Advances in Rolling Equipment and Technologies

Selected, peer reviewed papers from the International Symposium on Advanced Rolling Equipment and Technologies (ISARET2010), 23-24 September 2010, Taiyuan, China

Edited by

Qingxue Huang, Cunlong Zhou, Zhengyi Jiang, Jianmei Wang, Hailian Gui, Lifeng Ma, Lidong Ma, Yugui Li and Chunjiang Zhao

Preface

## I. Applied Fundamental

### The Expansion of the Kernels for 3D Elastic Fast Multipole BEM
W.W. Wang and Y.M. Chen

### Variational Method for Percussion Motion of a Non-Ideal Constraint System
W.L. Yao and L.L. Gao

### Prediction Model of Zinc Coating Weight for Continuous Hot-Dip Galvanizing Based on BP Network
X.B. Zhang, Q.D. Zhang and X.F. Zhang

### Nonlinear Spline Method for Buckling Analysis of Steel Strip
J. Qin, Q.D. Zhang and J.T. Dai

### Fuzzy Neural Networks Used in PID Controller of the Secondary Regulation Speed System
M. Dong, G.Y. Li and L.F. Li

### The Mathematical Models of the Best Adjusting of Shear Blade Clearance of Disk Shear in Cutting Plate
Z.Q. Huang and Q.X. Huang

### Parameter Estimation for Small Sample Censored Data Based on SVM

### MLE of Three-Parameter Weibull Distribution in Multi-Data Types
Y.J. Wang, Y. Fan and S.K. Wang

### Crank Block Steering Mechanism Optimization for Forklift Truck Based on Vector PSO
C.L. Sun, J.C. Zeng, J.S. Pan and Y.F. Tao

### The Correlation of Assessment Parameters on Geometrical Features of Surface Texture
Y.F. Yang, Z.N. Han and J.B. Li

## II. Rolling Technologies

### Four-High Cold Rolling Mill for Control of Edge-Drop and Thrust Force
J.S. Wang, X.F. Yu, L. Song and S.L. Li

### Work Roll Thermal Deformation Calculation Model of Cold Rolling Mill
L. Song, J.S. Wang, M.G. Shen, X.B. Chen and S.L. Li

### Feasibility Analysis of Solving Contact Problem of Roller Bearing by Finite Element Method
Z.W. Wang, L.Q. Meng, W.S. Hao and E. Zhang

### A Robust Model for Work Roll Bending Control Reaching Threshold in Flatness Control of Cold Rolling Mill
P.F. Wang, D.H. Zhang, X. Li and W.X. Zhang

### Analysis of Contact Pressure between Rolls under Non-Symmetrical Roll Bending of UCM Cold Rolling Mill
X. Li, D.H. Zhang, P.F. Wang and W.X. Zhang

### Transverse Deformation Control in Low Alloy Wear-Resistant Steel Quenching Process
D.M. Zhu, G.Y. Liu, S.J. Zhang and Q.S. Zhu
Performance Analysis of Asymmetrical Roll Bending for Flatness Control of Cold Rolling Mill
D.H. Zhang, P.F. Wang, W.X. Zhang and X. Li ................................................. 93

Research on Simulation of Hydraulic System of Bending Roll
H.Y. Han, H. Zhang, J. Wang, J. Wang and Q.X. Huang .................................. 100

Experimental Study of Roll Thermal Crown in 1750 Hot Strip Mill
Z.F. Ma, Z.W. Li, X.C. Zhao and M.W. Li ....................................................... 106

Thermal Deformation Modeling of Post-Rolling Deterioration of Hot Strip Flatness during Forced Cooling of Coils
X.L. Yu, Z.Y. Jiang and Q. Yang ........................................................................ 111

A Hybrid Model Using Genetic Algorithm and Neural Network for Optimizing Technology Parameters in Skew Rolling Seamless Pipes
J.H. Hu, Y.H. Shuang and P. Liu ...................................................................... 117

A New Approach of Combined Shape and Gauge Control
X.P. Zhang, C.J. Zhi, B. Sun, X.Z. Du and J.Z. Zhang ........................................ 123

Analysis on Influence of Dynamic Setting AGC Model Parameters on the Stability of Control System
C.J. Zhao, L.Y. Jiang, J.Z. Zhang, Q.X. Huang and X.K. Yu ................................. 128

The Calculation of Initial Velocity Field in Tension Reducing Deformation Zone of Steel Pipe

Research on Energy Equation of Lubrication Model on Large-Scale Journal Bearing System
J.M. Wang, Q.X. Huang, J.F. Kang and Y. Fan .................................................. 139

Key Equipment and Innovative Technology for Tempering of Super Thin Strip
W.H. Ding, J.Y. Xia and Y.Q. Li .............................................................. 145

Online Quality Prediction of Strip Hot-Dip Galvanizing Based on Support Vector Regression
F. He, Z.G. Liang, M. Li and J.W. Xu .............................................................. 153

Analysis of the Mill Roller Bearing Using Mixed Fast Multipole Boundary Element Method
Q.X. Huang, H.L. Gui, F. Fan and T. Song ......................................................... 159

Optimization of Rolling Schedule in Tandem Cold Mill Based on QPSO Algorithm
S. Lin and Y.R. Nan ............................................................................. 165

The Development of Short Stress Path Experimental Asymmetric Multifunctional Rolling Mill
Z.J. Chen, G.J. Huang, J.J. Min and B.H. Qian ................................................ 171

Analysis on Diffusion Parameters of Rolling Mill Bearing Alloy-Interface
H.B. Li, Q.X. Huang, J.M. Wang and Q. Ma .................................................... 177

Finite Element Simulation of the Hot-Rolling Process of Titanium Alloy Bar
M.R. Shuai, Q.X. Huang and Y.C. Zhu .......................................................... 181

3-D Finite Element Simulation of the Vertical-Horizontal Rolling Process

Simulation of Automatic Position Control in an 8-High Cold Rolling Mill Hydraulic System
L. Wang and L.Y. Cheng ............................................................................. 193

Research on Online Model of Vertical Rolling Force in Hot Strip Roughing Trains
G.M. Yuan, J. Wang, H. Xiao and M.L. Li ....................................................... 198

</table>
Research on Quenching Equipment of Rail Head
H. Kang, Y.H. Wang, D. Wu, X.M. Zhao and Y.M. Wang ................................................................. 313

The Finite Element Analysis and Structure Optimizing of the 42MN Flatting Mill’s Higher Beam
C.M. Zhang and R.Y. Hao .................................................................................................................. 317

Research on Influence of Fatigue Life from Variable Cross-Section Strut-and-Tie Transition Zone Radian
G. Hang and J.F. Wu ......................................................................................................................... 321

Effect of Nozzle Layout Parameters on the Controlled Cooling of Flat Steel
S.J. Zhang, D.M. Zhu and G.Y. Liu .................................................................................................... 326

Non-Uniform Deformation Characteristic of in 690 Superalloy Tube in Glass Lubricated Hot Extrusion
C.Y. Sun, B. Liu, Q.D. Zhang and R. Li ............................................................................................ 332

Improvement of On-Line Heating Method in the Side Dam for Twin Roll Strip Casting Process
X.W. Song and B.Y. Sun .................................................................................................................... 340

Study on Wear-Resistant Steel Quenching Deformation
X.X. Bian, Y.J. Ma and M.W. Li ........................................................................................................ 347

Microstructure Formation and Mechanical Properties in AZ31 Alloy Processed by Continuous Rheo-Extrusion
R.G. Guan, Z.Y. Zhao, F.R. Cao, X.P. Sun and Q.S. Zhang ............................................................... 353

Shear Stress and Deformation Analysis of Static Bonded Multi-Layer of Pyrex7740 Glass and Aluminum
C.R. Liu, T.S. Jia and Q.S. Meng ....................................................................................................... 361

The Mechanical Property Analysis of Circular Saw Blades under Different Rotational Speeds
X.L. Wang and Q. Zhang .................................................................................................................. 365

Influence of Rotation Speed on Cooling Uniformity of Seamless Pipe for Quenching

Study on Extrusion Forming of Superalloy Tube under Different Dies
Y.L. Mao, Q.D. Zhang and C.Y. Sun ................................................................................................... 380

Analysis on Micro-Scale Behaviors of Pinch Rolls on Cut-to-Length Shear
Y.G. Li, J.M. Wang and S.P. Liu ......................................................................................................... 386

Analysis on the Super-Winding Accident of Casting Crane and Configuration of the Safeguard
H. Wen, Q.W. Wang, G. Zheng and B. Wang ................................................................................... 390

IV. Leveling and Shearing Technologies
The Design and Study of Roller Curvature for the Tube or Bar Straightener
D.C. Hu and H.M. Chen ...................................................................................................................... 394

The Study of Fulcrum Distance in the Pressure Straightening Process
Y.Q. Tian, Z.F. Wang, Q.X. Huang and J.B. Li ................................................................................. 399

Research on Automatic Tracking Technology and Improvement Model of Plate in Leveling Region

Research on the Impact Pressure of the Hydraulic Rolling-Cut Shear
J. Wang, H.Y. Han, Q.X. Huang and J. Wang ................................................................................... 410
Rigid-Flexible Virtual Prototyping Study of Planetary Gear Reducer for Shearer Cutting Unit
K.B. Zhang, Z.J. Yang and W.B. Zhu ......................................................... 414

Research on Rolling-Cut Double-Side Shear in Kinetics
Z.B. Chu, Q.X. Huang, L.F. Ma and J.D. Zhang ........................................... 420

Analysis of Leveling Strategy for a Plate Mill
L. Cui, X.L. Hu and X.H. Liu .................................................................. 424

The Theory Analysis of the Blade Gap’s Adjusting for Rolling Shear
F. Fan, Y.G. Li, H.L. Gui and F.L. Yang ..................................................... 429

Calculation of Cutting Force for Drum Type Arc Flying Shear
J.Y. Xia, W.H. Ding and Z.Y. Li ................................................................. 434

The Design and Implementation of Leveling Model and Data Analysis System of Eleven Roller Leveler

Straightening Technology Research of Aluminum Profile for Vehicle
J.J. Hao, Q.X. Huang and X.L. Zhang ......................................................... 449

Research on Leveling Model of Combination Leveler
X.G. Wang, Q.X. Huang and J.M. Wang ...................................................... 453

Design Considerations in High Strength Plate Leveler
C.L. Zhou, H. Liu and Q.X. Huang ............................................................. 458

Industrial Test on Shearing Force of Rolling Shear
L.F. Ma, J.M. Wang and Q.X. Huang .......................................................... 462

A Networked Control System of Rolling Shear Line Based on PROFIBUS-DP
Z.Y. Sun, Q.L. Sun, X.W. Yan and H. Li ...................................................... 467

Development of Automatic Control System for a Rolling Shear Line
Q.L. Sun, Z.Y. Sun, X.W. Yan and H. Li ..................................................... 471

Analysis of Asymmetric Valve Control Asymmetric Cylinder System of Hydraulic Leveler
B. Guo, Y.G. Li and H.Y. Han ................................................................. 477

Deformation Work in Strip Tension Leveling

FEM Analysis of Bottom Cassette of Plate Roller Leveler
S. Liu, Q.X. Huang, C.L. Zhou and C.M. Gao ............................................. 488

Numerical Simulation of Straightening of Steel Pipe for Press Straightening Machine
D.F. Song ......................................................................................... 493

Research on Computer Simulation System for Special Straightening and Shearing of Wire
B.Y. Sun, X.Z. Du and X.R. Yang .............................................................. 499

Leveler Intelligent Model and Knowledge Base for Plate Steel Based on Multi-Fieldbus

V. Testing Technologies

Description and Control of Tin Plate Surface Visual Quality

Stress Testing and Strength Analysis of Vibrating Cooler
Design and Analysis of Structure and Test System for Bearing-Rotor Test-Bed  
X.Y. Pang, Z.J. Yang and Q.L. Liang ................................................................. 522

The Study of Online Detecting Technique of Steel Production Based  
on Laser Structured Light  
Z.G. Liang, X.C. Wang and F. He ........................................................................ 526

VI. Related Research and Development

Artificial Intelligent Solver on Windscreen Wiper Mechanism of Automobile  
Y.D. Song ............................................................................................................ 533

Simulation of Average Model Switch Network of Power Converter  
Y.D. Song ............................................................................................................ 537

Improve Design and Analysis on Transitional Chute of Scraper Conveyor  
S.P. Wang and Z.J. Yang ..................................................................................... 541

Intelligent Design of the Hydraulic Manifold Blocks Based on Rule-Based Reasoning  
S.W. Du, Y.T. Li and J.J. Song ............................................................................. 546

The Analysis on Different Circular Saw Structures for Reducing Saw Noise  
X.L. Wang and Y. Zhang ..................................................................................... 551

Performance Parameters Analysis of Vibrating Cooler  
Z.J. Yin, B. Chen, L.W. Zhang and Z. Tian ........................................................ 557

Simulation and Analysis of Mechanical Properties of Large Rotating Steel Structure  
Based on CAE Technology  
Z.J. Yin, Z.C. Tang, B. Chen and T. Han .............................................................. 562

The Study of CAD/CAE Integrated Technology in Network Environment  
H. Ding, Z.J. Yang, X.W. Wang and Z.Y. Ding ..................................................... 567

Feasibility Analysis for Large Rectangular Ingot Production by Intensive Cooling  
S.L. Li and X.G. Ai ............................................................................................... 573

Discussing the Effect of Different Modeling Methods on Bus Frame Modal Analysis  
Based on the Experiment  
T. Han, L. Jin and Z.J. Yin .................................................................................... 577

Experiment Research on Tangential Dynamic Characteristics of Machined  
Plane Joint Interfaces  
X.L. Zhang, S.H. Wen, G.S. Lan, H.Q. Ding and Z.Y. Zhang ............................ 584

Dynamic Recrystallization during Hot Compression Processes  
of 304 Austenite Stainless Steel  
X.D. Zhao, J.S. Liu, H.Q. Chen and W.W. He ..................................................... 590

Keyword Index ...................................................................................................... 597

Author Index ........................................................................................................ 601
