CONTENTS

ENGINEERING EDUCATION AND PROFESSIONAL DEVELOPMENT

ACCREDITATION, ABET
IMECE2009-10622
Development of Faculty Course Assessment Reports for ME Program ABET Accreditation
Shanzhong (Shawn) Duan and Kurt Bassett

IMECE2009-12474
Addressing Most of ABET Criterion 3 Issues First in an Early Design Class
Richard Bannerot

IMECE2009-12502
Implementing a Robust, Yet Straightforward, Direct Assessment Process That Engages 100% of the Faculty
Juan C. Morales

IMECE2009-12638
Evaluating Lifelong Learning
April Bryan, Patricia Brackin, and Wayne Sanders

IMECE2009-12946
A Case Study on Course-Based Outcomes Assessment to Enhance Student Learning and Course Delivery in the Engineering Sciences Core Curriculum
Edward Hensel and Amitabha Ghosh

APPLIED MATHEMATICAL ENGINEERING: VARIABLE SHAPE GEOMETRY, MOTION AND REGULATORY COMPLEXITY
IMECE2009-11564
Improved Lawnmower Blade Design and Optimization
Robert White, Jackie Seaman, Xuejun Fan, and Paul R. Corder

IMECE2009-11962
A Developed Toolkit for Analysis of Large Deflections of Beams
Shahnam Navaee

IMECE2009-12088
An Introduction to Self-Excited Oscillations
Riccardo Paniroli and Serge Abrate

IMECE2009-12418
Enhanced Instruction of Engineering Mechanics Using Curvature Experiments
Byron L. Newberry
ENGINEERING EDUCATION FOR ENERGY INDUSTRY
IMECE2009-10247 ......................................................................................... 85
A Sustainable Approach to Advanced Energy and Vehicular Technologies at the
University of Kansas
Christopher Depcik, Lou McKown, and Matt LeGresley

IMECE2009-11466 ......................................................................................... 97
Design of a Hydrogen Fuel Cell Vehicle in the Capstone Design Course
Sean Slate, Mathew Fuini, Damion Rose, Alexander Kutterer, Brandon Patton,
Windell Cox, and Messiha Saad

IMECE2009-12314 ......................................................................................... 105
Hydrogen and Fuel Cell Education
A. K. Sleiti

IMECE2009-12412 ......................................................................................... 113
Impacts of Industrial Assessment Centers on Energy Engineering Education
D. Paul Mehta

IMECE2009-13249 ......................................................................................... 121
Methodology for Energy Assessment and Conservation
Brittany Aulds, Theodore Kozman, Jim Lee, and Satish Tyagi

IMECE2009-13250 ......................................................................................... 131
Enhancing Students' Energy Engineering Skills by Embedding Topics in
Homework Exercises
B. K. Hodge

FLUIDS ENGINEERING
IMECE2009-10057 ......................................................................................... 139
Calculations of Pressure Drop in a Circular Duct Using the Traditional Method Compared to
That Using the Constricted Flow Diameter
William S. Janna

IMECE2009-10266 ......................................................................................... 145
Aerodynamics of a Badminton Shuttlecock
S. L. Post, Jordan McLachlan, Travis Lonas, Justin Dancs, Daniel Knobloch,
Chris Darrow, Eric Sinn, Sara Davis, Dean Neilly, Aaron Funk, James Golz,
Andrew Phelps, and Bradley Goers

IMECE2009-10964 ......................................................................................... 151
A Simple Experiment to Expose Misconceptions About the Bernoulli Equation
Gerald W. Recktenwald, Robert C. Edwards, Douglas Howe, and Jenna Faulkner

IMECE2009-12409 ......................................................................................... 161
Flow Separation
Ahmad Fakheri

IMECE2009-12947 ......................................................................................... 169
Development of Analytical Skills Through Cooperative Learning
Amitabha Ghosh
HEAT TRANSFER AND ENERGY SYSTEMS

IMECE2009-11722 ................................................................. 181
Using Excel for the Thermodynamic Analysis of Air-Standard Cycles and Combustion Processes
Amir Karimi

IMECE2009-12256 ................................................................. 193
Performance of Air Conditioners With Commercial Desuperheaters:
A Green Energy Project as an Undergraduate Research
Emin Yilmaz and Abhijit Nagchaudhuri

IMECE2009-12769 ................................................................. 203
Innovative Thermofluids Experiments for Modern Mechanical Engineering Education
Peter Rodgers, Shrinivas Bojanampati, Afshin Goharzadeh, Arman Molki, and Valerie Eveloy

IMECE2009-13072 ................................................................. 213
From a Traditional Combustion Course to an Alternative and Renewable Energy Course
Mehmet Sözen

INFLUENTIAL MECHANICAL ENGINEERING EDUCATION TRANSFORMATION

IMECE2009-10195 ................................................................. 219
Studying Your Students as They Learn: A Case Study of CAD Education
R. F. Hamade

IMECE2009-10396 ................................................................. 225
Feasibility of Team-Based Learning Techniques in a Large Engineering Course
Sung-Hwan Joo

IMECE2009-11150 ................................................................. 233
Professional Tools Instruction Within an Overall ME Design Curriculum
Kevin Schmaltz, Christopher Moore, and Joel Lenoir

IMECE2009-11240 ................................................................. 241
Cultivation of Engineering Soft Skills Within the Constraints of a Prescribed Curriculum
Varghese Panthalookaran

IMECE2009-11516 ................................................................. 249
A Module-Based Approach for FEM Learning in Engineering Education
X. J. Xin, Liang-Wu Cai, Bradley Yoder, Arka Chattopadhyay, and Malcolm Panthaki

IMECE2009-12348 ................................................................. 257
The Effectiveness of Mechanical and Manufacturing Engineering Technology Programs for Full-Time Employed Industry Students
Geoffrey J. Peter

IMECE2009-12871 ................................................................. 263
An Evaluation of the Effectiveness of Traveling Engineering Activity Kits in Pre-College Classrooms
Elizabeth A. DeBartolo, Margaret B. Bailey, Sheryl A. Gillow, William Scorse, and Richard Liccion
