Dynamic Characteristics of Hybrid Maglev Systems with Different Thickness Permanent Magnets
Tongjuan Liu, Xiangguo Ma, Bingwu Liu

Modeling and Control of a Rotary Inverted Pendulum Using Various Methods, Comparative Assessment and Result Analysis
Akhtaruzzaman Akhter, A. A. Shaflie

On the Innovation of Level Control of an Offshore Three-Phase Separator
Zhenyu Yang, Michael Juhl, Bo Lohndorf

Fr3-2: Advances in Mechatronic Systems

Output Displacement Analysis for Compliant Single Parallel Four-bar Mechanism
Xuefeng Yang, Wei Li, Yuqiao Wang, Guo Ye

Three-Dimensional Computations of In-Cylinder Flows in a Production DI Diesel Engine
Ruimin Liu, A. E. Catania, Guangmeng Zhou, Xiang Xu, Xiao Wu

A Self-Powered, Self-Sensing Magnetorheological Damper
Chao Chen, Wei-Hsin Liao

Active Damping of the 1D Rocking Mode
Bayan Babakhani, Theo J. A. de Vries

Study on Numerical Solution of the Contact Mechanics in Gas Foil Bearings
Haipeng Geng, Shemiao Qi, Lie Yu, Min He, Shuhai Yu

Research on Key Techniques of Green Mechanical Press Directly Driven by Transverse Flux Machine
Jia Xie, Shengdun Zhao, Jingxiang Li

Fr3-3: Special Purpose Robots

Configuration and Tip-Over Stability Analysis for Stair-Climbing of a New-Style Wheelchair Robot
Suyang Yu, Ting Wang, Xiaofan Li, Chen Yao, Zhong Wang, Di Zhi

Design and Optimization of Magnetic Wheel for Wall and Ceiling Climbing Robot
Yuanming Zhang, Tony Dodd, Kais Atallah, Ian Lyne

W-Climbot: A Modular Biped Wall-Climbing Robot
Haifei Zhu, Yisheng Guan, Chuanwu Cal, Li Jiang, Xianmin Zhang, Hong Zhang

Soft Biomimetic Leg Design and Fabrication Process of Cockroach-Inspired Robot
Wojun Wang, Samrad Shams, Dongik Shin, Changsoo Han, Hyeunseok Choi

GRNN-based Error-compensating Algorithms in Feeding Beam of Tunnel Rock-Drilling Robot
Xihua Xie, Qinghua He, Liang Zhou

Fr3-4: Novel Sensors

IPMC Based Micro Gripper For Miniature Part Handling
R K Jain, Sarbati Datta, S Majumder

Visual and Quantitative Analysis of Lower Limb 3D Gait Posture using Accelerometers and Magnetometers
Kun Liu, Inoue Yoshio, Shibata Kyoko

Simplest Magnetometer Configuration Scheme to Measure Magnetic Field Gradient Tensor
Yu Huang, Feng Sun, Yanling Hao

A Calibration Procedure and Testing of MEMS Inertial Sensors for an FPGA-based GPS/INS System
Lei Wang, Yongping Hao, Fei Wang

Research on GNSS Compatibility Methodology based on CT-SSC
Yao Wang, Baoguo Yu, Xianzhhi Luo

Study on Real-time Correction Method of Die Declination Angles in LED Sorting System
Tao Wu, Bin Li, Longwen Wang, Yu Huang
Fr3-5: Technology in Tanks, Ships and Aircrafts

Two-mode System for Tank Gunnery Skill Training Based on Haptic Interaction
Keke Lu, Guanyang Liu, Yuru Zhang, Weidong Guo, Moyuan Zhou

Modular Aircraft Simulation Platform based on Simulink
Changqing Chen, Yang Ji

Predict Pitch and Heave Motion of Ship via Inverse Triangle Transform MGM(1,n) Model
Jihong Shen, Yan Li, Xiangyin Meng

Improvement of the Sound Absorption Performance of Polycarbonate Automobile Window Pane using Double Micro-perforated Membrane Absorbers
Shen Min, Kazuteru Nagamura, Noritoshi Nakagawa, Masaharu Okamura

Fr3-6: Neural Network and Optimization

Using Ant Colony Arithmetic to Distribute the Ammunition Based on Multi-Target Threaten Evaluation
Qian Tao, Linhu Zhu, Bo Pan, Li Peng

A Discretization Algorithm Based on Information Distance Criterion and Ant Colony Optimization Algorithm for Knowledge Extracting on Industrial database
Wenzhi Zhu, Jingcheng Wang, Yanbin Zhang, Lixin Jia

Model Reference Neural Network Control strategy for flight simulator
Hongjie Hu, Jiayang Liu, Lin Wang

A Control Scheme Based on RBF Neural Network for High-precision Servo System
Hu Hongjie, Yue Jinyu, Zhen Ping

An Environment-Gene Double Evolution Immune Clone Algorithm for Constrained Optimization
Hu Xia, Jian Zhuang, Dehong Yu

Sa1-1: Motor Control and Power Electronics

A Context Aware Motor Controller Based on WSN
Zhicheng Deng, Ming Zhu

Design of Global Sliding-Mode Controlled AC Servo Controller Based on Exponential Acceleration/Deceleration Algorithm
Hongke Li, Hualshu Li, Lizhong Song, Yang Yin, Linshu Huang, Wenyuan Li

A Motor Speed Control System Using Dual-Loop PLL and Speed Feed-Forward/Back
Hidekazu Machida, Michinori Kambara, Kouta Tanaka, Fuminori Kobayashi

Study on Control System with Current Cut-off Negative Feedback for Hybrid Stepping Motor
Shuaifu Wang, Jinglin Liu

Algorithm to Realize Zero Steady-state Error for Voltage Controlled Wwitching DC-DC Converters
Feng Li, Tingcun Wei, Ran Zheng, Han Yan

Simulation and Control of Bus Conditioner for a Power Distribution System of More Electric Aircraft
Shuanqin Xie, Jianying Gong, Weiguo Liu

Sa1-2: Kinematics of Robots

Simulation and Numerical analysis Based on Kinematics of PRS-XY Serial-Parallel PKM
Hongchang Sun, Yi Dai, Jianmin Zhang, Lina Li

Kinematics Analysis of a Transformable Wheel-Track Robot with Self-adaptive Mobile Mechanism
Zhiqing Li, Shugen Ma, Bin Li, Minghui Wang, Yuechao Wang

Static and Dynamic Analysis of High Speed Small Size Motorized Spindle
Ping Zhao, Huadong Yu, Mei Cai, Meng Li

Design and Evaluation of a Novel Flexible Bio-robotic Foot/ankle Based on Parallel Kinematic Mechanism
Qiaokang Liang, Dan Zhang, Quanjun Song, Yunjian Ge

Gait Planning and Simulation of Parallel Walking Robot
Dejun Mu, Erfuan Luo, Xiaol Liu, Bo Wen Xue, Hongbo Wang
Development of Autonomous Robot for Space Servicing
Benoit Larouche, Zhenghong Zhu, Shaker Meguid

Sa1-3: Rehabilitation and medical robotics
Design and Implementation of Efficient Hardware Solution Based Sub-window Architecture of Haar Classifiers for Real-time Detection of Face Biometrics
Ren C. Luo, Hsin-Hung Liu

Danger Avoiding Method based-a Novel Catheter Operating System
Jian Guo, Shuxiang Guo, Nan Xiao, Takashi Tamiya

Driving Characteristic Analysis and Trial Research of A Wormlike Crawling Mechanism
Ying Zhang, Xinglong Zhu

Advanced Bioreactor for Ligament Tissue Engineering
Xiude Wu, Xiong Wang

Sa1-4: Computer Vision and Applications
Development of a Large-scale 3D Digitizing System for Cultural Heritage Documentation
Jianwei Liu, Jin Liang, Zhenzhong Xiao, Dehai Zhang

A Numerical Study on the Wall Shear Stress of Stented Artery Model
Jie Cheng, Zhonghua Ni

Path Parameters Consensus Based Formation Control for Multiple Mobile Robots
Yintao Wang, Weisheng Yan, Yue Huang

Visual Regulation of a Nonholonomic Wheeled Mobile Robot with Two Points Using Lyapunov Functions
Zhongli Wang, Yunhui Liu

Generic Vision Based Algorithm For Driving Space Detection in Diverse Indoor and Outdoor Environments
Umer Rasheed, Mariam Ahmed, Sara Ali, Jamal Afridi, Faraz Kunwar

A Quantitative Study of Grade of Gliomas by Applying Dynamic Contrast-enhanced MR imaging Technique
Na Zhang, Zhanli Hu, Xin Liu, Hairong Zheng, Yin Wu, Chao Zou, Bob L. Hou

Sa1-5: Advances in Petri Nets
Pre-allocation and partition of buffers for deadlock control in flexible manufacturing systems
Zhiming Zhang, Weimin Wu

On the Existence of Complementary-place Supervisors that Enforce the Liveness in S3PR
Shouguang Wang, Chengying Wang, Yanping Yu

An Improved Algorithm for Supervisor Design for FMS Using the Theory of Regions
Jinwei Guo, Zhiwu Li

Deadlock Prevention Using Divide-and-Conquer Strategy for WS3PR
Yifan Hou, Ding Liu, Zhiwu Li, Mi Zhao

A Deadlock Prevention Approach for a Class of Time Petri Nets Based on SCG
Jinwei Guo, Zhiwu Li

On the Transformation from Automata into Petri Nets in FMS
Jian Zhang, Jianzhong Cao, Dengshan Wu

Sa1-6: Intelligent Technology and Applications
Fault-tolerant Ripple-free Torque Control of Brushless Motors
Farhad Aghilli

Research of 3D General Parts Library Based on Knowledge Template
Piguang Wei, Wenhua Zhu, Tianpeng Wang

Adaptive Nonuniformity Correction in IRFPA Using Maximum Likelihood Estimation
Xingang Mou, Juntao Jia, Guillin Zhang, Ruolan Hu, Xiao Zhou
3D Object Retrieval Based on Bayesian Networks Lightfield Descriptor And Feedback Learning
Qinkun Xiao, Haiyun Wang, Xiaoxia Hu, Fei Li, Yue Gao

Research on Consecutive Micro-line Interpolation Algorithm with Local Cubic B-spline Fitting for High Speed Machining
Yongfeng Jin, Yuhan Wang, Jingchun Feng, Jianguo Yang

Structuring and Sharing of Mechanical Design Knowledge Based on Ontology
Jun Zhou

Sa2-1: Train and Aircraft Control I

A CKF based GNSS/INS Train Integrated Positioning Method
Jiang Liu, Baigen Cai, Tao Tang, Jian Wang

Research on Anti-sliding Control of Railway Brake System Based on Adhesion-creep Theory
Jianyong Zuo, Mengling Wu

Research on Key Techniques of High-speed Train Control System Simulation and Testing
Shangguan Wei, Baigen Cai, Chenxi Gou, Jianqiu Chen, Jian Wang

A Simple Controller of Mini-size Quad-Rotor Vehicle
Hongning Hou, Jian Zhuang, Hu Xia, Guanwei Wang, Dehong Yu

Sa2-2: Vibration Analysis and Control

Research on the Low-frequency Vibration Characteristics of the Adaptive Isolator Based on MR Damper
Dongyan Shi, Xianjie Shi

Nonlinear Control Design for System with Mechanical Resonance Based on Two Tracking-Differentiators
Pu Huang, Wensi Ge, Jihong Xiu, Jun Li, Youyi Li, Li Chen

A Novel Ultrasonic Motor Based on a Single Vibration Bending Mode of a PZT Tube
Siyuan He, Paul Chiarot, Soonho Park

Light-beam Stabilizing Control in Long-distance Transmission Systems Subject to Mechanical Vibration
Guimin Chen, Bo Hu, Yaochu Deng, Xiaoyuan Liu, Jianyuan Jia

Turbine Vibration Source Separation Based on Independent Component Analysis
Huan Yang, Yibing Liu, Hongwen An, Yanbing Zhou

The Design of Magnetic Circuit and Magnetic Field Finite Element Analysis of a Double Discs Magnetorheological Clutch
Zuzhi Tian, Youfu Hou, Nannan Wang

Sa2-3: Micro Systems

Dynamic Tracking of Moving Objects in Microassembly Through Visual Servoing
Henry K. Chu, James K. Mills, William L. Cleghorn

Effect of Micro/Nano-Scale Rough Surface on the Quality Factor of the Filter: Model and Simulate
Na Li, Fei Zheng

Research on Nonlinear Ultrasonic NDT of Microcracks
Yi Dun, Xiaohong Shi, Guanglong Wang, Zhaoying Zhou

Measurement of Nanoscale Surface Patterns Produced by Two-beam Laser Interference Lithography
Haiyan Pan, Lanjiao Liu, Jia Xu, Hongmei Xu, Zhengxun Song, Zhankun Weng, Zhen Hu, Jin Zhang, Yong Yue, Dayou Li, Zucubin Wang

Sa2-4: Object Recognition and Detection

Object Detection and Tracking for a Vision Guided Automated Suspended Cell Injection Process
Qiliang Du, Zhibin Wu, Qin Zhang, Lianfang Tian

Control Design of a Biped Humanoid Robot Capable of Facial Expression
Zhangguo Yu, Qiang Huang, Xuechao Chen, Jing Li, Wei Xu, Junyao Gao, Ningjun Fan
Luciano Cassio Lulio, Arthur Jose Vieira Porto, Marlo Luis Tronco

Computer Vision Based Wheel Sinkage Detection for Robotic Lunar Exploration Tasks
Ceng Ye, GuruPrasad Hegde, Christopher Robinson, Ashley Stroupe, Edward Tunstel

Fast Implicit Surface Reconstruction Method Based on Normal Constraints
Guangyue Guo, Xiaojun Wu, Michael Yu Wang, Jianhuang Wu

Automated Visual Inspection of Surface Mounted Chip Components
Huihui Wu, Guanglin Feng, Huiwen Li, Xianrong Zeng

Sa2-5: Modeling and Analysis of Complex Systems
Discussion on Tradeoffs among Delay, Energy and Accuracy of Data Aggregation for Multi-Robot Sensor Networks
Wuyungerile Li, Masaki Bandai, Takashi Watanabe

An Optimization Approach Towards Improved Petri Net Monitor Design
Hesuan Hu, Mengchu Zhou, Zhiwu Li

Maximally Permissive Deadlock Prevention Policy for FMS based on Elementary Siphons
Mingming Yan, Mi Zhao

Hybrid Liveness-enforcing Method for Petri Net Models of Flexible Manufacturing Systems
Ding Liu, Mi Zhao, Hesuan Hu, Anrong Wang

Response Policy for Failure of Parallel Module in Single-Arm Time Constrained Cluster Tools
Chunrong Pan, Naizi Wu

Sa2-6: Advances in Control Theory
Random Vibration Control Based On Adaptive Filter
Guangfeng Guan, Wei Xiong, Haitao Wang

Two Degree-of-Freedom of Self-Tuning GPC for M-input M-output Systems by Using a Genetic Algorithm
Akira Yanou, Mingcong Deng

The Multi-Dimensional Adaptive Control System with Reference Model for the AUV
Alexander Lebedev

The Control of a Thermal System with Large Time Delay Using of LQG and Lead-Compensator

LQR Controller Design of MIMO Systems with External Disturbances Based on Stability Degree Constraint
Dexin Gao, Baotong Cul

Sa3-1: Train and Aircraft Control II
Research on the Algorithm of Identifying Track Circuit Occupation in Simulation Platform of High-speed Train Control System
Jiangqiu Chen, Yong Zhang, Shangguan Wei

A Cubic Spline Curve based Track Map Generation Method for Train Control
Jun Wang, Baigen Cai, Jian Wang, Shangguan Wei

An IMM-UF Algorithm for Tracking Highly Maneuvering Target
Xiao Wang, Chongzhao Han, Hui Zhang

Adaptive Control of a Two-link Planar Manipulator using Nonlinear Model Predictive Control
Tomohiro Henmi, Mingcong Deng, Akira Inoue

Sa3-2: Filter Design and Applications
Resolution of Discrete Time Fourier Transition and Extension of Uniform Linear Array Algorithm for Direction of Arriving Estimation
Youchen Yuan, Yansheng Wang, Jun Liu, Yongdong Lv
Research on Improving Time-domain Resolution of Pulse-echo Methods by Compensation Filtering
Zhiwei Hou, Qiufeng Li, Jie Chen, Dong Gong

The Error Compensation Design for Transfer Alignment
Qi Nie, Xiaoying Gao, Zhiping Li, Ying Li, Cheng Jiao

An Adaptive Split and Merge Unscented Gaussian Sum Filter for Initial Alignment of SINS
Junhou Wang, Jiabin Chen

A Fault Detection and Diagnosis System Based on Input and Output Residual Generation Scheme for a CSTR Benchmark Process
Mehdi Rezagholizadeh, Karim salahshoor, Ebrahim Moradi Shahrivar

Sa3-3: Advances in MEMS

MEMS Gyro De-noising Based on Coefficients Dependency in Wavelet Transform Domain
Ben Mao, Junwei Wu, Jiantong Wu, Xuemei Zhou

Input Compliance Variation of a Particular One DOF Compliant Mechanism Caused by Fitting in Piezo Stack Actuator
Tien-Fu Lu, Wei Gao

Force Characterization of Live Cells in Automated Transportation with Robot-tweezers Manipulation System
Yanhua Wu, Dong Sun, Wenhao Huang, Haoyao Chen

A Mini Digital Methane Detecting and Alarm System for Miners Lamp
Xuhui Zhang, Hongwei Ma

Automated optical inspection method for MEMS fabrication
Ming Yang, Marco Castellani, R Landot, Felix Beyeler, Zuobin Wang, Duc Truong Pham

Sa3-4: Human-machine Interaction

Semi-Active Compliant Robot Enabling Collision Safety for Human Robot Interaction
Muhammad Rehan Ahmad, Ivan Kalaykov

An Improved Spectral Subtraction Algorithm based on Auditory Masking in Voice Human-computer Interaction
Jixiang Lu, Ping Wang, Sulhui Yu, Changde Lu

An Virtual Vehicle Control Game for Online Brain Computer Interface Feedback Training
Pengfei Wei

Design and Implementation of a Complex Agent using DFA for the MPR Vision System
Weiwai Lu, Liwei Zheng, Zhong Wan, Ying Hu, Jianwei Zhang

Design and Implement of Control System for an Autonomous Reconfigurable Mobile Microrobot
Dawei Zhang, Zhenbo Li, Jiapin Chen

Sa3-5: Wireless Sensor Networks

A Hybrid Approach to Evaluate the Complexity of RCA Strategies in WSNs
Xiaoguang Ma, Ming Yu, Leonard Tung, Bing Kwan

Ripple routing: an On-demand Routing Protocol for In-network Query Processing on Wireless Sensor Networks
Junhu Zhang, Stephane Grambach, Dongqing Yang, Alberto Martinez Anaya

A New Wireless Sensor Localization and Pose Tracking System for an Autonomous Mobile Robot
Juzhong Zhang, Shengjin Li, Gang Lu, Qixun Zhou

Clutter-sensitive Data Association for Simultaneous Localization and Mapping in Robotic Wireless Sensor Networks
Rex Wong, Jizhong Xiao, Samleo Joseph

An Experimental Study of Interference Impacts on ZigBee-based Wireless Communication Inside Buildings
Wenqi(Wendy) Guo, William Healy, Mengchu Zhou
Sa3-6: Production Scheduling and Control

An Effective Method for Detection and Elimination of Avalanche Effect Problem
Mural Uzam, Gokhan Gelen, Recep Dalci
1988

A Workshop Rescheduling Algorithm to Solve Producing Anomaly
Rong Dong, Weiping He, Yajie Li
1994

A Hybrid DPSO-SA Approach to Assembly Sequence Planning
Hongguang Lv, Cong Lu, Jun Zha
1998

Comparison Between Experimental and Computer Modelling Results for a Pneumatic/Hydraulic Hybrid Cylinder
Dyfyr Ll Davies, Yiqin Xue, John Walton, Graham A Williams
2004

Optimal Collision Avoidance Maneuver for Formation Flying Satellites Using Relative Orbital Elements
Min Hu, Guoqiang Zeng, Junling Song
2009

Agent-Based Real-Time Assembly Line Management for Wireless Job Shop Environment
Yingfeng Zhang, George Huang, Ting Qu, Jun Hong
2013

Author Index
