A Robust Method for Hand Gesture Segmentation and Recognition Using Forward Spotting Scheme in Conditional Random Fields .......................................................... 3850

Mahmoud Elmezain, Ayoub Al-Hamadi, and Bernd Michaelis

Real-Time Upper-Limbs Posture Recognition Based on Particle Filters and AdaBoost Algorithms .......................................................... 3854

Chin-Shyurng Fahn and Sheng-Lung Chiang

One-Lead ECG-based Personal Identification Using Ziv-Merhav Cross Parsing ........................................................................................................ 3858

David Pereira Coutinho, Ana L.N. Fred, and Mário A.T. Figueiredo

Multimodal Human Computer Interaction with MIDAS Intelligent Infokiosk ..................................................................................... 3862

Alexey Karpov, Andrey Ronzhin, Irina Kipyatkova, Alexander Ronzhin, and Lale Akarun

View Invariant Body Pose Estimation Based on Biased Manifold Learning .......................................................... 3866

Dongcheol Hur, Christian Wallraven, and Seong-Whan Lee

Visual Gaze Estimation by Joint Head and Eye Information ..................................................................................... 3870

Roberto Valentti, Adel Lablack, Nicu Sebe, Chabane Djeraba, and Theo Gevers

Discrimination of Moderate and Acute Drowsiness Based on Spontaneous Facial Expressions ........................................................................................................ 3874

Estra Vural, Marian Bartlett, Gwen Littlewort, Mujdat Cetin, Aytul Ercil, and Javier Movellan

Object Detection and Recognition V

Finding Multiple Object Instances with Occlusion ..................................................................................... 3878

Ge Guo, Tingting Jiang, Yizhou Wang, and Wen Gao

Bag of Hierarchical Co-occurrence Features for Image Classification ..................................................................................... 3882

Takumi Kobayashi and Nobuyuki Otsu

Person Detection Using Temporal and Geometric Context with a Pan Tilt Zoom Camera ..................................................................................... 3886

Alberto Del Bimbo, Giuseppe Lisanti, Iacopo Masi, and Federico Pernici

Disparity Map Refinement for Video Based Scene Change Detection Using a Mobile Stereo Camera Platform ..................................................................................... 3890

Hakan Haberdar and Shishir K. Shah

Using Symmetry to Select Fixation Points for Segmentation ..................................................................................... 3894

Gert Kootstra, Niklas Bergström, and Danica Kragic
Classification II
Data Classification on Multiple Manifolds ............................................................... 3898
   Rui Xiao, Qijun Zhao, David Zhang, and Pengfei Shi
Unsupervised Ensemble Ranking: Application to Large-Scale Image Retrieval ............... 3902
   Jung-Eun Lee, Rong Jin, and Anil K. Jain
Cross Entropy Optimization of the Random Set Framework for Multiple Instance Learning ............................................................... 3907
   Jeremy Bolton and Paul Gader
A Constant Average Time Algorithm to Allow Insertions in the LAESA Fast Nearest Neighbour Search Index ............................................................... 3911
   Luisa Micó and Jose Oncina
Feature Extraction from Discrete Attributes .................................................................. 3915
   Olcay Taner Yildiz

Computer Vision Applications II
Fire-Flame Detection Based on Fuzzy Finite Automation .............................................. 3919
   SunJae Ham, ByoungChul Ko, and JaeYeal Nam
Extrinsic Camera Parameter Estimation Using Video Images and GPS
Considering GPS Positioning Accuracy ........................................................................... 3923
   Hideyuki Kume, Takafumi Taketomi, Tomokazu Sato, and Naokazu Yokoya
Combining Monocular and Stereo Cues for Mobile Robot Localization Using Visual Words ........................................................................................................... 3927
   Friedrich Fraundorfer, Changchang Wu, and Marc Pollefeys
Fast Derivation of Soil Surface Roughness Parameters Using Multi-band SAR Imagery and the Integral Equation Model ............................................................. 3931
   Benjamin Seppke, Leonie Dreschler-Fischer, Jo-Ann Heiming, and Felix Wengenroth
Social Network Approach to Analysis of Soccer Game .................................................. 3935
   Kyoung-Jin Park and Alper Yilmaz

Image Segmentation II
Robust Foreground Object Segmentation via Adaptive Region-Based Background Modelling ................................................................................................................. 3939
   Vikas Reddy, Conrad Sanderson, and Brian C. Lovell
Flooding and MRF-based Algorithms for Interactive Segmentation ............................. 3943
   Ilias Grinias, Nikos Komodakis, and Georgios Tziritas
Steerable Filtering Using Novel Circular Harmonic Functions with Application to Edge Detection ................................................................................................. 3947
   Giuseppe Papari, Patrizio Campisi, and Nicolai Petkov
3D Vertebral Body Segmentation Using Shape Based Graph Cuts .................................. 3951
   Melih S. Aslan, Asem Ali, Aly A. Farag, Ham Rara, Ben Arnold, and Ping Xiang

lxvi
Locally Deformable Shape Model to Improve 3D Level Set Based Esophagus Segmentation
Sila Kurugol, Necmiye Ozay, Jennifer G. Dy, Gregory C. Sharp, and Dana H. Brooks

3D Face Recognition

3D Face Reconstruction Using a Single or Multiple Views
Jongmoo Choi, Gérard Medioni, Yuping Lin, Luciano Silva, Olga Regina, Mauricio Pamplona, and Timothy C. Faltemier

Real-Time 3D Face and Facial Action Tracking Using Extended 2D+3D AAMs
Mingcai Zhou, Yangsheng Wang, and Xiangsheng Huang

A Novel Pose Invariant Face Recognition Approach Using a 2D-3D Searching Strategy
Nicholas Dahn and Yongsheng Gao

Initialization and Pose Alignment in Active Shape Model
Pengfei Xiong, Lei Huang, and Changping Liu

3D Face Recognition by Deforming the Normal Face
Xiaoli Li and Feipeng Da

Text Analysis and Detection

Text Detection Using Edge Gradient and Graph Spectrum
Jing Zhang and Rangachar Kasturi

Scene Text Extraction with Edge Constraint and Text Collinearity
SeongHun Lee, Min Su Cho, Kyomin Jung, and Jin Hyung Kim

Typographical Features for Scene Text Recognition
Jerod J. Weinman

A Visual Attention Based Approach to Text Extraction
Qiaoyu Sun, Yue Lu, and Shiliang Sun

New Wavelet and Color Features for Text Detection in Video
Palaiahnaktoe Shivakumara, Trung Quy Phan, and Chew Lim Tan

Quantitative Biological Image and Signal Analysis

Improving Undersampled MRI Reconstruction Using Non-local Means
Ganesh Adluru, Tolga Tasdizen, Ross Whitaker, and Edward DiBella

Towards an Intelligent Bed Sensor: Non-intrusive Monitoring of Sleep
Kaveh Malakuti and Alexandra Bronzan Albu

Irregularities with Computer Vision Techniques
Kaveh Malakuti and Alexandra Bronzan Albu

Automatic Selection of Keyframes from Angiogram Videos
Object Detection and Recognition VI

Recognizing 3D Objects with 3D Information from Stereo Vision ................................................................. 4020
Kuk-Jin Yoon, Min-Gil Shin, and Ji-Hyo Lee

Combining Geometry and Local Appearance for Object Detection ................................................................. 4024
Manuel Pascual García-Tubio, Horst Wildenauer, and Lech Szumilas

Illumination and Expression Invariant Recognition Using SSIM Based Sparse Representation .................................. 4028
Asim Khwaja, Akshay Asthana, and Roland Goecke

Improving Classification Accuracy by Comparing Local Features through Canonical Correlations .......................... 4032
Mert Dikmen and Thomas S. Huang

A Robust Approach for Person Localization in Multi-camera Environment ....................................................... 4036
Luo Sun, Huijun Di, Linmi Tao, and Guangyou Xu

Classification III

Nearest Archetype Hull Methods for Large-Scale Data Classification ................................................................. 4040
Christian Thurau

A Bound on the Performance of LDA in Randomly Projected Data Spaces .......................................................... 4044
Robert J. Durrant and Ata Kabán

Adaptive Incremental Learning with an Ensemble of Support Vector Machines .................................................. 4048
Marcelo N. Kapp, Robert Sabourin, and Patrick Maupin

Margin Preserved Approximate Convex Hulls for Classification .......................................................................... 4052
Tetsuji Takahashi and Mineichi Kudo

Evolving Fuzzy Classifiers: Application to Incremental Learning of Handwritten Gesture Recognition Systems .......... 4056
Abdullah Almaksour, Eric Anquetil, Solen Quiniou, and Mohamed Cheriet

Computer Vision Applications III

Fast and Spatially-Smooth Terrain Classification Using Monocular Camera .......................................................... 4060
Chetan J., Madhava Krishna, and C. V. Jawahar

Learning Major Pedestrian Flows in Crowded Scenes ......................................................................................... 4064
Peter Widhalm and Norbert Brändle

On-Line Video Recognition and Counting of Harmful Insects ........................................................................... 4068
Ikhlef Bechar, Sabine Moisan, Monique Thonnat, and François Bremond
Boosted Edge Orientation Histograms for Grasping Point Detection .......................................................... 4072

Leonidas Lefakis, Horst Wildenauer, Manuel Pascual Garcia-Tubio, and Lech Szumilas

Automatic Refinement of Foreground Regions for Robot Trail Following ................................................. 4077

Mehmet Kemal Kocamaz and Christopher Rasmussen

Image Representation and Analysis

Object Decomposition Via Curvilinear Skeleton Partition ........................................................................ 4081

Luca Serino, Gabriella Sanniti di Baja, and Carlo Arcelli

Differential Area Profiles ......................................................................................................................... 4085

Georgios K. Ouzounis and Pierre Soille

Connected Component Trees for Multivariate Image Processing and Applications in Astronomy .......... 4089

Benjamin Perret, Sébastien Lefèvre, Christophe Collet, and Eric Slezak

Multiresolution Analysis of 3D Images Based on Discrete Distortion ...................................................... 4093

Kenneth Weiss, Leila De Floriani, and Mohammed Mostefa Mesmoudi

Multiscale Analysis of Digital Segments by Intersection of 2D Digital Lines ........................................... 4097

Mohammad Said, Jacques-Olivier Lachaud, and Fabien Feschet

Image/Video Processing

Stereoscopic Image Inpainting: Distinct Depth Maps and Images Inpainting ............................................. 4101

Alexandre Hervieu, Nicolas Papadakis, Aurélie Bugeau, Pau Gargallo, and Vicent Caselles

Panoramic Video Generation by Multi View Data Synthesis ...................................................................... 4105

Tiziana D'Orazio, Marco Leo, and Nicola Mosca

An Adaptive True Motion Estimation Algorithm for Frame Rate Conversion of High Definition Video .................................................................................................................. 4109

Mert Cetin and Ilker Hamzaoglu

Human Daily Activities Indexing in Videos from Wearable Cameras for Monitoring of Patients with Dementia Diseases ........................................................................................................... 4113

Svebor Karaman, Jenny Benoist-Pineau, Rémi Mégret, Vladislavs Dovgalecs, Jean-François Dartigues, and Yann Gaëtstel

Automatic Composition of an Informative Wide-View Image from Video .............................................. 4117

Hitoshi Habe, Shota Makiyama, and Masatsugu Kidode

Facial Expression

Regression-Based Multi-view Facial Expression Recognition ................................................................. 4121

Ognjen Rudovic, Ioannis Patras, and Maja Pantic

A Set of Selected SIFT Features for 3D Facial Expression Recognition .................................................... 4125

Stefano Berretti, Alberto Del Bimbo, Pietro Pala, Boulbaba Ben Amor, and Mohamed Daoudi

Local 3D Shape Analysis for Facial Expression Recognition ....................................................................... 4129

Ahmed Maalej, Boulbaba Ben Amor, Mohamed Daoudi, Anuj Srivastava, and Stefano Berretti
Multi-modal Emotion Recognition Using Canonical Correlations and Acoustic Features ................................................................. 4133

Rok Gajšek, Vitomir Štruc, and France Mihelič

Multimedia and Document Analysis Applications

Automatic Music Genre Classification Using Bass Lines .................................................................................................................. 4137

Umut Şimşekli

Exploiting Combined Multi-level Model for Document Sentiment Analysis ....................................................................................... 4141

Si Li, Hao Zhang, Weiran Xu, Guang Chen, and Jun Guo

MONORAIL: A Disk-Friendly Index for Huge Descriptor Databases ........................................................................................................ 4145

Fernando Akune, Eduardo Valle, and Ricardo Torres

Localized Supervised Metric Learning on Temporal Physiological Data ............................................................................................. 4149

Jimeng Sun, Daby Sow, Jianying Hu, and Shahram Ebadollahi

Automatic Detection of Phishing Target from Phishing Webpage .................................................................................................... 4153

Gang Liu, Bile Qiu, and Liu Wenyin

Pattern Recognition Systems and Applications III

Underwater Mine Classification with Imperfect Labels ....................................................................................................................... 4157

David P. Williams

Optimizing Optimum-Path Forest Classification for Huge Datasets .................................................................................................. 4162

João P. Papa, Fábio A.M. Cappabianco, and Alexandre Xavier Falcão

Model-Based Detection of Acoustically Dense Objects in Ultrasound ........................................................................................... 4166

Jyotirmoy Banerjee and Kajoli B. Krishnan

SubXPCA versus PCA: A Theoretical Investigation ......................................................................................................................... 4170

Atul Negi and Vijaya Kumar Kadappa

Feature Extraction Based on Class Mean Embedding (CME) ............................................................................................................... 4174

Minghua Wan, Zhihui Lai, and Zhong Jin

Forest Species Recognition Using Color-Based Features ................................................................................................................. 4178

Pedro Luiz de Paula, Luiz S. Oliveira, Alceu de Souza Britto Jr., and Robert Sabourin

An Information Theoretic Linear Discriminant Analysis Method ..................................................................................................... 4182

Haihong Zhang, Cuntai Guan, and Kai Keng Ang

Framewise Phone Classification Using Weighted Fuzzy Classification Rules .................................................................................. 4186

Omid Dehzangi, Bin Ma, Eng Siong Chng, and Haizhou Li

Statistical Fourier Descriptors for Defect Image Classification ........................................................................................................ 4190

Fabian Timm and Thomas Martinetz

A Measure of Competence Based on Randomized Reference Classifier for Dynamic Ensemble Selection ........................................... 4194

Tomasz Wołoszynski and Marek Kurzynski

Information Theory Based WCE Video Summarization ..................................................................................................................... 4198

Giovanni Gallo, Eliana Granata, and Alessandro Torrisi
An LDA-based Relative Hysteresis Classifier with Application to Segmentation of Retinal Vessels ...............................................................4202
Alexandra Paul Condurache, Florian Müller, and Alfred Mertins
An Offline Map Matching via Integer Programming ........................................4206
Hiroki Yanagisawa
Invisible Calibration Pattern Based on Human Visual Perception Characteristics ..........................................................4210
Hironori Takimoto, Seiki Yoshimori, Yasue Mitsukura, and Minoru Fukumi
Boosting Gray Codes for Red Eyes Removal ................................................4214
S. Battiato, G. M. Farinella, M. Guarnera, G. Messina, and D. Ravi
A New Rotation Feature for Single Tri-axial Accelerometer Based 3D Spatial Handwritten Digit Recognition ...........................................4218
Yang Xue and Lianwen Jin
Improved Mean Shift Algorithm with Heterogeneous Node Weights ..................4222
Ji Won Yoon and Simon P. Wilson
Word Clustering Using PLSA Enhanced with Long Distance Bigrams ..................4226
Bassiou Nikoletta and Kotropoulos Constantine
Scene Classification Using Local Co-occurrence Feature in Subspace Obtained by KPCA of Local Blob Visual Words ...............................4230
Kazuhiro Hotta
Recognition and Prediction of Situations in Urban Traffic Scenarios ..................4234
Eugen Käfer, Christoph Hermes, Christian Wöhler, Franz Kummert, and Helge Ritter Employing Decoding of Specific Error Correcting Codes as a New Classification Criterion in Multiclass Learning Problems .................................4238
Yurong Luo and Kayvan Najarian
EEG-based Emotion Recognition Using Self-Organizing Map for Boundary Detection ..................................................................................4242
