This Association was started in 1925. It is an organisation of scientific workers and others directly interested in the technological advancement of the Sugar Industry. Its affairs are run by a Council elected every three years by its own members. The Council is assisted by Standing Committees on Research and Investigations, on Publications, on Uniform System of Chemical Control and on Indian National Committee of ICUMSA.

The Association endeavours to serve the Sugar Industry. It solicits your cooperation in this task.
CONTENTS

PLENARY SECTION

1. Spoken Web – by Dr. Manish Gupta 3-4
2. Automation In Sugar Industry Using Data Acquisition – by K. B. Pranesh 5-11
3. Reaching Out to Communities, Experiences of Corporate Social Responsibility Around GIDL Sugar Plants – by Meena Raghunathan 12-22
4. Sustainability of Sugarcane Cultivation through Focus on Mechanization and Intercropping – by R. L. Tamak 23-35
5. Excellence in Energy Management – by N. Prabhakar 36-43

MANAGEMENT SECTION

2. HRD in Proper Hue – by T.L. Raghavan 10-12
3. The Importance of Human Capital – by R. Ramakrishnan 13-16
5. Reforming Indian Sugar Industry – by Anjali Gamta 32-35

SUGARCANE AGRICULTURE

3. An Integrated Seed Nursery Programme for Stabilizing Sugarcane Yield and Recovery in Tropical India – by Dr. K. Mohan Naidu 32-45

7. Breeding for Higher Sucrose Content in Sugarcane – Achievements and Prospects – by Bakshi Ram

10. Integrated Insect Pest Management for Low External-Input Sugarcane Production – by Saroj Jaipal & Jaipal Singh

13. Status of Cane Cultivation in Andhra Pradesh Causes for Reduction in Cane Area, Production and Sugar Recovery – by Dr. N.V. Naidu

16. Recent Management Technologies to Boost Sugarcane Productivity– by Dr. S. Nazeer Ahamed, Dr. G. Manickam, Dr. M. Jayachandran & Dr. K. Karunanithi

17. The Suitability of the Pre-release Elite Early Sugarcane Clone 03 G 231 for North Eastern Region of Tamil Nadu – by R. Sudhagar, M. Suresh, R.S. Purushothaman & A. Thirumurugan

(xxvi)

19. An Attempt to Increase the Efficiency of Trichogramma Chilonis Against Internode Borer, Chilo Sacchariphagus Indicus in Sugarcane – by R. Kandasamy & A. Thirumurugan

20. Intercropping of Sugar Beet with Sugarcane Under Different Spacing Regimes – by N.R. Yekkeli

24. Co 0238 – A Promising Variety – by Sudhir Kumar

26. Varietal Configuration of Sugarcane in Reserved Areas of U. P. Sugar Factories – by Ram Murti Singh

27. Sugarcane Production in Western U.P. – Problems and Issues – by Dr. Kanhaiya Lal & Dr. M.L. Sharma

29. Production of Tissue Culture Sugarcane Seedlings Free from Yellow Leaf and Grassy Shoot Disease for Seed Nursery Rejuvenation – by Dr. K. Mohan Naidu

30. Software System for An Effective Sugarcane Production Program of Sugar Industry – by Dr. K. Mohan Naidu

**FACTORY PROCESSING (MANUFACTURING)**

6. Problems and Solutions During Sugar Processing – An Experience Shared – Part-II – by Thiru G. Oyyaram, Thiru A. Arockiaraj, Thiru A. Arulappan & Thiru G. Subramani

10. Maximising Recovery of Sugar by Processing Raw Sugar as Stand Alone Process – by G. Sathiyamoothi & S. Vijayakumar

12. Production of Fermentable Sugars from Bagasse by Acid Hydrolysis – by Satindar Kaur, R.S.S. Kaler, Mininder Singh & Vishal Sharma

13. Impact of Burnt Cane on Sugar Processing – by J.N. Bhaumik, Dr. R.N. Bhosale, C.V. Godse & R.V. Dani

14. Decanter – A Gift to Sugar Industry – by N. Thiruppathi

15. An Economically Feasible Idea Implemented for Long Life and Efficient Working of Juice Heaters, evaporator Bodies and Pans – by T.C. Katiyar & Dr. Rajeev Kumar Sharma

16. Innovative Technology for the Production of Chemical and Microbial Free Organic Sugar – by Dr. P. Thangamuthu

17. Screen for Continuous Centrifuges – by Paul Wassing

GENERAL & CO-PRODUCT

(xxviii)
2. Influence of Distillery Spentwash Irrigation on the Nutrients of Root Vegetables in Untreated and Spentwash Treated Soil – by Dr. S. Chandraju & C.S. Chidankumar
8. Environmental and Social Sustainability with Product and By-Product of Sugarcane – by Arvind Kumar Mishra
10. Flash Drying of Bagasse Using Waste Heat from Boiler Flue Gas – by Rajesh Verma
13. A Comparative Study of Solid and Liquid Based Microbial Cultures for the Composting of Distillery Spentwash – by Deepali Nimbalkar, V.S. Ghole & A.S. Patil
15. An Increase in Ethanol Yield by Photochemical Anaerobic Respiration, Using Iron Supplmentor – by Dr. Anil Kumar Gupta

**EQUIPMENT DESIGN & MAINTENANCE (ENGINEERING)**
1. Bagasse Dryer – Case Study At Mawana Sugars Limited – by Mukesh Chauhan, Yogesh Malik & Sanjay Chaudhary
2. An Easy Approach to Mill Feeding and Mill Setting in a Sugar Plant – by D.C. Pandey
3. Application of Feed Water Heaters in Power Plants –
   by B.A. Ram, Jayashree Jadhav & Niket Pande 23-36

4. Trusted Mill Setting for Reduced Power and Improved Efficiency –
   by U.S. Mishra 37-44

5. Bagasse Based Cogeneration and its Financial Viability –
   by Seema Joshi & J.N. Mohanty 45-51

6. VFD Operated Motors – Effects & Case Study – by S.S. Sathawane 52-62

7. Two Roller Mill and How It will Help Cogeneration –
   by V. Thiruvenkadam 63-72

8. Latest Design Mill & Mill Setting for Up Gradation of
   Fiji Sugar Corporation Fiji Island– by M.K. Biswas 73-76

UTILITIES OF ENERGY EFFICIENCY & CONSERVATION
IN SUGAR INDUSTRY

1. Energy Conservation at G.S.S.K. Ltd., Raosahebnagar, Nhavre,
   Taluk Shirur, Distt. Pune – by N.L. Jadhav 3-18

2. Reduction in Steam Consumption with efficient Use of Heat
   by S.K. Bhojraj, Y.N. Kunjir & Niraj Chandra 19-30

3. Conservation of Steam to Maximise Surplus Power – Need of
   the Day Part-I – by Sudhakar Pawar & Manoj Suryawanshi
   Power and Steam Conservation, Smooth, Trouble free Working
   and Easy Operation of Entire Juice Heater Station –
   by Molli Venkata Ramana 31-37

   Steam & Power Conservation in a Steam Driven Plant
   A Challenging Job – by S.M. Sharma, Rajesh Singh
   & Anil Verma 38-43

4. Energy Saving is greater than Energy Generation –
   by C. Muthukumar, Khushal & Their Team 44-49

5. (xxx)
