Table of Contents

Preface ........................................................................................................... xxvii

Acknowledgment ........................................................................................... xxxi

Section 1
Drug Development and Medicine

Chapter 1
Ethics and Privacy Considerations for Systems Biology Applications in Predictive
and Personalized Medicine ............................................................................. 1

Jake Y. Chen, Indiana Center for Systems Biology and Personalized Medicine, USA &
Indiana University, Indianapolis, USA & Purdue University, USA
Heng Xu, The Pennsylvania State University, USA
Pan Shi, The Pennsylvania State University, USA
Adam Culbertson, Indiana University, USA
Eric M. Meslin, Indiana University Center for Bioethics, US, & Indiana University, USA

Chapter 2
Virtual Screening: An Overview on Methods and Applications .......................... 28

Khaled H. Barakat, University of Alberta, Canada
Jonathan Y. Mane, University of Alberta, Canada
Jack A. Tuszyński, University of Alberta, Canada

Chapter 3
Systems Biology-Based Approaches Applied to Vaccine Development .................. 61

Patricio A. Manque, Universidad Mayor, Chile
Ute Woehlbier, University of Chile, Chile

Chapter 4
Current Omics Technologies in Biomarker Discovery ...................................... 79

Wei Ding, Merck & Co., Inc., USA
Ping Qiu, Merck & Co., Inc., USA
Yan-Hui Liu, Merck & Co., Inc., USA
Wenqing Feng, Accela Sciences, LLC, USA
Section 2
Method Development in Bioinformatics

Chapter 5
Single Nucleotide Polymorphism and its Application in Mapping Loci Involved in Developing Human Diseases and Traits .................................................................................................................. 113
Rui-Ru Ji, Bristol-Myers Squibb, USA

Chapter 6
Addressing the Challenges of Detecting Epistasis in Genome-Wide Association Studies of Common Human Diseases Using Biological Expert Knowledge ...................................................... 128
Kristine A. Pattin, Dartmouth Medical School, USA
Jason H. Moore, Dartmouth Medical School, USA

Chapter 7
Biclustering of DNA Microarray Data: Theory, Evaluation, and Applications .................. 148
Alain B. Tchagang, National Research Council, Canada
Youlian Pan, National Research Council, Canada
Fazel Famili, National Research Council, Canada
Ahmed H. Tewfik, University of Minnesota, USA
Panayiotis V. Benos, University of Pittsburgh, USA

Chapter 8
Prediction of Epigenetic Target Sites by Using Genomic DNA Sequence .......................... 187
Guo-Cheng Yuan, Harvard School of Public Health, USA & Dana-Farber Cancer Institute, USA

Chapter 9
A New Approach for Sequence Analysis: Illustrating an Expanded Bioinformatics View through Exploring Properties of the Prestin Protein .......................................................................................... 202
Kathryn Dempsey, University of Nebraska at Omaha, USA & University of Nebraska Medical Center, USA
Benjamin Currall, Creighton University, USA
Richard Hallworth, Creighton University, USA
Hesham Ali, University of Nebraska at Omaha, USA & University of Nebraska Medical Center, USA

Section 3
Biological Networks and Pathways

Chapter 10
Knowledge-Driven, Data-Assisted Integrative Pathway Analytics ...................................... 225
Padmalatha S. Reddy, Pfizer, USA
Stuart Murray, Agios Pharmaceuticals Inc, USA
Wei Liu, Agios Pharmaceuticals Inc, USA
Chapter 11
Modules in Biological Networks: Identification and Application ........................................ 248
Bing Zhang, Vanderbilt University School of Medicine, USA
Zhiao Shi, Vanderbilt University, USA

Chapter 12
Using Functional Linkage Gene Networks to Study Human Diseases ................................ 275
Bolan Linghu, Novartis Institutes for BioMedical Research, USA
Guohui Liu, Millennium Pharmaceuticals Inc, USA
Yu Xia, Boston University, USA

Chapter 13
Network-Driven Analysis Methods and their Application to Drug Discovery ...................... 294
Daniel Ziemek, Pfizer Inc., USA
Christoph Brockel, Pfizer Inc., USA

Chapter 14
Pathway Resources at the Rat Genome Database: A Dynamic Platform for Integrating Gene, Pathway and Disease Information ................................................................. 316
Victoria Petri, Medical College of Wisconsin, USA

Chapter 15
Unsupervised Methods to Identify Cellular Signaling Networks from Perturbation Data ........ 337
Madhusudan Natarajan, Pfizer, USA

Chapter 16
Complexity and Modularity of MAPK Signaling Networks .............................................. 355
George V. Popescu, University Politehnica Bucharest, Romania
Sorina C. Popescu, Boyce Thompson Institute for Plant Research, USA

Chapter 17
Cancer and Signaling Pathway Deregulation ...................................................................... 369
Yingchun Liu, Dana-Farber Cancer Institute, USA & Harvard Medical School, USA

Chapter 18
Computational Methods for Identification of Novel Secondary Metabolite Biosynthetic Pathways by Genome Analysis ................................................................. 380
Swadha Anand, National Institute of Immunology, India
Debasis Mohanty, National Institute of Immunology, India
Chapter 19
Linking Interactome to Disease: A Network-Based Analysis of Metastatic Relapse in Breast Cancer

Maxime Garcia, Inserm, Paoli Calmettes Institute, France
Olivier Stahl, Inserm, Paoli Calmettes Institute, France
Pascal Finetti, Inserm, Paoli Calmettes Institute, France
Daniel Birnbaum, Inserm, Paoli Calmettes Institute, France
Francois Bertucci, Inserm, Paoli Calmettes Institute, France
Ghislain Bidaut, Inserm, Paoli Calmettes Institute, France

Chapter 20
Using Systems Biology Approaches to Predict New Players in the Innate Immune System

Bin Li, Merrimack Pharmaceuticals, Inc., USA

Chapter 21
Dynamic Modeling and Parameter Identification for Biological Networks: Application to the DNA Damage and Repair Processes

Fortunato Bianconi, University of Perugia, Italy
Gabriele Lillacci, University of Perugia, Italy
Paolo Valigi, University of Perugia, Italy

Chapter 22
Granger Causality: Its Foundation and Applications in Systems Biology

Tian Ge, Fudan University, China
Jianfeng Feng, Fudan University, China & University of Warwick, UK

Chapter 23
Connecting Microbial Population Genetics with Microbial Pathogenesis: Engineering Microfluidic Cell Arrays for High-throughput Interrogation of Host-Pathogen Interaction

Palaniappan Sethu, University of Louisville, USA
Kalyani Putty, University of Louisville, USA
Yongsheng Lian, University of Louisville, USA
Awdhesh Kalia, University of Louisville, USA

Section 4
Structural and Mathematical Modeling

Chapter 24
Structural Alignment of RNAs with Pseudoknots

Thomas K. F. Wong, The University of Hong Kong, Hong Kong
S. M. Yiu, The University of Hong Kong, Hong Kong
Chapter 25
Finding Attractors on a Folding Energy Landscape
Wilfred Ndifon, Princeton University, USA & Weizmann Institute of Science, Israel
Jonathan Dushoff, McMaster University, Canada

Chapter 26
Visualization of Protein 3D Structures in ‘Double-Centroid’ Reduced Representation:
Application to Ligand Binding Site Modeling and Screening
Vicente M. Reyes, School of Life Sciences, College of Science, Rochester Institute of Technology, Rochester, USA
Vrunda Sheth, School of Life Sciences, College of Science, Rochester Institute of Technology, Rochester, USA

Chapter 27
Mechanical Models of Cell Adhesion Incorporating Nonlinear Behavior and Stochastic Rupture of The Bonds: Concepts and Preliminary Results
Jean-François Ganghoffer, LEMTA – ENSEM, France

Chapter 28
A Multiscale Computational Model of Chemotactic Axon Guidance
Giacomo Aletti, University of Milan, Italy
Paola Cousin, University of Milan, Italy
Giovanni Naldi, University of Milan, Italy
Matteo Semplice, University of Insubria, Italy
