2010 International Conference on E-Business and E-Government

(ICEE 2010)

Guangzhou, China
7-9 May 2010

Pages 2394-3195
Application of a Combination Forecasting Model in Logistics Parks’ Demand .................................................. 2394
Chen Qin and Qi Ming

China’s E-Government Research and the Conception of its Disciplinization .................................................. 2398
Li Peng and Wang Xukun

China’s Emergency Management Mechanisms for Disaster Prevention and Mitigation ........................... 2403
Huang Ang

Chinese Enterprises’ R&D Funds Management Capability Measure: Index System .............................. 2408
He Yong and Tian Yuan-Fei

Cross-Border Merger and Acquisition: The Effect of Microeconomy and its Implementation Strategy .......... 2412
Yu Zhongdong

Data “Audit” Research Based on the Accounting Information System ......................................................... 2416
Tao Li and Chao Liu

Debate of Academic Freedom and University Autonomy ........................................................................ 2420
Zhang Liansheng and Sun Xiaodan

Development Strategies of China’s E-business in the Post-crisis Era ....................................................... 2424
Jianmei Hu

Discussion Roles of E-commerce in Enhancing the Competitiveness of the Nongjiale .............................. 2428
Feng Meizhi, Pan Hailan, and Ge Xiaomin

Educational Blog and Its Impact on Education ....................................................................................... 2432
Bowu Yan, Xiaoling Min, and Li Ruan

Exploring the Online-Game Life Cycle Stages ....................................................................................... 2436
Ling Zhu, Yifan Li, and Guanshi Zhao

Financing Process and Government Behavior: A Exemplification of China’s Land Use ...................... 2439
Sen Wang

Hotel Website Performance Evaluation: A Fuzzy Analytic Hierarchy Process Approach ........................................ 2443
Crystal Ip, Shanshan Qi, Rosanna Leung, and Rob Law

How Does the Tax Collection Efficiency in China? ............................................................................. 2447
Wu Yunyan

Integrated Marketing Communications in the Era of New Media-Blue Ocean for SMEs ....................... 2451
Xiaohui Li, Jishun Niu, Youfang Chen, and Xue Gao

Management Decision-Making Based on Fuzzy Neural Network ....................................................... 2454
Yuan Yao, Xiaokun Zhou, and Peng Dong

New Accounting Standards Influence on Earnings Conservatism of Listed Companies in China .............. 2457
Yi Xuan and Xie Zhiming

On Shortest Path Interval Games ........................................................................................................ 2461
Fumin Lei and Xiaodong Liu

Overall Evaluation of Risk Investment Based on Unascertained Theory .......................................... 2465
Lianhua Wang, Xuanchi Zhou, Zhanglin Guo, and Xianyu Meng
Post-evaluation of Project Management for Fengcheng PowerPlant Phase II Expansion
Project in JiangXi Province ................................................................. 2469
Wu Yunna, Shen Yue, and Huang Yong

Product Market Competition and Capital Structure: Evidence from Listed Companies
in China ................................................................................................ 2473
Li Jianqin, Li Qiang, and Zhang Juan

Progress in Geographic Information Standardization .................................. 2478
Ma Shengnan and Sun Yi

Quarterly Earnings Distribution and Earnings Management ......................... 2483
Gang Cui and Yaowen Wang

Research on Chinese Listed Company’s Financial Crisis Based on SVM Classification .................................................. 2487
Jun Zhu and Yan Li Su

Research on e-Commerce Environment in Decision-making Model of Consumer
Purchase ............................................................................................. 2491
Tao Yang and Xu Xiao Min

Research on Evaluation of Venture Capital for SMEs ................................. 2495
Hu Song and Xiao Lei

Research on Evolution Mechanism of Innovative Industrial Clusters and Policy
Suggestions .......................................................................................... 2498
Song Ge and Wang Xiaobin

Research on Growth Mechanism of Industrial Cluster of Logistics in Coopetition .... 2503
Zou Xiao and Zhao Feng

Research on Key Project Improvement Management in Production Operation
Management of Private Enterprise ......................................................... 2507
Xia Wang, Yuhong Li, and Jingjun Sun

Research on Performance Evaluation of Universities Governmental S&T Investment
Based on DEA Super ............................................................................ 2511
Ai-min Zhu, Wei Wang, and Li-juan Yu

Research on the Construction of High Efficiency Student’s Organization Based
on System Dynamics ........................................................................... 2515
Li Hong-yu, Lv Rong-jie, and Dong Shui-sheng

Research on the Dynamic Monitoring of Financial Prosperity Based on Entropy Model ...................................................... 2519
Yang Yi and Chen Yuan

Research on the Effect of Real Estate Price to Intermediate Objectives of Monetary
Policy Based on ECM ........................................................................ 2523
Yueying Lv and Decun Guo

Research on the Elder Tourism Market in Shanghai .................................. 2526
Tang Wenting, Pan HaiLan, and Wu Cuihong

Research on the Measuring Structure, Pattern and Methods of Management
Information Cost .................................................................................. 2530
Fu Gang

Research on the Security of an Improved E-commerce Model ....................... 2534
Dai Wei and Ji Wei

xli
Risk Analysis and Prevention of Network Accounting .......................................................... 2538

Zhang Suyun

Simulation Analysis of China Sovereign Wealth Fund Risk Based on the Fuzzy Comprehensive Assessment Model .......................................................... 2541

Jie Tan and Yiding Yue

Statistical Analysis of the New Rural Cooperative Medical Care System of the Factors Affecting Satisfaction .......................................................... 2545

Jie Ji and Yong Long

Study and Application on Ontology Based Unstructured Text Query Method .......................................................... 2549

Qiong Liu, Rushi Peng, Jing Xie, and Yulin Wang

Study on Enterprise Informationization Models .......................................................... 2553

Dongbing Huang and Wen Zhang

Study on the Formation Mechanisms of Ganzhou Navel Orange Characteristic Industrial Cluster Based on Organizational Ecology .......................................................... 2557

Shanqing Liu

Telecom Family Customer Value Identification Based on Fuzzy Comprehensive Evaluation Model .......................................................... 2561

Ning Wang, Mei Li, and Nannan Yang

The Application of Fuzzy Mathematical Method in Evaluation System of College Students’ Innovation Ability .......................................................... 2565

Hong-bo Li, Lan Yang, and Dao-jian Yang

The Improvement of BP Artificial Neural Network Algorithm and Its Application .......................................................... 2568

Xiaofeng Li and Jiuping Xu

The Interaction of Community and Tourism: Dual Structure and Kuznets Hypothesis .......................................................... 2572

Li Zhifei and Chen Qin

The Negative Impact of Emerging Technology: A Literature Review .......................................................... 2576

Lucheng Huang and Jiao Ren

The New Darling of Electric Commerce .......................................................... 2580

Ma Juan and Shen Jian-fei

The Research of Remote-Monitoring System of the Gas Based on Web .......................................................... 2583

Guo Xiucai, Zhao Jing, and Zhang Xinliang

The Risk Assessment of E-commerce Based on BP Neural Network .......................................................... 2587

Yin Peng and Sun Ying

The Strengthening Effect of Project Generation to Consulting Process .......................................................... 2591

Liang Gefu, Pang Dalian, Yang Yu, and Xu Po

Visualization of Potential Function of the Spherical Region Based on the Green Function Method .......................................................... 2595

Wu Gang and Fan Xiying
Project and Quality Management

Solve Job-shop Scheduling Problem Based on Cooperative Optimization .............................................. 2599
  He Jian-jia, Ye Chun-ming, Xu Fu-yuan, Ye Lin, and Huang He

A Conceptual Model of System Synergy Management Based on Emergence Mechanism - Take the Construction Project System as Example ................................................................. 2603
  Wu Shaoyan and Du Gang

A CUSUM Chart for Monitoring an Attribute Event .................................................................................. 2607
  Zhen He, Yafen Liu, and Min Zhang

A Discuss of the Application of Project Management in the Non-project-involved Organizations ......................................................................................................................... 2611
  Yonggui Liu and Bing Liu

A Neural Network-Based On-line Monitoring Model of Process Mean and Variance Shifts ................................................................................................................................. 2615
  Bin Wu and Jian-bo Yu

A New Method for Solving a Two-objective Programming Problem ...................................................... 2619
  Guozhong Bai

A Quality Testing Management System Architecture for Web-Based Small and Medium-sized Glasses Enterprises ........................................................................................................... 2623
  Yongfeng Li

A Repair Strategy Based on Minimal and Imperfect Repairs for Two-dimensional Warranty ............... 2627
  Jian Yu and Xiangzhi Chen

A Trapezoid Model for Credit Evaluation of Construction Agent based on Risk Management Benefit .......................................................................................................................... 2631
  Wu Yun-na, Xiong Kai, and Wang Yu-min

AHP Application in Objective Management of Coal Enterprises ......................................................... 2635
  Chang Ding and Lanlan Li

An Empirical Study on the Management of Product Development Project ............................................ 2639
  Cao Ping

An Improved Method for Project Duration Forecasting ............................................................................ 2644
  Xiaoxiao Chen, Lu Liu, and You Li

Analysis of Response Surface Designs to Outlier .................................................................................... 2648
  Juntao Fang and Zhen He

Analysis on the Pre-qualification System of Construction Project Bidding ........................................ 2652
  Xu Bing and Guan Xia

Application of Organizational Project Management Maturity Model Based on BP Neural Network .......................................................................................................................... 2656
  Suike Li, Sijun Bai, Rong Feng, and Yuntao Guo

Application of TPM in Site Continuous Improvement ......................................................................... 2661
  Li Yan-bo and Liu Song-xian

Application of Value Management to Real Estate Project Planning .................................................... 2664
  Li Hong-bing, Si Guang-bo, and Li Hong-min
Applied Research on the Agent Construction System for the Project Invested by the Government not to Obtain the Profit .................................................................2668
   Wang Wenshim and Mi Lingyun
Bid Evaluation System of Construction Project Based on Multi-level Fuzzy Synthetic Evaluation Model .................................................................2672
   Xie Benzheng and Sun Zheng
Construction of the Performance Audit Evaluation Index System of Fixed Assets Investments Project - Based on Chinese Experiences Empirical Study .................................................................2675
   Liu Aidong and Zhao Jinling
Cost Efficient Software Review in an E-Business Software Development Project .................................................................2680
   Bin Xu
Development of Effective Quality Management Driven by Visualization and Automation Support .................................................................2684
   Wu Yina, Ma Hui, and Chen Xiangui
Dynamic Game Analysis in Program Emergency Management of Engineering Construction Company .................................................................2688
   Guo Guang-xiang and Wang Zhuo-fu
Employer-Based Research on the Risk Identification and Assessment for Large-scale Mining Shaft Construction Project .................................................................2692
   Mi Lingyun and Wang Wenshim
Engineering Project Risk Appraisal Information System .................................................................2696
   Huo Zaiqiang
Exploring the Impact of Software Quality Management on Informatization .................................................................2700
   Dongping Tang and Junshan Chen
Fuzzy Comprehensive Evaluation of Work Safety Capacity for Construction Enterprises Based on Rough Set .................................................................2704
   Yao Li-gen and Li Xiu-ming
Impacts of PSC Elements on Contract Economics under Oil Price Uncertainty .................................................................2708
   Wang Zhen, Zhao Lin, and Liu Mingming
Innovation of Project Financing for Real Estate Industry in China .................................................................2712
   Xu Feng and Xie Dan
Investigation of High-efficiency Abrasive Finishing .................................................................2716
   C.H. Li, Z. Fang, and H.Y. Zhao
Issues and Solutions: When a Traditional Design Institute Shifting to Engineering Firm on Mineral Resources Industry in China .................................................................2720
   Zhenyou Li
Model for Social Impact Post-evaluation of Highway Based on Factor Analysis and Success Evaluation Methods .................................................................2725
   Shuping Chen, Liming Xia, Li Sun, and Jinshuang Pan
Multi-credit Evaluation of Construction-agency Based on Gray Model .................................................................2729
   Wu Yun-na, Lin Ping, and Wang Yu-min
On Certain Problems and Countermeasures of Listed Corporation in China's Financial IT Project Management ..........................................................2733
  Chenyun Ye and Xuan Gong
On the Reform of Examination & Approval System for Chinese Government-Invested Construction Project .......................................................2738
  Li Yanli and Li Lijun
Process Improvement and Value Analysis ......................................................2742
  Zhang Li and Chang Guang-shu
Process Training for Student in School ........................................................2745
  Wang Yangting and Shi Guang
Quantitative Risk Analysis Approach on Construction Project Feasibility Research ..........................................................2749
  Guan Jun and Wang Haiyan
R&D Project Budget Management of Enterprises and Technology Innovation ..........................................................2753
  Liang Lai-Xin, Chen Yi-Yun, and Zhou Ning
Research on Dynamic Game between Owner and Contractor in the Bidding Process of the Construction Project ...........................................2757
  Rong Hua, Yumei Zhao, Tingjie Lv, and Xiaodong Zhang
Research on ERP Application from an Integrative Review ............................2761
  Dongping Tang and Qin Wu
Research on Human Resource Configuration Strategy in Software Engineering ..........................................................2764
  Ren Zhiming and Zhu Qing
Research on Improved PERT Model in Analysis of Schedule Risk of Project ..........................................................2768
  Zhang Yunning and Sun Xixi
Research on Life Cycle Project Management in Government Invested Project ..........................................................2772
  Yilin Yin and Xiaoming Chen
Research on the Application of the Virtual United Organization in the Prophase of the Construction Project ...............................................2776
  Ke Hong, Song Zhenhua, and Li Juan
Research on the Application of TQC in JinJie Coal Mine ................................2779
  Ningning Ni and Xiaobing Pei
Research on the Information Integration Standard of Multi-interchange Based on the Life Cycle Theory ..........................................................2783
  Ke Hong, Wang Hui, and Song Zhenhua
Research on the Marketalized Operation Model in the Field of Urban Infrastructure Construction in Western Cities of China ..........................................................2786
  Wei Haimin and Hu Zhen
Research on the Synergetic Management Mechanism of R&D Projects ...............2790
  Pang Huatao and Wang Min
Study on Multi-objective Decision Making Method of Enterprise Project Investment ..........................................................2794
  Xiao Jijun and Liu Xiaojun
Study on the Enterprise Strategic Budget Management Mode Based on Balance Scored Card ..........................................................2798
  Li Baobao and Wang Yanfeng
Study on the Incentive of Engineering Contractor under Information Asymmetry ......................................................... 2802
  Yi Tao and Lu Gong-shu
Study on the Operational Risk Assessment Model of Untapped Low-grade Reservoirs ......................................................... 2807
  Bing Shaoxian, Liu Haohan, Liu Zhibin, and Hou Chunhua
The Application of Design Structure Matrix in Project Schedule Management ................................................................. 2813
  Yuchao Zhang, Sijun Bai, and Yuntao Guo
The Application of Safety Culture Model in the Construction Project ................................................................. 2817
  Gao Yuan and Zhang Lianying
The Application of Secondary Fuzzy Comprehensive Evaluation in Enterprise Order Evaluation ......................................................... 2821
  Cui Xuan and Sun Hua
The Application of Six Sigma Method in F Bank ................................................................. 2824
  Wenting Tang and Xiaobing Pei
The Comparison and Integration of Quality Improvement Methods ................................................................. 2828
  Zhang Li
The Current Situation and Countermeasures of Digital Library’s Knowledge Management ......................................................... 2832
  Yuan Zhen and Zhao Ting
The Influence of Service Design on Public-perceived Administrative Service Quality: The Moderating Effect of Social Monitoring ................................................................. 2835
  Weixia Lv and Yonggui Wang
The Research on Project Manager’s Moral Hazard ................................................................. 2839
  Zhijian Gao and Xiaojun Liu
The Research on Web Testing Methods for Agricultural Information Retrieval System Based on Ontology ................................................................. 2844
  Liu Shan-Hui and Zhou Qiang
The Selection of Navy Vessel’s Support Alternatives in Operation Cycle by Cost-Effectiveness Analysis ................................................................. 2847
  Yu Peng, Lv Jian-wei, Yang Jian-jun, and Liu Zhonghua
The Study on Setting Method of Project Buffers in a Critical Chain ................................................................. 2851
  Chen Gong and Sun Qing
To Cancel the Enforced Supervision Policy is Imperative ................................................................. 2855
  Yanxiang Chen and Xiaojun Liu

Service Sciences, Economy and Policy

Cause Analysis of the Workplace Emergency Management Problems in China ................................................................. 2858
  Shi Liping and Wang Ying
Infrastructure Securitization in China ................................................................. 2863
  Xu Feng and Zhao Long
Priority Order Selection of the Effective Supply of Rural Public Goods in Beijing ................................................................. 2867
  Dandan Xu, Xiao Meng, and Jing Yang
Measurement of Real Estate Bubble in China: An Overview of Direct Test Models
Since 2003

Bing Feng, Chunlu Liu, Yimei Shi, and Heng Jiang

Research on County Community Health Service
Liu Dingrong

Research on Market Operating Mechanism of China’s Digital Information Service
Gu Bin and Zhi Qingqing

Research on the Competitiveness of Agriculture in JiLin Province Based on the Diamond Model
Zhang Jiacheng

Research on the Evaluation of Development Level of Principal Sports Industry Based on Analytic Hierarchy Process
Xu Yong

Research on the Impact of Service Innovation about Relational Embedded Configuration and Network Competence
Ji Feng, Zhu Li-li, and Wang Bang-jun

Yingmei Gong, Youjin Gu, and Yougang Wang

Research on the Theory of Customer-Oriented E-Catalog Ontology Automatic Construction
