2010 Fifth International Conference on Frontier of Computer Science and Technology

(FCST 2010)

Changchun, China
18-22 August 2010

Editors:

Ivan Stojmenovic
Minyi Guo
Keqiu Li
Xiaohui Wei

Gerald Farin
Hai Jin
Liang Hu
Xiangju Che

IEEE

IEEE Catalog Number: CFP1033B-PRT
ISBN: 978-1-4244-7779-1
# Table of Contents

**Preface** ................................................. xiii  
**Organizing Committee** ................................... xv  
**Reviewers** ............................................... xvii  
**Keynotes** ................................................. xxiii  

## Parallel and Distributed Computing

Research on Performance Optimization for Grid Application Using Distributed File System ........................................ 3  
*Liang Hu, Lin Lin, and Jia Zhao*

Management and Control Techniques for Distributed Simulation System ................................................................. 9  
*Wei Duan, Yuan-Zheng Ge, and Xiao-Gang Qiu*

A Fast Single Pattern Matching Algorithm Based on the Bit-Parallel ................................................................. 17  
*Jun-bo Wang, Fei Kang, Xin-lei Xu, and Jing-ning Chen*

LimeVI: Extend Live-Migration-Enabled Virtual Infrastructure across Multi-LAN Network ........................................ 22  
*Xiaohui Wei, Hongliang Li, Liang Hu, Qingnan Guo, and Na Jiang*

Parallel Batch B+-tree Insertion on Multi-core Architectures .................................................................................. 30  
*Jianming Liao, Hu Chen, Yixia Yuan, and Jianqing Xi*

Parallel Electromagnetic Simulation for Electric Large Target by EMS-FMM ....................................................... 36  
*Wu Wang, Yangde Feng, and Xuebin Chi*

Traffic Optimization for Distributed Network Model Base on Petri Nets ................................................................. 40  
*Chang Xin, Pang Huanli, and Hu Liang*

A Novel On-Demand Streaming Service Based on Improved BitTorrent .............................................................. 46  
*Shiyu Yang, Yanming Shen, Wenyu Qu, and Keqiu Li*

</table>
Detecting Moving Shadows in Video Sequences Using Region Level Evaluation for Vision-Based Vehicle Detection ................................................................. 142
  Chen Wei-Gang and Xu Bin
A 3D Shape Measurement System Based on Random Pattern Projection ................................................................. 147
  Chunqin Shi and Liyan Zhang
A Parallel Streaming Motion Estimation for Real-Time HD H.264 Encoding on Programmable Processors ................................................................. 154
  Ju Ren, Mei Wen, Chunyuan Zhang, Huayou Su, Yi He, and Nan Wu
A Novel User-Specific Palmprint Verification Approach ......................................................................................................................... 161
  Zhongxian Qu, Yan Hu, Huihui Sun, and Jun Kong
A Local Threshold Segmentation Method Based on Multi-direction Grayscale Wave ........................................................................................................ 166
  Wei Wei, Xuanjing Shen, and Qingji Qian

Wireless Sensor Networks and Mobile Computing

OM: Opportunistic Multicast Routing for Wireless Mesh Networks ............................................................................................................. 173
  Yang Wen Zhong, Huang Chuan He, Wang Bo, Zhang Zhen Yu, and Wang Tong
CDHL: A Hybrid Range-Free Localization Algorithm in Wireless Sensor Networks ........................................................................................................ 180
  Hongyu Sun, Zhiyi Fang, Tianyang Wang, Yongbo Ma, and Naiji Ren
Numerical Simulation on Aerodynamic Heating Process and Research on the Missile Head Structure ..................................................................................................................... 184
  Bowei Liu, Yanli Ma, Yi Jiang, Weicheng Wang, Yongyuan Li, and Liwu Shao
Analytical Framework of Link Dynamics in Ad Hoc Network — A Perspective in Queueing System ..................................................................................................................... 187
  Guangcheng Qin, Panlong Yang, Chang Tian, and Hao Yin
Wireless Digital Gas Meter with Lower Power Consumption ................................................................................................................................. 192
  Yu Jiang, Yanchun Liang, Yang Cui, Lili He, Yinghui Cao, and Chengquan Hu

Reliability, Fault Tolerance, and Distributed Transaction Processing

Scenario-Based Early Reliability Model for Distributed Software ............................................................................................................. 201
  Luo Yunfeng and Ben Kerong
Test Data Generation Considering Data Dependence ................................................................................................................................. 208
  Xinzhong Liu, Gaochao Xu, Xiaodong Fu, and Yushuang Dong
Study of VOD Server Architecture with the Array of the Balanced Nodes in Storage and Networks ............................................................................................................. 214
  Xiaofeng Li, Liguo Xie, and Gang Liu
Security and Trustworthy Computing

Component Availability Based Survivability Recovery in Information System ............................................. 221
  Zhiwen Wang, Ke Lu, Huafeng Zou, and Qin Xia

Improving the Defence against Web Server Fingerprinting by Eliminating Compliance Variation .......................................................... 227
  Ke-xin Yang, Liang Hu, Ning Zhang, Yan-mei Huo, and Kuo Zhao

A New Digital Audio Watermarking Scheme Robust to Desynchronization Attacks .................................................. 233
  Pan-Pan Niu, Xiang-Yang Wang, and Ming-yu Lu

An Efficient Strong ID-Based Signature Scheme with Unforgeability ................................................................. 239
  Jianhong Zhang and Xue Liu

Assure High Quality Code Using Refactoring and Obfuscation Techniques ......................................................... 246
  Teng Long, Lin Liu, Yijun Yu, and Zhiguo Wan

Artificial Intelligence and Its Applications

The Measurement of Functional Load and Application in Tibetan ................................................................. 255
  Yang Yangrui, Guo Lei, Yu Hongshi, and Ma Ning

Persistent Storage of Ontology-Based Data with Integrity Constraints ............................................................ 260
  Xianji Cui, Dantong Ouyang, and Yuxin Ye

A Dynamic Evolutionary Algorithm for Multimodal Function Optimization .................................................. 266
  Jian Guo

Solving SAT Problem with Boolean Algebra ........................................................................................................... 271
  Youjun Xu, Dantong Ouyang, Yuxin Ye, and Jialiang He

Inversing Cardinal Direction Relations ............................................................................................................... 276
  Juan Chen, Haiyang Jia, Dayou Liu, and Changhai Zhang

Dynamic Scheduling for Semiconductor Wafer Fabrication Based on ETAEMS and MAS .................................. 282
  Xin Ma, Ying He, Xiaohu Shi, and Yanchun Liang

Theoretical Computer Science

A New Proof for the Undecidability of Context-Sensitive Synchronization-Sensitive Analysis ........................................ 291
  Miao Li and Zhang Da-Fang

System Software and Software Engineering

Modelling and Verifying of Medical Diagnosis System Based on Context-Awareness Framework ....................... 299
  Shijun Zou, Kaiyu Wan, and Zongyuan Yang

The Support of Interface Specifications in Black-box Components Testing .................................................. 305
  Ying Jiang, Ying-Na Li, and Xiao-Dong Fu
Aspect Mining Using Link Analysis ................................................................. 312
    Jin Huang, Yansheng Lu, and Jing Yang

Machine Learning and Pattern Recognition

The Method of Shape Recognition Based on V-System ..................................... 321
    Ruixia Song, Zhaoxia Zhao, Yanan Li, Qiaoxia Zhang, and Xi Chen

Ensemble Remote Sensing Classifier Based on α-Torrent Rough Set Feature

Partition ............................................................................................................. 327
    SuLi Zhang and Xin Pan

Computer Graphics and Human-Computer Interaction

User-Controlled Geometric Feature Preserving Simplification ............................. 335
    Zhi Wang and Hui-Ying Li

Is a Line Segment Circular? ............................................................................. 341
    Milica Stojmenović

The Study of User Interactions Based on Pen Tilt ............................................. 348
    Jibin Yin and Hua Liu

Workshop on Wireless Computing and Networking (WCN)

Periodic Real-Time Message Scheduling for Confidentiality-Aware

Cyber-Physical System in Wireless Networks .................................................... 355
    Wei Jiang, Wensheng Guo, and Nan Sang

Design of a Greenhouse Humiture Monitoring System Based on ZigBee

Wireless Sensor Networks .................................................................................. 361
    Guomin He, Xiaochan Wang, and Guoxiang Sun

Position-Aware Counter-Based Broadcast for Mobile Ad Hoc Networks ............ 366
    Xiaoman Wu, Yilan Yang, Jie Liu, Yue Wu, and Fasheng Yi

    Yuwen Sun, Mingxia Shen, Liang Zhou, Fenxian Ma, Xiangze Lin, and Yingjun Xiong

Improve the GNU Debugger for the Design of Multi-core Wireless Nodes .......... 376
    Tai-cong Zhong, Yong Liao, Jian-jing Shen, Xue Zhang, and Nan Sang

Workshop on Enabling Technology for e-Science (ETS)

A Hybrid Optimization Strategy and Its Application of Bridge Structures ............ 383
    Xiangwei Hao and Yang Liu

Analysis and Improvement of Dynamic Multi-core Hardware Prefetch Technology Based on Pre-execution ............................................................... 387
    Juan Fang and Hongbo Zhang

A Framework of Constructing and Evolving Trusted Services

with Formulation ............................................................................................... 392
    Ming Qu and Shufen Liu
Dynamic Load Balancing Scheduling Model Based on Multi-core Processor ......................................398
Xiaozhong Geng, Gaochao Xu, and Yuan Zhang

Constant Distance Prefetching for Linked Data Structure Based on CMP ....................................404
Hui-Dong Zhu and Ye Li

New Trends in Microprocessor Architecture for Parallel Computing ..............................................409
Xinfeng Xu and Yong Hei

A Case of Meta-scheduling for Biological Researches in Cloud Environment ....................................414
Xiaohui Wei, Lixian Xi, Hongliang Li, Haibin Wang, Wilfred Li, and Jingyuan Ren

Registration and Private Key Distribution Protocol Based on IBE ..................................................420
Liang Hu, Hongtu Li, Jianfen Chu, Hongwei Li, and Wei Yan

On the Structure of Parametric Sweeps in Large-Scale, Grid-Enabled Ash Deposition Simulations for the Irazu Volcano in the PRAGMA Grid .............................................................424
Santiago Núñez, Gustavo Barrantes, Eduardo Malavassi, José Brenes, and Jose Castro

Workshop on Bioinformatics and System Biology (BSB)

Weighted Network-Based Inference of Human MicroRNA-Disease Associations ....................................431
Qinghua Jiang, Yangyang Hao, Guohua Wang, Tianjiao Zhang, and Yudong Wang

Learning Qualitative Metabolic Models Using Evolutionary Methods .............................................436
Wei Pang and George M. Coghill

The Geometric and Electrostatic Properties of Binding Cavities and Their Usage in Protein-Ligand Docking ....................................................................................................................442
Lincong Wang

Analysis of Gene Expression Data Based on Density and Biological Knowledge ....................................448
Xu Zhou, Hang Sun, De-Ping Wang, Yu Zhang, and You Zhou

Gene Regulatory Network Reconstruction with Multiple Dataset Fusion and Differential Equation ..........................................................454
Ming Zheng, Guixia Liu, Deping Wang, Yan Wang, Chunguang Zhou, and Yuan Tian

Research and Implement of Structure Learning Algorithm for Hybrid Bayesian Networks ..................459
Dong Liyan, Yan Pengfei, Liu Zhaojun, Li Zhen, and Huang Peng

Workshop on Pattern Recognition and Intelligence Computing (WPRIC)

Coal and Coal Gangue Separation Based on Computer Vision ..........................................................467
Wenhui Li, Ying Wang, Bo Fu, and Yifeng Lin

An Image Denoising Method Based on Wavelet Spatial Correlation Edge Detection and Zero-tree-Like Structure .............................................................................................................473
Wen-hui Li, Bo Fu, Ying Wang, and Yi-feng Lin

Accurate Prediction of Transition Energies in Organic Molecules .......................................................479
Ting Gao, Hui Li, Dong-Bing Pu, Ying-Hua Lu, Hai-Bin Li, Hong-Zhi Li, and Zhong-Min Su
Predicting the Formation of Microporous Aluminophosphate AlPO4-5 Using
Ridge Regression .................................................................................................................. 483
Lixin Liu, Yan Yan, Jinsong Li, and Miao Qi

Research of Improving the Accuracy of License Plate Character Segmentation .................. 489
Shuang Qiao, Yan Zhu, Xiufen Li, Taihui Liu, and Baoxue Zhang

Design and Implementation of DSP-based License Plate Detection System .......................... 494
Ying-Juan Sun, Yong-Peng Xiao, Da-Wei Zhao, and Dong-Bing Pu

An Information Retrieval System Based on Prioritized Fuzzy Information
and Triangular Uninorms ........................................................................................................ 499
Songxin Wang

Accurate Prediction of the Optical Absorption Energies by Neural Network
Ensemble Approach .............................................................................................................. 503
Hui Li, Jianan Wang, Ting Gao, Yinghua Lu, and Zhongmin Su

Workshop on Image Processing and Information Security (WIPIS)

Fast Texture-Based Object Tracking Algorithm on Embedded Platform ............................ 511
Ming-Hwa Sheu, Wen-Kai Tsai, Chuang-Chun Hu, and Chun-Heng Tsao

Design and Realization of 3D Irregular Military Symbols Based on B-Spline ..................... 515
Huawen Jiang, Xiangju Che, Zhanheng Gao, Zhiwen Xu, and Zhengxuan Wang

Color Comparison in Codebook Model for Moving Objects Detection .............................. 518
Ke-Xue Dai, Qiang Li, and Zheng-Wu Zou

A Novel Biometric System Based on Hand Vein .................................................................. 522
Xiangqian Wu, Enying Gao, Youbao Tang, and Kuanquan Wang

A Novel Watermarking Algorithm Based on Phase Congruency Corner
Detection and SVD ............................................................................................................... 527
Wei Wang, Jinyan Wang, Chengxi Wang, and Dongbing Pu

Fusion of Palm Dorsal Vein and Hand Geometry for Personal Identification
Based on Linear Discriminant Analysis ................................................................................. 532
Wenjing Lu, Xinjun Qi, and Chenghang Liu

Image Fusion Algorithm Based on Two-Dimensional Discrete Wavelet
Transform and Spatial Frequency .......................................................................................... 537
Zhongxian Qu, Jingbo Zhang, and Zijun Feng

An Approach of Iris Recognition Based on Partical Swarm Optimization ......................... 541
Fuyou Han, Jinsong Li, Miao Qi, and Ming Sheng

Robust Human Tracking Algorithm Applied for Occlusion Handling ............................... 546
Jin Zhang, Hongguang Sun, Weizhou Guan, Jialiang Wang, Yannan Xie, and Bingnan Shang

Research on Enhancing Human Finger Vein Pattern Characteristics Based
on Adjacent Node Threshold Image Method ....................................................................... 552
Xue-Bing Wen and Xue-Zhang Liang
Workshop on Intelligent Information Processing (WIIP)

Disseminate Warning Message in VANETs Based on Predicting the Interval of Vehicles ................................................................. 559
   Qiangyuan Yu and Dayou Liu
Period Law of Discrete Two-Dimensional Arnold Transformation ........................................ 565
   Xiaoqiang Zhang, Guiliang Zhu, Weiping Wang, Mengmeng Wang, and Shilong Ma
Outlier Detection for Learning-Based Optimizing Compiler ....................................................... 570
   Shun Long and Weiheg Zhu
Based on Multi-agent Model for Grinding Process Control Research ........................................ 576
   Zhao Hongwei, Qi Yiming, Zhang Jiye, and Zhao Yuanheng
Constraint Satisfaction Timetabling Research Based on Course-Period-Template Selection and Conflict-Vector Detection ................................................................. 582
   Mingguang Yang, Liyuan Cai, and Guoming Song
A Statistics-Based Approach to Fast Performance Evaluation ..................................................... 589
   Shun Long and Xuan Chen
Optimization of Software Codes for CPU Chip Reliability ......................................................... 595
   Jiao-fang Shi, Zhi-hao Lin, and Jian Wang

Workshop in Assisted Engineering and Information Technologies (WAEIT)

A Design of the Mechanism for Lower Limbs Passive Rehabilitation and Kinematics Analysis ................................................................. 603
   Meng Zhang and Xuejun Li
Lip Detection and Tracking Using Variance Based Haar-Like Features and Kalman filter ................ 608
   Lirong Wang, Xiaoli Wang, and Jing Xu
Research on Local Image Navigation Method for Visual-Impaired Person ..................................... 613
   Xiaoli Wang, Lirong Wang, Jia Yin, and Chao Zhang
The Research on Paper-Mediated Braille Automatic Recognition Method ..................................... 619
   Jia Yin, Lirong Wang, and Jie Li
Pronouncing Rehabilitation of Hearing-Impaired Children Based on Chinese 3D Visual-Speech Database .................................................................................. 625
   Jian Zhao, Wang Lirong, Zhang Chao, Shi Lijuan, and Yin Jia
Gaze Assistant by Eye Tracking and Image Wrapping ....................................................................... 631
   Shanjun Zhang
Digest Generation Using Surveillance Video in Kindergarten ......................................................... 636
   Yu Wang and Jien Kato
Research on Chinese-Japanese Sign Language Translation System ................................................. 640
   Zhen Liu, Xiaomei Zhang, and Jien Kato

Author Index ................................................................................................................................. 646
