Vision Based Far-Range Perception and Traversability Analysis Using Predictive Probability of Terrain Classification**
  Masataka Suzuki, Eisuke Terada, Teppei Saitoh, Yoji Kuroda

### LEARNING AND ADAPTATION

- **Behavioral Organization for Mobile Robotic Systems: An Attractor Dynamics Approach**
  Matthias A. Grimm, Ioannis Iossifidis

- **Traveling Wave Locomotion of Snake Robot Along Symmetrical and Unsymmetrical Body Shapes**
  Hadi Kalani, Ali Reza Akbarzadeh, Javad Safaeian

- **Sensor Guided Robot Motions Using the Example of the Inverted Pendulum**
  Alexander Winkler, Jozef Suchý

- **An Adaptive Robot Game**
  Søren Tranberg Hansen, Mikael Svenstrup, Lars Dalgaard

### HUMAN-ROBOT COLLABORATION

- **PISA: Next Generation of Flexible Assembly Systems - From Initial Ideas to Industrial Prototypes**
  Jörg Krüger, Volker Katschinski, Dragoljub Surdilovic, Gerhard Schreck

- **Development of Collaborative Robots (COBOTS) for Flexible Human-Integrated Assembly Automation**
  Dragoljub Surdilovic, Gerhard Schreck, Uwe Schmidt

- **Measuring the Collision Potential of Industrial Robots**
  Suzanne Oberer-Tretz, Arnold Pesik, Alexander Verl

- **Learning Probabilistic Models to Enhance the Efficiency of Programming-by-Demonstration for Industrial Robots**
  Rebecca Hollmann, Martin Hägelse, Alexander Verl

### 3D VISION 1

- **Face Detection Using 3D Time-of-Flight and Colour Cameras**
  Jan Fischer, Daniel Seitz, Alexander Verl
Automatic Layered 3D Reconstruction of Simplified Object Models for Grasping
Lucian Cosmin Goron, Zoltan Csebo Marion, Gheorghe Lazea, Michael Beetz

3D-Vision Guided Robotics for Material Handling
Peter Nilsson

3D Measurement of Moving Objects Using Quotient Image Stereo
Tagir Bohirov, Stephan Irgenfried, Kirill Safonov, Igor Tchauchenkov, H. Wörn

LOCALIZATION AND MAPPING 2

Exactly Sparse Delayed State Filter Based Robust SLAM with Stereo Vision
Andrei Khazov, Ivan Petrovic

A Comparison of Efficient Global Image Features for Localizing Small Mobile Robots
Marian Hofmeister, Philipp Vorat, Andreas Zell

Off-Road Place Recognition Using Fused Image Features
Tohlas Ficht, Michael Arndt, Karsten Berns, Cristian Cristian Gava, Raquel Frizera Vassallo

Automatic Robot Supervision Within a Lunar Crater Environment
Alexander Demmann, Stefan Haase, Frank Kirchner

INDUSTRIAL HUMAN-ROBOT COOPERATION

When to Assist? - Modelling Human Behaviour for Hybrid Assembly Systems
Markus Huber, Alois Knoll, Thomas Brand, Stefan Glassauer

Injury Risk Quantification for Industrial Robots in Collaborative Operation with Humans
Bjørn Mathias, Susanne Oberer-Treitz, Harald Staub, Erich Schulze, Steffen Fedders

Occlusion Handling in Augmented Reality User Interfaces for Robotic Systems
Markus Sauer, Florian Lauter, Klaus Schülling

Greenhouse Partner Robot System
Koshi Kashivazaki, Yusuke Sugahara, Jun Iwabuki, Kazuhiro Kosuge, Shiro Kumaasa, Tomoki Yamashita

MOTION PLANNING

Dynamic Collision Avoidance for an Anthropomorphic Manipulator Using a 3D TOF Camera
Sankaranarayanan Natarajan, Andreas Vogt, Frank Kirchner

Indoor-GPS Based Robots as a Key Technology for Versatile Production
Robert Schmitt, Alexander Schönberg, Björn Damm

End-Effector Obstacle Avoidance Using Multiple Dynamic Variables
Hendrik Reimann, Ioannis Iossifidis, Gregor Schömer

Learning Motion Skills From Expert Demonstrations and Own Experience Using Gaussian Process
Regression
Kathrin Gröwe, Jörg Stücker, Sven Behnke

POSTER SESSION 1

P1 Current State Model for Easy Reconfiguration of Robot Systems and Offline-Programming-Environments
Gunther Reinhart, Stefan Krug

P2 ABB Service Agreements with Remote Services
René Nispeling

P4 Intelligent Components for Miniature Drive Systems in Robotics
Jens Haag, Rainer Bassey, Herbert Wallner, Fritz Faulhaber

P5 Automatic Generation of the Denavit-Hartenberg Convention
Wolfgang Weber

P6 Mechanical Design Process for the Zippy Wrist
Navid Mohsenyak, Javad Esfandali, Alireza Akbarzadeh

P7 Remotely Operated Inspection and Maintenance Robots
Charlotte Skourup, John Pretlove, Christopher Apseneth

P8 Towards a New Industrial Robotics
F. P. Bonfigliorno
P9 An Autonomous Robotized System for a Thermographic Camera........................................................................254
Alberto Pretlo, Emanuele Menegatti, Paolo Bicen, Ermanno Grinzato, Gianluca Cadelano, Enrico Fagello

P10 Low-Power Microcontroller-Based Acoustic Modem for Underwater Robot Communication.........................262
Christoph Osterloh, Erik Machle

P11 Particle Filter Based Sensor Fusion of Range Measurements From Wireless Sensor Network and Laser Range Finder...............................................................................................268
Christof Körig, Christopher Krisch

P12 Fuzzy Stereovision Tracking Control for Non-Holonomic Mobile Robots............................................................276
Mohand Said Djouadi, Samir Zeghlache

P13 Pattern Recognition and Tracking Dynamic Objects with LiDAR...................................................................278
Levente Tamas, Gheorghe Lazea

P14 Experimental Evaluation of a Low-Cost Mobile Robot Localization Technique for Large Indoor Public Environments ..............................................................................................................284
Inam-UI Haque, Erwin Prassler

P15 3-D-Environment Reconstruction for Mobile Robots Using fastSLAM and Feature Extraction.........................291
Georg Arbetier, Jan Fischer, Alexander Yeh

P16 Map Updating in Dynamic Environments .........................................................................................................296
Fabrizio Abrate, Basilio Bona, Marina Inatri, Stefano Rosa, Federico Tibaldi

P17 New Approach in Solving the Kidnapped Robot Problem..................................................................................304
Andras Majdik, Mircea Popa, Levente Tamas, Istvan Szoka, Gheorghe Lazea

P18 AUV Pipeline Following Using Reinforcement Learning.......................................................................................310
Sigurd A. Fjerdingen, Erik Kyrkjebø, Aksel A. Tranæth

3D VISION 2

Probabilistic Phase Unwrapping for Time-of-Flight Cameras..................................................................................318
David Droeschel, Dirk Holz, Sven Behnke

High Performance Optical Flow Serves Bayesian Filtering for Safe Human-Robot Cooperation...........................325
J. Graf, F. Dietrich, H. Wörn

Mobile Manipulation in Service Robotics: Scene and Object Recognition with Manipulator-Mounted Laser Ranger................................................................................................................333
Manuel Wagner, Jonas Beck, Siegfried Hochschuler, Christa Schlegel

Development of a Robot Vision System for Measuring 3D Pose of Large Object Using Virtual Plane Algorithm .................................................................................................................................340
Chan-Ho Lee, Jong-Kyu Oh, Sang-Hun Lee, Sang-Hyun Jung, Jong-Sung Hur, Sangbum Park, Youngjoon Han, Hermann Hahn

LOCALIZATION AND MAPPING 3

Donato Melita, Giovanni Muscato, Michelé Poncelet

A Comparison of Similarity Measures for Localization with Passive RFID Fingerprints........................................354
Philipp Vorst, Andreas Zell

UKF Sensor Data Fusion for Localisation of a Mobile Robot.......................................................................................362
Matthias Baumann, Daniel Eck, László Lemmer, Klara Schilling

Stabilizing and Global Localizing of Two-Wheeled Holonomic Mobile Robots Using Neuro-Fuzzy Algorithms .................................................................................................................................370
Hans Hansen, Karl Ihnengrat, Katinka Klein, Olga Petrovskaja, Vyacheslav Schostakowitsch

PERSONAL HUMAN-ROBOT COOPERATION

FRIEND - A Dependable Semiautonomous Rehabilitation Robot...........................................................................372
R. Tschakarow, Sorin M. Grigorescu, Axel Gräser

Pneumatic Rehabilitation Robot: Modeling and Control.........................................................................................379

Human in Loop Integration of an Arm Mounted Wheelchair Robot Based on RT Middleware...................................387
Wei Wang, Yuki Suga

Intuitive Multimodal Interaction for Domestic Service Robots..................................................................................393
Matthias Niewenhuizen, Jörg Stöckler, Sven Behnke
ROBOT CONTROL OF MACHINING PROCESSES

Markerless Visual Vibration Damping of a 3-DOF Flexible Link Robot Arm........................................... 401
Jörn Malzahn, Anh Son Phung, Rene Franke, Frank Hoffmann, Torsten Bertram

A Motion Control Strategy for Robots in Laser Material Processing and Other High Speed Applications................................................................................................................................. 409
Hartmut Bruhm, Alexander Czinki, Markus Loiz, Volker Wenzel

Robot Machining with Additional 3D-Piezo-Actuation Mechanism for Error Compensation......................... 415
Arnoldt Pietk, Christian Meyer, Alexander Verl

A Feedback Control System for a Rapid Production Process Based on Robotic Welding Deposition ................. 422
Filippo Bonaccorso, Carlo Bruno, Luciano Camelli, Domenico Longo, Giovanni Mascato, Salvatore Rapisarda

APPLICATIONS FOR VISION SENSORS

Robotic Vision for Bin-Picking Applications of Various Objects................................................................. 428
Ales Pochyby, Tomas Kubela, Martin Kozak, Petr Chok

Automatic Configuration of an Object Detection System................................................................................. 433
Martin Stutz, Alexander Verl

Anticipation-Preprocessing for Object Pose Detection...................................................................................... 440
Matthias Palzkill, Thomas Ledermann, Alexander Verl

Camera Calibration for Reliable Object Manipulation in Care-Providing System FRIEND.............................. 446
Torsten Heyer, Sorin M. Grigorescu, Axel Graser

PATH PLANNING AND NAVIGATION I

A Set-Based Dynamic Window Algorithm for Robust and Safe Mobile Robot Path Planning......................... 452
Sylvia Horn, Klaus Janschek

A RRT Based Path Planning Algorithm for Rehabilitation Robots.................................................................. 459
Christos Fragkopoulos, Axel Graser

A New Probabilistic Path Planning Algorithm for (Dis)Assembly Tasks...................................................... 467
Ulrike Thomas, Rene Jost

Path Planning Process Optimization for a Bin Picking System........................................................................ 473
Ricardo A. Tauro, Benedikt Kaiser, H. Würn

INDUSTRIAL GRASPING APPLICATIONS

Hybrid Robot Gripper and Tools for Handling and Bonding Micro Fluidic Chips............................................. 480

Visual Grasping Using Passive Joints and Clustered SIFT-Features............................................................. 486
Nicolas Gorges, André Haase, H. Würn

Gripping Systems for Intralogistics - Aiming At the "Swiss Army Knife" of Intralogistics Solutions................. 494
Hendrik Mühlerich, Florian Simon, Alexander Verl

A New Handling System for Textile/Clothing Industry.................................................................................. 501
Rezia Moffino, Matteo Zoppit, Enrico Carca, Roberto Avvenente

FORCE TORQUE CONTROL

Is a Linear Axis Really Required When Assembling Parts to a Moving Conveyor?...................................... 507
Friedrich Lange, Johannes Scharrer, G. Hirzinger

Control of Large Forces and Torques Using an Asymmetrically Arranged Compliant Sensor..................... 515
Friedrich Lange, Bertram Willberg, G. Hirzinger

Is Force Monitoring in Cooperating Industrial Robots Necessary?............................................................ 523
Gunther Reinhart, Sherif Zaidan, Jörg Habele

Superimposed Force/Torque-Control of Cooperating Robots........................................................................ 531
Alexander Spiller, Alexander Verl
SAFETY APPLICATIONS

A Real-Time Wearable Projector-WiiRemote-System for Augmented Reality Interaction Scenarios on Plane Objects
Alexander Steiger, Björn Heine, H. Wörn ........................................ 538
A Stationary Sensor System to Support Manipulators for Safe Human-Robot Interaction
Christoph Walter, Christian Vogel, Norbert Elkmann .......................... 544
Collision Avoidance Systems for Manual-Assisted Driving
Hector Yuste, Leopoldo Armesto, Josep Torner ................................ 550
PISALA Project: Intelligent Sensorization for Line Tracking with Artificial Vision
Vincent Girbés, Leopoldo Armesto, Josep Torner ............................... 558

PATH PLANNING AND NAVIGATION 2

Cooperative Docking Procedures for a Lunar Mission
Thomas M. Roehr, Florian Cordes, Frank Kirchner, Ingo Ahrens ........... 564
Deploying Mobile Maintenance Robots in Material Flow Systems Using Topological Maps and Local Calibration
Bernd Kohlenkötter, Matthias Bülker, Tobias Brutschick ...................... 572
Evaluating Risk Estimation Methods and Path Planning for Safe Human-Robot Cooperation
J. Graf, P. Czapiewski, H. Wörn .................................................. 579
Experimental Study of Robot Formation Control and Navigation Using Potential Functions and Panel Method
Abdel-Razzak Merhab, Veysel Gazi, Nilay Sazcı-Uzöl ......................... 586

ANTHROPOMORPHIC ARMS AND HANDS

A Five Fingerprinted Robotic Hand Prototype by Using Twist Drive
Ivan Godler, Takashi Sonoda ......................................................... 594
Grasp Synthesis for Dextrous Hands Optimised for Tactile Manipulation
Jimmy Jørgensen, Henrik Petersen ................................................. 600
Development of a Multi-Fingered Robot Hand with Softness-Changeable Skin Mechanism
Hiroki Takeuchi, Tatsuyu Watanabe ................................................. 606
On the Control Problem of a Hyper-Redundant Arm
Mircea Ivanescu, Mihaela Florescu, Nirvana Popescu, Decebal Popescu .... 613

SIMULATION AND PROGRAMMING

Recent Progress on Programming Methods for Industrial Robots
Zengxi Pan, Joseph Polden, Nathan Larkin, Stephen Van Duin, John Norrish ... 619
Sasim Gagor, Jobst Bickendorf ..................................................... 627
Automatic Generation of Robot Applications Using a Knowledge Integration Framework
Martin Naumann, Matthias Bengel, Alexander Veit ................................... 631
RobWorkSim - An Open Simulator for Sensor Based Grasping
Jimmy Jørgensen, Henrik Petersen, Lars-Peter Ellekilde .............................. 639

EXPLORATION AND PERCEPTION

Robotic Analysis of Everyday Scenes
Robert Eidenberger, Thilo Grundmann, Martin Schneider, Wendelin Falten, Michael Fitzger, Georg V. Wichert, Gisbert Lavitzky .... 647
Visual Odometry Using Feature Point and Ground Plane for Urban Environments
Atsushi Sakai, Yuya Tamura, Toji Kuroda ........................................ 654
