Table of Contents

Message from the General and Program Committee Chairs ........................................... x
Conference Organizers ....................................................................................................... xi

Algorithms, Analysis, and Theory

Generic Fault-Tolerance Mechanisms Using the Concept of Logical Execution Time .......................................................... 3
  Christian Buckl, Matthias Regensburger, Alois Knoll, and Gerhard Schrott

Error Recovery Method for Multiple-Dictionary Compression Method ......................................................... 11
  Masato Kitakami and Yuta Noguchi

Fault Detection System Activated by Failure Information ........................................................................... 19
  Masato Sakai, Hiroya Matsuba, and Yutaka Ishikawa

Comparative Analysis of QoS and Memory Usage of Adaptive Failure Detectors ........................................... 27
  Naixue Xiong, Y. Yang, and Xavier Défago
Quantifying Software Maintainability Based on a Fault-Detection/Correction Model

Kazuya Shibata, Koichiro Rinsaka, Tadashi Dohi, and Hiroyuki Okamura

PISRAT: Proportional Intensity-Based Software Reliability Assessment Tool

Kazuya Shibata, Koichiro Rinsaka, and Tadashi Dohi

An Automatic Real-Time Analysis of the Time to Reach Consensus

Tatsuhiro Tsuchiya and André Schiper

Combinatorial Constructions of Multi-erasure-Correcting Codes with Independent Parity Symbols for Storage Systems

Gang Wang, Sheng Lin, Xiaoguang Liu, Guangjun Xie, and Jing Liu

Failure Detectors and Extended Paxos for k-Set Agreement

Wei Chen, Jialin Zhang, Yu Chen, and Xuezheng Liu

An Accurate Model of Software Reliability

Shiyi Xu

Regression Testing Based on UML Design Models

Atifah Ali, Aamer Nadeem, Muhammad Zohaib Z. Iqbal, and Mohammad Usman

Model Based Development of Safety-Critical Systems Using Template Based Code Generation

Matthias Regensburger, Christian Buckl, Alois Knoll, and Gerhard Schrott

Predicting Defective Software Components from Code Complexity Measures

Hongyu Zhang, Xiuzhen Zhang, and Ming Gu

Neural-Network Based Test Cases Generation Using Genetic Algorithm

Ruilian Zhao and Shanshan Lv

A Measurement Tool of End-User Computing Capability in Competency Perspective

Chui Young Yoon and Keon Myung Lee

**Dependable Networks**

Fault Tolerance for Super-Peers of P2P Systems

Jenn-Wei Lin, Ming-Feng Yang, and Jichiang Tsai

A Path Diversity Metric for End-to-End Network

Song Huang, Yong Xu, and Ling Zhang

The Eventual Leadership in Dynamic Mobile Networking Environments

Jiamong Cao, Michel Raynal, Corentin Travers, and Weigang Wu

Fault-Tolerant Topology Control with Adjustable Transmission Ranges in Wireless Sensor Networks

Chiu-Wen Chen, Kuo-Feng Su, and Hewijin Christine Jiau
Dependability Evaluation of Cooperative Backup Strategies for Mobile Devices.................................139
   Ludovic Courtes, Ossama Hamouda, Mohamed Kaâniche, Marc-Olivier Kiliitian, and David Powell

Implementation of Highly Available OSPF Router on ATCA............................................................147
   Chia-Tai Tsai, Rong-Hong Jan, Chien Chen, and Chia-Yuan Huang

Overlay Network Topology Reconfiguration in Byzantine Settings....................................................155
   Rafael R. Obelheiro and Joni da Silva Fraga

A Randomized Distributed Algorithm for Peer-to-Peer Data Replication in Wireless Ad Hoc Networks ..............163
   Hong-Zu Chou, Szu-Chi Wang, and Sy-Yen Kuo

Fault Diagnosis for Time Synchronization in Sensor Networks.............................................................171
   Ke-Ting Chen, Kuo-Feng Ssu, and Wei-Tong Wang

Applied Self-Healing: Self-Aware Service Request Optimization for Gateway Stability in Ubiquitous Zone-Based Networks .................................................................179
   Junaid Ahsen Ali Chaudhry, Yonghwan Lee, Dugki Min, Seunghyu Park, Chun-Hyon Chang, and Duckwon Chung

A Fast Failure Detection and Failover Scheme for SIP High Availability Networks....................................187
   Wei-Ming Wu, Kuochen Wang, Rong-Hong Jan, and Chia-Yuan Huang

Assessment of Message Missing Failures in FlexRay-Based Networks...................................................191
   Vahid Lari, Mehdi Dehbashi, Seyed Ghassem Miremadi, and Navid Farazmand

A Hybrid Redundancy Approach for Data Availability in Structured P2P Network Systems..........................195
   Guangping Xu, Gang Wang, and Jing Liu

**Dependable Systems and Hardware**

A New Concurrent Detection of Control Flow Errors Based on DCT Technique........................................201
   Hung-Chuan Lai, Shi-Jinn Horng, Yong-Yuan Chen, Pingzhi Fan, and Yi Pan

Soft Error Rate Estimation in Deep Sub-micron CMOS .............................................................................210
   Lianlian Zeng and Paul Beckett

Energy Saving Based on CPU Voltage Scaling and Hardware Software Partitioning.......................................217
   Chia Hsiang Hsu, Cheng-Juei Yu, and Sheng-De Wang

Efficient BISR Techniques for Embedded Memories Considering Cluster Faults........................................224
   Chun-Lin Yang, Yuang-Cheng Hsiao, and Shyue-Kung Lu

A Fail-Silent Reconfigurable Superscalar Processor..................................................................................232
   Thomas Kotke and Andreas Steininger
Improving Dependability Using Shared Supplementary Memory and Opportunistic Micro Rejuvenation in Multi-tasking Embedded Systems ................................................................. 240
Vinaiytheerthan Sundaram, Sandip HomChaudhuri, Sachin Garg, Chandra Kintala, and Saurabh Bagchi

An On-Line Control Flow Checking Method for VLIW Processor ................................................................. 248
Shuming Chen, Xiao Hu, Biwei Liu, and Jihua Chen

Towards Byzantine Fault Tolerance in Many-Core Computing Platforms ................................................................. 256
Casey M. Jeffery and Renato J. O. Figueiredo

Heterogeneous Functional Units for High Speed Fault-Tolerant Execution Stage ................................................................. 260
Yousuke Nakamura and Kei Hiraki

A Low-Power and SEU-Tolerant Switch Architecture for Network on Chips ................................................................. 264
A. Patoghy, M. Fazeli, and S. G. Miremadi

Power-Performance Trade-Off of a Dependable Multicore Processor ................................................................. 268
Toshinori Sato and Toshimasa Funaki

Distributed Systems

Examining Web-Based Spyware Invasion with Stateful Behavior Monitoring ................................................................. 275
Ming-Wei Wu and Sy-Yen Kuo

A Process Group Membership Service for Active Safety Systems Using TT/ET Communication Scheduling ................................................................. 282
Carl Bergenhem and Johan Karlsson

Boosting Database Replication Scalability through Partial Replication and 1-Copy-Snapshot-Isolation ................................................................. 290
D. Serrano, M. Patiño-Martinez, R. Jimenez-Peris, and B. Kemme

PAI: A Lightweight Mechanism for Single-Node Memory Recovery in DSM Servers ................................................................. 298
Jangwoo Kim, Jared C. Smolens, Babak Falsafi, and James C. Hoe

Self-Adjusting Indexing Techniques for Communication-Induced Checkpointing Protocols ................................................................. 306
Jichiang Tsai, Chia-Yang Chen, Ming-Fa Hu, and Jenn-Wei Lin

RTG-L: Dependably Scheduling Real-Time Distributable Threads in Large-Scale, Unreliable Networks ................................................................. 314
Kai Han, Binoy Ravindran, and E. D. Jensen

Benchmarking the Robustness of Web Services ................................................................. 322
Marco Vieira, Nuno Laranjeiro, and Henrique Madeira

The Cost of Storing Checkpoints to Multiple Volatile Storage Locations Using at-least-k Semantics ................................................................. 330
Andrew Moloney and Andrzej Goscinski
A Proposal of New Dependable Database Middleware with Consistency and Concurrency Control ................................................................. 334
Takeshi Mishima and Hiroshi Nakamura

Improving Email Reliability by Sender Retransmission ......................................................... 338
Tim Moors and Patrick Chu

Implementation of a Flexible Membership Protocol on a Real-Time Ethernet Prototype .................. 342
Raul Barbosa, António Ferreira, and Johan Karlsson

Security Issues

MAPMon: A Host-Based Malware Detection Tool ................................................................. 349
Shih-Yao Dai and Sy-Yen Kuo

Intrusion Tolerance in Wireless Environments: An Experimental Evaluation ............................. 357
Henrique Moniz, Nuno Ferreira Neves, Miguel Correia, António Casimiro, and Paulo Veríssimo

José Fonseca, Marco Vieira, and Henrique Madeira

Resilient Intrusion Tolerance through Proactive and Reactive Recovery ........................................ 373
Paulo Sousa, Alysson Neves Bessani, Miguel Correia, Nuno Ferreira Neves, and Paulo Veríssimo

Information Security Fortification by Ontological Mapping of the ISO/IEC 27001 Standard .................. 381
Stefan Fenz, Gernot Goluch, Andreas Ekelhart, Bernhard Riedl, and Edgar Weippl

A Fault-Tolerant Bloom Filter for Deep Packet Inspection ...................................................... 389
Myeong-Hyeon Lee and Yoon-Hwa Choi

Applying a Threshold Scheme to the Pseudonymization of Health Data .................................... 397
Bernhard Riedl, Veronika Grascher, and Thomas Neubauer

On the Effects of Finite Memory on Intrusion-Tolerant Systems ............................................. 401
Giuliana Santos Veronese, Miguel Correia, Lau Cheuk Lung, and Paulo Veríssimo

An Efficient Client-to-Client Password-Authenticated Key Exchange Resilient to Server Compromise .................. 405
Hongfeng Zhu, Tianhua Liu, Jie Liu, and Guiran Chang

Author Index .......................................................................................................................... 409
