Preface by Dora C. Carreón-Freyre, Mariano Cerca & Devin Galloway v

Introduction by Alice Aureli, Laura Carbognin, Keith R. Prince, Frans B. Barends, Dora C. Carreón-Freyre, Devin Galloway, Giuseppe Gambolati & Jane Frankenfield Zanin ix

1 Earth Fissures, Fracturing and Faulting Related to Land Subsidence

KEYNOTE: Mechanisms for earth fissure formation in heavily pumped basins T. J. Burbey 3

Implications of ground-deformation measurements across earth fissures in subsidence areas in the southwestern USA T. L. Holzer 9

Soil fracturing induced by land subsidence G. Auvinet 20

On the mechanisms for earth fissuring in Las Vegas valley: a numerical analysis of pumping-induced deformation and stress M. Hernández-Marin & T. J. Burbey 27

Advances in geotechnical characterization of soil fracturing in Mexico City basin G. Auvinet, E. Méndez & J. Lermo 33

Monitoring land-surface deformation on Bicycle Lake playa, Fort Irwin, California, USA Jill Densmore, Kevin Ellett, Jim Howle, Michael Carpenter & Michelle Sneed 39

Monitoring of land subsidence and fracturing in Iztapalapa, Mexico City D. Carreon Freyre, M. Cerca, R. Gutiérrez Calderón & M. Huerta Ladrón de Guevara 44

Microtremor measurements to detect zones of potential cracking in the basin of México J. Lermo, E. Ovando & L. Espinosa 51

Application of Wigner-Ville distribution to identify anomalies in GPR profiles M. A. Elizondo, R. E. Chávez, M. E. Câmara & A. Tejero 54

2 Modelling Land Subsidence and Associated Hazards

Use of the SUB-WT Package for MODFLOW to simulate aquifer-system compaction in Antelope Valley, California, USA Stanley A. Leake & Devin L. Galloway 61

Monitoring and modelling 3-D ground movements induced by seasonal gas storage in deep reservoirs P. Teatini, G. Gambolati, N. Castelletto, M. Ferronato, C. Janna, E. Cairo, D. Marzorati, D. Colombo, A. Ferretti, A. Bagliani, F. Bottazzi & F. Rocca 68

A regional land subsidence model embodying complex deformation characteristics S. Ye, Y. Xue, J. Wu, Z. Wei & Q. Li 76

Modelling land subsidence processes induced by fast rainwater infiltration through fractures into the unsaturated zone I. Martinez, R. Hinkelmann & S. Savidis 82

Nonlinear analysis of land subsidence due to groundwater level oscillation by a finite difference method Hessam Yazdani, M. M. Toufigh & Amin Masoudzade 90

### 3 Land Subsidence Related to Geological and Geomechanical Processes

| KEYNOTE: Land subsidence processes and associated ground fracturing in central Mexico \textit{D. Carreón-Freyre} | 149 |
| Subsidence in the Holocene delta of The Netherlands \textit{L. M. Vonhögen, P. J. Doornenbal, Ger de Lange, P. A. Fokker & J. L. Gunnink} | 158 |
| Evaluation of the subsidence and risk of collapse in the Estació neighbourhood of Salent City, Catalonia (Spain) \textit{F. López, P. Buxó, J. Palau, J. Marturí, A. Concha & P. Martínez} | 170 |
| Zonation and prediction of land subsidence: case study, Kerman, Iran \textit{S. M. Vaezinejad, M. M. Toujigh & S. M. Marandi} | 173 |
| Zoning map of ground failure risk due to land subsidence of San Luis Potosí, Mexico \textit{Jesús Pacco-Martínez, Jorge Arzate-Flores, Rubén López-Doncel, Rafael Barboza-Gudiño, José Luis Mata-Segura, Antonio Del-Rosal-Pardo & Jorge Aranda-Gómez} | 179 |
| Integrated study of land subsidence in Morelia, Michoacán, Mexico \textit{J. A. Ávila-Olivera, V. H. Garduño-Monroy & P. Farina} | 185 |
Contents

Geological setting of active faulting associated with land subsidence at the Aguascalientes and Querétaro valleys, Mexico  J. Martínez-Reyes & L. M. Mitre-Salazar

Conceptual model of land subsidence with a structural control  J. Ávila-Olivera & V. H. Garduño-Monroy

Geological study and electrical resistivity tomography of Ameca, Jalisco, Mexico  A. Malagón, J. Rosas-Elguera, M. A. Alatorre, G. Perez & R. Maciel

Geological and geophysical characterization of fracturing in granular deposits associated with land subsidence in San Luis Potosí City, Mexico  L. D. Barajas-Nigoche, D. C. Carreón-Freyre, J. L. Mata-Segura, A. Rivera-León & F. Cafaggi-Félix

Assessment of land subsidence associated with intense erosion zones in the Zacatecas and Guadalupe quadrangles, Mexico  F. J. Escalona-Alcazar, L. A. Delgado-Argote & A. F. Rivera-Salinas

Seismic basaltic structure under the local subsidence in San Lorenzo Tezonco, Iztapalapa, México, Distrito Federal  Leobardo Salazar, Pedro Vera & Gema Guevara

Geophysical and geotechnical studies applied to determine a subsidence problem in Pachuca de Soto, Hidalgo, Mexico  L. A. Tapia, A. Tejero & R. Chavez

Microcracking of expansive soils during shrinkage processes: roles of mineralogy and microstructure  M. Audiguier, R. Cojean & Z. Geremew

Evolution of Mexico City clay properties affected by land subsidence  Alberto Jaime P. & E. Méndes-Sánchez

Ground subsidence induced by backfill-mining of a nickel mine and development forecasts  F. S. Ma, H. J. Zhao, Y. M. Zhang & J. Guo

Analysis of engineering land subsidence effects caused by shield construction for tunnels  Yang Tianliang, Yan Xuexin, Wang Hanmei, Zhan Longxi, Xu Zhun & Zhuang Yibin

4 Monitoring Techniques of Ground Displacements and Subsurface Deformation

Subsidence and fault hazard maps using PSI and permanent GPS networks in central Mexico  E. Cabral-Cano, B. Osmanoglu, T. Dixon, S. Wdowinski, C. DeMets, F. Cigna & O. Díaz-Molina

Measurement of land subsidence using interferometry, Coachella Valley, California  M. Sneed
Monitoring techniques for analysing subsidence: a basis for implementing an Early Warning System  J. Marturia, J. Ripoll, A. Concha & M. Barberà

DInSAR analysis of land subsidence caused by geothermal fluid exploitation in the Mexicali Valley, B.C., Mexico  O. Sarychikhina, E. Glowacka, F. Suarez-Vidal & R. Mellors

Long-term Differential InSAR monitoring of the Lampur Sidoarjo mud volcano (Java, Indonesia) using ALOS PALSAR imagery  A. Thomas, R. Holley, R. Burren, D. Shilston, D. Waring & C. Meikle

Radar interferometry-based mapping of the present land subsidence along the low-lying northern Adriatic coast of Italy  G. Bitelli, F. Bonsignore, L. Carbognin, A. Ferretti, T. Strozzi, P. Teatini, L. Tosi & L. Vittuari

Monitoring swelling soils through PSI and DinSAR interferometry: applications in eastern Paris Basin, France  H. F. Kaveh, B. Deffontaines, B. Fruneau, R. Cojean, M. Audiguier, A. Arnaud & J. Duro

Land subsidence at the Kujukuri Plain in Chiba Prefecture, Japan: Evaluation and monitoring environmental impacts  H. Obanawa, T. Tokumago, S. Rokugawa, T. Deguchi & T. Nakamura

Subsidence monitoring of an Iranian oil field inferred from SAR interferometry  N. Fouladi Moghadam, A. A. Matkan, M. R. Sahebi, M. Roostaei & H. R. Baqiari

Mexico City subsidence analysis assisted by InSAR  P. López-Quiroz, M. P. Doin, F. Tupin, P. Briole & J. M. Nicolas

Land subsidence in Emilia-Romagna Region, northern Italy: recent results  R. Bissoli, G. Bitelli, F. Bonsignore, A. Rapino & L. Vittuari

Large area observation of land subsidence by PSIInSAR and determination of the cause of local land subsidence  K. Daito, S. Saeki, S. Kuzuoka & T. Mizuno

Land subsidence monitored by satellite interferometry in Mexican cities  J. A. Ávila-Olvera, P. Farina & V. H. Garduño-Monroy

Using extensometer and Earth tide data to quantify fractured crystalline-rock properties  T. J. Burbey & L. C. Murdoch

Continuous monitoring techniques of fault displacement caused by geothermal fluid extraction in the Cerro Prieto Geothermal Field (Baja California, Mexico)  Ewa Glowacka, Olga Sarychikhina, F. Alejandro Nava, Francisco Suarez, Jorge Ramirez, Miguel Guzman, Braulio Robles, Francisco Farfan & Guillermo Diaz De Cossio Batani

Recent extensometric data for the monitoring of subsidence in Bologna (Italy)  F. Bonsignore, G. Bitelli, A. Chahoud, P. Macini, E. Mesini, P. Severi, B. Villani & L. Vittuari

Land subsidence monitoring system in the southeast part of Kanto groundwater basin, Japan  A. Kagawa & K. Furuno

Integrated monitoring network for surface deformation in Capo Colonna archaeological area, Crotone, Italy  F. Verdecchia, C. Zoccatelli, E. Norelli & R. Miandro

Monitoring land subsidence over a shallow gas reservoir in India using GPS  P. R. Patel
Contents

Measuring seabed altimetric variations with a repeat-track SAS interferometry experiment: processing and results  
*R. De Paulis, C. Prati, S. Scirpoli, P. A. Sletner & A. Tesei*  
358

In situ compaction measurements via radioactive markers in the Northern Adriatic basin: an analysis of data precision over 15 years of monitoring  
*C. Zoccatelli, F. Verdecchia, G. Cassiani, R. Deicma & N. Fralicelli*  
364

*In situ* formation compaction monitoring in deep reservoirs using optical fibres  
*Shoji Kunisue & Tatsuio Kokubo*  
368

Comparing several GPS post-processing strategies for a potash basin monitoring network in northeast Spain: first results  
*J. Gilt, N. Lantada, A. Concha, X. Soler, C. Puig & J. Marturia*  
371

Analysis of landslide monitoring using an e-GPS system and multi-antenna GPS technology  
*T. K. Yeh, Y. S. Hu & Y. A. Liou*  
374

Land subsidence observation using GPS on the Kujukuri Plain  
*D. Murai, M. Nakamura, S. Ikeda, F. Waki & N. Isezaki*  
377

Evaluation of Mexico City subsidence  
*G. Auvinet, E. Méndez & U. Matus*  
380

5 Social and Economic Impacts and Their Incorporation into Resources Management Strategies

KEYNOTE: Review of subsidence management in the Netherlands  
*F. B. J. Barends*  
385

Land subsidence and environmental law in Mexico: a reflection on civil liability for environmental damage  
*Pedro Joaquin Gutiérrez-Yurrita*  
396

Considerations on strategies of sustainable management of oil and gas fields in Italy  
*G. Brighenti, P. Macini & E. Mesini*  
402

Management of the environmental resources of the Kanto groundwater basin in Japan – land subsidence and monitoring system  
*K. Furuno, A. Kagawa, O. Kazaoka, Y. Sakai, T. Kusuda & H. Nirei*  
408

Environmental and social effects derived from groundwater extraction in Tláhuac and Valle-de-Chalco-Solidaridad, Metropolitan Area of Mexico City  
*A. Toscana & M. M. Campos*  
414

The centenary of land subsidence monitoring in Shanghai  
*Shi-Liang Gong*  
419

How much subsidence is allowed: the introduction of the “effective subsidence capacity” concept in The Netherlands  
*Jan van Herk, Hans Roest, Ingrid Kroon, Jaap Breunese & Hans De Waal*  
420

A warning system for exceeding subsidence limits  
*M. Nepveu, I. C. Kroon & P. A. Fokker*  
426

Need to integrate land subsidence into the legal instruments of Mexico: Morelia, Michoacán case study  
*L. L. Padilla-Gil, J. A. Ávila-Olivera, G. A. Huape-Padilla & M. E. Granados-García*  
432

Institutional controls in an area of subsidence induced flooding  
*Susan L. Baird*  
435
6 Land Subsidence Caused by Subsurface Fluids Withdrawal

Pumping effects on land subsidence in the Toluca Valley, Mexico
A. I. Calderhead, R. Martel, J. Garfias, A. Rivera & R. Therrien

Integrated simulation of consumptive use and land subsidence in the Central Valley, California, for the past and for a future subject to urbanization and climate change
R. T. Hanson, A. L. Flint, L. E. Flint, C. C. Faunt, Wolfgang Schmid, M. D. Dettinger, S. A. Leake & D. R. Cayan

1-D infiltration, analysis of unsaturated flow and increase in land subsidence
S. A. Masoudzade, M. M. Toufigh, H. Yazdani & R. Rahgozar

A theory of three-dimensional land motion in terms of its velocity field
J. Li & D. C. Helm

Deformation characteristics of aquifer sands due to groundwater pumping in the Southern Yangtze Delta, China
Y. Zhang, Y. Q. Xite, J. C. Wu & X. Q. Shi

Post-audit of land subsidence modelling of Saga-Shiroishi plain, Japan — lessons and improvements toward useful modelling
K. Fujisaki

Hazards of gases migrating over oilfields due to subsidence
J. O. Robertson, Jr & G. V. Chilingar

Subsidence faulting and aquifer vulnerability — their relation in Irapuato, Mexico
A. Schroeder & R. Rodriguez

Axisymmetric motion of a confined leaky aquifer due to pumping groundwater from a partially penetrating well
J. Li

Climate change impact and anthropogenic effects in land subsidence of Querétaro valley, Mexico
E. González-Sosa, N. R. Ramos-Salinas & C. A. Mastachi-Loza
