# Table of Contents

CGO 2010 Organizing Committee ...........................................................................................................viii
Additional Reviewers ............................................................................................................................. ix
CGO 2010 Sponsors & Supporters ......................................................................................................... x

## Keynote I

- **Performance Is Dead, Long Live Performance!** .............................................................................. 1
  Benjamin Zorn (Microsoft Research)

## Session 1: Dynamic Optimization and Analysis

- **PinPlay:**
  A Framework for Deterministic Replay and Reproducible Analysis of Parallel Programs ............. 2
  Harish Patil, Cristiano Pereira, Mack Stallcup, Gregory Lueck, James Cownie (Intel Corporation)
- **TAO: Two-Level Atomicity for Dynamic Binary Optimizations** .............................................. 12
  Edson Borin, Youfeng Wu, Cheng Wang, Wei Liu, Mauricio Breternitz Jr., Shiliang Hu,
  Esfir Natanzon, Shai Rotem, Roni Rosner (Intel Corporation)
- **UmbrA: Efficient and Scalable Memory Shadowing** ................................................................. 22
  Qin Zhao (Massachusetts Institute of Technology), Derek Bruening (VMware, Inc.),
  Saman Amarasinghe (Massachusetts Institute of Technology)
- **Large Program Trace Analysis and Compression with ZDDs** .................................................... 32
  Graham Price, Manish Vachharajani (University of Colorado at Boulder)

## Session 2: Feedback-Directed and JIT Compilation

- **Taming Hardware Event Samples for FDO Compilation** ........................................................ 42
  Dehao Chen (Tsinghua University), Neil Vachharajani, Robert Hundt, Shih-wei Liao (Google),
  Vinodha Ramasamy (No Affiliation), Paul Yuan (Peking University), Wenguang Chen, Weimin Zheng (Google)
- **Lightweight Feedback-Directed Cross-Module Optimization** ............................................... 53
  Xinliang David Li, Raksit Ashok, Robert Hundt (Google)
- **Automated Just-In-Time Compiler Tuning** ............................................................................ 62
  Kenneth Hoste, Andy Georges, Lieven Eeckhout (Ghent University)
- **Hybrid Java Compilation and Optimization for Digital TV Software Platform** .................... 73
  Dong-Heon Jung, Soo-Mook Moon, Hyeong-Seok Oh (Seoul National University)

## Session 3: Memory Optimizations and Synchronization

- **A Self-Adjusting Code Cache Manager to Balance Start-Up Time and Memory Usage** .......... 82
  Witawas Srisa-an, Myra B. Cohen, Yu Shang, Mithuna Soundararaj (University of Nebraska-Lincoln)
- **On Improving Heap Memory Layout by Dynamic Pool Allocation** ....................................... 92
  Zhenjiang Wang, Chenggang Wu (Chinese Academy of Sciences),
  Pen-Chung Yew (University of Minnesota at Twin-Cities)
- **An Efficient Software Transactional Memory Using Commit-Time Invalidation** .................. 101
  Justin E Gottschlich, Manish Vachharajani, Jeremy G. Siek (University of Colorado at Boulder)
- **Efficient Compilation of Fine-Grained SPMD-Threaded Programs for Multicore CPUs** ........ 111
  John A. Stratton (NVIDIA Corporation & University of Illinois at Urbana-Champaign),
  Vinod Grover, Jaydeep Marathe, Bastiaan Aarts, Mike Murphy, Ziang Hu (NVIDIA Corporation),
  Wen-mei W. Hwu (University of Illinois at Urbana-Champaign)

## Keynote II

- **There Are At Least Two Sides to Every Heterogeneous System** ............................................ 120
  Chris (CJ) Newbun (Intel)
Session 4: Speculative and Automatic Parallelization

- Decoupled Software Pipelining Creates Parallelization Opportunities ................................................................. 121
  Jialu Huang, Arun Raman, Thomas B. Jablin, Yun Zhang, Tzu-Han Hung, David I. August
  (Princeton University)

- Prospect: A Compiler Framework for Speculative Parallelization ............................................................................. 131
  Martin Suflkraut, Thomas Krauth, Stefan Weigert, Ute Schiffel (Technische Universität Dresden),
  Martin Meinhold (Konset E GmbH), Christof Fetzer (Technische Universität Dresden)

- Speculative Parallelization of Partial Reduction Variables ....................................................................................... 141
  Liang Han (North Carolina State University), Wei Liu (Intel Corporation),
  James M. Tuck (North Carolina State University)

- Automatic Parallelization of Simulink Applications .......................................................................................... 151
  Arquimedes Canedo, Takeo Yoshizawa, Hideaki Komatsu (IBM Research - Tokyo)

Session 5: Register Allocation

- Coloring-Based Coalescing for Graph Coloring Register Allocation .................................................................. 160
  Rei Odaira, Takuya Nakaike, Tatsushi Inagaki, Hideaki Komatsu, Toshiro Nakatani (IBM Research - Tokyo)

- Linear Scan Register Allocation on SSA Form ........................................................................................................ 170
  Christian Wimmer, Michael Franz (University of California, Irvine)

- Integrated Instruction Selection and Register Allocation for Compact Code
  Generating Exploiting Freeform Mixing of 16- and 32-Bit Instructions ............................................................ 180
  Tobias J. K. Edler von Koch, Igor Böhm, Björn Franke (University of Edinburgh)

Session 6: Static Optimizations

- Automatic Creation of Tile Size Selection Models .............................................................................................. 190
  Tomofumi Yuki (Colorado State University),
  Lakshminarayanan Rengananyan (IBM T.J. Watson Research Center),
  Sanjay Rajopadhye, Charles Anderson (Colorado State University),
  Alexandre E. Eichenberger, Kevin O’Brien (IBM T.J. Watson Research Center)

- Parameterized Tiling Revisited ..................................................................................................................... 200
  Muthu Manikandan Baskaran, Albert Hartono, Sanket Tavarageri, Thomas Henretty (The Ohio State University),
  J. Ramanujam (Louisiana State University), P. Sadayappan (The Ohio State University)

- Minimizing Communication in Rate-Optimal Software Pipelining for Stream Programs ......................... 210
  Haihao Wei, Junqing Yu, Huafei Yu (HuaZhong University of Science and Technology),
  Guang R. Gao (University of Delaware)

- Level by Level:
  Hongtiao Yu (Chinese Academy of Sciences), Jingling Xue (University of New South Wales, Australia),
  Wei Huo, Xiaobing Feng, Zhaoqing Zhang (Chinese Academy of Sciences),

Session 7: Mathematical/Statistical Approaches

- Towards Program Optimization Through Automated Analysis of Numerical Precision ...................... 230
  Michael D. Linderman, Matthew Ho, David L. Dill, Teresa H. Meng, Garry P Nolan (Stanford University)

- Statistically Regulating Program Behavior Via Mainstream Computing .................................................. 238
  Mark William Stephenson (IBM Austin Research Laboratory), Ram Rangan (NVIDIA),
  Emmanuel Yashchin, Eric Van Hensbergen (IBM Austin Research Laboratory)

- Exploiting Statistical Correlations for Proactive Prediction of Program Behaviors ............................. 248
  Yunlian Jiang, Eddy Z. Zhang, Kai Tian, Feng Mao, Malcom Gethers, Xipeng Shen
  (The College of William and Mary),
  Yaoqing Gao (IBM Toronto Laboratory)
Session 8: Runtime Techniques

- Contention Aware Execution: Online Contention Detection and Response .............................................257
  Jason Mars (University of Virginia), Neil Vachharajani, Robert Hundt (Google),
  Mary Lou Soffa (University of Virginia)

- An Adaptive Task Creation Strategy for Work-Stealing Scheduling ..................................................266
  Lei Wang, Huimin Cui (Chinese Academy of Sciences),
  Yuelu Duan (University of Illinois at Urbana-Champaign),
  Fang Lu, Xiaobing Feng (Chinese Academy of Sciences), Pen-Chung Yew (University of Minnesota)

- Dynamic Interpretation for Dynamic Scripting Languages .................................................................278
  Kevin Williams, Jason McCandless, David Gregg (Trinity College Dublin)

Author Index .............................................................................................................................................288
