Organizing Committee, Secretariat, Venue IX

Volume A

Section I. Keynote Lectures

A review of modern computational and experimental tools relevant to the field of drying
P. Perré

Pore network models of drying, contact angle and film flows
M. Prat

Drying of tropical fruit pulps: Spouted bed process optimization as a function of the pulp composition
S.C.S. Rocha, M.F.D. Medeiros, J.S. Souza and O.L.S. Alsina

Influence of spray method on product quality and morphology in spray drying
P. Walzel

Generation of specific product structures during drying of food
S. Palzer, C. Dubois and A. Gianfrancesco

Drying of porous materials: From a general mathematical model to specific applications
G. Chen and W. Wang

Section II. Fundamentals, modeling, simulation

Fundamentals of modeling and analysis of spray freeze drying: The drying of frozen pharmaceutical and food particles in packed beds
A.I. Liapis and R. Bruttini
Pore network model and simulation of transport process for grain deep bed drying
J. Chang, Y.J. Yuan, D.Y. Yang and X.D. Liu

Use of dryer simulators for higher education
F. Courtois and G.Trystram

Mathematical modelling of drying of nanosuspension droplets in constant-rate period
M. Mezhericher, A. Levy and I. Borde

The effective thermal conductivity in a solid containing a liquid mixture: An approach from drying experiments
R. Gamero and J. Martinez

Drying myths and misinterpretations
I.C. Kemp

Effect of drying-induced strain stress on drying behavior of layered foods with different moisture sorption isotherm
Y. Itaya and N. Kobayashi

Simulation of crack generation during drying
G. Musielak and T. Śliwa

An irregular pore network model for convective drying of aggregates: Capillary and micro-mechanical effects
A. Kharaghani, T. Metzger and E. Tsotsas

Plasticity in porous materials subjected to drying
S.J. Kowalski, J. Banaszak and A. Rybicki

Transient character of drying processes in deformable mixtures
C. Meszaros, K. Gottschalk, I. Farkas, A. Selakovic and A. Balint

Development of a measurement technique for particle shrinkage during convective drying
L. Spreutels, F. Debeste, C. Heilporn, R. Legros, J. Chaouki, F. Bertrand and B. Haut

Experimental and numerical investigation of pressure-swirl atomizers
K. Heinen, P. Renze and M. Schönherr
Particle deposition criterion in CFD modeling of spray dryers
M.W. Woo, L.M. Che, W.R.W. Daud, A.S. Mujumdar and X.D. Chen

Design of ultrasonic spray-drying by CFD modeling
E. Lebedev, A. Voynovskiy, M. Gordienko and N. Menshutina

CFD simulation of capillary condensation during freeze drying of porous material
M.H. Ghajar and S.H. Hashemabadi

Simple, accurate and robust modeling of various systems of drying of foods and biomaterials: Reaction engineering approach
A. Putranto, X.D. Chen and P.A. Webley

Neuro-fuzzy modeling of dryer performance
H.M.S. Lababidi and C.G.J. Baker

Prediction of the drying rate in the superheated steam drying process
R. Adamski and Z. Pakowski

Thermal-membrane drying: A novel drying concept assessed by mathematical modeling
Z.H. Wu, Z.Y. Li, Y.J. Xie, L. Wu and A.S. Mujumdar

Dimensionless formulation of convective heat transfer in fry-drying process of sewage sludge
M.H. Romdhana, D. Lecomte and B. Ladevie

Pressure drop and fluid flow behavior of spray dryer pressure nozzle
V. Pistre, F. Ducept, S. Mezdour, M. Sionneau and G. Cuvelier

Numerical study of water desorption process from polystyrene cation resin CG-8
M. Stakić and A. Nikolić

CFD-simulation of the dynamic behavior of a continuous fluidized bed plant
M. Jacob

Some generalized and particular issues on modeling of complex drying processes based on temperature-moisture relationships
V.I. Konovalov, N.Z. Gatapova and T. Kudra

XII
Formation of hollow particles by drying of silica-water suspension
E. Maevski, A. Levy and I. Borde

Drying kinetics and drying models of fruit that underwent continuous heat pump drying and hybrid drying methods
C.H. Chong, A. Figiel and C.L. Law

Production of narrow distributed particles by laminar rotary atomization – The influence of the ambient gas on the breakup of stretched liquid threads
A. Mescher and P. Walzel

Influence of water-cement ratio on diffusion coefficient of cement mortars at different moisture contents
H. Garbalińska, S.J. Kowalski and M. Staszak

Modeling of drying during ideal shrinkage
J. Brac, W. Jomaa, C. Pommier and L. Rouleau

Gas-admixing foam spray drying kinetics
J. Rabaeva, C. Strumillo and M. Piatkowski

Numerical simulation of particle trajectories and velocity in a pilot plant spray dryer with a two-fluid nozzle
A.R. Sayyari, O.R. Rouستapour, A.R. Tahavvor and A. Afšari

Computational fluid dynamic (CFD) simulation of swirl in a spray dryer
O.R. Rouستapour and M. Hosseinalipour

Analysis of experimental results using the drying model in a box-type heat pump dryer
K.H. Lee, J.R. Kim and S.R. Lee

Micro-scale model for drying of highly porous particle aggregates
C. Kirsch, T. Metzger and E. Tsotsas

Extraction of effective parameters for continuous drying model from discrete pore network model
N. Vorhauer, T. Metzger and E. Tsotsas

Modeling and energy efficiency optimization of a low temperature adsorption based food dryer
J.C. Atuonwu, G. van Straten, H.C. van Deventer and A.J.B. van Boxtel

XIV
The use of fractional-in-space diffusion equations for describing microscale diffusion in porous media

I. Turner, M. Illic and P. Perre

Application of the theory of neural networks to modelling the process heat treatment of loose materials in the dryer drum

V. Volynsky, V. Zaitsev and V. Mizonov

Numerical simulation of a Helmholtz-type pulse combustor

C.W. Feng, X.H. Fu, X.D. Liu, F. Cui, W.B. Wang, M.G. Wu and H.C. Niu

On the modeling of convective drying tests on soil samples in non-isothermal conditions

P. Gerard, A. Léonard, R. Charlier and F. Collin

Modeling plain vacuum drying by considering a dynamic capillary pressure

S. Sandoval-Torres, J. Rodriguez-Ramírez, L.L. Méndez-Lagunas and R. Rivera-Tinoco

Porous structure design of banana foam to resist moisture adsorption using a 2D stochastic pore network: Experiment and simulation

P. Prakotmak, S. Soponronnarit and S. Prachayawarakorn

Industrial drying of wooden pallets - CFD analysis of air flow

A.G. Ghiaus, A. Filios, D.P. Margaris and D. Tzempelikos

Some generalized and particular issues on the modeling of complex drying processes based on temperature-moisture relationships. Part I. General statements

V.I. Konovalov

Rate of the drying shrinkage of the hydraulic concretes

A. Brahma

Simulation of continuous fluidized bed dryers within the flowsheet simulation program SolidSim

I. Alaathar, E.U. Hartge, S. Heinrich and J. Werther

Application of population balance equations for continuous fluidized bed drying

U. Cundius, M. Peglow and E. Tsotsas
Discrete Element Modelling of the fluidized bed granulation process by coupling of different simulation systems

M. Dosta, S. Antonyuk, L. Fries and S. Heinrich

Experimental and theoretical investigations on fluidized bed freeze drying

L. Mörl, W. Behns, H. Haida, S. Schlüsselburg, S. Henschke and M. Jacob

Micromodel experiments of pure ice sublimation in capillary porous media

L.A. Segura and C.A. Oyarzún

A comparative study on numerical simulation in vacuum-FIR radiation drying and oven drying of litchi fruit

F.Y. Xu, C. Zhen and C.Y. Li

Mathematical modelling of plug flow fluidized bed dryer using batch drying kinetic data of DWGS

R.G. Bait and B.N. Thorat

Modeling of spray drying processes using meshfree simulation methods

W. Söckel, F. Keller and U. Nieken

Analysis of heat transfer during convective drying of cubic particles of papaya

P.S.S. Porto, E.P. Muniz, R.D. Loss, I.P. Santos and J.R.C. Provetti

Convection drying kinetics of Asian white radish (Raphanus sativus L.) slices

F. Khanzadeh, H. Tavakolipour and F. Rahmani

A Lattice Boltzmann simulation of drying liquid film on patterned substrates with different wettability

R.J. Li and Y. Morozumi

Improved identification of drying models with sequential optimal design of experiments

D. Goujot, X. Meyer and F. Courtois

Simulation of a fluidized bed spray granulation pilot plant GF/ProCell 25 with the flowsheet simulation software SolidSim

J. Neuwirth, S. Heinrich, M. Dosta, M. Jacob, C. Reimers and M. Pogodda

Optimization of fluidized drying in horizontal fluidized bed for the first period of drying

A. Paświata

XVI
Investigation into first and second order change of state for milk ingredients
C. Köhler, G.J. Esper and A. Knoblauch

Modeling of dehydration kinetics of European plums (Prunus domestica L.) by combined methods
M.M. Rodriguez, L.M. Gori, R.H. Mascheroni and A.M. Pagano

Section III. Measurement and process control

Non-intrusive detection of moisture content in a fluidized bed using acoustic emission
F. Karimi, R. Sotudeh-Gharebagh, N. Mostoufi and M. Abbasi

On-line product quality measurement and analysis in a spray drying process
J. Stawczyk and A. Lewandowski

Effect of moisture profile on the tableting behavior of Enalapril Maleate granules using inline near infrared spectroscopy
A. Hartung, M. Knöll, U. Schmidt and P. Langguth

Novel control technique for the drying process of pasta
F. Groß, R. Benning, U. Bindrich, K. Franke, V. Heinz and A. Delgado

Particle agglomeration in spray drying: Role of product properties related to stickiness
A. Gianfrancesco, C. Turchiuli, D. Flick, S. Palzer and E. Dumoulin

On the use of a MPC algorithm for the in-line optimization of a pharmaceutical freeze-drying process
R. Pisano, D. Fissore and A.A. Barresi

Kinetics of microwave drying under low pressure
A. Kieca and G. Musielak

Analysis of foam-structure and viscosity effects with focus on vacuum drying application
R. Kohlus and M. Sramek
Control of moisture evaporation in microwave drying
Z. Li, G.S.V. Raghavan and V. Orsat

Extrudability of cassava flour, water and by-products of renewable fuels industry to produce bioplastic
J.A. Ruano Ortiz, C.Y. Takeiti, C.W.P. Carvalho, J.L. Ascheri, T.L. Azevedo and F.S. Barbosa

Model-based measurement and control of granulation processes
A. Buck, M. Peglow, E. Tsotsas, M. Mangold and A. Kienle

Investigation of process dynamics in fluidized bed granulation
T. Hoffmann, M. Peglow and E. Tsotsas

Fibre-optical inline measurements of particle size distributions in fluidized bed processes
C. Fischer, A. Buck, M. Peglow and E. Tsotsas

Observation and analysis of mass transfer during drying of ceramic mass samples
J. Banaszak, I. Fijal-Kirejczyk, J.J. Milczarek, J. Żołdek and A. Trzcinski

Association of acoustic emission with drying process
J. Banaszak, A. Pawlowski and D. Mierzwa

Enrichment of dried pasta with whey by microencapsulation
R. Ares, I. Marañón, M.C. Villarán, U. Ruiz and I. Lombrana

Color quality control of chocolate beverage powder
C. Boxler
