FISA 2009

7th European Commission Conference on Euratom research and training in reactor systems
22 – 24 June 2009
Prague, Czech Republic

Edited by
G. Van Goethem, P. Manolatos,
M. Hugon, V. Bhatnagar,
M. Deffrennes, S. Webster
TABLE OF CONTENTS

Foreword

Programme committees

| Highlights about Policy, Research and Innovation, Education and Training:   |
| FISA-2009 Conference report by journalist                                           |
| Mary Todd Bergman, INTRASOFT International SA                                        |

1

1. INTRODUCTION

Stakeholders' views on Community nuclear research

Nuclear Fission, Today and Tomorrow (Generations II, III and IV + Transmutation)  23
   G. Van Goethem, M. Hugon, V. Bhatnagar, P. Manolatos, K. Ptackova,  
   M. Deffrennes and S. Webster, European Commission, DG Research,  
   Directorate J: Energy (Euratom)

The Euratom ‘Fission’ Programme and Broader Policy Objectives  55
   Z. Stančič, Deputy Director-General, O. Quintana Trias, Director Direction J,

Energy policy for Europe: how can the opportunities of nuclear energy be better exploited?  60
   D. Ristori, EC, DG ENER, and C. Cleutinx, Euratom Supply Agency

Towards harmonisation of technical nuclear safety practices across the EU: impact of Euratom research  66
   D. Drabova, Czech Regulatory Authority and M.P. Comets, ASN, France

The Sustainable Nuclear Energy Technological Platform: safety and competitiveness now and in the future  72
   P. Pradel, CEA, chair of SNE-TP

Euratom research and training: the need to maintain nuclear competence and the positive development of Nordic utility involvement in Framework Programme  89
   G. Lowenhielm, SSM, and G. Huldqvist, Forsmark, Sweden

A European utility opinion about research, development, demonstration and deployment of nuclear fission  99
   Keynote lecture by V. Hlavinka, Director, CEZ, Czech utility
2. SAFETY AND COMPETITIVENESS OF NUCLEAR INSTALLATIONS

Meeting EU's energy needs through nuclear fission: synergy of public and private research in an international context

Keynote lecture by EDF R&D (Y. Bamberger)

Plant life management and modernisation: research challenges in the EU

R. Rintamaa and I. Aho-Mantila, VTT

Prediction of the effects of radiation for reactor pressure vessel and in-core materials using multi-scale modelling - 60 years foreseen plant lifetime (PERFORM 60)

A. Al Mazouzi, EDF

A EU simulation platform for nuclear reactor safety: multi-scale and multi-physics calculations, sensitivity and uncertainty analysis (NURESIM)

C. Chauliac, CEA

Sustainable integration of EU research in severe accident phenomenology and management (SARNET-2)

J.P. Van Dorsselaere, IRSN

Nuclear and radiological emergency management and rehabilitation strategies: towards a EU approach for decision support tools (EURANOS)

W. Raskob, KIT

3. INNOVATIVE NUCLEAR SYSTEMS

3.1 ADVANCED FUEL CYCLES AND MATERIALS, INCLUDING PARTITIONING AND TRANSMUTATION

Basic research in support of innovative fuel design for Generation-IV systems (F-BRIDGE)

C. Valot, CEA

Innovative materials for Generation-IV systems and transmutation facilities (GETMAT)

C. Fazio, KIT

European nuclear data studies for fast systems

P. Rullhusen, JRC-IRMM

Partitioning technologies and actinide science: towards pilot facilities in Europe (ACSEPT)

S. Bourg, CEA

XIV
Transmutation of high level nuclear waste in an accelerator driven system: towards a demonstration device of industrial interest (EUROTRANS)

J. Knebel, KIT

Impact of partitioning and transmutation on the high level waste management

EM Gonzalez Romero, CIEMAT

3.2 ADVANCED NUCLEAR SYSTEMS OF GENERATION IV

European sodium fast reactor (ESFR)

GL Fiorini, CEA

European lead fast reactor (ELSY and LEADER)

A. Alemberti, Ansaldo Nucleare

European gas fast reactor (GCFR and GoFastR)

R. Stainsby, AMEC

European molten salt reactor (EVOL)

C. Renault, CEA and S. Delpech, CNRS

The importance of collaboration in the advancement of current and next generation reactors

Keynote lecture by Westinghouse Electric Co (K. J. Jackson et al.)

High and Very High Temperature nuclear reactor research for multipurpose energy applications (RAPHAEL)

D. Hittner, AREVA NP

European supercritical water cooled reactor (HPLWR)

T. Schulenberg, KIT

4. EDUCATION & TRAINING AND LARGE INFRASTRUCTURES

Nuclear disciplines in response to industry and regulatory needs through the ENEN association

Keynote lecture by CEA-INSTN, ENEN Chairman (J. Safieh)

EMSNE 2008 ceremony - “European Master of Science in Nuclear Engineering” (4th yearly event, awarding the ENEN certificates of EMSNE)
Conceptual design and construction of advanced Nuclear Power Plants: Training and Human Resource Considerations (ENEN III)

Keynote lecture by AREVA NP GmbH (C. Schoenfelder)

Radiation Protection: towards a European approach for education & training and mutual recognition of professional qualifications (ENETRAP)

M. Coeck, SCK-CEN

Geological Disposal: analysis & planning, development and implementation, evaluation and validation of training schemes (PETRUS)

B. Bazargan Sabet, INPL Nancy

Towards a network of research reactors for Generation III and IV

Keynote lecture by CEA (D. Iracane)

Integrated infrastructure initiatives for material testing reactor innovations

J. Dekeyser, SCK-CEN

5. CONCLUSION

Sustainable Nuclear Energy Technological Platform: challenges ahead of us in the Strategic Research Agenda

HA Abderrahim, SCK-CEN

The renaissance of nuclear: technologies and policies for the future

W.J. Nuttal, Cambridge University, UK

Summary of FISA-2009 Conference 1 - Safety & Competitiveness and Education & Training

Jozef Misak, NRI Rez plc, Czech Republic

Summary of FISA-2009 Conference 2 – Advanced Reactors and Fuel Cycle Technology

Paul JA Howarth, NNL, UK

6. SIDE EVENTS

International Science and Technology Center (ISTC) Session

W. Gudowski, ISTC Moscow, Russia

Science and Technology Center in Ukraine (STCU) Session

M. Zayet, STCU Kyiv, Ukraine
### 7. POST-FISA WORKSHOPS
