012141: The Effect of Dopants on the Brittle-to-Ductile Transition in Silicon Single Crystals..............................................................593
Youn Jeong Hong, Masaki Tanaka, Keiki Maeno, Kenji Higashida

012142: Crack Tip Dislocations Observed by TEM-Tomography in Silicon Single Crystals ..............................................................597
Sunao Sadamatsu, Masaki Tanaka, Masaki Honda, Kenji Higashida

012143: Pre-Strain Direction Effect on Microstructure Evolution and Energy Storage Process During Uniaxial Tension of Austenitic Steel........................................601
M Maj, W Olfersuk

012144: Identification of Energy Storage Rate Components. Theoretical and Experimental Approach ..............................................................605
W Olfersuk, M Maj

012145: Cavitation Failure During Superplastic Tensile Loading in Alumina-Base Ceramics ..............................................................609
K Hiroga, B-N Kim, K Morita, H Yoshida, M Tabuchi

012146: Plasticity and X-Ray Line Profile Analysis of the Semicrystalline Polymer Poly(3-Hydroxybutyrate) ..............................................................613
F Spieckermann, H Wilhelm, E Schäffer, M Kerber, S Bernstorff, M J Zehetbauer

012147: Bimodal Grain Size Distributions in UFG Materials Produced by SPD: Their Evolution and Effect on Mechanical Properties ..............................................................617
H W Höppel, M Korn, R Lapovok, H Mughrabi

012149: High Strength and High Ductility in As-Deposited Nanocrystalline Ni ..............................................................621
Pingqiang Dai, Weichang Xu, Dian Tang

012150: Crystallographic Characterization of Catastrophic Shear in Submicron Nickel at Low Temperatures ..............................................................625
S R Dey, L Hollang, K Reuther, R Hübner, R Chulist, W Skrotzki

012151: Creep in TiO2 Doped Zirconia: Implications for High Strain Rate Superplasticity ..............................................................629
Maya Kini, Atul H Chokshi

STRENGTH ISSUES IN BIOLOGICAL SYSTEMS AND BIOMATERIALS

012152: Preparation and Mechanical Property of Polymer-Based Biomaterials ..............................................................633
P Zhang, G Chen, X F Zheng

MECHANICAL BEHAVIOUR OF GLASSES AND NON-CRYSTALLINE SOLIDS

012153: High Pressure Torsion of Cu-Based Metallic Glasses ..............................................................637
S Höhor, Zs Kovács, A P Zhilyaev, L K Varga, P J Szabó, Á Révész

012154: Al-Based Metal Matrix Composites Reinforced with Nanocrystalline Al-Ti-Ni Particles ..............................................................641
S Scudino, F Ali, K B Suredi, K G Prashanth, M Sokalsyka, J Eckert

012155: Production of High-Strength Al0.6Y0.4Ni10Cu Bulk Alloy by Spark Plasma Sintering ..............................................................645
K B Suredi, V C Srivastava, S Scudino, M Sokalsyka, V Uhlenwinkel, J S Kim, J Eckert

012156: A Statistical Physics Consideration About the Strength of Small Size Metallic Glass Pillars ..............................................................649
Changqiang Chen, Yutao Pei, Jeff Th M De Hosson
### MULTISCALE MODELLING AND EXPERIMENTAL VALIDATION

- **012157**: Experimental Validation of Microstructure Evolution in Crystalline Materials ........................................... 653  
  C Rehrl, S Kleber, T Antretler, R Pippcm

- **012158**: Numerical Verification of Three Point Bending Experiment of Magnetorheological Elastomer (MRE) in Magnetic Field ........................................................................................................ 657  
  Danuta Miedzinska, Anna Bozackowska, Konrad Zubko

- **012159**: Consideration of Pinning and Dissolution with Dividing Sites in Monte Carlo Simulation of Grain Growth ........................................................................................................ 661  
  C Sekkak, N Rouag, R Penelle

### INSIGHT THROUGH NEW EXPERIMENTAL METHODS

- **012160**: In Situ Measurements of X-Ray Peak Profile Asymmetry from Individual Grains ........................................... 665  
  C Wejdemann, U Lienert, W Pantleon

- **012161**: Texture Evolution During Tensile Necking of Copper Processed by Equal Channel Angular Extrusion ........................................................................................................ 669  
  W Pantleon, S Richter, S Martin, J B Bowen

- **012162**: Thermal Shock Behaviour of Ceramics Under Different Testing Conditions ........................................... 673  
  R Pizl, B Rehmer

- **012163**: Investigation of Mechanical Properties of Gold Thin Films Using a Bulge Test Technique ........................................... 677  
  A Himmel, A Jacques, T Schenk, O Ferry, T Kruml

- **012164**: Pulsed Low-Energy Positron Beams: A Useful Tool to Investigate Defect Structures in Deformed Metals and Alloys ........................................................................................................ 681  
  W Egger, P Sperr, G Kögel, H-J Gudladt

### OTHER NEW DEVELOPMENTS RELATED TO THE FIELD

- **012165**: Research on Dynamic Wear Behavior at Elevated Temperature of HVOF Sprayed Nanostructured WC-17Co Coating ........................................................................................................ 687  
  Yan Liu, Hui Chen, Guoqing Gou, Mingjing Tu

- **012166**: Residual Strength of GFR/POM As a Function of Damage ........................................................................................................ 691  
  G Zachariev, H-V Rudolph, H Ivert

- **012167**: Effect of an Applied Stress on Discontinuous Precipitation in a Cu-Ag Alloy ........................................................................................................ 695  
  R Monzen, T Terazawa, C Watanabe

- **012168**: Compressive Strength and Hardness of Metal Matrix Syntactic Foams ........................................................................................................ 699  
  I N Orbildor, A Németh, J Dobrzensky

- **012169**: The Effects of Some Laser Parameters on the Surface and Near Surface Region of Laser Treated Cast Iron Cylinder Bore ........................................................................................................ 703  
  K Mößinger, P J Szabó

- **012170**: Effect of Yttrium Addition on Grain Growth of α, β and α+β Titanium Alloys ........................................................................................................ 707  
  B Poorganji, A Kazahari, T Narushima, C Ouchi, T Furushara
