# Table of Contents

## Session 1: Data Forwarding (Concise papers)

- **Human Mobility in Shopping Mall Environments** ................................................................. 1  
  Adriano Galati and Chris Greenhalgh (University of Nottingham, UK)

- **RADON: Reputation-Assisted Data Forwarding in Opportunistic Network** .......................... 8  
  Na Li and Sajal K. Das (The University of Texas at Arlington, USA)

- **On the Performance Modeling of Opportunistic Routing** .................................................. 15  
  Llorenç Cerdà-Alabern (Universitat Politècnica de Catalunya, Spain),  
  Vicent Pla (Universitat Politècnica de València, Spain), and  
  Amir Darehshoorzadeh (Universitat Politècnica de Catalunya, Spain)

## Session 2: Moving Data in Opportunistic Networks

- **Message Ferries as Generalized Dominating Sets in Intermittently Connected Mobile Networks** .......................... 22  
  Bahadir Polat, Pushkar Sachdeva, Mostafa Ammar, and  
  Ellen Zegura (Georgia Institute of Technology, USA)

- **Virtual Data Mules for Data Collection in Road-side Sensor Networks** .......................... 32  
  Diego Borsetti, Claudio E. Casetti, Carla-Fabiana Chiasserini  
  (Politecnico di Torino, Italy), Marco Fiore (INSA Lyon, France), and  
  Jose M. Barcelo-Ordinas (Universitat Politècnica de Catalunya, Spain)

- **Impact of Source Counter on DTN Routing Control under Resource Constraints** ........... 41  
  Xiaolan Zhang (Fordham University, USA), Honggang Zhang  
  (Suffolk University, USA), and Yu Gu (NEC Labs America, USA)

## Session 3: Opportunistic Network Applications (Concise papers)

- **Spectral Efficiency of Mobility-Assisted Podcasting in Cellular Networks** .................. 51  
  Vladimir Vukadinovic and Gunnar Karlsson  
  (KTH, Royal Institute of Technology, Sweden)

- **Uttering: Social Micro-blogging without the Internet** .................................................. 58  
  Gualtiero Colombo, Roger Whitaker, and Stuart Allen  
  (University of Cardiff, UK)

- **DTIPN: Delay Tolerant IP Networking for Opportunistic Network Applications** .......... 65
Session 4: **DTN Technologies & Prototypes** *(Concise papers)*

- Evaluation of a DTN Convergence Layer for the AX.25 Network Protocol ........................................ 72
  John Ronan, Kristian Walsh (Waterford Institute of Technology, Ireland),
  and Darren Long (Thales Optronics, UK)

- Secure Descriptive Message Dissemination in Disruption Tolerant Networks ........................................ 79
  Mooi Choo Chuah, Sankardas Roy, and Ivan Stoey
  (Lehigh University, USA)

- Intelligent Autonomous Handover in iMANETs ................................................................. 86
  Ben McCarthy, Panagiotis Georgopoulos, and Christopher Edwards
  (Lancaster University, UK)

Session 5: **Best Paper Award Session**

- Random Walks in Time-Graphs ................................................................................................ 93
  Utku G. Acer (INRIA, France), Petros Drineas (Rensselaer Polytechnic
  Institute, USA), and Alhussein A. Abouzeid (Rensselaer Polytechnic
  Institute, USA)

- Efficient and Reliable Dissemination in Wireless Opportunistic Networks
  by Location Extrapolation ........................................................................................................ 101
  Adnan Agbaria (The Academic Arab College, Israel) and
  Roy Friedman (Technion, Israel)

- Plausible Mobility: Inferring Movement from Contacts .................................................. 110
  John Whitbeck (Thales Communications, France and Université Pierre et
  Marie Curie, France), Vania Conan (Thales Communications, France), and
  Marcelo Amorim (CNRS, France and Université Pierre et Marie Curie,
  France)

Session 6: **Data Management in Opportunistic Networks**

- A Study of Information Dissemination Under Multiple Random Walkers
  and Replication Mechanisms .............................................................................................. 118
  Konstantinos Oikonomou (Ionian University, Greece),
  Dimitris Kogias, and Ioannis Stavrakakis (University of Athens, Greece)

- Token Based Algorithm for Supporting Mutual Exclusion in Opportunistic
  Networks .......................................................................................................................... 126
  Sagar A. Tamhane and Mohan J. Kumar
  (The University of Texas at Arlington, USA)

- Hide-and-Lie: Enhancing Application-level Privacy in Opportunistic
  Networks .......................................................................................................................... 135
Laszlo Dora and Tamás Holczer  
(Budapest University of Technology and Economics, Hungary)

**Poster Session**

- Synthetic Map-based Mobility Traces for the Performance Evaluation in Opportunistic Networks  
  Nils Aschenbruck, Matthias Schwamborn (University of Bonn, Germany)

- An Evaluation of the Resource Discovery Process in IEEE 802.11 Networks  
  German Castignani (Telecom Bretagne, France), Andrés Arcía,  
  (Universidad de Los Andes, Venezuela), and Nicolas Montavont  
  (Telecom Bretagne, France)

- On the Degree Distribution of Opportunistic Networks  
  Stefano Ferretti (University of Bologna, Italy)

- Using Triggers for Emulation of Opportunistic Networking  
  Per Hurtig (Karlstad University, Sweden), Tanguy Pérennou (University of Toulouse, France), Johan García (Karlstad University, Sweden), and  
  Anna Brunstrom (Karlstad University, Sweden)

- Social-Greedy: A Socially-Based Greedy Routing Algorithm for Delay Tolerant Networks  
  Kazem Jahanbakhsh, Ali Shoja, and Valerie King  
  (University of Victoria, Canada)

- Opportunistic Scheduling of a Message Ferry in Sensor Networks  
  Veeraruna Kavitha (INRIA, France and University of Avignon, France) and  
  Eitan Altman (INRIA, France)

- Using Haggle to Create an Electronic Triage Tag  
  Abraham Martin-Campillo (Universitat Autònoma de Barcelona, Spain),  
  Jon Crowcroft, Eiko Yoneki (University of Cambridge, UK);  
  Ramon Martí, and Carlos Martínez-García (Universitat Autònoma de  
  Barcelona, Spain)

- Participatory MobileSocialNetwork Simulation Environment  
  Fawad Nazir (University of New South Wales, Australia and National ICT,  
  Australia), Helmut Prendinger (National Institute of Informatics, Japan),  
  Aruna Seneviratne (University of New South Wales, Australia and National  
  ICT, Australia)

- Analysis of Opportunistic Localization Algorithms Based on the Linear Matrix Inequality Method  
  Francesco Zorzi, Andrea Bardella (University of Padova, Italy), Tanguy  
  Pérennou (University of Toulouse, France), Guodong Kang (University of  
  Toulouse, France and Northwestern Polytechnical University, China), and  
  Andrea Zanella (University of Padova, Italy)
Demo Session

- Extending the Reach of Online Social Networks to Opportunistic Networks with PodNet
  Bernhard Distl, Gergely Csucs, Sascha Trifunovic (ETH Zurich, Switzerland), Carlos Anastasiades (University of Bern, Switzerland), Franck Legendre (ETH Zurich, Switzerland)

- Opportunistic Communication for Multiplayer Mobile Gaming: Lessons Learned from PhotoShoot
  Roelof Kemp, Nicholas Palmer, Thilo Kielmann, and Henri Bal (Vrije Universiteit, The Netherlands)

- Distributed Spectrum Sensing and Channel Selection in Opportunistic Wireless Personal Area Networks
  Hussein Khaleel (Politecnico di Torino, Italy), Federico Penna (Politecnico di Torino, Italy and Istituto Superiore Mario Boella (ISMB), Italy), Claudio Pastrone, Riccardo Tomasi, and Maurizio Spirito (Istituto Superiore Mario Boella, Italy)

- Ateneo On Fly: a System for Supporting Mobile Sharing Applications in Campus Scenarios
  Daniele Mansella, Laura Galluccio, Alessandro Leonardi, Giacomo Morabito, Antonio Pantò, and Francesco Scoto (University of Catania, Italy)

- An Opportunistic Platform for Android-based Mobile Devices
  Paolo Meroni, Elena Pagani, Gian Paolo Rossi, and Lorenzo Valerio (Università degli Studi di Milano, Italy)

- Experimental Localization Application in Opportunistic Scenario
  Francesco Zorzi, Andrea Bardella (University of Padova, Italy), Tanguy Pérrenou (Université de Toulouse, France), GuoDong Kang (Université de Toulouse, France and Northwestern Polytechnical University, China), and Andrea Zanella (University of Padova, Italy)

PhD Forum Abstracts

- Evaluating the Spatial Dimension of Contacts in Opportunistic Networks
  Nadjet Belblidia (Université Pierre et Marie Curie - Paris 6, France)

- Social Roles for Opportunistic Forwarding
  Greg Bigwood (University of St. Andrews, UK)

- Design and Analysis of Context-aware Forwarding Protocols for Opportunistic Networks
  Chiara Boldrini (IIT-CNR, Italy)
• Geostatistics-Inspired Sparsity-aware Cooperative Spectrum Sensing for Cognitive Radio Networks.......................................................... 203
  Emiliano Dall’Anese (University of Padova, Italy)

• ZebraNet and its Theoretical Analysis on Distribution Functions of Data Gathering Time........................................................................ 205
  Akihoro Fujihara (Kwansei Gakuin University, Japan)

• Modelling Opportunistic Application Spreading............................................. 207
  Ádám Horváth (University of West Hungary, Hungary)

• Distributed Location-Aware Hovering Information Systems............................ 209
  Ossi Karkulahti (University of Helsinki, Finland)

• Opportunistically Supported Ubiquitous Localization.................................... 211
  Michela Papandrea (SUPSI, Switzerland)

• Privacy-enhanced Opportunistic Networks.................................................. 213
  Iain Parris (University of St. Andrews, UK)

• Security Issues in Opportunistic Networks.................................................. 215
  Abdullatif Shikfa (EURECOM, France)
