### Introduction
 xiii

### Part I  Failure mechanisms in concrete

1. Causes and mechanisms of deterioration in reinforced concrete
   
   V. Penttala, Helsinki University of Technology, Finland
   
   1.1 Introduction
   3
   1.2 Microstructure and role of moisture in concrete deterioration
   4
   1.3 Physically induced deterioration
   7
   1.4 Chemically induced deterioration
   19
   1.5 Summary
   29
   1.6 References and further reading
   29

2. Types of damage in concrete structures
   
   K. Kovler, National Building Research Institute, Israel; and V. Chernov, Ashdod Port Company Ltd, Israel
   
   2.1 Introduction
   32
   2.2 Types of concrete damage
   33
   2.3 Causes and mechanisms of concrete damage
   35
   2.4 Chemical attack
   37
   2.5 Fire
   38
   2.6 Static overloading
   42
   2.7 Impact
   43
   2.8 Earthquakes
   45
   2.9 Malicious damage
   48
   2.10 Case studies
   50
   2.11 Conclusions
   54
   2.12 References
   56
## Contents

### Part I

3  Types and causes of cracking in concrete structures  57
   C. J. Larosche, Wiss, Janney, Elstner Associates, Inc., USA
   3.1  Introduction  57
   3.2  Cracking in a plastic state  58
   3.3  Cracking after hardening  62
   3.4  Assessment of distressed concrete  79
   3.5  References  83

4  Condition assessment of concrete structures  84
   U. Dilek, MACTEC Engineering and Consulting, Inc., USA
   4.1  Introduction  84
   4.2  Evaluation of concrete structures – overview  84
   4.3  Methodologies to evaluate concrete structures  87
   4.4  Stages of condition assessment  90
   4.5  Evaluation techniques and test methodologies  102
   4.6  Laboratory testing on cores  119
   4.7  Load testing of structures  125
   4.8  Sources of further information and advice  133
   4.9  Acknowledgement  134
   4.10 References  134

### Part II

5  Standards and guidelines for repairing concrete structures  141
   M. Raupach, Institute of Building Materials Research of Aachen University, Germany; and L. Wolff, Consulting Engineers, Raupach Bruns Wolff GmbH & Co. KG, Germany
   5.1  Introduction  141
   5.2  Systematics of concrete repair according to EN 1504  141
   5.3  International regulations for condition evaluation, repair and maintenance  149
   5.4  References  159
   5.5  Appendix  160

6  Methods of crack repair in concrete structures  169
   C. A. Issa, Lebanese American University, Lebanon
   6.1  Crack repair methods selection  169
   6.2  Crack repair methods  175
   6.3  Summary  190
   6.4  Sources of further information and advice  190
   6.5  References  192
10 Protection systems for concrete structures
M. A. Murray, MAM, LLC, USA
10.1 Introduction 270
10.2 Surface preparation 271
10.3 Polymer overlays 272
10.4 Case studies 278
10.5 Recommendations 280
10.6 References 281

11 Patching of deteriorated concrete structures
M. A. Murray, MAM, LLC, USA
11.1 Introduction 282
11.2 Condition survey 283
11.3 Surface preparation 284
11.4 Repair materials 287
11.5 Material placement 289
11.6 Case studies 293
11.7 Recommendations 294
11.8 References 295

12 Durability of repaired concrete structures
D. Cusson, National Research Council Canada, Canada
12.1 Introduction 296
12.2 Designing concrete repairs for durability 297
12.3 Durability assessment of repaired concrete structures 304
12.4 Case studies 307
12.5 Concluding remarks and recommendations 318
12.6 Sources of further information and advice 319
12.7 References 319
