## Table of Contents

Message from the Programme Chairs
Programme Committee
Conference Sponsors

Towards a Taxonomy of Network Scanning Techniques  
*Barnett, Richard J. & Irwin, Barry* ................................................................. 1

Investigating the Impact of the External Environment on Strategic Information Systems Planning: A Qualitative Inquiry  
*Brown, Irwin* ........................................................................................................... 8

Contemplating Systematic Software Reuse in a Project-centric Company  
*Chapman, Mark & van der Merwe, Alta* ................................................................. 16

The Relationship between Emergence of the Shortest Path and Information Value using Ant-like Agents  
*Chibaya, Colin & Bangay, Shaun* ........................................................................... 27

Utilising the Living Labs Approach in the Design of a Digital Platform for SINGA  
*Dlodlo, Nomusa; Ford, Meryl & Marques, Lara* ...................................................... 35

Incorporating Layout Managers into an Evolutionary Programming algorithm to design Graphical User Interfaces  
*du Plessis, Mathys C. & Barnard, Lynette* ............................................................... 41

Agile Systems Development and Stakeholder Satisfaction: A South African Empirical Study  
*Ferreira, Carlos & Cohen, Jason* ............................................................................. 48

Guidelines for Secure Software Development  
*Futcher, Lynn & von Solms, Rossouw* ................................................................. 56

Designing Technology for Young Children: What we can Learn from Theories of Cognitive Development  
*Gelderblom, Helene & Kotzé, Paula* ....................................................................... 66

Usability Evaluation of the South African National Accessibility Portal Interactive Voice Response System  
*Greeff, Mardé; Coetzee, Louis & Pistorius, Martin* ............................................... 76

Do Online Buying Behaviour and Attitudes to Web Personalization Vary By Age Group?  
*Hart, Mike* ............................................................................................................... 86

Scientific computing using virtual high-performance computing: a case study using the Amazon Elastic Computing Cloud  
*Hazelhurst, Scott* .................................................................................................... 94

Using Mobile Preference-Based Searching to Improve Tourism Decision Support  
*Hill, Ryan & Wesson, Janet* ................................................................................... 104
Planning as Model Checking: The performance of ProB vs NuSMV
Hörne, Tertia & van der Poll, John A. .......................................................... 114

A Model for Eliciting User Requirements Specific to South African Rural Areas
Isabirye, Naomi & Flowerday, Stephen ....................................................... 124

Java Micro Edition and Adobe Flash Lite for Arcade-Style Mobile Phone Game Development: A Comparative Study
Koller, Alex; Foster, Greg & Wright, Madeleine .......................................... 131

Investigating the Use of “Grounded Theory” in Information Systems Research
Matavire, Rangarirai & Brown, Irwin ........................................................... 139

An investigation into the implementation of open source software within the SA government: An emerging expansion model
Mtsweni, Jabu & Biermann, Elmarie ............................................................ 148

A model of an intelligent video-based security surveillance system for general indoor/outdoor environments
Naidoo, Wayne C. & Tapamo, Jules-Raymond ............................................ 159

Maintaining Customer Profiles in an E-commerce Environment
Nkawanga, Felix; Calitz, André P. & Barnard, Lynette ................................ 169

A lightweight Web interface to Grid scheduling systems
Parker, Christopher & Suleman, Hussein ..................................................... 180

An Analysis of Representations for Hyper-Heuristics for the Uncapacitated Examination Timetabling Problem in a Genetic Programming System
Pillay, Nelishia ......................................................................................... 188

An Application of Genetic Algorithms to the School Timetabling Problem
Raghavjee, Rushil & Pillay, Nelishia ............................................................ 193

Models towards a Hybrid Conversational Agent for Contact Centres
Ravi Sanker, Gopal; Greyling, Jeán; Vogts, Dieter & du Plessis, Mathys C. .. 200

Predicting Technology Acceptance and Adoption by the Elderly: A Qualitative study
Renaud, Karen & van Bijon, Judy ............................................................... 210

Investigating the Viability of Scroll-Wheel Interfaced Mobile Phones for Text Entry
Slay, Hannah; Foster, Greg & Mukadah, Edison ........................................ 220

Automatic Marking with Sakai
Suleman, Hussein ..................................................................................... 229

Development and Implementation of an Institutional Repository within a Science, Engineering and Technology (SET) environment
van der Merwe, A. & Kroeze, J. H. ................................................................ 237

E-Government: living up to the challenge of culture context
van Greunen, D. & Yeratziotis, A. ............................................................... 246
Using Adaptive Interfaces to Improve Mobile Map-based Visualisation
van Tonder, Bradley & Wesson, Janet........................................................................................................257

A Framework for Gaze Selection Techniques
van Tonder, Martin; Cilliers, Charmain & Greyling, Jeán.........................................................................................267

Usability Context Analysis for Virtual Reality Training in South African Mines
van Wyk, Etienne & de Villiers, Ruth..................................................................................................................276

Comparison of the effects of Professional and Pedagogical Program Development Environments on Novice Programmers
Vogts, Dieter; Calitz, André & Greyling, Jeán........................................................................................................286
