Civil Engineering in China – Current Practice and Research Report

2010 International Conference on Civil Engineering

19—20 July 2010

Baoding • China

Editors: SUN Jianheng, HAN Huiling, Henry ZHANG

- High-Rise Buildings and Large Span Structures
- Road and Bridge Construction
- Composite Steel and Concrete Structures
- Structural Reliability and Protection from Natural Disasters
- Architecture Designs
- Municipal Engineering
- Architecture Foundation
- Rock and Soil Mechanics
- Tunnel Engineering
- Civil Engineering Materials
- Water Carrying Capacity and Urban Water Solution
- Water Resources and Agricultural Productivity
- Project Management and Environment Protection
- Earthquake Engineering

AUSSINO ACADEMIC PUBLISHING HOUSE
# Contents

## Chapter One

**High-Rise Buildings and Large Span Structures**

<table>
<thead>
<tr>

Chapter Three

Composite Steel and Concrete Structures

Three-Dimensional Finite Element Simulative Analysis of Reinforced Concrete Frame Columns
ZHANG Guojun, SHI Fengying .........................................................147

The Experimental Research on the Characteristics of Mechanics of Self-compacting Concrete Slab
WANG Libao ..............................................................................154

Response of Reinforced Concrete Flexural Members to Blast Loads
SUN Wenbin, JIANG Yang ..............................................................159

Synergetics Damage Mechanics of Concrete Compression Members
WEI Jinbo, DUAN Xin ..................................................................165

Cyclic Behavior of Full-Scale Steel Beam-to-CFT Column Moment-resisting Connections
The Shear Lag Effect of the Steel-concrete Composite Beam in the Action of Temperature Based on the Potential Variational Theory

A Uniform Criterion for the Shear Failure of Concrete Beam

Nonlinear Finite Element Analysis on Lattice Type Prestressed Steel Reinforced Concrete Beam with Unbonded Tendon

Quality Control of the Beam of Concrete Small-sized Hollow Block Masonry Construction

Size Effect in Concrete Compressive Strength: Considering the End Friction during Testing

Experimental Research on Hysteretic Behavior of Frame with Specially Shaped Columns

Temperature Stress of Concrete Member Strengthened by CFRP

The Damage Sensitivity Analysis of Beam Crack Based on Curvature Mode

Research on Ductility of Reinforced Concrete Columns with Circular Section Based on Energy Theory

Study on the Bending Resistance Forecast of Concrete Beam in Seawater

The Factors that Impacting the Constitutive Relation of the Core Concrete of the Axial-loaded High-strength Square Concrete-filled Steel Tubular Short Columns

Experimental Research on Flexural Performance of Low-strength Self-compacting Concrete Beams
Numerical Simulation on Split Test and Crack Process of Concrete  
LIU Yan, YI Cheng .................................................................233

Performance of Sprayed Steel Fiber Concrete  
WANG Xingguo, CHEN Hongqiang, CHENG Zhaoxiao ..................238

Finite Element Analysis of Steel-concrete Composite Slab with Section Steel Ribs  
ZHANG Xiaopeng, WANG Tiecheng ........................................243

The Influence of Different Curing Conditions on Compressive Strength  
Development of Concrete  
LIU Ming-hui, WANG Yuan-feng ..............................................247

Chapter Four

Structural Reliability and Protection from Natural Disasters

Influence of Steel Slag Powder on Pavement Performance and Durability of Concrete  
SUN Jiaying, XU Yidong .......................................................255

The Application Research of Fine Sand in High-speed Railway Embankment Filling  
QIU Huanfeng, FU Shaojun, LUO Keqing ..................................261

Safety Impaction on Pile-anchor Structure to Deep Excavation by Overloading  
WANG Wei-shuo, YAN Wei ....................................................269

Sampling and Testing Technology in Geotechnical Engineering Investigation  
LI Jian, ZHANG Mei ............................................................274

Disaster Prevention Information Publishing System Based on Web GIS  
LIU Yingli, YAN Teliang .......................................................277

Concrete Carbonation Prediction SVM Model Basing on PSO Parameter Optimization  
CAO Keqing, WU Xinmiao .....................................................282

Safety Risk Management for Building Effected by Large-section Ventilation Channel Construction  
ZHAO Yanfa, QIN Huihui, HE Yue .........................................287

Disaster Warning Expert System and Prevention for Railway Tunnel in Karst Areas  
BAI Mingzhou, KUANG Xing ..................................................292
Chapter Five

Architecture Designs

Wrinkle Behave of Space Membranes

LI Huiyun, ZHANG Ying  ...........................................343

Analysis on the Origin of Flat Roofing Leakage and Design Countermeasures

TANG Hong, Wang Jinyu  ...........................................347

On the Composability of Sunken Spaces and the System of Urban Public Spaces

LI Linggao, LI Dong  ...........................................351
Movable Roof Design and Analysis of Retractable Roof Structures
JIANG Yingbo, WANG Xiaorong .................................................................357

Architectural Design of Mountainous Villages
LI Dongmei, SHANG Gaizhen .................................................................362

Rational Order — Review of Laiyuan Business Center Design
JIA Anqiang, HAO Yonggang .................................................................365

The Study of some Innovations and Key Techniques in the Design and Construction of Wuhan Railway Station
QIU Hongsheng, HUANG Xiaomin ..........................................................369

Research on the Influence of Traditional Mountainous Residence Technology to the New Residence Construction — Take the Taihang Mountain Region as the Sample
ZHAO Jing, LI Hongwei .......................................................................374

An Analysis of Influence of the Membrane Structure on the Impact of Architectural Design
YANG Shunchao, JI Jianghai .................................................................378

Design of Man Cheng County Hospital Ward Building Complex
CHEN Bo, WANG Guanghe .................................................................381

Research on the Effect of Architectural Design in Molding City Image
ZHAO Xiaqing, LI Hongwei .................................................................385

Urban Green Transport Research
CHEN Tao, LI Hongwei .................................................................388

Focus on Multi-perspective — Search for New Rural Ecological House Design in North China
JIA Huixian, PENG Ying .................................................................392

An AHP-based Fuzzy Synthetic Analysis Applied on Allocate Zhouzhou Logistics Park
LI Bing .................................................................397

Experimental Simulation and Data Analysis on Heat Transfer Process of the Building Envelope
FAN Jinsheng, CAO Xiuling .................................................................402
Chapter Six

Municipal Engineering

Research on the Potentials of Rural Residential Area Land Consolidation --- A Case Study in Langfang Yongqing City of Hebei Province
WANG Wei, LIU Yimeng .........................................................409

Study on the Risk Management of Demolition for Renovation of Villages in a City
ZHANG Huimin, ZHOU Zhi ..........................................................414

Study on the Compensation Method for Chinese Urban House Demolition
--- Using Beijing as an Example
LIU Lei, LI Manyin .................................................................418

The Empirical Research of China's Urban Real Estate Development Level
ZHANG Yuanyuan, ZHANG Changchun ........................................423

Factor Analysis on Farmland Transfer: A Case of Jiumen Village
ZHANG Changchun, WANG Liqin ..................................................429

The Researches on Energy Construction for Small Towns in Ecological Planning
- A Case Study of Qingyuan Town
SHUAI Kai, SHANG Gaizhen .......................................................434

Evolution and Development of Vernacular Building --- with Jingxing Country, Hebei Province as an Example
HAO Yonggang, JIA Anqiang ......................................................439

Research on Industrial Transformation and Development of Resource-based Towns
LI Hongwei, XU Zhao ..............................................................443

The Comparison and Selection of the Parking Way in Residential Districts
CHEN Xue, LI Guoqing .............................................................447

Grasp the Road’s Space and Pedestrian Mental Factor --- with Commercial Pedestrian Street for Example
QU Jiwen, HE Tianpei ..............................................................450

A Study of Eco-travel on the Eco-city Development
TAN Yuanyuan, GAO Xiang .......................................................454

Research on Planning of Modern Agricultural High-tech Demonstration Area
LI Qiang, REN Yilei ...............................................................458
Chapter Seven

Architecture Foundation

A Study on Consolidation Settlement for Sand-Drained Ground using Discrete Element Method
JIA Yongsheng ........................................... 497

Nonlinear Regression Analysis of Observation Settlement of Foundation in Yangshan Deepwater Port
LI Yuqi, LIU Yiran ........................................... 505

Research of Working Properties for Composite Foundation with Rammed Soil-cement Cylindrical and Tapered Piles
LIU Jie, HE Jie, WANG Yinxiang ........................................... 510

Mechanical Analysis of Composite Foundation
Zhou Hua-cong, YAO Wen-juan ........................................... 518
Numerical Analyses of the Ground Subsidence Caused by Foundation Pit Dewatering
ZHANG Zhenshuan, DENG Yu ................................................................. 523

The Improved Joint Inversion Method of Rayleigh Wave Exploration
LU Yan, YANG Dejian ................................................................. 528

The Research on Compressive Bearing Capacity and Horizontal Bearing Capacity after Reinforcement of the Defective Pipe
XU Jin, HE Jing ................................................................. 533

Temperature Monitoring and Crack Control on Foundation Mats Mass Concrete Construction Process
LIU Jinghong, LIU Xiaohua ................................................................. 538

The Analysis of Influence Ingredients of Triaxial Compression Test Result
ZOU Hong-li, ZHANG Wen-zhen ................................................................. 543

The Unified Solution for Ultimate Bearing Capacity of Composite Foundation of Single Gravel Pile
YANG Zhenjia, WANG Shijie ................................................................. 549

Effect of Cushion on Bearing Characteristics of Rammed Cement-soil Pile Composite Foundation
ZHANG Mei, LI Jian ................................................................. 553

Application of Similarity Theory in Pile-net Composite Foundation
WANG Ruifang, PI Juhua ................................................................. 557

Calculation and Analysis of the Influence Factors on Pile-Soil Stress Ratio of Double Reinforced Composite Foundation
JIA Litao, YU Yunfei ................................................................. 562

Displacement Level Forecast on Deep Foundation BP Algorithm Application Based on Neural Network
YANG Shibin, MAO Zhengli ................................................................. 567

Chapter Eight

Rock and Soil Mechanics

Analysis of Wall Rock Mass Stability and Water-sealed System Effectiveness in the Underground Water-sealed Oil Storage Caverns
LI Yingjie, LIU Baoguo

Catastrophe Theory of Soil Slope Based on Variation Method

CHENG Shengguo, Yang Yunhua

Mechanisms of Soil-anchor Interactions Based on Ideal Elastic-plastic Model

KONG Xianbin, SUN Wenbin

Study on Gauge Retention Structure of Cone Bit

LIN Yulong

Gas Effect in Constitutive Modeling of Unsaturated Soils

LIU Yan, ZHAO Chenggang

Experimental Study on Dynamic Consolidation Method to Improve Saturated Soft Soil Foundation

GU Yanfeng, WANG Shijie

Application of Strength Reduction Method in FLAC to Analysis of Slope Stability

LU Shuang, XU Mo

Study of Negative Skin Friction of Pipe Pile in Deep Soft Soil Foundation

ZHOU Wanqing WU Mingchu

Analysis on the Relationship between Capillary Stress and Fabric for Unsaturated Granular Soils

ZHANG Weihua, ZHAO Chenggang

A Preliminary Physical Modeling Experiment of Coupled Flow and Heat Transfer in Fractured Rocks

LU Wei, XUANG Yanyong

Study on the Assessment Model of Soil Water Resources in Hebei Plain

DENG Ruiqing, CHENG Wuqun

Dynamic Response Analysis of Transversely Isotropic Fluid-saturated Viscoelastic Porous Media under Rectangular Coordinate

ZHU Yanzhi, HU Jiangchun

Micro-structure Change of Remolded loess in Uniaxial Creep Test with Computerized Tomography

LI Xiaojun, JIANG Lihua

The Determination of Weight of Factors in Surface Subsidence by Matter Element Analysis

XIA Xiaogang
Study on Compression of Colluvial Slope Masses Based on Particle Flow Method

XIANG Xianchao, JIANG Guosheng ................................................. 652

Simulation of Mechanism of Piping Based on Fluid-solid Coupling

SU Hui, DI Weijin ................................................................. 656

Combination of Coal and Rock Damage Evolution Mechanism

GUO Dongming, YANG Renshu, WU Baoyang ................................. 660

Physical Property of Marlite in Luwangfen Swelling Rock Test Region of Middle-route of South to North Water Division

TAN Fengyi, YAN Lu .......................................................... 667

Chapter Nine

Tunnel Engineering

Surface Displacement Monitoring and Analysis of Ground Freezing Method Applied to Subway Tunnel

LIANG Zheng, LIU Jinghong ..................................................... 673

3D Geostress Field BP Analysis of Wushaoling Tunnel

CHEN Zhimin, ZHAO De-an, LI Shuangyang .................................. 678

Analysis of Jet Fan Parallel Ways on Pollutants’ Dilution Effect in the Road Tunnel

XING Jincheng, WANG Ying ..................................................... 685

The Crack Mechanism of the Rock Mass around Deep Tunnels

ZHANG Bohu ........................................................................ 690

Study on the Rational Excavation Sequence of Deep Buried Perpendicular Tunnel in Beijing

LI Shaogang, LIU Baoguo ........................................................ 695

Lateral Seismic Response Analysis of Subsea Tunnel Subjected to Seismic Wave

CHEN Xianghong, ZHANG Hongru ............................................. 699

Prediction and Analysis of the Perimeter Deflection of Tunnel Based on the Grey System Theory

WU Weidong, GENG Shuai ........................................................ 704

Tunnel Arch Subsidence Monitoring with Method of Self-regression

XU Xi, HE Lin ...................................................................... 710
Study on the Subway Tunnel Deformation Characteristic under Existing Subway Vibration Load

*JIN Aibing, GAO Yongtao*

Some Problems on Anchor-shotcrete Reinforcement Technology for Underwater Tunnel

*JIANG Xiaomin, WANG Xiaofeng*

Study on Mechanical Characteristics and Control Technology of Surrounding Rock Deformation in Soft Rock Tunnel under High Ground Stress

*CHEN Fengbin, ZHANG Dingli*

Quality Control of Cross Passage Construction in Shanghai Yangtze River Tunnel

*WANG Tao, JI Qianqian*

The Application and Development of Peck’s Method in Estimating a Subway Tunnel Construction Aroused the Earth’s Surface Displacement

*ZHANG Xiangdong, SHENG Chao*

Construction Technology in the Dahualing Tunnel of Swelling Rock

*ZHANG Hongqiang, FENG Weixing*

Analysis and Control of the Safety Risk for Tunneling in Fault Fracture Zone

*ZHANG Chengping, LI Limin*

Roadway Safety Evaluation with Numerical Simulation Based On CDEM

*MENG Da, ZHANG Mei*

Safety Monitoring for Second Lining Structure of Beijing Subway Line 15 First Phase' Three Segments

*HOU Yuefeng, MENG Da*

Chapter Ten

Civil Engineering Materials

Study on Energy Conservation Reconstruction of Residential Buildings in Cold Region Using Color Steel EPSs

*GAO Zongzhang, LIU Suying*

Finite Element Analysis of Mechanical Properties of R.C. Grill Wall under Horizontal Load

*TIAN Wenling, LI Zixiang*
Recent Advances in Experimental Studies on the Behavior of FRP-confined Concrete Short Columns  
WANG Jianlin, SUN Wenbin ..............................................776

Influence of Different Mineral Admixtures on Early-age Properties of Cement-based Composite Materials  
XU Yidong, WANG Dongdong ..............................................783

Experimental Investigation on Complete Stress-Strain Curve of Recycled Concrete under Uniaxial Loading  
WANG Xueting, YANG Dejian ..............................................787

Experimental Research on Compressive Strength and Elastic Modulus of Recycled Concrete  
WANG Ruijuan, YANG Dejian ..............................................791

Minimizing Cutting Wastes of Reinforcement Steel Bars Using Multi-objective Genetic Algorithm  
ZHAO Wenyu, ZHAO Shengli ..............................................796

Nonlinear Finite-element Analysis on External Prestressed Reinforced Concrete Simple Supported Beams  
JI Jing .................................................................800

Experimental Study on the Proportions of Raw Materials and Curing Methods of Reactive Powder Concrete  
HAO Wenxiu, XU Xiao ...................................................804

Axial Compression Behaviors of Angle-steel Reinforced Concrete Stub  
Zhang Wenfu, SUI Haiyan ..............................................809

Simplified Analysis of Yield Surface for Concrete-filled Square Steel Tubular Member under Biaxial Compression  
ZHANG Wenyan, ZHANG Wenfu .........................................814

Recent Research Progress on Flame-Retartant of Construction Wood  
LIU Haiyan, CHANG Qingyun ...........................................818

Using Plane Stress Method to Simulate the Interfacial Bond between Steel Fiber and Concrete  
YUAN Jing, ZHAO Boxin ................................................822

C60 High-strength Concrete Mix Proportion and Its Engineering Application Based on High-efficient Naphthalene Water Reducing Agent  
GUO Yuqi, ZHEN Guangchang ..........................................828
Antique Building Construction in the Application of New Materials
ZHANG Qiuyu, REN Yilei ................................................................. 832

Consolidation Test of RC Columns Bound with Two Kinds of Fiber BFRP, CFRP
HUO Baorong, ZHANG Xiangdong ................................................... 836

The Selected Materials of Landscape Architecture Design
CHEN Jiangwei, LI Guoqing ............................................................. 841

Experimental Study on Mechanical Properties of Masonry Made of Porous Shale Brick
REN Quanchang, YANG Dejian ........................................................ 845

Study on Optimization Design of Fly Ash Foamed Concrete Mix Ratio
ZHAO Xiaoyan, TIAN Wenling ......................................................... 849

Chapter Eleven

Water Carrying Capacity and Urban Water Solution

Flocculation Behavior in Hexagonal-hole Grid System Dealing with Different Turbidity Water
WANG Qin, LIU Jie ........................................................................ 857

Application of An Improved Grey Model on Urban Water Demand Forecasting
CHEN Xu, LIU Junliang, ZHANG Liyong .......................................... 862

Evaluation on the Surface Water Quality Based on LS-SVM
FENG Lijun, HE Hongming ............................................................... 868

A Tchebycheff Theory Applied to Studying Water Resourced Carrying Capacity in Hebei Province
ZHANG Zhiyu, ZHU Changzhi ......................................................... 872

Analysis on Water Resources Supply and Demand Balance in Langfang and Emergency Water Supply Measures
WANG Yan, HAN Huiling ................................................................. 877

Study on the Change Trends of WRCC in Hebei Province
LIU Hong-quan, HAN Hui-ling ........................................................ 882

The Analysis of Research and Applications on City Water Resources Carrying Capacity
DENG Dapeng, DONG Huifang ......................................................... 886
Chapter Twelve

Water Resources and Agricultural Productivity

The Water Productivity Forecasting Based on BP Neural Network and Gray Prediction Model

Chapter Thirteen

Project Management and Environment Protection

Numerical Simulation of Rock Faultage’s Influence on Contamination Transport
SUN Keming, LI Kai, QIN Jian ...................................................... 1001

Fuzzy Mathematics in Civil Engineering Application of Tender Offer
ZUO Jifeng, WU Xianbing ......................................................... 1005

Value Management Applied to Legacy Property Protection and Development in Chongqing Universities
ZHU Shuangying, ZHANG Min ..................................................... 1008

Study of Regenerative Braking Evaluation of Hybrid Electric Vehicle
ZHAO Shupeng, DU Lijuan ....................................................... 1012

Study of Diagnose Expert System of Engine Based on Fuzzy Neural Network
DU Lijuan, ZHANG Shi-fang ...................................................... 1016

Research on the Characteristics of Migration and Absorption of Iron in the Porous Media
XU Jianfang, LI Duo, DAI Fenggang ........................................ 1021

Discussion on Environmental Protection and Sustainable Development in Rural Areas
LIU Xin, LI Gongqing .............................................................. 1026

The Flocculation Efficiency of Complex Bioflocculant in Hexagonal-hole Grid System
WANG Hui, LI Xing ................................................................. 1030

The Research of Problems Concerning the Management of Engineering Building
ZHAO Jing, LI Hongwei .......................................................... 1035

Experimental Study of Desulfurized Fly Ash Used for Cement Admixture
JIANG Alan, ZHAO Jing .......................................................... 1038

Research on Damping Effect of Pre-splitting Blasting and its Application in the Excavation Slope
ZHANG Xiantang, ZHOU Hongmin ........................................ 1043

Experimental Study on Ground Temperature Variation of Saline Soil Subgrade in Corps Reclamation Area
FENG Ruiling, WU Lijian ........................................................ 1048
Claim Game Model Calculated by Linear Programming
*DAI Bin, ZHAO Li*

Protecting Historical Section Based on the Principle of Low Carbon - take Baoding as an Example
*WANG Yichao, LI Guoqing*

Research on Construction Schedule Control
*REN Yilei, CHEN Jing*

The Problems of Environmental Protection in the Stadium Construction in Terms of the Beijing Olympic Games
*MA Tianlong, SHI Lingjuan*

Study on the Simulate and Support Structural Distortion of the Governing Project of Tuo-Chang Highway Highwall Slope
*ZHANG Xiangdong, YU Haijian, WANG Chengli*

**Chapter Fourteen**

**Earthquake Engineering**

Experimental Research on Seismic Behavior of Concrete Block Walls
*HAO Yahan, REN Quanchang*

Seismic Response Analysis of Continuous Rigid Frame Bridge Considering Canyon Topography Effects under Incident SH Wave
*Zhou Guoliang, LI Xiaojun*

Seismic Behavior of Strengthened RC Frame with Special-shaped Columns
*ZHOU Mingjie, ZHENG Gang*

Analysis and Recommendations on Seismic Design of Masonry Structures
*QI Hongwei, LI Miao*

Finite-element Comparison Analysis of the Overall Anti-seismic Performance of Two Types of Steel Frame
*WEN Faming, LI Ting*

Seismic Isolation Design Recommendation in the Important Buildings and Reconstruction Analysis on Seismic Damages of the School Buildings in the Wenchuan Earthquake
*SUN Hong-ling, LI Hong-pei*
Seismic Vibration Control for Portal Frame with Viscous Dampers
ZHANG Shanshan, WANG Senlin ......................................................1113

Experimental Research on Seismic Behavior of Steel Frame with MR Dampers
LI Xinhua .................................................................1117

Reliability Analysis Method for The Shear Strength Formula of Column on Seismic
CHEN Xiang-shang, CHEN Zhaoxia .............................................1121

Influence of Filler Wall Vertical Arrangement on Seismic Behavior of RC Frame
YAN Hongxia, YANG Qingshan ..................................................1127

Elastic-Plastic Analysis of the Asymmetric Special-shaped Column Structure
Considering Torsional Component of Seismic Wave
XU Dongqiang, ZHAO Wen .......................................................1132

Research on Seismic Performance on the 46.5m Long-span Steel Arch
Structure with Arches
XIONG Zhongming, LIU Xiaotong ................................................1137

Earthquake Damage Analysis of Reinforced Concrete Structure and Discussion on
Security about City Building Structure
LONG Fei, SUN Hongling .........................................................1141

Analysis of Viscoelastic Damper for the Reduction of Seismic Response of RC
Frame Structures
FANG Youliang, XU Honglei ......................................................1148

Study on the Total Life-cycle Cost Evaluation Method of the Base-isolation Structure
SUN Hongling, SUN Peng .........................................................1153

Seismic Behavior of Steel Reinforced Concrete Frame with Reduced Beam Sections
LIU Hongru, LIU Hongquan .......................................................1158

Seismic Reinforcement Method Study on Adding Layer Transformation of
Masonry-concrete Structure
CAO Xiuling, YANG Xiaohui ......................................................1163
