CONTENTS

Chairman’s Message i
Message from the Technical Committee ii
Conference Technical-Organizing Committee iii
Technical Review Members iii
Keynote Speakers v
Contents vii

TECHNICAL SESSION 01 - TRACK CONDITION MONITORING 1
Measuring Defect Growth Rates in Rail using Ultrasonic Measurement 3
David Griffiths & Peter Cranwell

Track Condition Monitoring: The Next Generation 9
Mike Darby, Eugenio Alvarez, John McLeod, Graham Tew & Greg Crew

Monitoring Track Status on Indian Railways 17
Pankaj Saxena

Innovative Infrastructure Monitoring Systems for Improved Operation and Safety in CVRD 25
Giuseppe Aurisicchio, José Henrique P. da Luz & Giovanni Paschoschi

TECHNICAL SESSION 02 - VEHICLE-TRACK INTERACTION I 33
Numerically Evaluating Effects of Track Rigidity on Ground Vibration 35
Yoshihiko Sato

Establishing Meaningful Results from Models of Railway Track Dynamic Behaviour 41
David Steffens & Martin Murray

Force-Based Assessment of Weld Geometry 51
Coenraad Esveld & Michaël J.M.M. Steenbergen

Truck Design Issues Resulting From Track Gage Design Variation 59
Curtis Urban

TECHNICAL SESSION 03 - LUBRICATION WORKSHOP 67
Freight Car-Based Top of Rail Friction Modifier Application System 69
Jocelyn Bilodeau, Serge Michaud, Yvon Rioux, Gerard Sirois, John Cotter, Don Eadie, David Elvidge & Richard Reiff
Implementing Top of Rail Friction Control North American Freight Railroad Experience
Richard Reiff

Trackside Top of Rail Friction Control at CN
Donald T. Eadie, Loerella Maglalang, Brian Vidler, David Lilley & Richard Reiff

Canadian Pacific Railway 100 Effective Friction Management Strategy
Peter Sroba, Kevin Oldknow, Russ Dashko & Michael Roney

CVRD-EFVM Railway System Improvement through Lubrication and Grinding Practices
Corey Pasta, Richard Reiff, Huimin Wu, Cristiano Jorge, Sebastião Nobre & José Eduardo Abreu Filho

TECHNICAL SESSION 04 - TRAIN CONTROL

An Approach to Introducing a Fundamental Change in Train Control Technology
William (Bill) J. Moore Ede & Alan L. Polivka

Intelligent Power Sharing within a Locomotive Consist for Fuel Reduction and Enhanced Trip Reliability
Christian Gritsch, Bernhard Hoscheler & György Papp

Risk Analysis of Railway Control Systems
Jorge Rady de Almeida Junior, João Batista Camargo Junior & Paulo Sérgio Cugnasca

MRS Iron Ore Unit Train Performance
Oberlam Moreira Calçada, Célia Maria de Oliveira Rodrigues, Alexandre Rabelo Goulart & João Dornellas

TECHNICAL SESSION 05 - CAPACITY

Technical and Economic Challenges and Decisions for Heavy Haul Operations in Russia under Conditions of Combined Traffic of Freight and Passenger Trains
I.S. Besedin & L.A. Muginshtein

Quadrupling Heavy Haul Capacity by Using Distributed Power
David Peltz

CVRD Hump Yard Modernization: a Technological Approach
Deodato Meneguelle Ramos, Jedson Alessandro Damasceno, Lucas Gomes Dutra Nicácio, Manoel José Rebello Santana, Rodrigo Madeira Marques & Wagner Francisco Marques

Increasing the Yard Capacity to Improve the Pig Iron Transportation on CVRD-EFVM
Elaine Cristina Furieri S. Toraldo
TECHNICAL SESSION 06 - DERAILMENT PREVENTION ANALYSIS I
The Formation of Ground-to-Train Safety Monitoring System in China
Liu Ruiyang
LER Specifications and Crashworthiness Required for Rail Accident Investigations
Daoxing Chen
Railway Accidents Probabilistic Detector - RAPD
Leon Denis Campos

TECHNICAL SESSION 07 - INCREASED AXLE LOADS
Economic Modeling of the Benefits of Rail Lubrication and Grinding on EFVM
Steve Clark & Cristiano Jorge
Introducing Heavy Haul on existing lines - The Swedish approach and experience
Björn Paulsson & Sam Berggren
Common Elements of Successful Heavy Haul Railways: A Worldwide Perspective
Michael Roney
Increasing axle load in Europe-State of the art and perspectives
I. Korpanec, E. Rebeyrotte, M. Guigon & L Tordai
Increasing productivity through heavy Haul Operation on Indian Railway
Ashima Singh

TECHNICAL SESSION 08 - WHEEL PERFORMANCE
Effect of braking heating on the wave speed of longitudinal critically refracted waves in the rims of railroad wheels
Guilherme Fabiano Mendonca dos Santos, Domingos Jose Minicucci, Marcilio Haddad Andrino & Auteliano Antunes dos Santos Junior
Tread braking of railway wheels – wheel and block temperatures and the influence of rail chill
Tore Vernersson & Roger Lundén
Rolling Contact Fatigue Damage of Freight Car Whells in the Russian Railways
Sergey Zakharov & Irina G. Goraycheva

TECHNICAL SESSION 09 - TRACK DESIGN
Track design for extreme traction and braking forces
D. Rhodes, J.S. Maree & P. Barthram
Sleeper Lay Out Redesign of the Brazilian Southeast Railroad Net
Luiz Francisco Muniz da Silva, Jorge Luis Goudene Spada, Candice Jorge Sousa, Fernando César de Moura e Silva, Walter Vidon Júnior & Célia Maria de Oliveira Rodrigues

Deformation Measurement on a Heavy Haul Track Formation
P.J. Gräbe, C. R. I. Clayton & F.J. Shaw

TECHNICAL SESSION 10 - RAILWAY ASSET MANAGEMENT I
Amtrak’s use of Wireless Communication for Management of Maintenance Resources
David J Hughes, Walter L. Heide & Willem Ebersohn

The Use Of Automation and Technology In Improving Maintenance Practices In a Heavy Haul Railroad
Russel Donnelly, Murray Lynch & Mike Darby

Improving track maintenance efficiency: a condition-based approach
Pietro Pace, José Henrique da Luz & Pietro Cosoli

TECHNICAL SESSION 11 - ENVIRONMENT & HUMAN FACTORS I
Top of Rail Friction Control: Reductions in Fuel and Greenhouse Gas Emissions
John Cotter, Don Eadie, David Elvidge, Norm Hooper, Jay Roberts, Tony Makowsky & Yan Liu

Managing and Reporting on Canada’s Locomotive Emissions - A voluntary approach involving a partnership between government and industry that works
Mike Lowenger & Nicholas Vincent

The Mobile Railway Car-Observatory as a Tool for Assessment of the Harmful Effect of Rail Traffic on the Environment
I.S. Besedin, B.M. Bogdanov, A.M. Grisenko, O.B. Lavrova, V.S. Mosgrin, G.S. Golitsyn, N.F. Elansky, A.I. Skorohod & A.V. Andronova

TECHNICAL SESSION 12 - TRACK COMPONENTS / SPECIAL TRACKWORK
Pre-assembly as a means to improve track renewal productivity
F. Coats, M.D. Somerset & D. Rhodes

Special Trackwork Designs for Improved Performance and Reliability Under Heavy Axle Load (HAL) Traffic
David D. Davis, Charity D. Sasaoka & Muhammad N. Akhtar

Grinding Rail in Turnouts to Improve Contact Conditions
Robert Fröhling, Wolfgang Schöch & Hennie Klopper

Successful Introduction of Kinematic Gauge Optimisation (KGO) in Heavy Haul Turnouts
Heinz Ossberger
TECHNICAL SESSION 13 - ENVIRONMENT & HUMAN FACTORS II

Machine Vision Analysis of the Energy Efficiency of Intermodal Trains
LAI Yung-Cheng (Rex) Lai, John M. Hart, Phani Venuru, Joseph Drapa, Narendra Ahuja, Christopher P.L. Barkan, Larry Milhon & Mark Stehly

Environmental Risk Analysis of Chemicals Transported in Railroad Tank Cars
Pooja Anand, Christopher P. L. Barkan, David J. Schaeffer, Charles J. Werth & Barbara S. Minsker

Contribution of Professional Development and Training of Workforce to Productivity
Wardina Oghanna & Martin Murray

Fatigue Management Tools to Reduce Operator Fatigue
Thomas G. Raslear, Michael Coplen & Stephen Popkin

TECHNICAL SESSION 14 - RAIL GRINDING WORKSHOP

Optimization of Rail Grinding on A North American Heavy Haul Railroad Line
Huimin Wu, Stephen S. Woody & Robert W. Blank

Rail Maintenance Strategies Bases on Grinding, Wear and Lubrication – Swedish Ore Line (Malmbanan)
Per-Olof Larsson-Kraik

Preventive-Gradual On-Cycle Grinding: A First for MRS in Brazil
Fernando Silva, Walter Vidon Jr., Dave Rippeth & Rob Caldwell

A Practical Approach to Controlling Rolling Contact Fatigue in Railways
Eric E. Magel, Kevin J. Sawley, Peter S. Sroba & Joe Kalousek

Some Facts and Myths About Rail Grinding – The Australian Experience
Stephen Marich

TECHNICAL SESSION 15 - DERAILMENT ANALYSIS PREVENTION II

Systematic Analysis of Derailments of Heavy Haul Freight Trains in Canada
Daoxing Chen

Safety Criterion for Railway Vehicle Derailment
Roberto Spinola Barbosa

Derailment Investigation on a HFT Wagon
Roberto Spinola Barbosa & Armando Sisdelli

Derailment Probability Analysis and Modeling of Mainline Freight Trains
Robert T. Anderson & Christopher P.L. Barkan
TECHNICAL SESSION 16 - USE DETECTORS IN THE ROLLING STOCK MAINTENANCE 499

Monitoring the Performance of Railroad Cars by means of Wayside Detectors in Support of Predictive Maintenance
HM Tournay & S. Cummings

Wayside Monitoring to Drive Vehicle Maintenance
Russell Bowey, Peter Bartle, Russell Donnelly, Andrew Stevens & Murray Lynch

Utilization of Failure Acoustic Detector on Journal Bearings as Maintenance Management Tool
Bruno Ferreira Fiuza Costa

Potential of condition monitoring on railway vehicles: a case study
Robert Lagnebäck

TECHNICAL SESSION 17 - TRACK GEOMETRY INSPECTION 537

Realizing Performance-Based Track Geometry Standards
G. W. English & T.W. Moynihan

Analysis of track geometry data to highlight problem areas: A simple approach
J. H. Coetzee & E. Swarts

Implementation of Performance-based Track Geometry Inspection on North American Railroads
Dingqing Li, Lisa Stabler, Rick Harbuck, Michael Mischke & Semih Kaplay

TECHNICAL SESSION 18 - RAILWAY DYNAMICS & ON-BOARD SIMULATION 561

Safety Monitoring Systems On CR Existing Lines
Qian Lixin, Kang Xiong & Wang Lan

On-Board Condition Monitoring System Performance in a Revenue Service Demonstration
John Donelson III, Mark Edwards, John Punwani, Monique Stewart, David Toth & Wayne Zavis

Saving Fuel on Long-Haul Trains - Australian Stage 2 Trial Results
Dale Coleman, Robert Yee & Peter Pudney

System for Remote Measurement of Longitudinal - Dynamic Forces in Long Trains
L.A. Mouginshteine, V.I. Rakhmaninov, M.S. Pyasic & I.A. Yabko

TECHNICAL SESSION 19 - WHEEL-AXLE INSPECTION 591

Stress Evaluation of Railroad Forged Wheels by Ultrasonic Testing
Minicuci D.J., Santos Junior A.A. & Andrino M.H.
Use of Finite Element Analysis to Improve Axles for Heavy Haul Service
Cameron Lonsdale, James Pilch & Steven Dedmon

Strategies to Prevent Heavy Haul Axle Failures
Geoffrey E. Dahlman, Cameron P. Lonsdale & Steven L. Dedmon

TECHNICAL SESSION 20 - RAILWAY ASSET MANAGEMENT II

Rail Operations Management in the Information Age
Paulo Rogério P. Andrade, Fábio B. Lopes, Renato F. Souza Neto, Luiz Steinberg & André Verçosa

Track Quality Analysis and consequent Decision Making
Stasha Jovanovic

Judging the Merits of Life Cycle Cost Benchmarking
Arjen Zoeteman & Jan Swier

TECHNICAL SESSION 21 - TRACK MAINTENANCE

In-Track Gas Pressure Rail Welding in China
Wang Ziru & Jin Shushan

The effects of short-term post-weld heat treatments on residual stresses in flash butt welds
D. Tawfik, P. J. Mutton & W. K. Chiu

Management of Rail Longitudinal Forces under Heavy Axle Loads
David M. Read, Andrew Kish & Joseph Lopresti

TECHNICAL SESSION 22 - LOCOMOTIVES & BRAKING SYSTEMS

Progress on the Roll-out of ECPB/WDP and RDP Systems on Spoornet
Andre Veldsman & Marthin Mulder

Locomotive Failure Analysis
Leonardo Vieira Machado Alexandre & Angelo Antonio Franco Donaggio

Automatic and Non-Stop Helper Locomotive Coupling
Fernando Dellacqua Filho, Jedson Alessandro Damasceno & Wagner Francisco Marques

Study on Simulation of ECP/DP on Heavy-haul train
Zhang Bo, Qian Lixin, Ma Dawei, Wang Chengguo & Lu Yang

Independent Acceleration System for Multiples Units
Alexandre Rabelo Goulart, Jorge Luiz de Oliveira & Oberlan Moreira Calçada
TECHNICAL SESSION 23 - TRACK COMPONENTS / RAIL STEELS

Evaluation of Advanced Rail Steels and Improved Welding Techniques under 35.7-tonne (39 ton) Axle Loads at the Facility for Accelerated Service Testing (FAST).
Joseph Kristan, Leonard Allen & Joseph LoPresti

Rail Requirements for 40 tonne Axle Loads
Jonathan Duvel, Peter Mutton, Eugenio Alvarez & John McLeod

New Rail Grades – a Technical Performance Overview
Gregor Girsch, Norbert Frank & Peter Pointner

Bainitic Rails for Heavy Haul Operations
Shur E.A., Vorozhishchev V. I., Pavlov V. V, Korneva L. V, Godic L.

Major Advances in Rail Technologies Achieved in the Past 10-20 Years
Stephen Marich

TECHNICAL SESSION 24 - VEHICLE-TRACK INTERACTION II

Simulation, Development and Field Testing of a Track Stiffness Measurement Vehicle
Eric Berggren, Åke Jahlénius, Bengt-Erik Bengtsson & Mats Berg

A New Simulation Method for the Train Dynamics
Weihua Zhang, Maoru Chi & Jing Zeng

Continuous Improvement in Wheel/Rail Interaction for Efficient Railway Operation
Claus Epp, S S Ravitharan, John Powell & Nicholas Wheatley

Influence of Railway Wheel Flat Impact on Crack Growth in Rails
Jens C O Nielsen, Jonas W Ringsberg & Luis Baeza

TECHNICAL SESSION 25 - WAYSIDE DETECTION WORKSHOP

Roller Bearing Detection and Maintenance Using Acoustic Condition Monitoring on the Chinese Railways
Liu Ruiyang, Gerald Anderson & Firidausi Irani

Advanced Rail Vehicle Inspection Systems
James Lundgren & Chris Killian

An Improved Method to Monitor Vehicle Steering Performance
Dan Larsson

Truck Performance Detector – A Tool to Improve Safety and Increase Efficiency
Juan Manuel Soler, Juan Jose Moreno, Curtis Urban & M. Carmen Trevizo

Author Index
