## Contents

**SESSION: WORLDCOMP/FCS KEYNOTE**

WORLDCOMP/FCS Keynote: Computing with Words and Perceptions - A Paradigm Shift  
Lotfi A. Zadeh  

**SESSION: NOVEL ALGORITHMS AND APPLICATIONS + METHODOLOGIES**

Nature Inspired Arithmetic in Speed Independent Circuit  
Aleksandr Katkow, Agnieszka Ulfik  

Optimal Distortion Embedding of Complete Binary Trees into Lines  
Masao Kumamoto, Eiji Miyano  

LIDAR and Chaotic Oscillatory-based Neural Network for Wind Shear Forecasting  
Ka Ming Kwong, Nga Kwok Liu, Pak Wai Chan  

Batman - The Dark Knight: A Game Theoretical Approach  
Sabine Hummert, Stefan Schuster, Christian Hummert  

Meeting the Needs of Today's Traffic in Networks by Differentiated Delivery  
V Leela Teja Chegondi  

Antis: Another Tool for Identical or Similar Code Detection  
Bogdan Ghit, Matei Gruber, Octavian Voicu, Florin Pop  

Multiprocessor Independent Tasks Scheduling Using Modified Improved Harmony Search Algorithm  
Farrokh Ghanatir, Hadi Abouhosseini, Amir Masoud Rahmani, Abolfazl Nazari  

A Simple O(2^sqrt(x)) Algorithm for Partition and Subset Sum  
Thomas O'Neil, Scott Kerlin  

Does Resolving P vs NP Require a Paradigm Shift? Part I: A Perspective  
Bhupinder Singh Anand  

Does Resolving P vs NP Require a Paradigm Shift? Part II: The Main Problem and a Suggested Solution  
Bhupinder Singh Anand  

Does Resolving P vs NP Require a Paradigm Shift? Part III: Consequences of a Sound, Algorithmic Interpretation of PA  
Bhupinder Singh Anand
SESSION: THEORY + PROOF + VERIFICATION METHODS

Formalization of Probability and Random Sampling on a Finite and Discrete Sample Space
Using the Mizar Proof Checker
Kenichi Arai, Nobuaki Kondo, Hiroyuki Okazaki

The Z Specification Refinement of Based on Tableau
Xiaolei Gao

Operation Expression: a Way to Verified Software
Chongyi Yuan, Wen Zhao, Yu Huang

Study on Typical Load Pattern in Power System and Bad Data Processing
Li Liu, Denghui Zhai

SESSION: QUANTUM COMPUTING + AUTOMATA + TURING MACHINES

Swarming - A Classical Analog of Hardy's Quantum Gravity Computational Paradigm
Edayathu Krishnamurthy

A Characterization of the Chomsky Hierarchy by String Turing Machines
Hans Werner Lang

Understanding Quantum Networking: Where Are We and What Can We Expect?
Charles Balch

Simulation vs. Equivalence
Zoltan Esik, Andreas Maletti

SESSION: GRAPH BASED METHODS AND RELATED ISSUES

Recursive Graph Deduction and Reachability Queries
Yangjun Chen

A Graph-based Economical Dispatch Model
Jaime Cerda Jacobo, David De Roure

Variations of the Vision-Based Pursuit-Evasion Problem on a Grid
Bogdan Munteanu, Richard Borie
Optimal Edge Ranking of Ladder Graphs
Tai-Lung Wu, Justie Su-Tzu Juan

SESSION: PROGRAMMING + LANGUAGES + SOFTWARE AND RELATED ISSUES

Optimal Tradeoff
Raihan Al-Ekram, Ric Holt

Vectorizing Compilers and Manual Code Optimization for Application Domains
Farahzad Behi, Matthew Del Buono

Template Metaprogramming, Partial Evaluation and Computational Complexity Classes
Emanuele Covino, Giovanni Pani

SESSION: PANSYSTEMS, ONTOLOGY DEVELOPMENT, PLAGIARISM DETECTION, FIBONACCI NUMBERS, RANKING, MACHINE LEARNING, AND COMPUTATIONAL COMPLEXITY

Complexity of the Game of Sprouts
Leemon Baird, Dino Schweitzer

On Consistency in Pairwise Comparisons Based Numerical and Non-Numerical Ranking
Yun Zhai, Ryszard Janicki

An AST Plagiarism Detection Model for Procedural Programming Languages
Dong Sheng Liu, Mei Zhong, ShuMin Shi, YanBo Zhao

Attribute Reducts Using Multistep Relational Extension Matrix
Pei Li Zhou, Xu Li

The Extended Model of Rough Sets Theory Based on Panweighted Field and Panweighted Networks in the Meaning of Recursive
Weipeng Guo, Pei Li Zhou, Yongli Li

Application of Pansystems Theory in Operating Systems
Pei Li Zhou, Haixia Li, Yongli Li

Ontology for Accounting
Thomas Abraham Joseph Velankanni, Sherley Mary Lourdu sawmy

Integer and Complex Fibonacci Data Models
Omar AlHeyasat, Vladimier Luzhetski, Abdelwadood Mosleh
