</table>
Hybrid Power Source with Electric Double Layer Capacitor and Battery in Electric Vehicle

N. Urasaki, M. Iwasaki

373

Power Quality Control Strategy for Grid-connected Renewable Energy Sources Using PV Array and Supercapacitor

377

Research on Power Distribution by Voltage Control in Hybrid Power System

K. Li, X. Y. Feng, J. L. Zhang, J. Zheng, C. X. Ma

382

Low Cost MPPT Controller for off Grid Solar Applications

Z. He, C. Liu, Y. Liu, Y. Zeng, J. Pan

387

Output Power Smoothing of Wind Turbine Generation System for the 2-MW Permanent Magnet Synchronous Generators

A. M. Howlader, N. Urasaki, T. Senjyu, A. Uehara, A. Yona, A. Y. Saber

392

Voltage Control in Distribution Systems Considered Reactive Power Output Sharing in Smart Grid

M. Oshiro, K. Uchida, T. Senjyu, A. Yona

398

A Rapid Charging Station with an Ultracapacitor Energy Storage System for Plug-in Electric Vehicles

J. Song, A. Toliyat, D. Tuttle, A. Kwasinski

408

Renovating of Existing Pumped Storage Power Plant From Conventional System to Adjustable Speed System

K. Inoue, S. Nagasue, M. Okada, M. Higuchi

420

Wireless Power Transmission to Multi Devices Through Resonant Coupling

Y. H. Kim, S. Y. Kang, S. Cheon, M. L. Lee, T. Zung

426

A New Family of ZCS-PWM DC-DC Converters with Clamping Diodes-Assisted Active Edge-Resonant Cell

T. Mishima, M. Nakaoka

469

Energy Efficient Control of Induction Motor Driving System

P. F. Sun, X. Y. Feng, H. C. Tang

475

Design and Development of a TMS320F2812 DSP Controller Based PM BLDC Motor Drive

K. R. Rajagopal, A. Nair

479

An Enhanced Torque Control Method of Permanent Magnet Synchronous Motor in the Field Weakening Region

S. Kitaoka, K. Kondo

484

Robust Position Control of Ultrasonic Motor Using VSS Observer

S. Odomari, A. Darba, K. Uchida, T. Senjyu, A. Yona

490

Stabilization of Wind Farms by DFIG-based Variable Speed Wind Generators

K. E. Okeke, S. M. Muyeen, R. Takahashi, J. Tamura

495
Comparison of New Dual Power Flow and Conventional Wind Power Generation Systems ........................................ 501
Y. Zhu, M. Cheng, X. Sun, W. Hua, W. Wei

A Voltage and Frequency Control Approach by Grid-connected MW Class PV Systems ..................................... 506

Electrical Machines and Drives for Potentially Explosive Atmospheres ................................................................. 512
C. Grantham

Research on Stator Coupled Physical Field of Turbine Generators .............................................................................. 518
J. Q. Li, J. M. Fu, P. P. Zhang

Iron Loss Characteristics of Induction Motor Made of Soft Magnetic Composite ....................................................... 523
N. Tsuchiya, M. Mori moto

Optimal Rotor Design of a PSC Motor Using Taguchi Method and FEM ................................................................. 527
P. Srikomkham, S. Sungrainechatwianich

Analysis of One Step Delay in Direct Torque Control of Permanent Magnet Synchronous Motor and its Remedies .................................................. 533
Y. Zhang, J. Zhu, W. Xu

Predictive Torque Control of Permanent Magnet Synchronous Motor Drive with Reduced Switching Frequency ............................................................................ 539
Y. Zhang, J. Zhu, W. Xu

Wide-speed-range Sensorless Control of Interior PMSM Based on MRAS ................................................................. 545
Z. Xingming, W. Xuhui, Z. Feng, G. Xinhua, Z. Feng

Sensor-less Control of an Integrated Starter-alternator with an IPM Synchronous Machine ............................................ 550
Z. Xu, X. Gui, D. Xu

Position Sensorless Control of Interior Permanent Magnet Synchronous Motors ...................................................... 556
P. Hu, C. Miao, L. Huang

A PI-based Control Scheme for Primary Cascaded H-bridge Rectifier in Transformerless Traction Converters ..................... 561
T. Xinghua, L. Yongdong, S. Min

Design and Research of a New Dual-rotor Switched Reluctance Motor for Hybrid Electric Vehicles ................................ 566
W. Fang, L. Quan, X. Zhu, D. Chen, Y. Du

Electromagnetic Performance Analysis and Fault-tolerant Control of New Doubly Salient Flux Memory Motor Drive ................................................................................................. 571
D. Chun, X. Zhu, L. Quan, Q. Ding, Z. Wang, M. Cheng

Modeling of a Novel Hybrid-excited Flux-switching Machine Drives for Hybrid Electrical Vehicles .......................... 576
G. Dong, M. Cheng, W. Hua

Study on Multi-segment Sliding-mode-control-based Servo System ........................................................................... 581
P. Huang, L. Huang, C. Miao

Sensorless Control of Brushless DC Motor with Delta Connection Windings .............................................................. 585
J. Qui, C. Shi

Vector Control of Double-Stator Permanent Magnet Brushless Motor with Surface Mounted Topology ......................... 589
Y. Wang, M. Cheng, Y. Du, S. Ding

Study of Switched Reluctance Motor Drive System Fed by Voltage PWM Rectifier .................................................. 593
Y. F. Zhu, Q. X. Ge, H. Chen, Y. H. Li, L. Zhao

An Improved Stator Flux Observation Strategy for Direct Torque Controlled Induction Machine Drive System .................. 597
W. Wang, M. Cheng, W. Hua, W. Zhao, S. Ding, Y. Zhu

Post-fault Operation of Redundant Flux-switching Permanent-magnet Motors Using Harmonic Injected Current ................................................................. 602
W. Zhao, M. Cheng, W. Hua, L. Xu, R. Cao, Y. Du

Review of Position Estimation Methods for PMSM Drives Without a Position Sensor, Part III: Methods Based on Saliency and Signal Injection ......................................................................... 607
O. Benjak, D. Gerling

Novel Sensorless Phase Modulation Drive for a Field Assisted Switched Reluctance Motor ........................................... 613
H. Aniri, E. Afjei, H. Torkaman

Small Copper Loss Unidirectional Current Type BLDC Motor and the Motor System ................................................. 617
K. Tashiro, S. A. K. Zavev, T. Kita, T. Ogawa, Y. Araki

Analysis of Common-mode Voltage Elimination of PWM Inverter with Auxiliary Inverter ........................................... 623
N. Aizawa, H. Kubota

Flux Position Estimation Method of IPMSM by Controlling Current Derivative at Zero Voltage Vector .................................................. 628
Y. Hataoka, H. Kubota
Characteristic Analysis & Optimum Design Solutions of Permanent Magnet Assisted Synchronous Reluctance Motor for Power Improvement

J. H. Lee, T. W. Yun, B. B. Lee

Optimum Design for Premium 250 kW Efficiency of Traction Induction Motor Using Response Surface Methodology & FEM

J. H. Lee, T. D. Lee, T. W. Yun

Optimum Design Criteria for Maximum Torque Density & Minimum Torque Ripple of Flux Switching Motor Using Response Surface Methodology

Calculation of Cogging Torque in Squirrel-cage Induction Motors

W. Yun, Q. Ariu

Research on Induction Motor Energy Saving Strategy Using Voltage Regulation Control

P. Huo, M. Cheng, R. Can, Y. Wang, Z. Wang

Characteristics of the Evaporative Cooling Technology for the Large Turbine Generator and its Analysis

Design of Infrared Temperature Monitoring System Applied to the Stator of Evaporative Cooling Hydrogenerators

H. Jing, R. Lin

An Approach to Improve the Torque Performance of IPMSM by Considering Cross Saturation Applied for Hybrid Electric Vehicle

Z. Rui, W. Qunjing, L. Guoli, P. Cong, F. Guang-Hui

Simulation Research on Field Windings Inter-turn Short Circuits Fault of Turbine Generator with no Load Based on Multi-loop Model

L. Jun-Qing, H. Ji-Yong, L. He-Ming

The Application of Modified Genetic Algorithm to the Optimum Design of Turbo Generator

H. Guo

Uniform Modeling for Pole-phase Modulation Induction Motors

G. Booming, S. Dongsen, W. Weiliang, L. Yushan, B. Daqiang

Full Speed Range Induction Motor Indirect Rotor Field Oriented Control for High Speed Traction Applications

X. Ma, J. Ren, Q. X. Ge, Y. Li

Discussion on Setting Calculation of Loss-of-excitation Protection for Large Turbogenerator

Y. Siwang, W. Weifan, L. Ling, G. Lin, Q. Ariu

Asynchronous Motor's More-accurate Equivalent Circuit Parameter Determining by Auto2fit

L. Youjie, X. Zhivel, X. Weicai

Analysis on the Negative Sequence Impedance Directional Protection for Stator Internal Fault of Turbo Generator

H. Liangliang, S. Yuguang, Q. Ariu

Efficiency Evaluation of PMASynRM vs. SynRM Using Coupled FEM & Preisach Modeling

J. H. Lee, I. K. Lee, A. R. Leon

Characteristics of PWM Inverter-driven Hysteresis Motor with Short-duration Overexcitation

T. Kubota, K. Kuribara, T. Tanaka

Analysis on Performance Characteristics of Alternator System Considering Load Conditions and Power Factor

S. M. Jang, Y. S. Park, K. J. Ko, J. Y. Choi, D. J. You, C. S. Goo
A Novel Stator Design of Synchronous Reluctance Motor by Loss & Torque Evaluations Related to Slot Numbers Using Coupled Preisach Model & FEM

J. H. Lee, B. D. Lee, T. W. Yun
