2010 10th IEEE International Conference on Advanced Learning Technologies

(ICALT 2010)

Sousse, Tunisia
5 – 7 July 2010

Editors:

Mohamed Jemni
Kinshuk

Demetrios Sampson
J. Michael Spector

IEEE Catalog Number: CFP10261-PRT
2010 10th IEEE International Conference on Advanced Learning Technologies

ICALT 2010

Table of Contents

Preface ................................................................. xxvi
Chairs / Committees ................................................ xxvii
Reviewers ............................................................... xxvii

10th IEEE International Conference on Advanced Learning Technologies (ICALT 2010)

3D Digital Simulations in Participative Design of the Boulevard in Putrajaya: Implications on Academic, Organizational, and Informal Learning ................................................................. 1
   Rashidah Ab. Rahman
A 3D Educational Mobile Game to Enhance Student’s Spatial Skills ................................................. 6
   Norena Martin-Dorta, Isabel Sanchez-Berriel, Miguel Bravo, Juan Hernandez,
   Jose Luis Saorin, and Manuel Contero
A Chorus Learning Support System Based on the Tutoring Knowledge of the Chorus Leader ....................... 11
   Mizue Kayama, Kazunori Itoh, Kazushi Asamuma, Masami Hashimoto, and Makoto Otani
A Collaborative Mobile Virtual Campus System Based on Location-Based Dynamic Grouping ..................... 16
   Qing Tan, Kinshuk, Yu-Lin Jeng, and Yueh-Min Huang
A Conceptual Framework of Learning through Agent Negotiation ............................................................ 19
   K. Robert Lai and Chung-Hsien Lan
A Design for Integration of Web 2.0 and an Online Learning Community: A Pilot Study for IWiLL 2.0 ................................................................. 22
   J-Fan Liu, Meng Chang Chen, Yeali Sun, David Wible, and Chin-Hwa Kuo
A Diversity-Enhanced Genetic Algorithm to Characterize the Questions of a Competitive e-Learning System ................................................................. 25
   Elena Verdi, Maria Jesús Verdi, Luisa M. Regueras, and Juan Pablo de Castro
Active Sharing of Contextual Learning Experiences among Users in Personal Learning Environments Using a Peer-to-Peer Network

Amel Bouzeghoub and Ngoc-Kien Do

ALGOWEB: A Web-Based Environment for Learning Introductory Programming

Ricardo Vargas Dorneles, Delcino Piccinin Jr., and André Gustavo Adami

Ahmad Mustafa Seel and Imran A. Zualkernan

An Approach for the Personalization of Exercises Based on Contextualized Attention Metadata and Semantic Web technologies

Pedro J. Muñoz-Merino, Carlos Delgado Kloos, Martin Wolpers, Martin Friedrich, and Mario Muñoz-Organero

An Architecture for Layering and Integration of Learning Ontologies, Applied to Personal Learning Environments and Cloud Learning Environments

Alexander Mikroyannidis, Paul Lefrere, and Peter Scott

An Audio Book Platform for Early EFL Oral Reading Fluency

Kuo-Ping Liu, Cheng-Chung Liu, Chih-Hsin Huang, Kuo-Chun Hung, and Chio-Jung Chang

An Educational Environment for Training Skills for Global Software Development

Miguel J. Monasor, Aurora Vizcaino, and Mario Piattini

An Evaluation of Diagnosis in a Learning Environment for Object-Oriented Modeling

Ludovic Auxepaules and Dominique Py

An Integrated Approach to Learning Object Sequencing

Battur Tugsgerel, Rachid Anane, and Georgios Theodoropoulos

An Integrated Model of Synchronous Cyber Assessment and Blended Learning Environment for Foreign Language Learners

Sabrina Leone, Tommaso Leo, and Nian-Shing Chen

An Investigation of the Enhancement and the Formal Description of IMS/QTI Specification for Programming Courses

Ahlem Harchay, Lilia Cheniti-Belcadhi, and Rafik Braham

An Online Arabic Learning Environment Based on IMS-QTI

Abdelkader Abdelkarim, Dalila Souilem Boumisa, and Rafik Braham

An Online Collaborative Learning Platform with Annotation on Figures

Ping-Lin Fan, Hsueh-Wu Wang, Wei-Hsien Wu, Su-ju Lu, Min-Chung Ke, and Han-Jang Wu

Analysis of the Advantages of Using Tablet PC in e-Learning

Masahiro Ando and Maomi Ueno
Analyzing Contextualized Attention Metadata with Rough Set Methodologies to Support Self-regulated Learning ................................................................. 125
  Maren Scheffel, Martin Wolpers, and Frank Beer
Applying and Reusing Knowledge in a Repository ............................................ 130
  I. Azevedo, A. Ortiz, C. Vaz de Carvalho, Rui Seiça, and E. Carrapatoso
AR_Dehaes: An Educational Toolkit Based on Augmented Reality Technology for Learning Engineering Graphics ................................................................. 133
  Jorge Martín-Gutiérrez, Jose Luis Saorín, Manuel Contero, and Mariano Alcañiz
ASK-LOM-AP: A Web-Based Tool for Development and Management of IEEE LOM Application Profiles ................................................................. 138
  George Chloros, Panagiotis Zervas, and Demetrios G. Sampson
Automarking: Automatic Assessment of Open Questions .................................. 143
  Laurie Ane Cutrone and Maiga Chang
Bringing the Social Semantic Web to the Personal Learning Environment ............... 148
  Vlad Posea and Stefan Trausan-Matu
Browsing E-Lecture Libraries on Mobile Devices: A Spatial Interaction Concept ................................................................. 151
  Jochen Huber, Jürgen Steinle, Simon Olberding, Roman Lissermann, and Max Mühlhäuser
CARDS: A Metamodel Approach to Aggregate Outcomes of Learning Tools ........... 156
  Emilio Julio Lorenzo and María Felisa Verdejo
Case-Based Medical E-assessment System .......................................................... 158
  Rozemary Scarlat, Liana Stanescu, Elvira Popescu, and Dumitru Dan Burdescu
Checking Semantic Consistency of SCORM-like Learning Objects ....................... 163
  Ramzi Farhat, Bruno Defude, and Mohamed Jemni
Children's Interactive Behavior and Strategy in a Multi-robots' Collaborative Environment ................................................................. 168
  Wu-Yuin Hwang, Sheng-Yi Wu, and Te-Yuan Yang
Collaborative Development of an Augmented Reality Application for Digestive and Circulatory Systems Teaching ................................................................. 173
  David Pérez-López, Manuel Contero, and Mariano Alcañiz
Combining Dialogue and Semantics for Learning and Knowledge Maturing: Developing Collaborative Understanding in the Web 2.0 Workplace ............................... 176
  Andrew Ravenscroft, Simone Braun, and Tobias Nelkner
Communication Patterns in Component-Based Intelligent Tutoring Systems ............ 181
  Géraldine Ruddeck and Alke Martens
Comparing Social Virtual Worlds for Educational Purposes ............................... 186
  Rosa Reis, Paula Escudeiro, and Nuno Escudeiro
Computerized Adaptive Testing Based on Decision Tree .................................... 191
  Maomi Ueno and Pokpong Songmuang
Continuous Use of Authoring for Adaptive Educational Hypermedia: A Long-term Case Study ................................................................. 194
Jonathan G.K. Foss, Alexandra J. Cristea, and Maurice Hendrix

Course Ranking and Automated Suggestions through Web Mining .................................................. 197
Stavros Valsamidis, Ioannis Kazanidis, Sotirios Kontogiannis, and Alexandros Karakos

Deepthink: A Second Life Environment for Part-time Research Students at a Distance ........................................... 200
L. Rapanotti, L. Barroca, M. Vargas-Vera, and A.J. Reeves

Design and Evaluation of an Affective Interface of the E-learning Systems ........................................ 202
Hui-Chun Chuang, Chin-Yeh Wang, Gwo-Dong Chen, Chen-Chung Liu, and Baw-Jhiune Liu

Design for Off-task Interaction - Rethinking Pedagogy in Technology Enhanced Learning .................................................. 204
Agneta Gulz, Annika Sillevarg, and Björn Sjödén

Design Study of OER-CC Ontology - A Semantic Web Approach to Describe Open Educational Resources .................................................. 207
Nelson Piedra, Janneth Chicaiza, Jorge López, Edmundo Tovar, and Oscar Martinez

Designing a Collaborative Learning Activity in Second Life - An Exploratory Study in Physics .................................................. 210
Ioannis Vrellis, Nikiforos M. Papachristos, Joan Bellou, Nikolaos Avouris, and Tassos A. Mikropoulos

Designing Game-Based Learning Framework - A Motivation-Driven Approach .................................................. 215
Kuo-chen Li, Jia-Chi Huang, Jia-Sheng Heh, Cheng-Ting Chen, Hui-Chih Wang, and Shiao-Wen Yeh

Designing Tutoring Activity - An Extension of Two EMLs, Based on an Organizational Model of Tutoring .................................................. 217
Patricia Gounon and Pascal Leroux

Developing a Collaborative E-Learning Environment Based upon Semantic Wiki: From Design Models to Application Scenarios .................................................. 222
Yanyan Li, Mingkai Dong, and Ronghui Huang

Development and Evaluation of Learning Support System Based on Automatic Classification of Students’ Programs According to Difference from Standard Algorithm .................................................. 227
Satoru Kogure, Hiroyasu Takatsu, Tatsuhiro Konishi, and Yukihiro Itoh

Digital Design Learning Patterns in Ambient Learning Environments .................................................. 229
Yacine Atif

dinsEditor: A Browser Extension for QTI-Compliant Assessment Item Authoring .................................................. 231
Sungjae Han, Jinjoo Kim, Youngseok Lee, Jaehyuk Cha, and Byung-Uk Choi
Educational Tool Based on Topology and Evolution of Hyperlinks in the Wikipedia ................................................................. 233

  Lauri Lahti

Educational Webportals Augmented by Mobile Devices with iFrimousse Architecture .......................................................... 236

  Florent Carlier and Valérie Renault

Effects of Adaptive Reflection Teaching Strategies on Learners’ Reflection Levels in a Web-Based Learning Environment ........................................... 241

  Nian-Shing Chen, Chun-Wang Wei, and Chia-Chi Liu

E-learning Authoring with Docbook and SMIL .......................................................... 246

  Alberto González Téllez

Emotional Strategies for Vocabulary Learning .......................................................... 249

  Ramla Ghali and Claude Frasson

Enabling Communication and Feedback in Mass Lectures ........................................... 254

  Mostafa Akbari, Georg Böhm, and Ulrik Schroeder

Enabling the Use of Real World Objects to Improve Learning ........................................ 259

  Katja Niemann and Martin Wolpers

Engineering of Open Learning Scenarios - The Case of Hop3x Learning Scenarios .......................................................... 264

  El Amine Ouraiba, Christophe Choquet, Philippe Cottier, Christophe Despres, and Pierre Jacoboni

Enhancing Educational Metadata with Mobile Assisted Language Learning Information .......................................................... 269

  Panagiotis Zervas and Demetrios G. Sampson

Enhancing the Learning Experience by Addressing the Needs of the Learner Through Customization and Personalization in the Learning by Doing Methodology .......................................................... 274

  Surya Kiran Reddy K. and Sandhya Kode

Evaluating a Brain-Computer Interface to Categorise Human Emotional Response .......................................................... 276

  Katie Crowley, Aidan Sloney, Ian Pitt, and Dave Murphy

Evaluating Student Response Driven Feedback in a Programming Course .......................................................... 279

  José Luis Fernández Alemán, Dominic Palmer-Brown, and Christina Draganova

Evaluating the Effectiveness and Motivational Impact of Replacing a Human Instructor by Mobile Devices for Teaching Network Services Configuration to Telecommunication Engineering Students .......................................................... 284

  Mario Muñoz-Organoero, Gustavo Ramirez-Gonzalez, Pedro J. Muñoz-Merino, and Carlos Delgado Kloos

Examining Learning Object Repositories from a Knowledge Management Perspective .......................................................... 289

  Pavlos Kallonis and Demetrios G. Sampson
Examining the Effects of the Simultaneous Display of Students’ Responses
Using a Digital Pen System on Class Activity - A Case Study of an Early
Elementary School in Japan .............................................................. 294
  Taro Sugihara, Takumi Miura, Motoki Miura, and Susumu Kunifui
Exploiting Semantic and Social Technologies for Competency Management ........................................ 297
  Giovanni Acampora, Matteo Gaeta, Francesco Orciuoli, and Pierluigi Ritrovato
Exploiting the Semantic Web for Interactive Relationship Discovery
in Technology Enhanced Learning .................................................. 302
  Steffen Lohmann, Philipp Heim, and Paloma Diaz
Exploring the Development of Adaptable Learning Objects. A Practical
Approach .......................................................................................... 307
  Voula Gkatzidou and Elaine Pearson
Extending LMS with Collaborative Remote Lab Features ............................................................. 310
  Mario A. Bochicchio and Antonella Longo
Extending Open Space Technology for Blended Learning ............................................................ 315
  Isabel Pereira and Antonio Dias Figueiredo
Extending the IMS LD standard with Adaptability ........................................................................ 320
  Valérie Monfort, Maha Khemaja, and Slimane Hammoudi
Facilitating Learning Interests Through Mobile Information Visualization ...................................... 323
  Yuan Xin Gu, Raymond Koon Chuan Koh, Vivian Hsueh-Hua Chen,
  and Henry Been-Lirm Duh
Fade-out and Peer Monitor Techniques in Tools for Scripted Argumentation:
Evaluation Results from a Case Study ......................................................................................... 328
  Yannis N. Bouyias, Stavros N. Demetriadis, and Anastasios Karakostas
From a Personal Learning Environment to an Adaptable Personal Learning
Environment: Meeting the Needs and Preferences of Disabled Learners ........................................ 333
  Elaine Pearson, Voula Gkatzidou, and Steve Green
From Mini Rover Programs to Algebraic Expressions ..................................................................... 336
  G. Barbara Demo
Helping Students Understand Courses through Written Syntheses: An
LSA-Based Online Advisor .................................................................. 341
  Emmanuelle Villiot-Leclercq, Sonia Mandin, Philippe Dessus, and Virginie Zampa
How to Instrument a Community of Practice Dedicated to Project Based
Pedagogy Tutors: A Solution Based on Case Based Reasoning ................................................... 344
  Céline Quénu-Joiron and Dominique Lecler
How to See Training Paths in Learning Management Systems? .................................................... 349
  Philipe Teutsch and Jean-Francois Bourdet
iCALT: Intelligent Context-Aware Learning and Teaching Environment ........................................ 352
  Shonali Krishnaswamy, Selby Markham, John Hurst, Steven Cunningham,
  Cyrill Labbe, Behrang Saeedzadeh, and Brett Gillick
Identifying Animals with Dynamic Location-aware and Semantic Hierarchy-Based Image Browsing for Different Cognitive Style Learners........................................................................355  
Dunwei Wen, Ming-Chi Liu, Yueh-Min Huang, Kinshuk, and Pi-Hsia Hung
Implementation of a Remote Analog and Digital Communications Laboratory for e-Learning ..................................................................................................................360  
Akram Abu-aisheh and Farid Farahmand
Implementation of Web-Based Dynamic Assessment System and its Application on Science Learning ..............................................................................................................362  
Ah-Fur Lai, Chih-Hung Chen, and Horng-Yih Lai
Implementing Psychological Parameters in a Web-Based Appraisal System .................................................................................................................................365  
Zacharias Lekkas, Nikos Tsianos, Costas Mourlas, Panagiotis Germanakos, and George Samaras
Improve the Output from a MCQ Test Item Generator Using Statistical NLP ...............................................................................................................................368  
Robert Michael Foster
Increasing Motivation in a Multicultural Learning Setting .........................................................................................................................370  
S. Ortiz de Arri, M. Retegi, I. Calvo, A. Arruarte, J.A. Elorriaga, M. Larrañaga, and U. Rueda
Increasing Students In-Class Engagement through Public Commenting: An Exploratory Study ........................................................................................................373  
Honglu Du, Hao Jiang, Mary Beth Rosson, and John M. Carroll
Indicators for Supporting the Regulation Process of Learners’ Activities and the Teachers’ Self-regulation Process ................................................................................378  
Aina Lekira, Christophe Després, and Pierre Jacoboni
Injecting Pedagogical Constraints into Sequential Learning Pattern Mining .........................................................................................................................380  
Mingming Zhou and Yabo Xu
Instant Seat Mapping for Student Note Sharing Process ................................................................................................................................................382  
Motoki Miura, Taro Sugihara, and Susumu Kunifushi
Integration of External Tools in Virtual Learning Environments: Main Design Issues and Alternatives ..................................................................................................384  
Carlos Alario-Hoyos, Juan I. Asensio-Pérez, Miguel L. Bote-Lorenzo, Eduardo Gómez-Sánchez, Guillermo Vega-Gorgojo, and Adolfo Ruiz-Calleja
Interactive Search Interfaces for Young Children - The PuppyIR Approach .........................................................................................................................389  
Andreas Lingnau, Ian Ruthven, Monica Landoni, and Frans van der Sluis
Interactive Widgets for Regulation in Learning Games .............................................................................................................391  
Thebault Carron, Jean-Charles Marty, and Stéphane Talbot
Inter-University Co-operation by Using ViCaDiS Virtual Campus .........................................................................................................................394  
Radu Vasiu and Diana Andone
Introducing Students to Aerospace Board Information Systems Using an Embedded Graphics System Simulator .........................................................................................397  
Pavel Paces and Martin Šipos
Kernel for a Semantic Learning Platform with Adapted Suggestions
Ioan Szilagyi, Radu Balog-Crisan, and Ioan Roxin

Lab VIEW-Based Integrated Virtual Learning Platform
Akram Abu-aisheh and Farid Farahmand

Learner Control on Feedback: A New Extension to Adaptive Learning?
Mieke Vandewaetere and Kelly Wauters

Learning Biology with the Animated Agent in Game Based Learning
Hsin I Yung

Learning by Pet-training Competition: Alleviating Negative Influences of Direction Competition by Training Pets to Compete in Game-Based Environments
Zhi-Hong Chen, Calvin C.Y. Liao, and Tak-Wai Chan

Learning Styles and Teaching Strategies to Improve the SCORM Learning Objects Quality
Javier Enrique Rojas Moreno and Bruno Defude

Learning Technology Standards Adoption Process Improvement and Output Legitimacy
Paul A. Hollins and Tore Hoel

Learning Words Using Augmented Reality
Carmen M. Juan, Edith Llop, Francisco Abad, and Javier Lluch

Managing the Production and Evolution of e-learning Tools with Attribute Grammars
Bryan Temprado-Battad, Antonio Sarasa-Cabezuelo, and José Luis Sierra

Model-Driven Development of Context-aware Adaptive Learning Systems
Jihen Malek, Mona Laroussi, Alain Derycke, and Henda Ben Ghezala

Modeling Adaptive Situations According with Context and Learning Scenarios
Ana Marilza Pernas, José Palazzo M. de Oliveira, and Amel Bouzeghoub

Modelling Affect in Learning Environments - Motivation and Methods
Shazia Afzal and Peter Robinson

Modelling Computer Game Based Educational Experience for Teaching Children about Emergencies
Mario Rafael Ruiz Vargas, Telmo Zarraonandia, Paloma Díaz, and Ignacio Aedo

Monitoring Learning Experiences and Styles: The Socio-emotional Level
Chiara Spadavecchia and Carlo Giovannella

Multi-Object Oriented Augmented Reality for Location-Based Adaptive Mobile Learning
William Chang, Qing Tan, and Fang Wei Tuo

Multiple Usability Evaluations of a Program Animation Tool
Antonio Pérez Carrasco, J. Ángel Veldázquez Iturbide, and Jaime Urquiza Fuentes
Multi-User 3D Virtual Environment for Spanish Learning: A Wonderland Experience ........................................................................................................................................................................... 455

  Maria Blanca Ibáñez, José Jesús García, Sergio Galán, David Maroto, Diego Morillo, and Carlos Delgado Kloos

Offering Early Success Experiences in Software Construction: Experiences Teaching Dynamic Website Development to High School Girls ........................................................................................................................................................................... 458

  Mary Beth Rosson, Hansa Sinha, Tisha Hansford, and Jan Mahar

On Improving Learning Outcomes Through Sharing of Learning Experiences ........................................................................................................................................................................... 461

  Au Thien Wan, Shazia Sadiq, and Xue Li

On the Design of Learning Objects Classifiers ........................................................................................................................................................................... 464

  Marcelo Mendoza and Carlos Becerra

Ontology-Based Solution for Personalized Recommendations in E-Learning Systems. Methodological Aspects and Evaluation Criterias ........................................................................................................................................................................... 469

  Mihaela Brut and Florence Sèdes

OPENET4VE: A Platform for the Execution of IMS LD Units of Learning in Virtual Environments ........................................................................................................................................................................... 472

  Beatriz Fernández-Gallego, Manuel Lama, Juan Carlos Vidal, Eduardo Sánchez, and Alberto Bugarin

Pedagogical Deigns and Principles in Vocational Training: The Case of ELEVATE ........................................................................................................................................................................... 475

  Iraklis Paraskakis, Andreas Konstantinidis, and Ikaros Tsantekidis

Perceptions and Illusions about Adaptivity and Their Effects on Learning Outcomes ........................................................................................................................................................................... 480

  Mieke Vandewaetere and Geraldine Clarebout

Personalized Game Based Mobile Learning to Assist High School Students with Mathematics ........................................................................................................................................................................... 485

  Vani Kalloo, Kinshuk, and Permanand Mohan

Personalizing Learning Processes by Data Mining ........................................................................................................................................................................... 488

  Rainer Knauf, Yoshitaka Sakurai, Kohei Takada, and Setsuo Tsuruta

Playing Games on the Screen: Adapting Mouse Interaction at Early Ages ........................................................................................................................................................................... 493

  J. Enrique Agudo, Héctor Sánchez, and Mercedes Rico

Prediction of Players Motivational States Using Electrophysiological Measures during Serious Game Play ........................................................................................................................................................................... 498

  Lotfi Derbali and Claude Frasson

Read/Write Lectures: Fostering Active Participation and Increasing Student Engagement in the Lecture Hall ........................................................................................................................................................................... 503

  Kai Michael Höver and Michael Hartle

Re-engineering of Pedagogical Scenarios Using the Data Combination Language and Usage Tracking Language ........................................................................................................................................................................... 506

  Diem Pham Thi Ngoc, Sébastien Iksal, and Christophe Choquet
Re-engineering of the Apprenticeship Electronic Booklet: Adaptation to New Users Requirements ................................................................. 511
  Lahcen Oubahssi, Pierre Laforcade, and Philippe Cottier

Relationships between E-Learning Systems and Learning Outcomes: A Path Analysis Model ................................................................. 516
  Sean Eom

Remote Permission Management in Third-Party Tools and e-Learning Systems ................................................................. 521
  Jorge Fontenla González, Manuel Caeiro Rodríguez, and Martín Llumas Nistal

Re-thinking the Forum ........................................................................ 523
  Andrea Camusi and Carlo Giovannella

Retrieval Information Model for Moodle Data Visualization ........................................................................ 526
  D.A. Gómez-Aguilar, M.A. Conde-González, R. Therón, and F.J. García-Peñalvo

Reusing Adaptation Strategies in Adaptive Educational Hypermedia Systems ................................................................. 528
  Joshua Scotton and Alexandra I. Cristea

Scripted Collaborative Learning Based on Collaborative Learning Flow Patterns: A Case Study Using COLLAGE Editor ........................................................................ 533
  Nikos P. Michailidis, Stavros N. Demetriadis, and Yannis A. Dimitriadis

SeGAE: A Serious Game Authoring Environment ........................................................................ 538
  Amel Yessad, Jean-Marc Labat, and François Kermorvant

Self-Esteem Conditioning for Learning Conditioning ........................................................................ 541
  Imène Jraidí, Maher Chaouachi, and Claude Frasson

Similarity Contents Selection Mechanism for Learner’s Device Using Delivery Context Ontology and Rules ........................................................................ 546
  Yoonsoo Lee, Hyunoh Doh, Haanwoong Choi, and Jaehyuk Cha

Simple Learning Design 2.0 ........................................................................ 549
  Guillaume Durand, Luc Belliveau, and Benjamin Craig

Smart Timetable Plate for Classroom ........................................................................ 552
  Yuan-Chih Yu, Shing-chern D. You, and Dwen-Ren Tsai

Spatializing Social Practices in Mobile Game-Based Learning ........................................................................ 555
  Susan Gwee, Yam-San Chee, and Ek-Ming Tan

Students Attitude and Learning Effectiveness of Emotional Agents ........................................................................ 558
  K. Chatzara, C. Karagiannidis, and D. Stamatis

Student-Produced Vodcasts as Active Metacognitive Learning ........................................................................ 560
  Andrew Litchfield, Laurel Evelyn Dyson, Marijke Wright, Sojen Pradhan, and Barbara Courtille

Students’ Perceptions of the Factors Leading to Unsuccessful Group Collaboration ........................................................................ 565
  Shuangyan Liu, Mike Joy, and Nathan Griffiths

Students’ Competitive Preferences on Multiuser Wireless Sensor Classroom Interactive Environment ........................................................................ 570
  Ben Chang and Chien Wen Chen
Supporting Cognitive Competence Development in Virtual Classrooms -
Personal Learning Management and Evaluation Using Pedagogical Agents .............................................573

Stefan Weinbrenner, H. Ulrich Hoppe, Linda Leal, Milcon Montenegro,  
William Vargas, and Luis Maldonado

Supporting Collaborative Learning Processes in CVEs by Augmenting Student  
Avatars, with Nonverbal Communication Features .................................................................578

Thrasyvoulos Tsiatsos and Theodouli Terzidou

Supporting Exception Handling in Scripted Collaborative Courses ..................................................581

Roberto Perez-Rodriguez, Manuel Caiero-Rodriguez, and Luis Anido-Rifon

Supporting High-quality Early Childhood Education Services through ICTs ........................................586

Rubén Miguez, Juan M. Santos, and Luis Anido

Supporting Instructors in Designing Tablet PC-Based Courses .........................................................591

José-Vicente Benlloch-Dualde, Félix Buendia, and Juan-Carlos Cano

Supporting Partially Distributed, Case-Based Learning in an Advanced  
Undergraduate Course in Usability Engineering ..............................................................................594

Hao Jiang, John M. Carroll, Marcella Borge, and Craig Ganoe

Taking Advantage of Web 2.0 and Video Resources for Developing a Social  
Service: Babelium Project, the Web Community for Foreign Language Speaking Practice ..................597

Silvia Sanz Santamaria, Juan Antonio Pereira Varela, and Juián Gutiérrez Serrano

Tangible Cubes Used as the User Interface in an Augmented Reality Game for Edutainment .................599

Carmen M. Juan, Giacomo Toffetti, Francisco Abad, and Juan Cano

The CAE-L Cultural Framework: Definition, Instances and Web Service ...........................................604

Craig Stewart, Tim Brailsford, Krishna Chandramouli, and Alexandra I. Cristea

The Design and Application of an Automatic Course Generation System for Large-Scale Education ..........607

Xiaohong Tan, Carsten Ullrich, Yan Wang, and Ruimin Shen

The Effects of Prior Computer Experience and Gender on High School  
Students’ Learning of Computer Science Concepts from Instructional Simulations ............................610

Ming-Puu Chen

The Emotional Machine: A Machine Learning Approach to Online Prediction  
of User’s Emotion and Intensity ...................................................................................................613

Amine Trabelsi and Claude Frasson

The Integrated Lab: An Assessment to Combining Classroom Curriculum  
and Lab Experiments to Teach Information Systems Development Course .....................................618

Khalid A. Nafjan

The STELLAR Science 2.0 Mash-Up Infrastructure ...............................................................................621

Fridolin Wild, Thomas Daniel Ullmann, and Peter Scott
T-learning in Telecommunication Engineering: The Value of Interactive Digital TV in the European Higher Education Area ............................................................. 624

Martín López-Nores, Yolanda Blanco-Fernández, José J. Pazos-Arias, and Jorge García-Duque

Tool for Generation IMS-QTI v2.1 Files with Java Server Faces ............................................................. 627

Antonio García, Roberto Barchino, Luis de Marcos, Eva García, José-Ramón Hilera, José-Maria Gutiérrez, Salvador Otón, José-Javier Martínez, and José-Antonio Gutiérrez

Towards a Competence Based System for Recommending Study Materials (CBSR) ............................................................. 629

Athitaya Nitchot, Lester Gilbert, and Gary B. Wills

Towards a Distributed Architecture for Adaptive E-Learning System ............................................................. 632

Sarab Al Muhaideb, Salah Hammami, and Hassan Mathkour

Towards an Enhanced Approach for Peer-Assessment Activities ............................................................. 637

Mohammad AL-Smadi, Christian Gütl, and Frank Kappe

Towards Intelligent Collaborative Learning Simulations: Extending the IMS LD Standard by Web Semantic Based ITSs ............................................................. 642

Maha Khemaja, Sameh Ghallabi, and Valérie Monfort

Towards the Generalization of Game-Based Learning: Integrating Educational Video Games in LAMS ............................................................. 644

Ángel del Blanco, Javier Torrente, Pablo Moreno-Ger, and Baltasar Fernández-Manjón

Toys++ AR Embodied Agents as Tools to Learn by Building ............................................................. 649

Luca Simeone and Salvatore Iaconesi

Transfer of Educational Methods through Open Sourcing of Learning Management Systems ............................................................. 651

Imed Hammouda, Rami Laine, and Jari Peltonen

Using Feedback Tags and Sentiment Analysis to Generate Sharable Learning Resources Investigating Automated Sentiment Analysis of Feedback Tags in a Programming Course ............................................................. 653

Stephen Cummins, Liz Burd, and Andrew Hatch

Using Interactive Videoconference to Promote Active Learning in a Blended Learning Environment ............................................................. 658

Covadonga Rodrigo, José Luis Delgado, and Jorge Vega

Using SaaS and Cloud Computing for “On Demand” E Learning Services Application to Navigation and Fishing Simulator ............................................................. 663

Valérie Monfort, Maha Khemaja, Nouha Ammari, and Fayssal Fehli

Using Semantic Documents and Social Networking in Authoring of Course Material: An Empirical Study ............................................................. 666

Saša Nešić, Mehdi Jazayeri, Monica Landoni, and Đorđan Gašević

Using Tangible Learning Companions in English Education ............................................................. 671

Yi Hsuan Wang, Shelley S.C. Young, and Jyh-Shing Roger Jang
Web-Based Intelligent Tutoring Systems Using the SCORM 2004 Specification - A Conceptual Framework for Implementing SCORM Compliant Intelligent Web-Based Learning Environments .................................................................676
   Gustavo Santos and Álvaro Figueira
Web Tests in LMS Using Fingerprint Identification .................................................................679
   Chao Gil, Manuel Castro, Mudasser F. Wyne, and Russ Meier
What You Check is What You Get: Authoring with jEditOQMath ........................................682
   Paul Libbrecht
Winkball for Schools: An Advanced Video Modelling Technology for Learning Visual and Oral Communication Skills .........................................................................................687
   James Ohene-Djan
WOntoVLab: A Virtual Laboratory Authorship Process Based on Workflow and Ontologies .................................................................690
   Daniel C. Cugler, Cristiane A. Yaguimuma, and Marilde T.P. Santos
Doctoral Consortium
Appropriating Technology-rich Learning Spaces .........................................................................695
   Nadia Pantidi
Change Management and Social Networks: The Enabling Role of e-Learning .............................697
   Sara Sterlocchi and Aurelio Ravarini
Developing Adaptive and Personalized Distributed Learning Systems with Semantic Web Supported Multi Agent Technology .........................................................................................699
   Birol Ciloglugil and Mustafa Murat Inceoglu
Model-Driven Development in the Production of Customizable Learning Objects .................................................................701
   Maria de Fátima C. de Souza, José A. de Castro Filho, and Rossana M.C. Andrade
Offline Mobile Learning: Open Platforms for ICT4D ................................................................703
   Sujan Shrestha, John P.T. Moore, and Jose Abdelnour-Nocera
Self-and Co-Regulation in a Computer Supported Collaborative Learning Environment among Key Stage Three Students .................................................................................705
   Eunice Eyitayo Olakanmi
Advanced Learning Technologies for Disabled and Non-Disabled People (WALTD)
An Approach for Designing and Implementing a Computerized Adaptive Testing Tool for Applicants with Disabilities .........................................................................................708
   Monjia Balloumi, Mohsen Ladbidi, and Mohamed Jemni
How to Support Disabled and Non-disabled Learners with the ACCLIP Information Model 710
   Kalthoum Rezgui
Personalizing Accessibility to E-Learning Environments .................................................................712
   Mohsen Laabidi and Mohamed Jemni
Representing Contextual Features of Subtitles in an Educational Context .............................................. 714
  Marion Hersh and James Ohene-Djan

Synote: Designed for all Advanced Learning Technology for Disabled and Non-Disabled People ................................................................. 716
  Mike Wald

Technology-enhanced Training for All: Evaluation Results from the Use of the e-Access2Learn Framework ...................................................... 718
  Demetrios G. Sampson and Panagiotis Zervas

User Centered Model to Provide Accessible e-Learning Systems ................................................................. 720
  Halima Hebiri, Mohsen Laabidi, and Mohamed Jemni

Design Centered and Personalized Learning in Liquid and Ubiquitous Learning Places (DULP) Future Visions and Practical Implementations

An Innovative Approach to Improve the Performances of the Research Community ................................................................. 722
  Claudia Grieco, Giuseppina Rita Mangione, Francesco Orciuoli, and Anna Pierri

An Ontology Based Approach for Selection of Appropriate E-learning Personalization Strategy ........................................................ 724
  Fathi Essalmi, Leila Jemni Ben Ayed, and Mohamed Jemni

A Collaborative Ubiquitous Learning Approach for Conducting Personal Computer-Assembling Activities ................................................................. 726
