CONTENTS

PROCESSING AND ENGINEERING APPLICATIONS OF NOVEL MATERIALS

ADVANCES IN BONDING AND JOINING TECHNOLOGIES
IMECE2009-10976 ................................................................. 1
A Three-Dimensional Finite Element Stress Analysis and Strength Prediction of CFRP Adhesive Laminated Plates Subjected to Static and Impact Out-of-Plane Loadings
Yukiya Noshita, Toshiyuki Sawa, and Yuya Omiya

IMECE2009-11100 ............................................................... 13
FEM Stress Analysis and Evaluation of the Sealing Performance in Flexible Box-Shape Bolted Flange Gasketed Joints Subjected to Internal Pressure
Kentaro Tenma, Ryou Kurosawa, and Toshiyuki Sawa

IMECE2009-13110 ............................................................... 23
Investigation on the Effect of Storage Time on Bond Strength Between Plasma Activated Silicon Wafers
Joel Soman and Chad B. O’Neal

ADVANCES IN PROCESSING, CHARACTERIZATION AND APPLICATIONS OF BIOENGINEERED MATERIALS
IMECE2009-11000 ................................................................. 29
Biodegradable Micro- and Nanofibers Fabricated Through Electrospinning for Tissue Engineering and Controlled Release Applications
Jia-Chen Kang, Min Wang, and Xiao-Yan Yuan

IMECE2009-11689 ................................................................. 37
Preparation and Characterization of Porous Magnesium Alloys in Biomedical Applications
Zhigang Xu, James Linford, Shuo Chen, Christopher Smith, and Jag Sankar

IMECE2009-11958 ................................................................. 43
DNA Oligonucleotide-Templated Nanocrystals: Synthesis and Novel Label-Free Protein Detection
Kok Hao Chen and Jong Hyun Choi

IMECE2009-12574 ................................................................. 45
Effect of Heat Treating Temperature on Chemical and Physical Properties of Natural Hydroxyapatite Produced From Bovine Bone
Mousa Younesi, Mehdi Javidi, Mohammad Ebrahim Bahrololoom, and Hamidreza Fooladfar

IMECE2009-12612 ................................................................. 55
Nanoindentation, Nanoscratch and Wear Studies on Nanoscale Multilayer TiN/CrN Coatings
Manohar S. Konchady, Sergey Yarmolenko, Devdas M. Pai, and Jag Sankar
Fabrication of Novel Single-Chamber Solid Oxide Fuel Cells Towards Green Technology
Man Yang, Zhigang Xu, Salil Desai, Dhananjay Kumar, and Jagannathan Sankar

Shape Anisotropy Study of Nickel and Iron/Cobalt Nanoparticles
Karina Vial and Dhananjay Kumar

Understanding Release Kinetics of Calcium Alginate Microcapsules Using Drop on Demand Inkjet Printing
Jessica L. Perkins, Salil Desai, Benjamin Harrison, and Jagannathan Sankar

Effect of Conductivity and Environmental Pressure on Electro-Plasma-Process (EPP)
M. A. Wahab, Jiandong Liang, and Shengmin Guo

Influence of Hot Pressing Parameters on Mechanical Properties of PP-HA Bio-Composites
Mousa Younesi, Mohammad Ebrahim Bahrololoom, and Hamidreza Fooladfar

The Study of RBC Deformation in Capillaries With a Lattice Boltzmann Method for Surfactant Covered Droplets
Hassan Farhat and Joon Sang Lee

Responsive Biosensors for Biodegradable Magnesium Implants
Mark J. Schulz, Amos Doepke, Xuefei Guo, Julia Kuhlmann, Brian Halsall, William Heineman, Zhongyun Dong, Zongqin Tan, Dingchuan Xue, Namheon Lee, Yeoheung Yun, Yijun Liu, Douglas Hurd, Vesselin Shanov, Durgesh Rai, Frank Witte, Dhananjay Kumar, Sergey Yarmolenko, Sarah K. Pixley, Tracy Hopkins, Chaminda Jajasinghe, and Surya Sundaramurthy

Numerical Modeling and Experimental Study of Hot-Embossing Process for Manufacturing of Microcomponents
Jean-Philippe Marcotte, Kalonji K. Kabanemi, and Jean-François Hétu

Effect of Low Field Magnetic Annealing on the Viscoleastic Behavior of a Structural Epoxy
Mehran Tehrani, Marwan Al-Haik, Hamid Garmestani, and Dongsheng Li

Characterization and FEA Based Optimization of Elastomeric Components for Automotive Applications
Reza R. Rizvi, Alex Czekanski, and Hani E. Naguib

Actuation of Shape Memory Polymer by Resistive Heating of Carbon Nanopaper
Haibao Lu, Yong Tang, Jihua Gou, Erin Chow, Jinsong Leng, and Shanyi Du
Properties, Characterization and Fiber Extrusion Simulation of Novel Amorphous Polymers for Optical Application
Kyle G. Gipson, Philip J. Brown, Kathryn A. Stevens, and Christopher L. Cox

IMECE2009-12801 ................................................................. 157
IPMC Force Scanner
Manuel N. Martinez, Brian R. Schmitt, and Ronald Lumia

IMECE2009-13086 ................................................................. 161
Study of Embrittled Friction-Stir-Welds
Muhammad A. Wahab, David Taylor, and Meletis Efstatios

IMECE2009-13174 ................................................................. 169
Fiber Orientation in Injection-Compression Molded Short-Fiber-Reinforced Polypropylene Parts
Han-Xiong Huang, Can Yang, and Kun Li

FATIGUE AND FRACTURE MECHANICS OF NOVEL MATERIALS
IMECE2009-10084 ................................................................. 177
Non-Destructive Evaluation of Creep Damage in a Nickel Base Super-Alloy Turbine Bucket
Hector Carreon

IMECE2009-10697 ................................................................. 183
Thermographic Evaluation of SS 304 Material During Monotonic Loading
Raghu V. Prakash, Kathirvel Thiagarajan, Chandraprakash Chindam, and Krishnan Balasubramaniam

IMECE2009-10802 ................................................................. 189
Atomistic Modeling of Fatigue Crack Growth in Magnesium Single Crystals Under Cyclic Loading
Tian Tang, Sungwo Kim, Sebastien Groh, and Mark F. Horstemeyer

IMECE2009-12896 ................................................................. 199
Fatigue Life Prediction of Al-Li Alloy Butt-Welded Joints in Aerospace Structures
Muhammad A. Wahab and Vinay Raghuram

MULTIFUNCTIONAL MATERIAL SYSTEMS
IMECE2009-11289 ................................................................. 209
Development and Characterization of Novel Conductive Polypyrrole-Polylactide Open-Porous Composites
Christine Chan, Weijia Zhang, and Hani E. Naguib

IMECE2009-11314 ................................................................. 217
Processing and MWNT Composition Effects on the Thermal, Electrical and Mechanical Properties of PLA-MWNT Composites
Reza R. Rizvi, Jae K. Kim, and Hani E. Naguib
IMECE2009-11411 ................................................................. 227
Tension-Compression Asymmetry of Solid, Shape Recovered "Bulk" Nitinol
Matthew Fonte and Anil Saigal

IMECE2009-11509 ................................................................. 235
Application of Multifunctional Materials for Machine Tool Structures
Francesco Aggogeri, Angelo Merlo, Marco Mazzola, and Nicola Pellegrini

IMECE2009-11805 ................................................................. 243
Mechanical Properties of NiAl Nanocomposite Intermetallic Alloys With Varying Porosity
Emily M. Hunt and Piliaka Murty

IMECE2009-11849 ................................................................. 247
Fabrication and Characterization of Thermoelectric Oxide La$_{1-x}$Sr$_x$CoO$_3$ (x=0.05) Nanofibers
Weihe Xu, Shiyou Xu, Dante Smiriglio, and Yong Shi

IMECE2009-11886 ................................................................. 251
Corrosion Detection/Quantification on Thin-Wall Structures Using Multi-Mode Sensing
Combined With Statistical and Time-Frequency Analysis
Lingyu Yu, Victor Giurgiutiu, Jingjiang Wang, and Yong-June Shin

IMECE2009-12861 ................................................................. 259
Mechanical Properties of Aluminum Foam-Polymer Multifunctional Hybrid Materials
James R. Hadley, Nassif E. Rayess, Nihad Dukhan, and Dan Q. Houston

IMECE2009-12899 ................................................................. 269
Formation and Protection of Fe-Cr Oxide Spinel During the Oxidation Process of Stainless Steels in LBE Environment
Taide Tan and Yitung Chen

IMECE2009-13302 ................................................................. 277
Application of Elastic Dispersion Relations to Estimate Thermal Properties of Nano-Scale Rods and Tubes of Varying Wall Thickness and Diameter
Michael F. Bifano, Pankaj B. Kaul, Vikas Prakash, and Ajit Roy

NANOCOMPOSITES
IMECE2009-10570 ................................................................. 289
A Comparison of the Processing Routes on the Properties of Mg Reinforced With Nanosize MgO
C. S. Goh, J. Wei, and M. Gupta

IMECE2009-11459 ................................................................. 293
Study of Synergistic Fire Retardancy of Nanoparticles in Polymer Matrix Composites
Jinfeng Zhuge, Yong Tang, Jihua Gou, Ruey-Hung Chen, and Christopher Ibeh

PROCESSING CHARACTERIZATION, MODELING AND APPLICATIONS OF HYBRID MATERIAL SYSTEMS
IMECE2009-10534 ................................................................. 301
Dynamic Analysis of Tensile Preloaded Woven Composites Under Low Velocity Impact
Bhushan S. Thatte and Ajit D. Kelkar
