Message from Chairs
Organising Committee
Programme Committee
Keynote Speech

Session 1: Safety and Development Process

Application of ISO DIS 26262 in Practice ................................................................. 3
Marc Born, Olaf Kath, John Favaro

Automatic Allocation of Safety Integrity Levels ......................................................... 7
Yiannis Papadopoulos, Martin Walker, David Servat, Rolf Johansson, Mark-Oliver Reiser, Andreas Abele,
Friedhelm Stappert, Fulvio Tagliabo, Sandra Torchiaro, DeJiu Chen, Martin Töngren, Henrik Lonn, Lars-Olof
Bertnsson, Matthias Weber

Requirement traceability in safety critical systems ...................................................... 11
Marie-Agnès Peraldi-Frati, Arnaud Albinet

Session 2: Architecture and Robustness

Memory Protection at Option ....................................................................................... 17
Michael Stilkerich, Daniel Lohmann, Wolfgang Schröder-Preikschat

A Road-Map for Enabling System Analysis of AUTOSAR-Based Systems .................. 21
Rolf Johansson, Stefan Bunzel, Marc Graniou, Henrik Lönn, Håkan Sivencrona, Friedhelm Stappert

Temporal isolation for the cohabitation of applications in automotive embedded software... 25
Dominique Bertrand, Sébastien Faucou, Yvon Trinquet

Work In Progress Session

A Calculation Method for Software Safety Integrity Level ............................................ 31
Takaji Fujiwara, Juan Manuel Estevez, Yoshinobu Satoh, Shigeru Yamada

Towards Verification-based Development of In-Vehicle Safety Critical Software: A Case Study. 35
Martijn M.H.P. van den Heuvel, Reinder J. Bril, Peter van de Velde, Johan J. Lukkien

Unambiguous Semantics in Automotive Timing Modelling ............................................ 39
Johan Nordlander, Rolf Johansson, Risat Mahmud Pathan

Enforcing Trust in Control Automotive Platforms ..................................................... 43
Christophe Jouvray, Géregoire Chartier, Nicolas François, Ismael Ripoll, Miguel Masmano, Alfons Crespo

VESBA – A Middleware Oriented Architecture for Virtualized Embedded Systems ........ 47
Artur Schiefer, Gruhn Volker, Hrushchak Ruslan
Session 3 : Design and Validation

Use of Formal Methods for Building Qualified Code Generator for Safer Automotive Systems ... 53  
Nassima Izerrouken, Olivier Ssi Yan Kai, Marc Pantel, Xavier Thirioux

Conditional Safety Guarantees in Open Systems ................................................................. 57  
Daniel Schneider, Mario Trapp

Opportunities from Standardization in Automotive Safety Assessment ............................ 61  
Raul Barbosa, Johan Karlsson

Session 4: Scheduling and real-time

Experimentation of WCET computation on both ends of automotive processor range ....... 67  
Hugues Cassé, Pascal Sainrat, Clément Ballabriga, Marianne De Michiel

Tree scheduling versus sequential scheduling ................................................................. 71  
Christian Fotsing, Annie Geniet, Guy Vidal-Naquet

Enabling Mode Changes in a Distributed Automotive System ........................................ 75  
Martin Mitzlaff, Rüdiger Kapitza, Wolfgang Schröder-Preikschat

Author Index ......................................................................................................................... 79
