9th Symposium on Identity and Trust on the Internet 2010

(IDtrust 2010)

ACM International Conference Proceedings Series

Gaithersburg, Maryland, USA
13-15 April 2010

Editors:

Carl Ellison
Neal McBurnett

Sara Caswell

Identity Providers and Federation
Federated Login to TeraGrid ................................................................. 1
Jim Basney, National Center for Supercomputing Appls. (NCSA), University of Illinois
Terry Fleury, National Center for Supercomputing Appls. (NCSA), University of Illinois
Von Welch, National Center for Supercomputing Appls. (NCSA), University of Illinois

CardSpace-Liberty Integration for CardSpace Users .................................... 12
Haitham Al-Sinani, Royal Holloway, University of London
Waleed Alrodhan, Royal Holloway, University of London
Chris Mitchell, Royal Holloway, University of London

An Identity Provider to Manage Reliable Digital Identities for
SOA and the Web .................................................................................. 26
Ivonne Thomas, Hasso-Plattner-Institute
Christoph Meinel, Hasso-Plattner-Institute

Policy Conflict Resolution
An Attribute-based Authorization Policy Framework with Dynamic Conflict
Resolution .............................................................................................. 37
Apurva Mohan, Georgia Tech
Douglas Blough, Georgia Tech

Computational Techniques for Increasing PKI Policy Comprehension
by Human Analysts ............................................................................... 51
Gabriel Weaver, Dartmouth College
Scott Rea, Dartmouth College
Sean Smith, Dartmouth College

Privacy
Efficient and Privacy-Preserving Enforcement of Attribute-Based
Access Control ..................................................................................... 63
Ning Shang, Microsoft Corporation
Federica Paci, University of Trento
Elisa Bertino, Purdue University

Privacy-Preserving DRM ....................................................................... 69
Radia Perlman, Intel Labs
Charlie Kaufman, Microsoft
Ray Perlner, NIST
Biometrics
Biometrics-Based Identifiers for Digital Identity Management ........................................... 84
Abhilasha Bhargav-Spantzel, Intel Corporation
Anna Squicciarini, Pennsylvania State University
Elisa Bertino, Purdue University
Xiangwei Kong, Dalian University of Technology, China
Weike Zhang, Dalian University of Technology, China

Infrastructure
Practical and Secure Trust Anchor Management and Usage ............................................. 97
Carl Wallace, Cygnacom Solutions
Geoff Beier, Cygnacom Solutions

A Proposal for Collaborative Internet-Scale Trust Infrastructures Deployment:
    The Public Key System (PKS) ................................................................. 108
Massimiliano Pala, Dartmouth College

Author Index.......................................................................................................................... 117
