1 Uniform Random Number Generation

1.1 Random Numbers
  1.1.1 Properties of a Good Random Number Generator
  1.1.2 Choosing a Good Random Number Generator

1.2 Generators Based on Linear Recurrences
  1.2.1 Linear Congruential Generators
  1.2.2 Multiple-Recursive Generators
  1.2.3 Matrix Congruential Generators
  1.2.4 Modulo 2 Linear Generators

1.3 Combined Generators

1.4 Other Generators

1.5 Tests for Random Number Generators
  1.5.1 Spectral Test
  1.5.2 Empirical Tests

References
## Quasirandom Number Generation

- 2.1 Multidimensional Integration
- 2.2 Van der Corput and Digital Sequences
- 2.3 Halton Sequences
- 2.4 Faure Sequences
- 2.5 Sobol' Sequences
- 2.6 Lattice Methods
- 2.7 Randomization and Scrambling

## Random Variable Generation

- 3.1 Generic Algorithms Based on Common Transformations
  - 3.1.1 Inverse-Transform Method
  - 3.1.2 Other Transformation Methods
  - 3.1.3 Table Lookup Method
  - 3.1.4 Alias Method
  - 3.1.5 Acceptance-Rejection Method
  - 3.1.6 Ratio of Uniforms Method
- 3.2 Generation Methods for Multivariate Random Variables
  - 3.2.1 Copulas
- 3.3 Generation Methods for Various Random Objects
  - 3.3.1 Generating Order Statistics
  - 3.3.2 Generating Uniform Random Vectors in a Simplex
  - 3.3.3 Generating Random Vectors Uniformly Distributed in a Unit Hyperball and Hypersphere
  - 3.3.4 Generating Random Vectors Uniformly Distributed in a Hyperellipsoid
  - 3.3.5 Uniform Sampling on a Curve
  - 3.3.6 Uniform Sampling on a Surface
  - 3.3.7 Generating Random Permutations
  - 3.3.8 Exact Sampling From a Conditional Bernoulli Distribution

## Probability Distributions

- 4.1 Discrete Distributions
  - 4.1.1 Bernoulli Distribution
  - 4.1.2 Binomial Distribution
  - 4.1.3 Geometric Distribution
  - 4.1.4 Hypergeometric Distribution
  - 4.1.5 Negative Binomial Distribution

8 Statistical Analysis of Simulation Data

8.1 Simulation Data
8.1.1 Data Visualization
8.1.2 Data Summarization

8.2 Estimation of Performance Measures for Independent Data
8.2.1 Delta Method

8.3 Estimation of Steady-State Performance Measures
8.3.1 Covariance Method
8.3.2 Batch Means Method
8.3.3 Regenerative Method

8.4 Empirical Cdf

8.5 Kernel Density Estimation
8.5.1 Least Squares Cross Validation
8.5.2 Plug-in Bandwidth Selection

8.6 Resampling and the Bootstrap Method

8.7 Goodness of Fit
8.7.1 Graphical Procedures
8.7.2 Kolmogorov–Smirnov Test
8.7.3 Anderson–Darling Test
8.7.4 $\chi^2$ Tests
